Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

verification_failed

Description Enable automatic packet-capture for SYN cookie verification failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-sys-obj-stats-change_aam-auth-server-ocsp

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_aam-auth-server-ocsp_trigger-stats-inc*

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_aam-auth-server-ocsp_trigger-stats-inc

Specification	
Type	*object*

job-start-error

Description Enable automatic packet-capture for Total OCSP Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

polling-control-error

Description Enable automatic packet-capture for Total OCSP Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-dropped

Description Enable automatic packet-capture for Total OCSP Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-error

Description Enable automatic packet-capture for Total OCSP Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-timeout

Description Enable automatic packet-capture for Total OCSP Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stapling-request-dropped

Description Enable automatic packet-capture for Total OCSP Stapling Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stapling-response-error

Description Enable automatic packet-capture for Total OCSP Stapling Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stapling-response-timeout

Description Enable automatic packet-capture for Total OCSP Stapling Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_payload_len

Description Enable automatic packet-capture for Bad IP Payload Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_ttl

Description Enable automatic packet-capture for Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_tcp_urg_offset

Description Enable automatic packet-capture for TCP Bad Urgent Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

csum

Description Enable automatic packet-capture for Bad IP Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_frg

Description Enable automatic packet-capture for Empty Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_mic_frg

Description Enable automatic packet-capture for Micro Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frg

Description Enable automatic packet-capture for IPv4 Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gre_pptp_err

Description Enable automatic packet-capture for GRE PPTP Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_err

Description Enable automatic packet-capture for IP-over-IP Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_msmtch

Description Enable automatic packet-capture for IP-over-IP Tunnel Mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land

Description Enable automatic packet-capture for Land Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_ip_payload

Description Enable automatic packet-capture for No IP Payload drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nvgre_err

Description Enable automatic packet-capture for GRE Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

opt

Description Enable automatic packet-capture for IPv4 Options Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

over_ip_payload

Description Enable automatic packet-capture for Oversize IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pod

Description Enable automatic packet-capture for ICMP Ping of Death Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_ip_hdr

Description Enable automatic packet-capture for Runt IP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_tcp_udp_hdr

Description Enable automatic packet-capture for Runt TCP/UDP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_csum

Description Enable automatic packet-capture for TCP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_iplen

Description Enable automatic packet-capture for TCP Bad IP Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_frg_hdr

Description Enable automatic packet-capture for TCP Fragmented Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_frg

Description Enable automatic packet-capture for TCP Null Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_scan

Description Enable automatic packet-capture for TCP Null Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_opt_err

Description Enable automatic packet-capture for TCP Option Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_sht_hdr

Description Enable automatic packet-capture for TCP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_fin

Description Enable automatic packet-capture for TCP Syn and Fin Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_frg

Description Enable automatic packet-capture for TCP Syn Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas

Description Enable automatic packet-capture for TCP XMAS Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas_scan

Description Enable automatic packet-capture for TCP XMAS Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_csum

Description Enable automatic packet-capture for UDP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_len

Description Enable automatic packet-capture for UDP Bad Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_kerb_frg

Description Enable automatic packet-capture for UDP Kerberos Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_port_lb

Description Enable automatic packet-capture for UDP Port Loopback Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_srt_hdr

Description Enable automatic packet-capture for UDP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan_err

Description Enable automatic packet-capture for VXLAN Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Specification	
Type	*object*

ha-standby-dropped

Description Enable automatic packet-capture for HA Standby Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-key

Description Enable automatic packet-capture for Radius Request has Invalid Key Field

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-prefix-length-mismatch

Description Enable automatic packet-capture for Framed IPV6 Prefix Length Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-request-dropped

Description Enable automatic packet-capture for RADIUS Request Dropped (Malformed Packet)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-table-full

Description Enable automatic packet-capture for RADIUS Request Dropped (Table Full)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-bad-secret-dropped

Description Enable automatic packet-capture for RADIUS Request Bad Secret Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-malformed-dropped

Description Enable automatic packet-capture for RADIUS Request Malformed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-no-key-vap-dropped

Description Enable automatic packet-capture for RADIUS Request No Key Attribute Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-not-configured-dropped

Description Enable automatic packet-capture for RADIUS Secret Not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_fw-rad-server_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

ha-standby-dropped

Description Enable automatic packet-capture for HA Standby Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-key

Description Enable automatic packet-capture for Radius Request has Invalid Key Field

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-prefix-length-mismatch

Description Enable automatic packet-capture for Framed IPV6 Prefix Length Mismatch

Type: boolean

Default: 0

request-bad-secret-dropped

Description Enable automatic packet-capture for RADIUS Request Bad Secret Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-malformed-dropped

Description Enable automatic packet-capture for RADIUS Request Malformed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-no-key-vap-dropped

Description Enable automatic packet-capture for RADIUS Request No Key Attribute Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-not-configured-dropped

Description Enable automatic packet-capture for RADIUS Secret Not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

bad-ip-hdr-len

Description Enable automatic packet-capture for Total Bad IP hdr len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-payload-len

Description Enable automatic packet-capture for Total Bad IP PL len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-ttl-drop

Description Enable automatic packet-capture for Total Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

empty-frag-drop

Description Enable automatic packet-capture for Total Empty frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fcs-drop

Description Enable automatic packet-capture for Total FCS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hrx-drop

Description Enable automatic packet-capture for Total HRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-pod-drop

Description Enable automatic packet-capture for Total ICMP POD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-frag

Description Enable automatic packet-capture for Total IP frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-opt-drop

Description Enable automatic packet-capture for Total IPv4 opt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land-drop

Description Enable automatic packet-capture for Total LAND Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mic-frag-drop

Description Enable automatic packet-capture for Total Micro frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mrx-drop

Description Enable automatic packet-capture for Total MRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ip-payload-drop

Description Enable automatic packet-capture for Total No IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

oversize-ip-payload

Description Enable automatic packet-capture for Total Oversize IP PL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

qdr-drop

Description Enable automatic packet-capture for Total QDR Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-ip-hdr

Description Enable automatic packet-capture for Total Runt IP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-tcpudp-hdr

Description Enable automatic packet-capture for Total Runt TCPUDP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

siz-drop

Description Enable automatic packet-capture for Total Size Drop

Type: boolean

Supported Values: true, false, 1, 0

Supported Values: true, false, 1, 0

Default: 0

tcp-null-flags

Description Enable automatic packet-capture for Total TCP null flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-scan

Description Enable automatic packet-capture for Total TCP null scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-short-hdr

Description Enable automatic packet-capture for Total TCP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-syn-frag

Description Enable automatic packet-capture for Total TCP SYN frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-flags

Description Enable automatic packet-capture for Total TCP XMAS FLAGS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-scan

Description Enable automatic packet-capture for Total TCP XMAS scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

tun-mismatch

Description Enable automatic packet-capture for Total Tun mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-chksum

Description Enable automatic packet-capture for Total UDP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-ip-len

Description Enable automatic packet-capture for Total UDP bad leng Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-kb-frags

Description Enable automatic packet-capture for Total UDP KB frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-port-lb

Description Enable automatic packet-capture for Total UDP port LB Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-short-hdr

Description Enable automatic packet-capture for Total UDP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_aam-authentication-global

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_aam-authentication-global_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-authentication-global/trigger-stats-inc*

Specification	
Type	*object*

aflex-authz-fail

Description Enable automatic packet-capture for Total Authorization failure number in aFleX

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authn-failure

Description Enable automatic packet-capture for Total Authentication failure number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authz-failure

Description Enable automatic packet-capture for Total Authorization failure number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connect-failed

Description Enable automatic packet-capture for Total AAM Connect Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-timer-failed

Description Enable automatic packet-capture for Total AAM Timer Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-resolve-failed

Description Enable automatic packet-capture for Total AAM DNS resolve failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

get-socket-option-failed

Description Enable automatic packet-capture for Total AAM Get Socket Option Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

misses

Description Enable automatic packet-capture for Total Authentication Request Missed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

open-socket-failed

Description Enable automatic packet-capture for Total AAM Open Socket Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

badpkt_drop

Description Enable automatic packet-capture for Bad Pkt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

incorrect_len_drop

Description Enable automatic packet-capture for Incorrect Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_rx_arp_pkt

Description Enable automatic packet-capture for Invalid ARP PKT Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_sender_mac_arp_drop

Description Enable automatic packet-capture for ARP PKT dropped due to invalid sender MAC

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_defrag_invalid_len

Description Enable automatic packet-capture for IP Invalid Length Frag

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_oversize

Description Enable automatic packet-capture for IP Fragment oversize

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_too_many

Description Enable automatic packet-capture for IP Fragment too many

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_ipip_dropped

Description Enable automatic packet-capture for IP Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overlap

Description Enable automatic packet-capture for IP Fragment Overlap

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overload

Description Enable automatic packet-capture for IP Frag Overload Drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_reasmfails

Description Enable automatic packet-capture for IP Fragment Reasm Fails

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_tcp_dropped

Description Enable automatic packet-capture for IP Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_timeout

Description Enable automatic packet-capture for IP Fragment Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_udp_dropped

Description Enable automatic packet-capture for IP Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4_frag_6rd_drop

Description Enable automatic packet-capture for IPv4 Frag 6RD Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_gre_dropped

Description Enable automatic packet-capture for IPv6 Frag gre Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_ipip_dropped

Description Enable automatic packet-capture for IPv6 Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_tcp_dropped

Description Enable automatic packet-capture for IPv6 Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_udp_dropped

Description Enable automatic packet-capture for IPv6 Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prot_down_drop

Description Enable automatic packet-capture for Prot Down Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ttl_exceeded_drop

Description Enable automatic packet-capture for TTL Exceeded Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown_prot_drop

Description Enable automatic packet-capture for Unknown Prot Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Default: 0

ip_frag_oversize

Description Enable automatic packet-capture for IP Fragment oversize

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_too_many

Description Enable automatic packet-capture for IP Fragment too many

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_ipip_dropped

Description Enable automatic packet-capture for IP Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overlap

Description Enable automatic packet-capture for IP Fragment Overlap

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overload

Description Enable automatic packet-capture for IP Frag Overload Drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_reasmfails

Description Enable automatic packet-capture for IP Fragment Reasm Fails

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_tcp_dropped

Description Enable automatic packet-capture for IP Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_timeout

Description Enable automatic packet-capture for IP Fragment Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_udp_dropped

Description Enable automatic packet-capture for IP Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4_frag_6rd_drop

Description Enable automatic packet-capture for IPv4 Frag 6RD Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_gre_dropped

Description Enable automatic packet-capture for IPv6 Frag gre Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_ipip_dropped

Description Enable automatic packet-capture for IPv6 Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_tcp_dropped

Description Enable automatic packet-capture for IPv6 Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_udp_dropped

Description Enable automatic packet-capture for IPv6 Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prot_down_drop

Description Enable automatic packet-capture for Prot Down Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

ttl_exceeded_drop

Description Enable automatic packet-capture for TTL Exceeded Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown_prot_drop

Description Enable automatic packet-capture for Unknown Prot Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Type	*object*

adc_port_allocation_failed

Description Enable automatic packet-capture for ADC Port Allocation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_user_quota_exceeded

Description Enable automatic packet-capture for Data Session User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_failure

Description Enable automatic packet-capture for LSN Fullcone Extension Memory Allocate Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_init_faulure

Description Enable automatic packet-capture for LSN Fullcone Extension Initialization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_alloc_single_port_failure

Description Enable automatic packet-capture for H323 ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_filtered

Description Enable automatic packet-capture for Endpoint-Dependent Filtering Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_port_pair_alloc_from_quota_par

Description Enable automatic packet-capture for MGCP ALG Port Pair Allocated From Quota Partition Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

new_user_resource_unavailable

Description Enable automatic packet-capture for New User NAT Resource Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_class_list_match

Description Enable automatic packet-capture for No Class-List Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_inc_overflow

Description Enable automatic packet-capture for Port Overloading Inc Overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_out_of_memory

Description Enable automatic packet-capture for Port Overloading Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_rtp_rtcp_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc RTP/RTCP NAT Ports Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_single_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_quota_inc_failure

Description Enable automatic packet-capture for SIP ALG User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

standby_class_list_drop

Description Enable automatic packet-capture for HA Standby Class-List drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_cgnv6-lsn_trigger-stats-rate

Specification	
Type	*object*

adc_port_allocation_failed

Description Enable automatic packet-capture for ADC Port Allocation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_user_quota_exceeded

Description Enable automatic packet-capture for Data Session User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Default: 0

fullcone_ext_mem_alloc_init_faulure

Description Enable automatic packet-capture for LSN Fullcone Extension Initialization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_alloc_single_port_failure

Description Enable automatic packet-capture for H323 ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_filtered

Description Enable automatic packet-capture for Endpoint-Dependent Filtering Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_port_pair_alloc_from_quota_par

Description Enable automatic packet-capture for MGCP ALG Port Pair Allocated From Quota Partition Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

new_user_resource_unavailable

Description Enable automatic packet-capture for New User NAT Resource Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_class_list_match

Description Enable automatic packet-capture for No Class-List Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_inc_overflow

Description Enable automatic packet-capture for Port Overloading Inc Overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_out_of_memory

Description Enable automatic packet-capture for Port Overloading Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_rtp_rtcp_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc RTP/RTCP NAT Ports Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_single_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_quota_inc_failure

Description Enable automatic packet-capture for SIP ALG User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

standby_class_list_drop

Description Enable automatic packet-capture for HA Standby Class-List drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_slb-mssql

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_slb-mssql_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-mssql/trigger-stats-inc*

bw_rate_limit_exceed

Description Enable automatic packet-capture for BW-Limit Exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

concurrent_conn_exceed

Description Enable automatic packet-capture for L3V Conn Limit Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn_rate_limit_drop

Description Enable automatic packet-capture for Conn rate limit drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn_rate_limit_reset

Description Enable automatic packet-capture for Conn rate limit resets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connlimit_drop

Description Enable automatic packet-capture for Conn Limit drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_policy_drop

Description Enable automatic packet-capture for DNS Policy Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4_cps_exceed

Description Enable automatic packet-capture for L4 CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l7_cps_exceed

Description Enable automatic packet-capture for L7 CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_cps_exceed

Description Enable automatic packet-capture for NAT CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_resourse_drop

Description Enable automatic packet-capture for No resource drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_vport_drop

Description Enable automatic packet-capture for vport not matching drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

novport_drop

Description Enable automatic packet-capture for NAT no session drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for Source NAT failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_cps_exceed

Description Enable automatic packet-capture for SSL CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_tpt_exceed

Description Enable automatic packet-capture for SSL TPT exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrselfail

Description Enable automatic packet-capture for Server sel failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syncookiescheckfailed

Description Enable automatic packet-capture for TCP SYN cookie failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syncookiessentfailed

Description Enable automatic packet-capture for TCP SYN cookie snt fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Supported Values: true, false, 1, 0

Default: 0

line_extend_fail

Description Enable automatic packet-capture for Line extend fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_table_extend_fail

Description Enable automatic packet-capture for Table extend fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_too_long

Description Enable automatic packet-capture for Line too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read_request_line_fail

Description Enable automatic packet-capture for Read request line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv_server_unknow_reply_code

Description Enable automatic packet-capture for Recv server unknown-code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove_resonse_line_fail

Description Enable automatic packet-capture for Del response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send_client_service_not_ready

Description Enable automatic packet-capture for Sent client serv-not-rdy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for Source NAT failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

too_many_headers

Description Enable automatic packet-capture for Too many headers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_logging-local-log-global

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_logging-local-log-global_trigger-stats-inc*

Description Enable automatic packet-capture for Total RX packet frame error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-len-err

Description Enable automatic packet-capture for Total RX packet length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-long-len-err

Description Enable automatic packet-capture for Total RX packet long length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-miss-err

Description Enable automatic packet-capture for Total RX packet miss error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-no-buff-err

Description Enable automatic packet-capture for Total RX packet no buffer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-over-err

Description Enable automatic packet-capture for Total RX packet over error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-short-len-err

Description Enable automatic packet-capture for Total RX packet short length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-abort-err

Description Enable automatic packet-capture for Total TX packet abort error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-carrier-err

Description Enable automatic packet-capture for Total TX packert carrier error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-drop

Description Enable automatic packet-capture for Total TX packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-err

Description Enable automatic packet-capture for Total TX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-fifo-err

Description Enable automatic packet-capture for Total TX packet fifo error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-hbeat-err

Description Enable automatic packet-capture for Total TX packet HBEAT error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-windows-err

Description Enable automatic packet-capture for Total TX windows error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

w-link-down-drop

Description Enable automatic packet-capture for Total worker core link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-ring-drop

Description Enable automatic packet-capture for Total worker core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-tx-que-drop

Description Enable automatic packet-capture for Total worker core queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-sys-obj-stats-change_system-dpdk-stats_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

err-pkt-drop

Description Enable automatic packet-capture for Total error packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-ring-drop

Description Enable automatic packet-capture for Total IO core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-rx-que-drop

Description Enable automatic packet-capture for Total IO core Rx queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-tx-que-drop

Description Enable automatic packet-capture for Total IO core TX queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-drop

Description Enable automatic packet-capture for Total packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-lnk-down-drop

Description Enable automatic packet-capture for Total packets link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-align-err

Description Enable automatic packet-capture for Total RX packet align error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-crc-err

Description Enable automatic packet-capture for Total RX packet CRC error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-csum-offload-err

Description Enable automatic packet-capture for Total Rx packet check-sum offload error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-err

Description Enable automatic packet-capture for Total RX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-frame-err

Description Enable automatic packet-capture for Total RX packet frame error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-len-err

Description Enable automatic packet-capture for Total RX packet length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-long-len-err

Description Enable automatic packet-capture for Total RX packet long length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-miss-err

Description Enable automatic packet-capture for Total RX packet miss error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-no-buff-err

Description Enable automatic packet-capture for Total RX packet no buffer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-over-err

Description Enable automatic packet-capture for Total RX packet over error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-short-len-err

Description Enable automatic packet-capture for Total RX packet short length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

tx-abort-err

Description Enable automatic packet-capture for Total TX packet abort error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-carrier-err

Description Enable automatic packet-capture for Total TX packert carrier error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-drop

Description Enable automatic packet-capture for Total TX packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-err

Description Enable automatic packet-capture for Total TX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-fifo-err

Description Enable automatic packet-capture for Total TX packet fifo error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-hbeat-err

Description Enable automatic packet-capture for Total TX packet HBEAT error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-windows-err

Description Enable automatic packet-capture for Total TX windows error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

w-link-down-drop

Description Enable automatic packet-capture for Total worker core link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-ring-drop

Description Enable automatic packet-capture for Total worker core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-tx-que-drop

Description Enable automatic packet-capture for Total worker core queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-sys-obj-stats-change_cgnv6-ddos-proc

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_cgnv6-ddos-proc_trigger-stats-inc*

Specification	
Type	*object*

ip_node_alloc_failure

Description Enable automatic packet-capture for Node alloc failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_other_block_alloc_failure

Description Enable automatic packet-capture for Other block alloc failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_port_block_alloc_failure

Description Enable automatic packet-capture for Port block alloc failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_add_to_bgp_failure

Description Enable automatic packet-capture for L3 Entry BGP add failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_add_to_hw_failure

Description Enable automatic packet-capture for L3 entry HW add failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_drop_max_hw_exceeded

Description Enable automatic packet-capture for L3 Entry Drop due to HW Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_match_drop

Description Enable automatic packet-capture for L3 Entry match drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_match_drop_hw

Description Enable automatic packet-capture for L3 HW entry match drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_remove_from_bgp_failure

Description Enable automatic packet-capture for L3 entry BGP remove failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4_entry_list_alloc_failure

Description Enable automatic packet-capture for L4 Entry list alloc failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4_entry_match_drop

Description Enable automatic packet-capture for L4 Entry match drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4_entry_match_drop_hw

Description Enable automatic packet-capture for L4 HW Entry match drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn_cookie_verification_failed

Description Enable automatic packet-capture for SYN cookie verification failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Description Enable automatic packet-capture for OCSP response status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_unknown

Description Enable automatic packet-capture for OCSP response status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_https

Description Enable automatic packet-capture for Log OCSP URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_not_found

Description Enable automatic packet-capture for OCSP URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_unsupported

Description Enable automatic packet-capture for OCSP URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_system-radius-server

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_system-radius-server_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/system-radius-server/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_system-radius-server_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/system-radius-server/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_system-radius-server_trigger-stats-inc

Specification	
Type	*object*

ha-standby-dropped

Description Enable automatic packet-capture for HA Standby Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-prefix-length-mismatch

Description Enable automatic packet-capture for Framed IPV6 Prefix Length Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-request-dropped

Description Enable automatic packet-capture for RADIUS Request Dropped (Malformed Packet)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-bad-secret-dropped

Description Enable automatic packet-capture for RADIUS Request Bad Secret Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-ignored

Description Enable automatic packet-capture for RADIUS Request Ignored

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-malformed-dropped

Description Enable automatic packet-capture for RADIUS Request Malformed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-no-key-vap-dropped

Description Enable automatic packet-capture for RADIUS Request No Key Attribute Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-not-configured-dropped

Description Enable automatic packet-capture for RADIUS Secret Not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_system-radius-server_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

ha-standby-dropped

Description Enable automatic packet-capture for HA Standby Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-prefix-length-mismatch

Description Enable automatic packet-capture for Framed IPV6 Prefix Length Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-request-dropped

Description Enable automatic packet-capture for RADIUS Request Dropped (Malformed Packet)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-bad-secret-dropped

Description Enable automatic packet-capture for RADIUS Request Bad Secret Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-ignored

Description Enable automatic packet-capture for RADIUS Request Ignored

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-malformed-dropped

Description Enable automatic packet-capture for RADIUS Request Malformed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-no-key-vap-dropped

Description Enable automatic packet-capture for RADIUS Request No Key Attribute Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-not-configured-dropped

Description Enable automatic packet-capture for RADIUS Secret Not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Specification	
Type	*object*

err_entry_create_failed

Description Enable automatic packet-capture for Entry Creation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_entry_create_oom

Description Enable automatic packet-capture for Entry Creation Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_entry_insert_failed

Description Enable automatic packet-capture for Entry Insert Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_l4_sess_alloc

Description Enable automatic packet-capture for Error allocating L4 session for probe

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_probe_tcp_conn_send

Description Enable automatic packet-capture for Error in initiating TCP connection for probe

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_smart_nat_alloc

Description Enable automatic packet-capture for Error creating Smart NAT Instance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_smart_nat_port_alloc

Description Enable automatic packet-capture for Error obtaining Smart NAT source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_tmpl_probe_create_failed

Description Enable automatic packet-capture for Probe Template Creation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_tmpl_probe_create_oom

Description Enable automatic packet-capture for Probe Template Creation Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Description Enable automatic packet-capture for Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

resp-err

Description Enable automatic packet-capture for Response Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_slb-http2

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_slb-http2_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-http2/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_slb-http2_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-http2/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_slb-http2_trigger-stats-inc

Specification	
Type	*object*

alloc_fail_total

Description Enable automatic packet-capture for Alloc Fail - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

buff_alloc_error

Description Enable automatic packet-capture for Buff alloc error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_control_frame

Description Enable automatic packet-capture for Cant allocate control frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_goaway_frame

Description Enable automatic packet-capture for Cant allocate GOAWAY frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_ping_frame

Description Enable automatic packet-capture for Cant allocate PING frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_rst_frame

Description Enable automatic packet-capture for Cant allocate RST_STREAM frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_settings_frame

Description Enable automatic packet-capture for Cant allocate SETTINGS frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_stream

Description Enable automatic packet-capture for Cant allocate stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_window_frame

Description Enable automatic packet-capture for Cant allocate WINDOW_UPDATE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_queue_alloc_error

Description Enable automatic packet-capture for Data Queue Alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_slb-http2_trigger-stats-rate

Specification	
Type	*object*

alloc_fail_total

Description Enable automatic packet-capture for Alloc Fail - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

buff_alloc_error

Description Enable automatic packet-capture for Buff alloc error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_control_frame

Description Enable automatic packet-capture for Cant allocate control frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_goaway_frame

Description Enable automatic packet-capture for Cant allocate GOAWAY frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_ping_frame

Description Enable automatic packet-capture for Cant allocate PING frame

cant_allocate_stream

Description Enable automatic packet-capture for Cant allocate stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_window_frame

Description Enable automatic packet-capture for Cant allocate WINDOW_UPDATE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_queue_alloc_error

Description Enable automatic packet-capture for Data Queue Alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-severity

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.115.40 visibility packet-capture object-templates

Configure object packet capture templates for T2 counters

object-templates Specification

Type	*Configuration Resource*

Default: 0

gslb_response_bad

Description Enable automatic packet-capture for gslb response bad

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_dns_filter_class_drop

Description Enable automatic packet-capture for counters Total DNS Filter Class Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_dns_filter_type_drop

Description Enable automatic packet-capture for counters Total DNS Filter Type Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_filter_drop

Description Enable automatic packet-capture for query filter drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_max_query_len_drop

Description Enable automatic packet-capture for query too long drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

dns_vport-tmpl-list_trigger-stats-rate

Specification	
Type	*object*

dns_filter_class_any_drop

Description Enable automatic packet-capture for counters DNS Filter Class ANY Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_chaos_drop

Description Enable automatic packet-capture for counters DNS Filter Class CHAOS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_hesiod_drop

Description Enable automatic packet-capture for counters DNS Filter Class HESIOD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_internet_drop

Description Enable automatic packet-capture for counters DNS Filter Class INTERNET Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_none_drop

Description Enable automatic packet-capture for counters DNS Filter Class NONE Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_others_drop

Description Enable automatic packet-capture for counters DNS Filter Class OTHER Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_a_drop

Description Enable automatic packet-capture for counters DNS Filter Type A Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_aaaa_drop

Description Enable automatic packet-capture for counters DNS Filter Type AAAA Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_any_drop

Description Enable automatic packet-capture for counters DNS Filter Type Any Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_cname_drop

Description Enable automatic packet-capture for counters DNS Filter Type CNAME Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_mx_drop

Description Enable automatic packet-capture for counters DNS Filter Type MX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_ns_drop

Description Enable automatic packet-capture for counters DNS Filter Type NS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_others_drop

Description Enable automatic packet-capture for counters DNS Filter Type OTHERS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_ptr_drop

Description Enable automatic packet-capture for counters DNS Filter Type PTR Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_soa_drop

Description Enable automatic packet-capture for counters DNS Filter Type SOA Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_srv_drop

Description Enable automatic packet-capture for counters DNS Filter Type SRV Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_txt_drop

Description Enable automatic packet-capture for counters DNS Filter Type TXT Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_rpz_action_drop

Description Enable automatic packet-capture for DNS RPZ Action Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_total_dropped

Description Enable automatic packet-capture for dns rrl drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

gslb_query_bad

Description Enable automatic packet-capture for gslb query bad

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gslb_response_bad

Description Enable automatic packet-capture for gslb response bad

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

total_dns_filter_class_drop

Description Enable automatic packet-capture for counters Total DNS Filter Class Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_dns_filter_type_drop

Description Enable automatic packet-capture for counters Total DNS Filter Type Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_filter_drop

Description Enable automatic packet-capture for query filter drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_max_query_len_drop

Description Enable automatic packet-capture for query too long drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Description: trigger-stats-severity is a **JSON Block**. Please see below for *tmpl-gtp-plcy-tmpl-list_trigger-stats-severity*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/object-templates/tmpl-gtp-plcy-tmpl/{name}/trigger-stats-severity*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tmpl-gtp-plcy-tmpl-list_trigger-stats-severity

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Specification	
Type	*object*

drop-flt-apn-filtering

Description Enable automatic packet-capture for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Enable automatic packet-capture for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Enable automatic packet-capture for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Enable automatic packet-capture for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Enable automatic packet-capture for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv0-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv1-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Create PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Update PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv2-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Create Session Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Modify Bearer Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Enable automatic packet-capture for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Enable automatic packet-capture for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv0-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-message-length-mismat

Description Enable automatic packet-capture for GTPv0-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv1-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-message-length-mismat

Description Enable automatic packet-capture for GTPv1-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv2-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-message-length-mismat

Description Enable automatic packet-capture for GTPv2-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV0-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV1-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV2-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v0-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv0-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v1-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv1-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v2-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Create Session Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

tmpl-gtp-plcy-tmpl-list_trigger-stats-rate

Specification	
Type	*object*

drop-flt-apn-filtering

Description Enable automatic packet-capture for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Enable automatic packet-capture for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Enable automatic packet-capture for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Enable automatic packet-capture for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Enable automatic packet-capture for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv0-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv1-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Create PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Update PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv2-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Create Session Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Modify Bearer Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Enable automatic packet-capture for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Enable automatic packet-capture for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv0-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-message-length-mismat

Description Enable automatic packet-capture for GTPv0-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv1-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-message-length-mismat

Description Enable automatic packet-capture for GTPv1-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv2-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-message-length-mismat

Description Enable automatic packet-capture for GTPv2-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV0-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV1-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV2-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v0-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv0-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v1-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv1-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v2-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Create Session Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

Description Enable automatic packet-capture for Denied counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unmatched-drops

Description Enable automatic packet-capture for Unmatched drops counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

rule-set-tmpl-list_trigger-stats-rate

Specification	
Type	*object*

deny

Description Enable automatic packet-capture for Denied counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

unmatched-drops

Description Enable automatic packet-capture for Unmatched drops counter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

spn_krb_faiure

Description Enable automatic packet-capture for SPN Kerberos Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.115.44 visibility packet-capture object-templates aam-auth-relay-form-inst-tmpl

Configure template for aam.authentication.relay.form-based.instance

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-severity

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-inc

Specification	
Type	*object*

acs-fail

Description Enable automatic packet-capture for ACS Fail Count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

md-fail

Description Enable automatic packet-capture for Metadata Update Fail Count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	
Type	*object*

acs-fail

Description Enable automatic packet-capture for ACS Fail Count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

md-fail

Description Enable automatic packet-capture for Metadata Update Fail Count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

fail

Description Enable automatic packet-capture for Handle OCSP response failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stapling-fail

Description Enable automatic packet-capture for Handle OCSP response failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stapling-timeout

Description Enable automatic packet-capture for OCSP Stapling Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

timeout

Description Enable automatic packet-capture for Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-inc

Specification	
Type	*object*

server_selection_fail_drop

Description Enable automatic packet-capture for Drops due to Service selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_selection_fail_reset

Description Enable automatic packet-capture for Resets sent out for Service selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

server_selection_fail_drop

Description Enable automatic packet-capture for Drops due to Service selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_selection_fail_reset

Description Enable automatic packet-capture for Resets sent out for Service selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-severity

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-inc

Specification	
Type	*object*

drop-flt-apn-filtering

Description Enable automatic packet-capture for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Enable automatic packet-capture for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Enable automatic packet-capture for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Enable automatic packet-capture for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Enable automatic packet-capture for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv0-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv1-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Create PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Update PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv2-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Create Session Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Modify Bearer Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Enable automatic packet-capture for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Enable automatic packet-capture for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv0-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-message-length-mismat

Description Enable automatic packet-capture for GTPv0-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv1-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-message-length-mismat

Description Enable automatic packet-capture for GTPv1-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv2-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-message-length-mismat

Description Enable automatic packet-capture for GTPv2-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV0-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV1-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV2-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v0-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv0-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v1-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv1-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v2-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Create Session Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-stats-rate

Specification	
Type	*object*

drop-flt-apn-filtering

Description Enable automatic packet-capture for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Enable automatic packet-capture for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Enable automatic packet-capture for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Enable automatic packet-capture for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Enable automatic packet-capture for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv0-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv1-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Create PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Update PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv2-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Create Session Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Modify Bearer Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Enable automatic packet-capture for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Enable automatic packet-capture for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv0-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-message-length-mismat

Description Enable automatic packet-capture for GTPv0-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv1-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-message-length-mismat

Description Enable automatic packet-capture for GTPv1-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv2-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-message-length-mismat

Description Enable automatic packet-capture for GTPv2-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV0-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV1-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV2-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v0-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv0-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v1-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv1-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v2-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Create Session Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.115.69 visibility ping-sweep-detection

Configure ping sweep detection

ping-sweep-detection Specification

Type	*Configuration Resource*

Refernce Object: */axapi/v3/visibility/reporting/template/notification/template-name/{name}/authentication*

debug-mode

Description Enable debug mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

host-name

Description Configure the host name(e.g www.a10networks.com)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Mutual Exclusion: host-name ipv4-address and ipv6-address are mutually exclusive

http-port

Description Configure the http port to use(default 80) (http port(default 80))

Type: number

Range: 1-65535

Default: 80

https-port

Description Configure the https port to use(default 443) (http port(default 443))

Type: number

Range: 1-65535

Default: 443

ipv4-address

Description Configure the host IPv4 address

Type: string

Format: ipv4-address

Mutual Exclusion: ipv4-address ipv6-address and host-name are mutually exclusive

ipv6-address

Description Configure the host IPv6 address

Type: string

Format: ipv6-address

Mutual Exclusion: ipv6-address ipv4-address and host-name are mutually exclusive

name

Description Notification template name

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

protocol

Description 'http': Use http protocol; 'https': Use https protocol(default); (http protocol)

Type: string

Supported Values: http, https

Default: https

relative-uri

Description Configure the relative uri(e.g /example , default /)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Default: /

sampling-enable

Type: List

test-connectivity

Description Test connectivity to notification receiver

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port for notifications

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_notification_template-name-list_authentication

Specification	
Type	*object*

api-key

Description Configure api-key as a mode of authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

api-key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

api-key-string

Description Configure api-key as a mode of authentication

Type: string

Format: password

Maximum Length: 64 characters

Maximum Length: 1 characters

auth-password

Description Configure the authentication user password (Authentication password)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-password-string

Description Configure the authentication user password (Authentication password)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-username

Description Configure the authentication user name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

relative-login-uri

Description Configure the authentication login uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

relative-logoff-uri

Description Configure the authentication logoff uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template_notification_template-name-list_sampling-enable

Specification

sampling-enable

Type: List

test-connectivity

Description Test connectivity to notification receiver

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port for notifications

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

authentication

Specification	
Type	*object*

api-key

Description Configure api-key as a mode of authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

api-key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

api-key-string

Description Configure api-key as a mode of authentication

Type: string

Format: password

Maximum Length: 64 characters

Maximum Length: 1 characters

auth-password

Description Configure the authentication user password (Authentication password)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-password-string

Description Configure the authentication user password (Authentication password)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-username

Description Configure the authentication user name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

relative-login-uri

Description Configure the authentication login uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

relative-logoff-uri

Description Configure the authentication logoff uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'sent_successful': Sent successful; 'send_fail': Send failures; 'response_fail': Response failures;

Type: string

Supported Values: all, sent_successful, send_fail, response_fail

stats data

	Counter	Size	Description
	send_fail	8	Send failures
	sent_successful	8	Sent successful
	response_fail	8	Response failures

2.115.76 visibility reporting template notification template-name authentication

Configure authentication information

authentication Specification

Type	*Configuration Resource*
Element Name	authentication

Specification	
Type	*object*

downlink-bytes

Description Track Top-N entities for Downlink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

downlink-pkts

Description Track Top-N entities for Downlink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-apn-filtering

Description Track Top-N entities for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Track Top-N entities for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Track Top-N entities for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Track Top-N entities for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Track Top-N entities for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Track Top-N entities for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Track Top-N entities for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv0-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv1-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Create PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Update PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv2-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Create Session Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Modify Bearer Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Track Top-N entities for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Track Top-N entities for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Track Top-N entities for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Track Top-N entities for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Track Top-N entities for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Track Top-N entities for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Track Top-N entities for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Track Top-N entities for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Track Top-N entities for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Track Top-N entities for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Track Top-N entities for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Track Top-N entities for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Track Top-N entities for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Track Top-N entities for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Track Top-N entities for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Track Top-N entities for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Track Top-N entities for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Track Top-N entities for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Track Top-N entities for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Track Top-N entities for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-unsupported-message-type

Description Track Top-N entities for Validation Drop: Message type not supported in GTP-C

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Track Top-N entities for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-path-management-message

Description Track Top-N entities for GTP Path Management Messages Received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-created

Description Track Top-N entities for GTP-U Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-deleted

Description Track Top-N entities for GTP-U Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPV0-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv0-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-closed

Description Track Top-N entities for GTPv0-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-created

Description Track Top-N entities for GTPv0-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted

Description Track Top-N entities for GTPv0-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv0-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-closed

Description Track Top-N entities for GTPv0-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-open

Description Track Top-N entities for GTPv0-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPV0-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPV1-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv1-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-closed

Description Track Top-N entities for GTPv1-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-created

Description Track Top-N entities for GTPv1-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted

Description Track Top-N entities for GTPv1-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv1-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-closed

Description Track Top-N entities for GTPv1-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-open

Description Track Top-N entities for GTPv1-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPV1-C Update PDP Context response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-create-sess-resp-unsuccess

Description Track Top-N entities for GTPV2-C Create Session Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv2-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-mod_bearer-resp-unsuccess

Description Track Top-N entities for GTPV2-C Modify Bearer Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-piggyback-message

Description Track Top-N entities for GTPv2-C Piggyback Messages seen

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-closed

Description Track Top-N entities for GTPv2-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-created

Description Track Top-N entities for GTPv2-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted

Description Track Top-N entities for GTPv2-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv2-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-closed

Description Track Top-N entities for GTPv2-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-open

Description Track Top-N entities for GTPv2-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-bytes

Description Track Top-N entities for Uplink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-pkts

Description Track Top-N entities for Uplink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

gtp-network-element-topn-tmpl-list

Specification	
Type	*list*
Block object keys	

interval

Description '5': 5 minutes; '15': 15 minutes; '30': 30 minutes; '60': 60 minutes; 'all-time': Since template is activated;

Type: string

Supported Values: 5, 15, 30, 60, all-time

metrics

Description: metrics is a **JSON Block**. Please see below for *gtp-network-element-topn-tmpl-list_metrics*

Type: Object

Refernce Object: */axapi/v3/visibility/topn/gtp-network-element-topn-tmpl/{name}/metrics*

name

Description Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

topn-size

Description Congure value of N for topn

Type: number

Range: 10-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Specification	
Type	*object*

downlink-bytes

Description Track Top-N entities for Downlink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

downlink-pkts

Description Track Top-N entities for Downlink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-apn-filtering

Description Track Top-N entities for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Track Top-N entities for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Track Top-N entities for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Track Top-N entities for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Track Top-N entities for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Track Top-N entities for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Track Top-N entities for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv0-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv1-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Create PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Update PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv2-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Create Session Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Modify Bearer Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Track Top-N entities for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Track Top-N entities for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Track Top-N entities for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Track Top-N entities for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Track Top-N entities for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Track Top-N entities for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Track Top-N entities for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Track Top-N entities for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Track Top-N entities for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Track Top-N entities for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Track Top-N entities for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Track Top-N entities for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Track Top-N entities for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Track Top-N entities for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Track Top-N entities for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Track Top-N entities for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Track Top-N entities for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Track Top-N entities for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Track Top-N entities for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-unsupported-message-type

Description Track Top-N entities for Validation Drop: Message type not supported by GTP Version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Track Top-N entities for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop_vld-gtp-bearer-count-exceed

Description Track Top-N entities for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-path-management-message

Description Track Top-N entities for GTP Path Management Messages Received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-created

Description Track Top-N entities for GTP-U Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-deleted

Description Track Top-N entities for GTP-U Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPv0-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv0-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-reserved-message-allow

Description Track Top-N entities for GTPv0-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-closed

Description Track Top-N entities for GTPv0-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-created

Description Track Top-N entities for GTPv0-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted

Description Track Top-N entities for GTPv0-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv0-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-closed

Description Track Top-N entities for GTPv0-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-open

Description Track Top-N entities for GTPv0-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPv0-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPv1-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv1-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-reserved-message-allow

Description Track Top-N entities for GTPv1-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-closed

Description Track Top-N entities for GTPv1-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-created

Description Track Top-N entities for GTPv1-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted

Description Track Top-N entities for GTPv1-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv1-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-closed

Description Track Top-N entities for GTPv1-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-open

Description Track Top-N entities for GTPv1-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPv1-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-create-sess-resp-unsuccess

Description Track Top-N entities for GTPv2-C Create Session Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv2-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-mod_bearer-resp-unsuccess

Description Track Top-N entities for GTPv2-C Modify Bearer Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-piggyback-message

Description Track Top-N entities for GTPv2-C Piggyback Messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-reserved-message-allow

Description Track Top-N entities for GTPv2-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-closed

Description Track Top-N entities for GTPv2-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-created

Description Track Top-N entities for GTPv2-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted

Description Track Top-N entities for GTPv2-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv2-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-closed

Description Track Top-N entities for GTPv2-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-open

Description Track Top-N entities for GTPv2-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-bytes

Description Track Top-N entities for Uplink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-pkts

Description Track Top-N entities for Uplink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Specification	
Type	*object*

downlink-bytes

Description Track Top-N entities for Downlink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

downlink-pkts

Description Track Top-N entities for Downlink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-apn-filtering

Description Track Top-N entities for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Track Top-N entities for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Track Top-N entities for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Track Top-N entities for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Track Top-N entities for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Track Top-N entities for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Track Top-N entities for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv0-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv1-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Create PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Update PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv2-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Create Session Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Modify Bearer Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Track Top-N entities for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Track Top-N entities for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Track Top-N entities for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Track Top-N entities for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Track Top-N entities for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Track Top-N entities for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Track Top-N entities for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Track Top-N entities for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Track Top-N entities for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Track Top-N entities for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Track Top-N entities for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Track Top-N entities for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Track Top-N entities for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Track Top-N entities for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Track Top-N entities for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Track Top-N entities for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Track Top-N entities for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Track Top-N entities for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Track Top-N entities for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Track Top-N entities for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-unsupported-message-type

Description Track Top-N entities for Validation Drop: Message type not supported in GTP-C

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Track Top-N entities for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-path-management-message

Description Track Top-N entities for GTP Path Management Messages Received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-created

Description Track Top-N entities for GTP-U Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-deleted

Description Track Top-N entities for GTP-U Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPV0-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv0-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-closed

Description Track Top-N entities for GTPv0-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-created

Description Track Top-N entities for GTPv0-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted

Description Track Top-N entities for GTPv0-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv0-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-closed

Description Track Top-N entities for GTPv0-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-open

Description Track Top-N entities for GTPv0-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPV0-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPV1-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv1-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-closed

Description Track Top-N entities for GTPv1-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-created

Description Track Top-N entities for GTPv1-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted

Description Track Top-N entities for GTPv1-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv1-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-closed

Description Track Top-N entities for GTPv1-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-open

Description Track Top-N entities for GTPv1-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPV1-C Update PDP Context response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-create-sess-resp-unsuccess

Description Track Top-N entities for GTPV2-C Create Session Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv2-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-mod_bearer-resp-unsuccess

Description Track Top-N entities for GTPV2-C Modify Bearer Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-piggyback-message

Description Track Top-N entities for GTPv2-C Piggyback Messages seen

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-closed

Description Track Top-N entities for GTPv2-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-created

Description Track Top-N entities for GTPv2-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted

Description Track Top-N entities for GTPv2-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv2-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-closed

Description Track Top-N entities for GTPv2-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-open

Description Track Top-N entities for GTPv2-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-bytes

Description Track Top-N entities for Uplink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-pkts

Description Track Top-N entities for Uplink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

drop-flt-rat-type-filtering

Description Track Top-N entities for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Track Top-N entities for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Track Top-N entities for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv0-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv1-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Create PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Update PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv2-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Create Session Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Modify Bearer Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Track Top-N entities for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Track Top-N entities for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Track Top-N entities for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Track Top-N entities for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Track Top-N entities for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Track Top-N entities for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Track Top-N entities for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Track Top-N entities for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Track Top-N entities for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Track Top-N entities for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Track Top-N entities for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Track Top-N entities for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Track Top-N entities for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Track Top-N entities for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Track Top-N entities for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Track Top-N entities for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Track Top-N entities for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Track Top-N entities for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Track Top-N entities for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Track Top-N entities for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-unsupported-message-type

Description Track Top-N entities for Validation Drop: Message type not supported in GTP-C

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Track Top-N entities for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-path-management-message

Description Track Top-N entities for GTP Path Management Messages Received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-created

Description Track Top-N entities for GTP-U Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-deleted

Description Track Top-N entities for GTP-U Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPV0-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv0-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-closed

Description Track Top-N entities for GTPv0-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-created

Description Track Top-N entities for GTPv0-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted

Description Track Top-N entities for GTPv0-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv0-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-closed

Description Track Top-N entities for GTPv0-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-open

Description Track Top-N entities for GTPv0-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPV0-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPV1-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv1-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-closed

Description Track Top-N entities for GTPv1-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-created

Description Track Top-N entities for GTPv1-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted

Description Track Top-N entities for GTPv1-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv1-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-closed

Description Track Top-N entities for GTPv1-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-open

Description Track Top-N entities for GTPv1-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPV1-C Update PDP Context response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-create-sess-resp-unsuccess

Description Track Top-N entities for GTPV2-C Create Session Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv2-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-mod_bearer-resp-unsuccess

Description Track Top-N entities for GTPV2-C Modify Bearer Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-piggyback-message

Description Track Top-N entities for GTPv2-C Piggyback Messages seen

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-closed

Description Track Top-N entities for GTPv2-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-created

Description Track Top-N entities for GTPv2-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted

Description Track Top-N entities for GTPv2-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv2-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-closed

Description Track Top-N entities for GTPv2-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-open

Description Track Top-N entities for GTPv2-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-bytes

Description Track Top-N entities for Uplink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-pkts

Description Track Top-N entities for Uplink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.115.86 visibility topn gtp-network-element-topn-node

Activate gtp-network-element-topn template

Specification	
Type	*object*

downlink-bytes

Description Track Top-N entities for Downlink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

downlink-pkts

Description Track Top-N entities for Downlink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-apn-filtering

Description Track Top-N entities for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Track Top-N entities for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Track Top-N entities for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Track Top-N entities for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Track Top-N entities for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Track Top-N entities for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Track Top-N entities for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv0-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv1-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Create PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Update PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv2-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Create Session Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Modify Bearer Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Track Top-N entities for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Track Top-N entities for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Track Top-N entities for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Track Top-N entities for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Track Top-N entities for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Track Top-N entities for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Track Top-N entities for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Track Top-N entities for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Track Top-N entities for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Track Top-N entities for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Track Top-N entities for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Track Top-N entities for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Track Top-N entities for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Track Top-N entities for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Track Top-N entities for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Track Top-N entities for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Track Top-N entities for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Track Top-N entities for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Track Top-N entities for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-unsupported-message-type

Description Track Top-N entities for Validation Drop: Message type not supported by GTP Version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Track Top-N entities for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop_vld-gtp-bearer-count-exceed

Description Track Top-N entities for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-path-management-message

Description Track Top-N entities for GTP Path Management Messages Received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-created

Description Track Top-N entities for GTP-U Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-deleted

Description Track Top-N entities for GTP-U Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPv0-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv0-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-reserved-message-allow

Description Track Top-N entities for GTPv0-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-closed

Description Track Top-N entities for GTPv0-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-created

Description Track Top-N entities for GTPv0-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted

Description Track Top-N entities for GTPv0-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv0-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-closed

Description Track Top-N entities for GTPv0-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-open

Description Track Top-N entities for GTPv0-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPv0-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPv1-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv1-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-reserved-message-allow

Description Track Top-N entities for GTPv1-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-closed

Description Track Top-N entities for GTPv1-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-created

Description Track Top-N entities for GTPv1-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted

Description Track Top-N entities for GTPv1-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv1-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-closed

Description Track Top-N entities for GTPv1-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-open

Description Track Top-N entities for GTPv1-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPv1-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-create-sess-resp-unsuccess

Description Track Top-N entities for GTPv2-C Create Session Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv2-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-mod_bearer-resp-unsuccess

Description Track Top-N entities for GTPv2-C Modify Bearer Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-piggyback-message

Description Track Top-N entities for GTPv2-C Piggyback Messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-reserved-message-allow

Description Track Top-N entities for GTPv2-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-closed

Description Track Top-N entities for GTPv2-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-created

Description Track Top-N entities for GTPv2-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted

Description Track Top-N entities for GTPv2-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv2-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-closed

Description Track Top-N entities for GTPv2-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-open

Description Track Top-N entities for GTPv2-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-bytes

Description Track Top-N entities for Uplink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-pkts

Description Track Top-N entities for Uplink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

downlink-bytes

Description Track Top-N entities for Downlink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

downlink-pkts

Description Track Top-N entities for Downlink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-apn-filtering

Description Track Top-N entities for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Track Top-N entities for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Track Top-N entities for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Track Top-N entities for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Track Top-N entities for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Track Top-N entities for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Track Top-N entities for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv0-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv1-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Create PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Update PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv2-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Create Session Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Modify Bearer Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Track Top-N entities for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Track Top-N entities for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Track Top-N entities for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Track Top-N entities for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Track Top-N entities for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Track Top-N entities for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Track Top-N entities for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Track Top-N entities for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Track Top-N entities for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Track Top-N entities for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Track Top-N entities for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Track Top-N entities for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Track Top-N entities for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Track Top-N entities for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Track Top-N entities for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Track Top-N entities for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Track Top-N entities for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Track Top-N entities for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Track Top-N entities for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-unsupported-message-type

Description Track Top-N entities for Validation Drop: Message type not supported by GTP Version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Track Top-N entities for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop_vld-gtp-bearer-count-exceed

Description Track Top-N entities for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-path-management-message

Description Track Top-N entities for GTP Path Management Messages Received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-created

Description Track Top-N entities for GTP-U Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-deleted

Description Track Top-N entities for GTP-U Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPv0-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv0-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-reserved-message-allow

Description Track Top-N entities for GTPv0-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-closed

Description Track Top-N entities for GTPv0-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-created

Description Track Top-N entities for GTPv0-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted

Description Track Top-N entities for GTPv0-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv0-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-closed

Description Track Top-N entities for GTPv0-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-open

Description Track Top-N entities for GTPv0-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPv0-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPv1-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv1-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-reserved-message-allow

Description Track Top-N entities for GTPv1-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-closed

Description Track Top-N entities for GTPv1-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-created

Description Track Top-N entities for GTPv1-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted

Description Track Top-N entities for GTPv1-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv1-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-closed

Description Track Top-N entities for GTPv1-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-open

Description Track Top-N entities for GTPv1-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPv1-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-create-sess-resp-unsuccess

Description Track Top-N entities for GTPv2-C Create Session Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv2-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-mod_bearer-resp-unsuccess

Description Track Top-N entities for GTPv2-C Modify Bearer Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-piggyback-message

Description Track Top-N entities for GTPv2-C Piggyback Messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-reserved-message-allow

Description Track Top-N entities for GTPv2-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-closed

Description Track Top-N entities for GTPv2-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-created

Description Track Top-N entities for GTPv2-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted

Description Track Top-N entities for GTPv2-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv2-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-closed

Description Track Top-N entities for GTPv2-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-open

Description Track Top-N entities for GTPv2-C Tunnel Create Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-bytes

Description Track Top-N entities for Uplink Bytes

vpn attributes

asymmetric-flow-support

Description Support asymmetric flows pass through IPsec tunnel

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl

Description: crl is a **JSON Block**. Please see below for *crl*

Type: Object

Refernce Object: */axapi/v3/vpn/crl*

default

Description: default is a **JSON Block**. Please see below for *default*

Type: Object

Refernce Object: */axapi/v3/vpn/default*

error

Description: error is a **JSON Block**. Please see below for *error*

Type: Object

Refernce Object: */axapi/v3/vpn/error*

errordump

Description: errordump is a **JSON Block**. Please see below for *errordump*

Type: Object

Refernce Object: */axapi/v3/vpn/errordump*

extended-matching

Description Enable session extended matching for packet comes from IPsec tunnel

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fragment-after-encap

Description Fragment after adding IPsec headers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: fragment-after-encap and jumbo-fragment are mutually exclusive

ike-acc-enable

Description Enable IKE Acceleration by Cavium Nitrox card

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ike-gateway-list

Type: List

Refernce Object: */axapi/v3/vpn/ike-gateway/{name}*

ike-sa

Description: ike-sa is a **JSON Block**. Please see below for *ike-sa*

Type: Object

Refernce Object: */axapi/v3/vpn/ike-sa*

ike-sa-brief

Description: ike-sa-brief is a **JSON Block**. Please see below for *ike-sa-brief*

Type: Object

Refernce Object: */axapi/v3/vpn/ike-sa-brief*

ike-sa-clients

Description: ike-sa-clients is a **JSON Block**. Please see below for *ike-sa-clients*

Type: Object

Refernce Object: */axapi/v3/vpn/ike-sa-clients*

ike-sa-timeout

Description Timeout IKE-SA in connecting state in seconds (default 600s)

Type: number

Range: 300-86400

Default: 600

ike-stats-by-gw

Description: ike-stats-by-gw is a **JSON Block**. Please see below for *ike-stats-by-gw*

Type: Object

Refernce Object: /axapi/v3/vpn/ike-stats-by-gw

ike-stats-global

Description: ike-stats-global is a **JSON Block**. Please see below for *ike-stats-global*

Type: Object

Refernce Object: /axapi/v3/vpn/ike-stats-global

ipsec-error-dump

Description Support record the error ipsec cavium information in dump file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipsec-list

Type: List

Refernce Object: */axapi/v3/vpn/ipsec/{name}*

ipsec-mgmt-default-policy-drop

Description Drop MGMT traffic that is not match ipsec tunnel, share partition only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipsec-sa

Description: ipsec-sa is a **JSON Block**. Please see below for *ipsec-sa*

Type: Object

Refernce Object: */axapi/v3/vpn/ipsec-sa*

ipsec-sa-by-gw

Description: ipsec-sa-by-gw is a **JSON Block**. Please see below for *ipsec-sa-by-gw*

Type: Object

Refernce Object: */axapi/v3/vpn/ipsec-sa-by-gw*

ipsec-sa-clients

Description: ipsec-sa-clients is a **JSON Block**. Please see below for *ipsec-sa-clients*

Type: Object

Refernce Object: */axapi/v3/vpn/ipsec-sa-clients*

ipsec-sa-stats-list

Type: List

Refernce Object: /axapi/v3/vpn/ipsec-sa-stats/{sampling-enable}

jumbo-fragment

Description Support IKE jumbo fragment packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: jumbo-fragment and fragment-after-encap are mutually exclusive

log

Description: log is a **JSON Block**. Please see below for *log*

Type: Object

Refernce Object: */axapi/v3/vpn/log*

nat-traversal-flow-affinity

Description Choose IPsec UDP source port based on port of inner flow (only for A10 to A10)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp

Description: ocsp is a **JSON Block**. Please see below for *ocsp*

Type: Object

Refernce Object: */axapi/v3/vpn/ocsp*

revocation-list

Type: List

Refernce Object: */axapi/v3/vpn/revocation/{name}*

sampling-enable

Type: List

stateful-mode

Description VPN module will work in stateful mode and create sessions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-mss-adjust-disable

Description Disable TCP MSS adjustment in SYN packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ike-gateway-list

Specification	
Type	*list*
Block object keys	

auth-method

Description 'preshare-key': Authenticate the remote gateway using a pre-shared key (Default); 'rsa-signature': Authenticate the remote gateway using an RSA certificate;

Type: string

Supported Values: preshare-key, rsa-signature, ecdsa-signature, eap-radius, eap-tls

Default: preshare-key

configuration-payload

Description 'dhcp': Enable DHCP configuration-payload; 'radius': Enable RADIUS configuration-payload;

Type: string

Supported Values: dhcp, radius

dh-group

Description '1': Diffie-Hellman group 1 (Default); '2': Diffie-Hellman group 2; '5': Diffie-Hellman group 5; '14': Diffie-Hellman group 14; '15': Diffie-Hellman group 15; '16': Diffie-Hellman group 16; '18': Diffie-Hellman group 18;

Type: string

Supported Values: 1, 2, 5, 14, 15, 16, 18, 19, 20

Default: 1

dhcp-server

Description: dhcp-server is a **JSON Block**. Please see below for *ike-gateway-list_dhcp-server*

Type: Object

disable-rekey

Description Disable initiating rekey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dpd

Description: dpd is a **JSON Block**. Please see below for *ike-gateway-list_dpd*

Type: Object

enc-cfg

Type: List

ike-version

Description 'v1': IKEv1 key exchange; 'v2': IKEv2 key exchange;

Type: string

Supported Values: v1, v2

Default: v2

interface-management

Description only handle traffic on management interface, share partition only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key

Description Private Key

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key-passphrase

Description Private Key Pass Phrase

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

key-passphrase-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED key string)

lifetime

Description IKE SA age in seconds

Type: number

Range: 300-86400

Default: 86400

local-address

Description: local-address is a **JSON Block**. Please see below for *ike-gateway-list_local-address*

Type: Object

local-cert

Description: local-cert is a **JSON Block**. Please see below for *ike-gateway-list_local-cert*

Type: Object

local-id

Description Local Gateway Identity

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

mode

Description 'main': Negotiate Main mode (Default); 'aggressive': Negotiate Aggressive mode;

Type: string

Supported Values: main, aggressive

Default: main

name

Description IKE-gateway name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

nat-traversal

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preshare-key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED pre-shared key string)

preshare-key-value

Description pre-shared key

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

radius-server

Description: radius-server is a **JSON Block**. Please see below for *ike-gateway-list_radius-server*

Type: Object

remote-address

Description: remote-address is a **JSON Block**. Please see below for *ike-gateway-list_remote-address*

Type: Object

remote-ca-cert

Description: remote-ca-cert is a **JSON Block**. Please see below for *ike-gateway-list_remote-ca-cert*

Type: Object

remote-id

Description Remote Gateway Identity

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrid

Description: vrid is a **JSON Block**. Please see below for *ike-gateway-list_vrid*

Type: Object

ike-gateway-list_local-cert

Specification	
Type	*object*

local-cert-name

Description Certificate File Name

Block object keys	

encryption

Description 'des': Data Encryption Standard algorithm; '3des': Triple Data Encryption Standard algorithm; 'aes-128': Advanced Encryption Standard algorithm (key size: 128 bits); 'aes-192': Advanced Encryption Standard algorithm (key size: 192 bits); 'aes-256': Advanced Encryption Standard algorithm (key size: 256 bits); 'null': No encryption algorithm, only for IKEv2;

Type: string

Supported Values: des, 3des, aes-128, aes-192, aes-256, aes-gcm-128, aes-gcm-192, aes-gcm-256, null

gcm_priority

Description Prioritizes (1-10) security protocol, least value has highest priority

Type: number

Range: 1-10

Default: 5

hash

Description 'md5': MD5 Dessage-Digest Algorithm; 'sha1': Secure Hash Algorithm 1; 'sha256': Secure Hash Algorithm 256;

Type: string

Supported Values: md5, sha1, sha256, sha384, sha512

prf

Description 'md5': MD5 Dessage-Digest Algorithm; 'sha1': Secure Hash Algorithm 1; 'sha256': Secure Hash Algorithm 256; 'sha384': Secure Hash Algorithm 384; 'sha512': Secure Hash Algorithm 512;

Type: string

Supported Values: md5, sha1, sha256, sha384, sha512

priority

Description Prioritizes (1-10) security protocol, least value has highest priority

Type: number

Range: 1-10

Default: 5

ike-gateway-list_vrid

Specification	
Type	*object*

vrid-num

Description Specify ha VRRP-A vrid

Type: number

Range: 0-31

Mutual Exclusion: vrid-num and default are mutually exclusive

ike-gateway-list_radius-server

Specification	
Type	*object*

radius-pri

Description Primary RADIUS Authentication Server

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/aam/authentication/server/radius/instance*

radius-sec

Description Secondary RADIUS Authentication Server

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/aam/authentication/server/radius/instance*

ike-gateway-list_local-address

Specification	
Type	*object*

local-ip

Description Ipv4 address

Type: string

Format: ipv4-address

Mutual Exclusion: local-ip and local-ipv6 are mutually exclusive

local-ipv6

Description Ipv6 address

Type: string

Format: ipv6-address

Mutual Exclusion: local-ipv6 and local-ip are mutually exclusive

ike-gateway-list_remote-address

Specification	
Type	*object*

dns

Description Remote IP based on Domain name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: dns remote-ip and remote-ipv6 are mutually exclusive

remote-ip

Description Ipv4 address

Type: string

Format: ipv4-address

Mutual Exclusion: remote-ip dns and remote-ipv6 are mutually exclusive

remote-ipv6

Description Ipv6 address

Type: string

Format: ipv6-address

Mutual Exclusion: remote-ipv6 remote-ip and dns are mutually exclusive

ike-gateway-list_remote-ca-cert

Specification	
Type	*object*

remote-cert-name

Description Remote CA certificate DN (C=, ST=, L=, O=, CN=) without emailAddress

Type: string

Supported Values: default, af11, af12, af13, af21, af22, af23, af31, af32, af33, af41, af42, af43, cs1, cs2, cs3, cs4, cs5, cs6, cs7, ef, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16,

17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63

enc-cfg

Type: List

enforce-traffic-selector

Description Enforce Traffic Selector

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipsec-gateway

Description: ipsec-gateway is a **JSON Block**. Please see below for *ipsec-list_ipsec-gateway*

Type: Object

Refernce Object: */axapi/v3/vpn/ipsec/{name}/ipsec-gateway*

lifebytes

Description IPsec SA age in megabytes (0 indicates unlimited bytes)

Type: number

Range: 0-8000000

Default: 0

lifetime

Description IPsec SA age in seconds

Type: number

Range: 300-28800

Default: 28800

mode

Description 'tunnel': Encapsulating the packet in IPsec tunnel mode (Default);

Type: string

Supported Values: tunnel

Default: tunnel

name

Description IPsec name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

proto

Description 'esp': Encapsulating security protocol (Default);

Type: string

Supported Values: esp

Default: esp

sampling-enable

Type: List

sequence-number-disable

Description Do not use incremental sequence number in the ESP header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

traffic-selector

Description: traffic-selector is a **JSON Block**. Please see below for *ipsec-list_traffic-selector*

Type: Object

up

Description Initiates SA negotiation to bring the IPsec connection up

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

ike-gateway-list

ike-gateway-list is **JSON List** of *ike-gateway attributes*

ike-gateway-list : [

{ *ike-gateway attributes* },

{ *ike-gateway attributes* },

...

]

ike-gateway attributes

auth-method

Description 'preshare-key': Authenticate the remote gateway using a pre-shared key (Default); 'rsa-signature': Authenticate the remote gateway using an RSA certificate; 'ecdsa-signature': Authenticate the remote gateway using an ECDSA certificate;

Type: string

Supported Values: preshare-key, rsa-signature, ecdsa-signature, eap-radius, eap-tls

Default: preshare-key

configuration-payload

Description 'dhcp': Enable DHCP configuration-payload; 'radius': Enable RADIUS configuration-payload;

Type: string

Supported Values: dhcp, radius

dh-group

Description '1': Diffie-Hellman group 1 - 768-bit(Default); '2': Diffie-Hellman group 2 - 1024-bit; '5': Diffie-Hellman group 5 - 1536-bit; '14': Diffie-Hellman group 14 - 2048-bit; '15': Diffie-Hellman group 15 - 3072-bit; '16': Diffie-Hellman group 16 - 4096-bit; '18': Diffie-Hellman group 18 - 8192-bit; '19': Diffie-Hellman group 19 - 256-bit Elliptic Curve; '20': Diffie-Hellman group 20 - 384-bit Elliptic Curve;

Type: string

Supported Values: 1, 2, 5, 14, 15, 16, 18, 19, 20

Default: 1

dhcp-server

Description: dhcp-server is a **JSON Block**. Please see below for *dhcp-server*

Type: Object

disable-rekey

Description Disable initiating rekey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dpd

Description: dpd is a **JSON Block**. Please see below for *dpd*

Type: Object

enc-cfg

Type: List

ike-version

Description 'v1': IKEv1 key exchange; 'v2': IKEv2 key exchange;

Type: string

Supported Values: v1, v2

Default: v2

interface-management

Description only handle traffic on management interface, share partition only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

key

Description Private Key

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

key-passphrase

Description Private Key Pass Phrase

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

key-passphrase-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED key string)

lifetime

Description IKE SA age in seconds

Type: number

Range: 300-86400

Default: 86400

local-address

Description: local-address is a **JSON Block**. Please see below for *local-address*

Type: Object

local-cert

Description: local-cert is a **JSON Block**. Please see below for *local-cert*

Type: Object

local-id

Description Local Gateway Identity

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

mode

Description 'main': Negotiate Main mode (Default); 'aggressive': Negotiate Aggressive mode;

Type: string

Supported Values: main, aggressive

Default: main

name

Description IKE-gateway name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

nat-traversal

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preshare-key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED pre-shared key string)

preshare-key-value

Description pre-shared key

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

radius-server

Description: radius-server is a **JSON Block**. Please see below for *radius-server*

Type: Object

remote-address

Description: remote-address is a **JSON Block**. Please see below for *remote-address*

Type: Object

remote-ca-cert

Description: remote-ca-cert is a **JSON Block**. Please see below for *remote-ca-cert*

Type: Object

remote-id

Description Remote Gateway Identity

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrid

Description: vrid is a **JSON Block**. Please see below for *vrid*

Type: Object

local-cert

Specification	
Type	*object*

local-cert-name

Description Certificate File Name

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

dhcp-server

Specification	
Type	*object*

pri

Description: pri is a **JSON Block**. Please see below for *dhcp-server_pri*

Type: Object

sec

Description: sec is a **JSON Block**. Please see below for *dhcp-server_sec*

Type: Object

dhcp-server_sec

Specification	
Type	*object*

dhcp-sec-ipv4

Description Secondary DHCP Server IP Address

Type: string

Format: ipv4-address

dhcp-server_pri

Specification	
Type	*object*

dhcp-pri-ipv4

Description Primary DHCP Server IP Address

Type: string

Format: ipv4-address

enc-cfg

Specification	
Type	*list*
Block object keys	

encryption

Description 'des': Data Encryption Standard algorithm; '3des': Triple Data Encryption Standard algorithm; 'aes-128': Advanced Encryption Standard algorithm (key size: 128 bits); 'aes-192': Advanced Encryption Standard algorithm (key size: 192 bits); 'aes-256': Advanced Encryption Standard algorithm (key size: 256 bits); 'null': No encryption algorithm, only for IKEv2;

Type: string

Supported Values: des, 3des, aes-128, aes-192, aes-256, aes-gcm-128, aes-gcm-192, aes-gcm-256, null

gcm_priority

Description Prioritizes (1-10) security protocol, least value has highest priority

Type: number

Range: 1-10

Default: 5

hash

Description 'md5': MD5 Dessage-Digest Algorithm; 'sha1': Secure Hash Algorithm 1; 'sha256': Secure Hash Algorithm 256;

Type: string

Supported Values: md5, sha1, sha256, sha384, sha512

prf

Description 'md5': MD5 Dessage-Digest Algorithm; 'sha1': Secure Hash Algorithm 1; 'sha256': Secure Hash Algorithm 256; 'sha384': Secure Hash Algorithm 384; 'sha512': Secure Hash Algorithm 512;

Type: string

Supported Values: md5, sha1, sha256, sha384, sha512

priority

Description Prioritizes (1-10) security protocol, least value has highest priority

Type: number

Range: 1-10

Default: 5

vrid

Specification	
Type	*object*

vrid-num

Description Specify ha VRRP-A vrid

Type: number

Range: 0-31

Mutual Exclusion: vrid-num and default are mutually exclusive

radius-server

Specification	
Type	*object*

radius-pri

Description Primary RADIUS Authentication Server

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/aam/authentication/server/radius/instance*

radius-sec

Description Secondary RADIUS Authentication Server

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/aam/authentication/server/radius/instance*

local-address

Specification	
Type	*object*

local-ip

Description Ipv4 address

Type: string

Format: ipv4-address

Mutual Exclusion: local-ip and local-ipv6 are mutually exclusive

local-ipv6

Description Ipv6 address

Type: string

Format: ipv6-address

Mutual Exclusion: local-ipv6 and local-ip are mutually exclusive

remote-address

Specification	
Type	*object*

dns

Description Remote IP based on Domain name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: dns remote-ip and remote-ipv6 are mutually exclusive

remote-ip

Description Ipv4 address

Type: string

Format: ipv4-address

Mutual Exclusion: remote-ip dns and remote-ipv6 are mutually exclusive

remote-ipv6

Description Ipv6 address

Type: string

Format: ipv6-address

Mutual Exclusion: remote-ipv6 remote-ip and dns are mutually exclusive

remote-ca-cert

Specification	
Type	*object*

remote-cert-name

Description Remote CA certificate DN (C=, ST=, L=, O=, CN=) without emailAddress

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

sampling-enable

Specification

Description 'default': Default dscp (000000); 'af11': AF11 (001010); 'af12': AF12 (001100); 'af13': AF13 (001110); 'af21': AF21 (010010); 'af22': AF22 (010100); 'af23': AF23 (010110); 'af31': AF31 (011010); 'af32': AF32 (011100); 'af33': AF33 (011110); 'af41': AF41 (100010); 'af42': AF42 (100100); 'af43': AF43 (100110); 'cs1': CS1 (001000); 'cs2': CS2 (010000); 'cs3': CS3 (011000); 'cs4': CS4 (100000); 'cs5': CS5 (101000); 'cs6': CS6 (110000); 'cs7': CS7 (111000); 'ef': EF (101110); '0': 000000; '1': 000001; '2': 000010; '3': 000011; '4': 000100; '5': 000101; '6': 000110; '7': 000111; '8': 001000; '9': 001001; '10': 001010; '11': 001011; '12': 001100; '13': 001101; '14': 001110; '15': 001111; '16': 010000; '17': 010001; '18': 010010; '19': 010011; '20': 010100; '21': 010101; '22': 010110; '23': 010111; '24': 011000; '25': 011001; '26': 011010; '27': 011011; '28': 011100; '29': 011101; '30': 011110; '31': 011111; '32': 100000; '33': 100001; '34': 100010; '35': 100011; '36': 100100; '37': 100101; '38': 100110; '39': 100111; '40': 101000; '41': 101001; '42': 101010; '43': 101011; '44': 101100; '45': 101101; '46': 101110; '47': 101111; '48': 110000; '49': 110001; '50': 110010; '51': 110011; '52': 110100; '53': 110101; '54': 110110; '55': 110111; '56': 111000; '57': 111001; '58': 111010; '59': 111011; '60': 111100; '61': 111101; '62': 111110; '63': 111111;

Type: string

Supported Values: default, af11, af12, af13, af21, af22, af23, af31, af32, af33, af41, af42, af43, cs1, cs2, cs3, cs4, cs5, cs6, cs7, ef, 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63

enc-cfg

Type: List

enforce-traffic-selector

Description Enforce Traffic Selector

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipsec-gateway

Description: ipsec-gateway is a **JSON Block**. Please see below for *ipsec-gateway*

Type: Object

Refernce Object: */axapi/v3/vpn/ipsec/{name}/ipsec-gateway*

lifebytes

Description IPsec SA age in megabytes (0 indicates unlimited bytes)

Type: number

Range: 0-8000000

Default: 0

lifetime

Description IPsec SA age in seconds

Type: number

Range: 300-28800

Default: 28800

mode

Description 'tunnel': Encapsulating the packet in IPsec tunnel mode (Default);

Type: string

Supported Values: tunnel

Default: tunnel

name

Description IPsec name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

proto

Description 'esp': Encapsulating security protocol (Default);

Type: string

Supported Values: esp

Default: esp

sampling-enable

Type: List

sequence-number-disable

Description Do not use incremental sequence number in the ESP header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

traffic-selector

Description: traffic-selector is a **JSON Block**. Please see below for *traffic-selector*

Type: Object

up

Description Initiates SA negotiation to bring the IPsec connection up

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

traffic-selector

Specification	
Type	*object*

ipv4

Description: ipv4 is a **JSON Block**. Please see below for *traffic-selector_ipv4*

Type: Object

ipv6

Description: ipv6 is a **JSON Block**. Please see below for *traffic-selector_ipv6*

Type: Object

traffic-selector_ipv4

Specification	
Type	*object*

local

Description Local Traffic Selector

Type: string

Format: ipv4-address

Mutual Exclusion: local and localv6 are mutually exclusive

local_netmask

Description IPv4 Address Network Mask

Type: string

Format: ipv4-netmask

local_port

Description Port Number

Type: number

Range: 0-65535

protocol

Description IP Protocol Number (0-255)

Type: number

Range: 0-255

remote-ip

Description IPv4 Address

Type: string

Format: ipv4-address

Mutual Exclusion: remote-ip and remote-ipv4-assigned are mutually exclusive

remote-ipv4-assigned

Description Remote IP address assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: remote-ipv4-assigned and remote-ip are mutually exclusive

remote_netmask

Description IPv4 Address Network Mask

Type: string

Format: ipv4-netmask

remote_port

Description Port Number

Type: number

Range: 0-65535

traffic-selector_ipv6

Specification	
Type	*object*

local_portv6

Description Port Number

Type: number

Range: 0-65535

localv6

Description Local Traffic Selector

Type: string

Format: ipv6-address-plen

Mutual Exclusion: localv6 and local are mutually exclusive

protocolv6

Description IP Protocol Number (0-255)

Type: number

Range: 0-255

remote-ipv6

Description IPv6 Address

Type: string

Format: ipv6-address-plen

Mutual Exclusion: remote-ipv6 and remote-ipv6-assigned are mutually exclusive

remote-ipv6-assigned

Description Remote IPv6 address assigned

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: remote-ipv6-assigned and remote-ipv6 are mutually exclusive

remote_portv6

Description Port Number

Type: number

Range: 0-65535

bind-tunnel

Specification	
Type	*object*

next-hop

Description IPsec Next Hop IP Address

Type: string

Format: ipv4-address

Mutual Exclusion: next-hop and next-hop-v6 are mutually exclusive

next-hop-v6

Description IPsec Next Hop IPv6 Address

Type: string

Format: ipv6-address

Mutual Exclusion: next-hop-v6 and next-hop are mutually exclusive

tunnel

Description Tunnel interface index

Type: number

Range: 1-128

Refernce Object: */axapi/v3/interface/tunnel*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'packets-encrypted': Encrypted Packets; 'packets-decrypted': Decrypted Packets; 'anti-replay-num': Anti-Replay Failure; 'rekey-num': Rekey Times; 'packets-err-inactive': Inactive Error; 'packets-err-encryption': Encryption Error; 'packets-err-pad-check': Pad Check Error; 'packets-err-pkt-sanity': Packets Sanity Error; 'packets-err-icv-check': ICV Check Error; 'packets-err-lifetime-lifebytes': Lifetime Lifebytes Error; 'bytes-encrypted': Encrypted Bytes; 'bytes-decrypted': Decrypted Bytes; 'prefrag-success': Pre-frag Success; 'prefrag-error': Pre-frag Error; 'cavium-bytes-encrypted': CAVIUM Encrypted Bytes; 'cavium-bytes-decrypted': CAVIUM Decrypted Bytes; 'cavium-packets-encrypted': CAVIUM Encrypted Packets; 'cavium-packets-decrypted': CAVIUM Decrypted Packets; 'tunnel-intf-down': Packet dropped: Tunnel Interface Down; 'pkt-fail-prep-to-send': Packet dropped: Failed in prepare to send; 'no-next-hop': Packet dropped: No next hop; 'invalid-tunnel-id': Packet dropped: Invalid tunnel ID; 'no-tunnel-found': Packet dropped: No tunnel found; 'pkt-fail-to-send': Packet dropped: Failed to send;

Type: string

Supported Values: all, packets-encrypted, packets-decrypted, anti-replay-num, rekey-num, packets-err-inactive, packets-err-encryption, packets-err-pad-check, packets-err-pkt-sanity, packets-err-icv-check, packets-err-lifetime-lifebytes, bytes-encrypted, bytes-decrypted, prefrag-success, prefrag-error, cavium-bytes-encrypted, cavium-bytes-decrypted, cavium-packets-encrypted, cavium-packets-decrypted, qat-bytes-encrypted, qat-bytes-decrypted, qat-packets-encrypted, qat-packets-decrypted, tunnel-intf-down, pkt-fail-prep-to-send, no-next-hop, invalid-tunnel-id, no-tunnel-found, pkt-fail-to-send, frag-after-encap-frag-packets, frag-received, sequence-num, sequence-num-rollover, packets-err-nh-check

ipsec-gateway

Specification	
Type	*object*

ike-gateway

Description Gateway to use for IPsec SA

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/vpn/ike-gateway*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

enc-cfg

Specification	
Type	*list*
Block object keys	

encryption

Description 'des': Data Encryption Standard algorithm; '3des': Triple Data Encryption Standard algorithm; 'aes-128': Advanced Encryption Standard algorithm (key size: 128 bits); 'aes-192': Advanced Encryption Standard algorithm (key size: 192 bits); 'aes-256': Advanced Encryption Standard algorithm (key size: 256 bits); 'null': No encryption algorithm;

Type: string

Supported Values: des, 3des, aes-128, aes-192, aes-256, aes-gcm-128, aes-gcm-192, aes-gcm-256, null

gcm_priority

Description Prioritizes (1-10) security protocol, least value has highest priority

Type: number

Range: 1-10

Default: 5

hash

Description 'md5': MD5 Dessage-Digest Algorithm; 'sha1': Secure Hash Algorithm 1; 'sha256': Secure Hash Algorithm 256; 'null': No hash algorithm;

Type: string

Supported Values: md5, sha1, sha256, sha384, sha512, null

priority

Description Prioritizes (1-10) security protocol, least value has highest priority

Type: number

Range: 1-10

Default: 5

revocation attributes

ca

Description Certificate Authority file name

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

crl

Description: crl is a **JSON Block**. Please see below for *crl*

Type: Object

name

Description Revocation name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

ocsp

Description: ocsp is a **JSON Block**. Please see below for *ocsp*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ocsp

Specification	
Type	*object*

ocsp-pri

Description Primary OCSP Authentication Server

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/aam/authentication/server/ocsp/instance*

ocsp-sec

Description Secondary OCSP Authentication Server

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/aam/authentication/server/ocsp/instance*

crl

Specification	
Type	*object*

crl-pri

Description Primary CRL URL (http://www.example.com/ocsp) (only .der filetypes)

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

crl-sec

Description Secondary CRL URL (http://www.example.com/ocsp) (only .der filetypes)

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/vrrp-a/vrid/{vrid-val}*

force-self-standby

Specification	
Type	*object*

action

Description 'enable': enable vrrp-a force-self-standby; 'disable': disable vrrp-a force-self-standby;

Type: string

Supported Values: enable, disable

all-partitions

Description force all partitions in standby state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vrid

Description Specify one VRRP-A vrid to force into standby state

Type: number

Range: 0-31

restart-port-list

Specification	
Type	*object*

ethernet-cfg

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrid-list

Type: List

Refernce Object: */axapi/v3/vrrp-a/restart-port-list/vrid/{vrid-val}*

restart-port-list_vrid-list

Specification	
Type	*list*
Block object keys	

ethernet-cfg

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrid-val

Description Specify ha VRRP-A vrid

Type: number

Range: 0-31

Default: 0

restart-port-list_vrid-list_ethernet-cfg

Specification	
Type	*list*
Block object keys	

flap-ethernet-end

Description Ethernet Port

Type: number

Format: interface

flap-ethernet-start

Description Ethernet Port

Type: number

Format: interface

restart-port-list_ethernet-cfg

Specification	
Type	*list*
Block object keys	

flap-ethernet-end

Description Ethernet Port

Type: number

Format: interface

flap-ethernet-start

Description Ethernet Port

Type: number

Format: interface

force-self-standby-persistent-list

Specification	
Type	*list*
Block object keys	

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrid

Description Specify one VRRP-A vrid to force into standby state

Type: number

Range: 0-31

l3-inline-mode-flag

Specification	
Type	*object*

l3-inline-mode

Description Enable Layer 3 Inline Hot Standby Mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

peer-group

Specification	
Type	*object*

peer

Description: peer is a **JSON Block**. Please see below for *peer-group_peer*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

peer-group_peer

Specification	
Type	*object*

ip-peer-address-cfg

Type: List

ipv6-peer-address-cfg

Type: List

peer-group_peer_ip-peer-address-cfg

Specification	
Type	*list*
Block object keys	

ip-peer-address

Description IP Address

Type: string

Format: ipv4-address

peer-group_peer_ipv6-peer-address-cfg

Specification	
Type	*list*
Block object keys	

ipv6-peer-address

Description IPV6 address

Type: string

Format: ipv6-address

detail

Specification	
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

fail-over-policy-template-list

Specification	
Type	*list*
Block object keys	

bgp

Description: bgp is a **JSON Block**. Please see below for *fail-over-policy-template-list_bgp*

Type: Object

gateway

Description: gateway is a **JSON Block**. Please see below for *fail-over-policy-template-list_gateway*

Type: Object

interface

Type: List

name

Description VRRP-A fail over policy template name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

route

Description: route is a **JSON Block**. Please see below for *fail-over-policy-template-list_route*

Type: Object

trunk-cfg

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlan-cfg

Type: List

fail-over-policy-template-list_vlan-cfg

Specification	
Type	*list*
Block object keys	

timeout

Description

Type: number

Range: 2-600

vlan

Description VLAN tracking (VLAN id)

Type: number

Range: 1-4094

weight

Description The failover event weight

Type: number

Range: 1-255

fail-over-policy-template-list_route

Specification	
Type	*object*

ip-destination-cfg

Type: List

ipv6-destination-cfg

Type: List

fail-over-policy-template-list_route_ipv6-destination-cfg

Specification	
Type	*list*
Block object keys	

distance

Description Route's administrative distance (default: match any)

Type: number

Range: 1-255

gatewayv6

Description Match the route's gateway (next-hop) (default: match any)

Type: string

Format: ipv6-address

ipv6-destination

Description IPv6 Destination Prefix

Type: string

Format: ipv6-address-plen

protocol

Description 'any': Match any routing protocol (default); 'static': Match only static routes (added by user); 'dynamic': Match routes added by dynamic routing protocols (e.g. OSPF);

Type: string

Supported Values: any, static, dynamic

Default: any

weight

Description The amount the priority will decrease if the route is missing (The amount the priority will decrease if the route is not present)

Type: number

Range: 1-255

fail-over-policy-template-list_route_ip-destination-cfg

Specification	
Type	*list*
Block object keys	

distance

Description Route's administrative distance(default: match any)

Type: number

Range: 1-255

gateway

Description

Type: string

Format: ipv4-address

ip-destination

Description Destination prefix

Type: string

Format: ipv4-address

mask

Description Destination prefix mask

Type: string

Format: ipv4-netmask

protocol

Description 'any': Match any routing protocol (default); 'static': Match only static routes (added by user); 'dynamic': Match routes added by dynamic routing protocols (e.g. OSPF);

Type: string

Supported Values: any, static, dynamic

Default: any

weight

Description The amount the priority will decrease if the route is missing (The amount the priority will decrease if the route is not present)

Type: number

Range: 1-255

fail-over-policy-template-list_bgp

Specification	
Type	*object*

bgp-ipv4-address-cfg

Type: List

bgp-ipv6-address-cfg

Type: List

fail-over-policy-template-list_bgp_bgp-ipv4-address-cfg

Specification	
Type	*list*
Block object keys	

bgp-ipv4-address

Description bgp IP Address

Type: string

Format: ipv4-address

weight

Description The failover event weight

Type: number

Range: 1-255

fail-over-policy-template-list_bgp_bgp-ipv6-address-cfg

Specification	
Type	*list*
Block object keys	

bgp-ipv6-address

Description IPV6 address

Type: string

Format: ipv6-address

weight

Description The failover event weight

Type: number

Range: 1-255

fail-over-policy-template-list_interface

Specification	
Type	*list*
Block object keys	

ethernet

Description Ethernet Interface (Ethernet interface number)

Type: number

Format: interface

weight

Description The failover event weight

distance

Description Route's administrative distance (default: match any)

Type: number

Range: 1-255

gatewayv6

Description Match the route's gateway (next-hop) (default: match any)

Type: string

Format: ipv6-address

ipv6-destination

Description IPv6 Destination Prefix

Type: string

Format: ipv6-address-plen

priority-cost

Description The amount the priority will decrease if the route is missing (The amount the priority will decrease if the route is not present)

Type: number

Range: 1-255

protocol

Description 'any': Match any routing protocol (default); 'static': Match only static routes (added by user); 'dynamic': Match routes added by dynamic routing protocols (e.g. OSPF);

Type: string

Supported Values: any, static, dynamic

Default: any

vrid-list_blade-parameters_tracking-options_route_ip-destination-cfg

Specification	
Type	*list*
Block object keys	

distance

Description Route's administrative distance (default: match any)

Type: number

Range: 1-255

gateway

Description Match the route's gateway (next-hop) (default: match any)

Type: string

Format: ipv4-address

ip-destination

Description Destination prefix

Type: string

Format: ipv4-address

mask

Description Destination prefix mask

Type: string

Format: ipv4-netmask

priority-cost

Description The amount the priority will decrease if the route is missing (The amount the priority will decrease if the route is not present)

Type: number

Range: 1-255

protocol

Description 'any': Match any routing protocol (default); 'static': Match only static routes (added by user); 'dynamic': Match routes added by dynamic routing protocols (e.g. OSPF);

Type: string

Supported Values: any, static, dynamic

Block object keys	

both

Description both a router and server interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: both router-interface and server-interface are mutually exclusive

no-heartbeat

Description do not send out heartbeat packet from this interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: no-heartbeat and vlan are mutually exclusive

router-interface

Description interface to upstream router

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: router-interface server-interface and both are mutually exclusive

server-interface

Description interface to real server

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: server-interface router-interface and both are mutually exclusive

trunk-val

Description Ethernet Interface

Type: number

Range: 1-4096

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

vlan

Description Do not filter OSPF packet on specific vlan (Vlan number)

Type: number

Range: 1-4094

common

Specification	
Type	*object*

action

Description 'enable': enable vrrp-a; 'disable': disable vrrp-a;

Type: string

Supported Values: enable, disable

Default: disable

arp-retry

Description Number of additional gratuitous ARPs sent out after HA failover (1-255, default is 4)

Type: number

Range: 1-255

Default: 4

dead-timer

Description VRRP-A dead timer in terms of how many hello messages missed, default is 5 (2-255, default is 5)

Type: number

Range: 2-255

Default: 5

device-id

Description Unique ID for each VRRP-A box (Device-id number)

Type: number

disable-default-vrid

Description Disable default vrid

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-sync-session-seq-number

Description enable monitoring sending and receiving sync packets with sequence number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

forward-l4-packet-on-standby

Description Enables Layer 2/3 forwarding of Layer 4 traffic on the Standby ACOS device

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

get-ready-time

Description set get ready time after ax starting up (60-1200, in unit of 100millisec, default is 60)

Type: number

Range: 60-1200

Default: 60

hello-interval

Description VRRP-A Hello Interval (1-255, in unit of 100millisec, default is 2)

Type: number

Range: 1-255

Default: 2

hostid-append-to-vrid

Description: hostid-append-to-vrid is a **JSON Block**. Please see below for *common_hostid-append-to-vrid*

Type: Object

inline-mode-cfg

Description: inline-mode-cfg is a **JSON Block**. Please see below for *common_inline-mode-cfg*

Type: Object

preemption-delay

Description Delay before changing state from Active to Standby (1-255, in unit of 100millisec, default is 60)

Type: number

Range: 1-255

Default: 60

restart-time

Description Time between restarting ports on standby system after transition

Type: number

Range: 1-100

Default: 20

set-id

Description Set-ID for HA configuration (Set id from 1 to 15)

Type: number

Range: 1-15

track-event-delay

Description Delay before changing state after up/down event (Units of 100 milliseconds (default 30))

Type: number

Range: 1-100

Default: 30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

common_hostid-append-to-vrid

Specification	
Type	*object*

hostid-append-to-vrid-default

Description hostid append to vrid default

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: hostid-append-to-vrid-default and hostid-append-to-vrid-value are mutually exclusive

hostid-append-to-vrid-value

Description hostid append to vrid num

Type: number

Range: 1-31

Mutual Exclusion: hostid-append-to-vrid-value and hostid-append-to-vrid-default are mutually exclusive

common_inline-mode-cfg

Specification	
Type	*object*

inline-mode

Description Enable Layer 2 Inline Hot Standby Mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preferred-port

Description Preferred ethernet Port

Type: number

Format: interface

Mutual Exclusion: preferred-port and preferred-trunk are mutually exclusive

preferred-trunk

Description Preferred trunk Port

Type: number

Range: 1-4096

Mutual Exclusion: preferred-trunk and preferred-port are mutually exclusive

common attributes

action

Description 'enable': enable vrrp-a; 'disable': disable vrrp-a;

Type: string

Supported Values: enable, disable

Default: disable

arp-retry

Description Number of additional gratuitous ARPs sent out after HA failover (1-255, default is 4)

Type: number

Range: 1-255

Default: 4

dead-timer

Description VRRP-A dead timer in terms of how many hello messages missed, default is 5 (2-255, default is 5)

Type: number

Range: 2-255

Default: 5

device-id

Description Unique ID for each VRRP-A box (Device-id number)

Type: number

disable-default-vrid

Description Disable default vrid

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-sync-session-seq-number

Description enable monitoring sending and receiving sync packets with sequence number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

forward-l4-packet-on-standby

Description Enables Layer 2/3 forwarding of Layer 4 traffic on the Standby ACOS device

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

get-ready-time

Description set get ready time after ax starting up (60-1200, in unit of 100millisec, default is 60)

Type: number

Range: 60-1200

Default: 60

hello-interval

Description VRRP-A Hello Interval (1-255, in unit of 100millisec, default is 2)

Type: number

Range: 1-255

Default: 2

hostid-append-to-vrid

Description: hostid-append-to-vrid is a **JSON Block**. Please see below for *hostid-append-to-vrid*

Type: Object

inline-mode-cfg

Description: inline-mode-cfg is a **JSON Block**. Please see below for *inline-mode-cfg*

Type: Object

preemption-delay

Description Delay before changing state from Active to Standby (1-255, in unit of 100millisec, default is 60)

Type: number

Range: 1-255

Default: 60

restart-time

Description Time between restarting ports on standby system after transition

Type: number

Range: 1-100

Default: 20

set-id

Description Set-ID for HA configuration (Set id from 1 to 15)

Type: number

Range: 1-15

track-event-delay

Description Delay before changing state after up/down event (Units of 100 milliseconds (default 30))

Type: number

Range: 1-100

Default: 30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

hostid-append-to-vrid

Specification	
Type	*object*

hostid-append-to-vrid-default

Description hostid append to vrid default

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: hostid-append-to-vrid-default and hostid-append-to-vrid-value are mutually exclusive

hostid-append-to-vrid-value

Description hostid append to vrid num

Type: number

Range: 1-31

Mutual Exclusion: hostid-append-to-vrid-value and hostid-append-to-vrid-default are mutually exclusive

inline-mode-cfg

Specification	
Type	*object*

inline-mode

Description Enable Layer 2 Inline Hot Standby Mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preferred-port

Description Preferred ethernet Port

Type: number

Format: interface

Mutual Exclusion: preferred-port and preferred-trunk are mutually exclusive

preferred-trunk

Description Preferred trunk Port

Type: number

Range: 1-4096

Mutual Exclusion: preferred-trunk and preferred-port are mutually exclusive

trunk attributes

both

Description both a router and server interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: both router-interface and server-interface are mutually exclusive

no-heartbeat

Description do not send out heartbeat packet from this interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: no-heartbeat and vlan are mutually exclusive

router-interface

Description interface to upstream router

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: router-interface server-interface and both are mutually exclusive

server-interface

Description interface to real server

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: server-interface router-interface and both are mutually exclusive

trunk-val

Description Ethernet Interface

Type: number

Range: 1-4096

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

	sync_rx_lsn_create_sby	8	Conn Sync LSN Create Standby
	sync_get_buff_failed_rt	8	Conn Sync Get Buff Failure No Route
	sync_rx_ext_fw_gtp_log_ext_info	8	FW GTP Ext Log Info Received
	sync_tx_create_ext_bit_counter	8	Conn Sync Create with Ext Sent counter
	sync_tx_max_packed	2	Min Sync Msg Per Packet
	sync_rx_persist_update_age_counter	2	Conn Sync Update Persist Age Pkts Received counter
	sync_tx_aflex_table_entry_delete_counter	8	Sync send packet with aflex table entry delete
	sync_rx_table_entry_update_counter	8	Conn Sync receive packet with table entry update
	sync_rx_sfw	8	Conn Sync SFW
	sync_rx_bad_protocol_counter	8	Conn Sync receive packet with bad protocol
	sync_tx_aflex_table_entry_lookup_counter	8	Sync send packet with aflex table entry lookup
	sync_rx_seq_deltas	8	Conn Sync Seq Deltas Failure
	sync_tx_aflex_table_entry_error_counter	8	Error on send packet with aflex table entry
	sync_rx_ext_dcfw_rule_id	8	Conn Sync FIREWALL session rule ID information Failure
	sync_rx_proto_not_supported	8	Conn Sync Protocol Invalid
	query_pkt_invalid_idx_counter	8	Conn Query Invalid Interface
	sync_rx_create_static_sby	8	Conn Sync Create Static Standby
	sync_rx_aflex_table_entry_timeout_counter	8	Sync receive packet with aflex table entry timeout
	sync_rx_aflex_table_entry_replace_counter	8	Sync receive packet with aflex table entry replace
	sync_rx_persist_del_counter	2	Conn Sync Delete Persist Session Pkts Received counter
	sync_rx_update_age_counter	2	Conn Sync Update Age Received counter
	sync_rx_ext_fw_limit_entry	8	Sync FW Limit Entry Info Failure
	sync_rx_smp_create_counter	2	Sync Create SMP Session Pkts Received counter
	sync_rx_table_entry_del_counter	8	Conn Sync receive packet with table entry delete
	sync_tx_smp_create_counter	2	Sync Create SMP Session Pkts Sent counter
	query_tx_max_packed	2	Max Query Msg Per Packet
	sync_persist_rx_ext_bit_process_error	8	Persist Conn Sync Proc Ext Bit Failure
	query_pkt_rcv_counter	2	Conn Query Received counter
	sync_rx_zero_info_counter	8	Conn Sync Packet Empty
	sync_pkt_tx_counter	2	Conn Sync Sent counter
	sync_rx_ext_sip_alg	8	Conn Sync SIP TCP ALG Failure

Table 2.77 – continued from previous page

	Counter	Size	Description
	sync_rx_no_vgrp_counter	8	Conn Sync receive packet with no virtual group
	query_rx_invalid_ha_group_counter	8	Conn Sync receive query packet with invalid ha group
	sync_rx_reserve_ha	8	Conn Sync Reserve HA Conn
	sync_tx_smp_delete_counter	2	Sync Delete SMP Session Pkts Sent counter
	sync_rx_table_entry_create_counter	8	Conn Sync receive packet with table entry create
	sync_tx_aflex_table_entry_append_counter	8	Sync send packet with aflex table entry append
	sync_rx_ext_pptp	8	Conn Sync Ext PPTP
	sync_persist_rx_type_invalid	8	Persist Conn Sync Type Invalid
	sync_rx_insert_tuple	8	Conn Sync Insert Tuple
	sync_rx_aflex_table_entry_incr_counter	8	Sync receive packet with aflex table entry incr
	sync_rx_no_such_nat_pool	8	Conn Sync NAT Pool Error
	sync_pkt_invalid_idx_counter	8	Conn Sync Invalid Interface
	sync_rx_ext_fw_so_shadow_ext_info	8	FW Scaleout Shadow Ext Info Received
	sync_tx_lsn_fullcone	8	Conn Sync Update LSN Fullcone Sent counter
	sync_rx_apptype_not_supported	8	Conn Sync App Type Invalid
	sync_pkt_no_sending_vgrp_counter	8	Conn Sync drop sending packet for invalid sending virtual group
	sync_pkt_empty_buff_counter	8	Conn Sync drop sending packet for empty buffer
	query_rx_invalid_sync_version_counter	8	Conn Sync receive query packet with invalid sync version
	sync_pkt_no_receiving_vgrp_counter	8	Conn Sync drop sending packet for invalid receiving ip
	query_rx_zero_info_counter	8	Conn Query Packet Empty
	sync_persist_rx_no_such_rport	8	Persist Conn Sync Real Port Not Found
	sync_rx_by_inactive_peer_counter	8	Conn Sync receive packet by inactive peer
	sync_persist_rx_no_such_vport	8	Persist Conn Sync Virt Port Not Found
	sync_rx_aflex_table_entry_delete_counter	8	Sync receive packet with aflex table entry delete
	query_tx_get_buff_failed	8	Conn Query Get Buff Failure
	sync_rx_ext_h323_alg	8	Conn Sync H323 TCP ALG Failure
	sync_rx_ext_fw_apps	8	Conn Sync FIREWALL application information Failure
	sync_persist_rx_cannot_process_mandatory	8	Persist Conn Sync Process Mandatory Invalid
	sync_rx_ext_dcfw_log	8	Conn Sync FIREWALL session logging information Failure
	sync_rx_invalid_sync_packet_counter	8	Conn Sync receive invalid packet
	sync_tx_aflex_table_entry_lifetime_counter	8	Sync send packet with aflex table entry lifetime
	sync_persist_rx_proto_not_supported	8	Persist Conn Sync Protocol Invalid
	sync_rx_aflex_create_counter	8	Conn Sync receive packet with aflex create
	sync_persist_rx_conn_get_failed	8	Persist Conn Sync Get Conn Failure
	sync_rx_ext_fw_gtp_echo_ext_info	8	FW GTP Echo Ext Info Received
	sync_rx_ext_lsn_acl_idle_timeout	8	Conn Sync LSN ACL Idle Timeout Failure
	sync_err_lsn_fullcone	8	Conn Sync LSN Fullcone Failure
	sync_tx_min_packed	2	Max Sync Msg Per Packet
	query_rx_unk_counter	8	Conn Query Unknown Type
	sync_rx_update_sctp_conn_addr	8	Update SCTP Addresses Received
	sync_tx_mon_entity	8	Acos Monitoring Entities Sync Messages Sent
	sync_rx_aflex_table_entry_set_counter	8	Sync receive packet with aflex table entry set
	sync_persist_rx_no_sg_group_info	8	Persist Conn Sync No Service Group Info Found
	sync_rx_no_such_vport	8	Conn Sync Virt Port Not Found
	sync_rx_aflex_table_entry_add_counter	8	Sync receive packet with aflex table entry add
	sync_rx_no_such_rport	8	Conn Sync Real Port Not Found
	sync_rx_unreached_pkt_counter	8	total number of unreached packets

continues on next page

Table 2.77 – continued from previous page

	Counter	Size	Description
	sync_rx_ext_dcfw_rule_idle_timeout	8	Conn Sync FIREWALL session rule idle timeout information Failure
	sync_rx_del_counter	2	Conn Sync Del Session Received counter
	query_rx_full_info_counter	8	Conn Query Packet Full
	sync_rx_ext_fw_gtp_u_info	8	FW GTP U Info Received
	query_rx_invalid_partition_counter	8	Conn Sync receive query packet with invalid partition
	sync_query_dcmsg_counter	8	Conn Sync query forward CPU
	sync_rx_no_dst_for_vport_inline	8	Conn Sync 'dst' not found for vport inline
	sync_rx_ext_fw_gtp_ext_info	8	FW GTP Ext Info Received

vrid attributes

blade-parameters

Description: blade-parameters is a **JSON Block**. Please see below for *blade-parameters*

Type: Object

Refernce Object: */axapi/v3/vrrp-a/vrid/{vrid-val}/blade-parameters*

floating-ip

Description: floating-ip is a **JSON Block**. Please see below for *floating-ip*

Type: Object

follow

Description: follow is a **JSON Block**. Please see below for *follow*

Type: Object

pair-follow

Description: pair-follow is a **JSON Block**. Please see below for *pair-follow*

Type: Object

preempt-mode

Description: preempt-mode is a **JSON Block**. Please see below for *preempt-mode*

Type: Object

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrid-val

Description Specify ha VRRP-A vrid

Type: number

Range: 0-31

Default: 0

pair-follow

Specification	
Type	*object*

pair-follow

Description Follow other VRRP-A vrid

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vrid-lead

Description Define a VRRP-A VRID leader

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

blade-parameters

Specification	
Type	*object*

fail-over-policy-template

Description Apply a fail over policy template (VRRP-A fail over policy template name)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/vrrp-a/fail-over-policy-template*

priority

Description VRRP-A priorty (Priority, default is 150)

Type: number

Range: 1-255

Default: 150

tracking-options

Description: tracking-options is a **JSON Block**. Please see below for *blade-parameters_tracking-options*

Type: Object

Refernce Object: */axapi/v3/vrrp-a/vrid/{vrid-val}/blade-parameters/tracking-options*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

blade-parameters_tracking-options

Specification	
Type	*object*

bgp

Description: bgp is a **JSON Block**. Please see below for *blade-parameters_tracking-options_bgp*

Type: Object

gateway

Description: gateway is a **JSON Block**. Please see below for *blade-parameters_tracking-options_gateway*

Type: Object

Refernce Object: */axapi/v3/vrrp-a/vrid/{vrid-val}/blade-parameters/tracking-options/gateway*

interface

Type: List

route

Description: route is a **JSON Block**. Please see below for *blade-parameters_tracking-options_route*

Type: Object

trunk-cfg

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlan-cfg

Type: List

blade-parameters_tracking-options_vlan-cfg

Specification	
Type	*list*
Block object keys	

priority-cost

Description The amount the priority will decrease

Type: number

Range: 1-255

timeout

Description

Type: number

Range: 2-600

vlan

Description VLAN tracking (VLAN id)

Type: number

Range: 1-4094

blade-parameters_tracking-options_route

Specification	
Type	*object*

ip-destination-cfg

Type: List

ipv6-destination-cfg

Type: List

blade-parameters_tracking-options_route_ipv6-destination-cfg

Specification	
Type	*list*
Block object keys	

distance

Description Route's administrative distance (default: match any)

Type: number

Range: 1-255

gatewayv6

Description Match the route's gateway (next-hop) (default: match any)

Type: string

Format: ipv6-address

ipv6-destination

Description IPv6 Destination Prefix

Type: string

Format: ipv6-address-plen

priority-cost

Description The amount the priority will decrease if the route is missing (The amount the priority will decrease if the route is not present)

Type: number

Range: 1-255

protocol

Description 'any': Match any routing protocol (default); 'static': Match only static routes (added by user); 'dynamic': Match routes added by dynamic routing protocols (e.g. OSPF);

Type: string

Supported Values: any, static, dynamic

Default: any

blade-parameters_tracking-options_route_ip-destination-cfg

Specification	
Type	*list*
Block object keys	

distance

Description Route's administrative distance (default: match any)

Type: number

Range: 1-255

gateway

Description Match the route's gateway (next-hop) (default: match any)

Type: string

Format: ipv4-address

ip-destination

Description Destination prefix

Type: string

Format: ipv4-address

mask

Description Destination prefix mask

Type: string

Format: ipv4-netmask

priority-cost

Description The amount the priority will decrease if the route is missing (The amount the priority will decrease if the route is not present)

Type: number

Range: 1-255

protocol

Description 'any': Match any routing protocol (default); 'static': Match only static routes (added by user); 'dynamic': Match routes added by dynamic routing protocols (e.g. OSPF);

Type: string

Supported Values: any, static, dynamic

Default: any

ipv6-address

Description IPV6 address

Type: string

Format: ipv6-address

trunk

Description Trunk interface (for link-local address only)

Type: number

Range: 1-4096

Refernce Object: */axapi/v3/interface/trunk*

ve

Description VE interface (for link-local address only)

Type: number

Range: 2-4094

Refernce Object: */axapi/v3/network/vlan*

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'associated_vip_count': Number of vips associated to vrid; 'associated_vport_count': Number of vports associated to vrid; 'associated_natpool_count': Number of nat pools associated to vrid;

Type: string

Supported Values: all, associated_vip_count, associated_vport_count, associated_natpool_count

preempt-mode

Specification	
Type	*object*

disable

Description disable preemption

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold

Description preemption threshold (preemption threshhold (0-255), default 0)

Type: number

Range: 0-255

Default: 0

follow

Specification	
Type	*object*

vrid-lead

Description Define a VRRP-A VRID leader

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

stats data

	Counter	Size	Description
	associated_natpool_count	8	Number of nat pools associated to vrid
	associated_vport_count	8	Number of vports associated to vrid
	associated_vip_count	8	Number of vips associated to vrid

operational data

	Counter	Size	Description
	init_status	string	init_status
	weight	number	weight
	peer-list		peer-list
	active_standby_local	string	active_standby_local
	vrid_lead	string	vrid_lead
	priority	number	priority
	state	enum	Output contains one of the following values: - Active, Standby
	became_active	string	became_active
	force_standby	string	force_standby
	unit	number	unit

vrid-lead-list

vrid-lead-list is **JSON List** of *vrid-lead attributes*

vrid-lead-list : [

{ *vrid-lead attributes* },

{ *vrid-lead attributes* },

...

]

vrid-lead attributes

partition

Description: partition is a **JSON Block**. Please see below for *partition*

Type: Object

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vrid-lead-str

Description VRRP-A VRID leader name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: default-vrid-lead

partition

Specification	
Type	*object*

name-cfg

Description: name-cfg is a **JSON Block**. Please see below for *partition_name-cfg*

Type: Object

partition

Description Partition name

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

shared-cfg

Description: shared-cfg is a **JSON Block**. Please see below for *partition_shared-cfg*

Type: Object

partition_shared-cfg

Specification	
Type	*object*

shared

Description Shared partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: shared and name are mutually exclusive

vrid

Description VRRP-A id

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vrid-value

Description Specify ha VRRP-A vrid

Type: number

Range: 0-31

partition_name-cfg

Specification	
Type	*object*

name

Description Partition name

Type: string

Maximum Length: 14 characters

Maximum Length: 1 characters

Mutual Exclusion: name and shared are mutually exclusive

Refernce Object: */axapi/v3/partition*

vrid

Description VRRP-A id

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vrid-value

Description Specify ha VRRP-A vrid

Type: number

Range: 0-7

2.118 waf

Objects:

2.118.1 waf

WAF related commands

waf Specification

Type	*Intermediate Resource*
Element Name	waf
Element URI	/axapi/v3/waf
Element Attributes	waf_attributes
Schema	`waf schema`

Operations Allowed:

Get Object

GET

/axapi/v3/waf

waf attributes

global

Description: global is a **JSON Block**. Please see below for *global*

Type: Object

Refernce Object: */axapi/v3/waf/global*

policy

Description: policy is a **JSON Block**. Please see below for *policy*

Type: Object

Refernce Object: */axapi/v3/waf/policy*

rule-set-config-list

Type: List

Refernce Object: /axapi/v3/waf/rule-set-config/{name}

template-list

Type: List

Refernce Object: */axapi/v3/waf/template/{name}*

wsdl

Description: wsdl is a **JSON Block**. Please see below for *wsdl*

Type: Object

Refernce Object: */axapi/v3/waf/wsdl*

xml-schema

Description: xml-schema is a **JSON Block**. Please see below for *xml-schema*

Type: Object

Refernce Object: */axapi/v3/waf/xml-schema*

rule-set-config-list

Specification	
Type	*list*
Block object keys	

deploy-mode

Description 'active': Deploy WAF rule-set in active mode; 'monitor': Deploy WAF rule-set in monitor mode, only log and statistics.;

Type: string

Supported Values: active, monitor

max-process-time

Description Specify maximum request processing time (in ms) per phase (default: 80)

Type: number

Range: 40-1500

max-rules-per-phase

Description Specify maximum rules per phase (default: 10000)

Type: number

Range: 100-65535

name

Description WAF rule-set-config template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

process-timeout-action

Description 'drop': Drop the request; 'deny': Deny the request; 'allow': Allow the request;

Type: string

Supported Values: drop, deny, allow

request-body-access

Description 'on': WAF rule-set allow request body processing; 'off': WAF rule-set disable request body processing;

Type: string

Supported Values: on, off

request-body-default-action

Description Specify WAF rule-set default actions for request-body phase (default: log,deny) (Specify default actions (ex: log,deny))

Type: string

Format: string-rlx

Maximum Length: 256 characters

Maximum Length: 1 characters

request-body-limit

Description Specify maximum request body size in KB for buffering (default: 1024)

Type: number

Range: 1-1048576

request-body-limit-action

Description 'reject': Reject the request (default); 'process-partial': Process partial request body;

Type: string

Supported Values: reject, process-partial

request-header-default-action

Description Specify WAF rule-set default actions for request-header phase (default: log,deny) (Specify default actions (ex: log,deny))

Type: string

Format: string-rlx

Maximum Length: 256 characters

Maximum Length: 1 characters

response-body-access

Description 'on': WAF rule-set allow response body processing; 'off': WAF rule-set disable response body processing;

Type: string

Supported Values: on, off

response-body-default-action

Description Specify WAF rule-set default actions for response-body phase (default: log,pass) (Specify default actions (ex: log,deny))

Type: string

Format: string-rlx

Maximum Length: 256 characters

Maximum Length: 1 characters

response-body-limit

Description Specify maximum response body in KB size for buffering (default: 512)

Type: number

Range: 1-1048576

response-body-limit-action

Description 'reject': Reject the response; 'process-partial': Process partial response body (default);

Type: string

Supported Values: reject, process-partial

response-body-mime-type

Description Specify MIME types that WAF rule-set will process (default: text/plain text/html) (Specify MIME types (ex: text/plain text/html))

Type: string

Format: string-rlx

Maximum Length: 1024 characters

Maximum Length: 1 characters

response-header-default-action

Description Specify WAF rule-set default actions for response-header phase (default: log,pass) (Specify default actions (ex: log,deny))

Type: string

Format: string-rlx

Maximum Length: 256 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global

Specification	
Type	*object*

template-list

Specification	
Type	*list*
Block object keys	

brute-force-protection

Description: brute-force-protection is a **JSON Block**. Please see below for *template-list_brute-force-protection*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/brute-force-protection*

cookie-security

Description: cookie-security is a **JSON Block**. Please see below for *template-list_cookie-security*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/cookie-security*

csp

Description Insert HTTP header Content-Security-Policy if necessary

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

csp-insert-type

Description 'insert-if-not-exist': Only insert the header when it does not exist; 'insert-always': Always insert the header even when there is a header with the same name;

Type: string

Supported Values: insert-if-not-exist, insert-always

csp-value

Description CSP header value, e.g., "script-src 'none'"

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

data-leak-prevention

Description: data-leak-prevention is a **JSON Block**. Please see below for *template-list_data-leak-prevention*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/data-leak-prevention*

deploy-mode

Description 'active': Deploy WAF in active (blocking) mode; 'passive': Deploy WAF in passive (log-only) mode; 'learning': Deploy WAF in learning mode;

Type: string

Supported Values: active, passive, learning

Default: active

evasion-check

Description: evasion-check is a **JSON Block**. Please see below for *template-list_evasion-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/evasion-check*

form-protection

Description: form-protection is a **JSON Block**. Please see below for *template-list_form-protection*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/form-protection*

http-limit-check

Description: http-limit-check is a **JSON Block**. Please see below for *template-list_http-limit-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/http-limit-check*

http-protocol-check

Description: http-protocol-check is a **JSON Block**. Please see below for *template-list_http-protocol-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/http-protocol-check*

http-redirect

Description Send HTTP redirect response (302 Found) to specifed URL (URL to redirect to when denying request)

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Mutual Exclusion: http-redirecthttp-resp-200, reset-conn and http-resp-403 are mutually exclusive

http-resp-200

Description Send HTTP response with status code 200 OK

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: http-resp-200http-redirect, reset-conn and http-resp-403 are mutually exclusive

http-resp-403

Description Send HTTP response with status code 403 Forbidden (default)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: http-resp-403http-redirect, http-resp-200 and reset-conn are mutually exclusive

json-check

Description: json-check is a **JSON Block**. Please see below for *template-list_json-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/json-check*

log-succ-reqs

Description Log successful waf requests

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

logging

Description Logging template (Logging Config name)

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/slb/template/logging*

name

Description WAF Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

parent

Description inherit from parent template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parent-template-waf

Description WAF template (WAF Config name)

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/waf/template*

request-check

Description: request-check is a **JSON Block**. Please see below for *template-list_request-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/request-check*

reset-conn

Description Reset the client connection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: reset-connhttp-redirect, http-resp-200 and http-resp-403 are mutually exclusive

resp-url-200

Description Response content to send client when denying request

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

resp-url-403

Description Response content to send client when denying request

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

response-cloaking

Description: response-cloaking is a **JSON Block**. Please see below for *template-list_response-cloaking*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/response-cloaking*

soap-format-check

Description Check XML document for SOAP format compliance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation-log-mask

Description: violation-log-mask is a **JSON Block**. Please see below for *template-list_violation-log-mask*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/violation-log-mask*

wsdl-file

Description Specify name of WSDL file for verifying XML body contents

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: wsdl-file and wsdl-resp-val-file are mutually exclusive

wsdl-resp-val-file

Description Specify name of WSDL file for verifying XML body contents

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: wsdl-resp-val-file and wsdl-file are mutually exclusive

xml-check

Description: xml-check is a **JSON Block**. Please see below for *template-list_xml-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/xml-check*

xml-schema-file

Description Specify name of XML-Schema file for verifying XML body contents

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: xml-schema-file and xml-schema-resp-val-file are mutually exclusive

xml-schema-resp-val-file

Description Specify name of XML-Schema file for verifying XML body contents

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: xml-schema-resp-val-file and xml-schema-file are mutually exclusive

template-list_violation-log-mask

Specification	
Type	*object*

query-param-name-equal-type

Description 'equals': Mask the query value if the query name equals to the string;

Type: string

Supported Values: equals

query-param-name-value

Description The list of Query parameter names

Type: string

Format: string-rlx

Maximum Length: 1031 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_data-leak-prevention

Specification	
Type	*object*

ccn-mask

Description Mask credit card numbers in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keep-end

Description Number of unmasked characters at the end (default: 0)

Type: number

Range: 0-65535

keep-start

Description Number of unmasked characters at the beginning (default: 0)

Type: number

Range: 0-65535

mask

Description Character to mask the matched pattern (default: X)

Type: string

Format: string-rlx

Maximum Length: 1 characters

Maximum Length: 1 characters

pcre-mask

Description Mask matched PCRE pattern in response

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssn-mask

Description Mask US Social Security numbers in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_brute-force-protection

Specification	
Type	*object*

brute-force-challenge-limit

Description Maximum brute-force events before sending challenge (default 2) (Maximum brute-force events before locking out client (default 2))

Type: number

Range: 0-65535

Default: 2

brute-force-global

Description Brute-force triggers apply globally instead of per-client (Apply brute-force triggers globally)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-lockout-limit

Description Maximum brute-force events before locking out client (default 5)

Type: number

Range: 0-65535

Default: 5

brute-force-lockout-period

Description Number of seconds client should be locked out (default 600)

Type: number

Range: 0-1800

Default: 600

brute-force-resp-codes

Description Trigger brute-force check on HTTP response code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-resp-codes-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

brute-force-resp-headers

Description Trigger brute-force check on HTTP response header names

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-resp-headers-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

brute-force-resp-string

Description Trigger brute-force check on HTTP response line

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-resp-string-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

brute-force-test-period

Description Number of seconds for brute-force event counting (default 60)

Type: number

Range: 0-600

Default: 60

challenge-action-cookie

Description Use Set-Cookie to determine if client allows cookies

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-action-javascript

Description Add JavaScript to response to test if client allows JavaScript

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-disable-action

Description 'enable': Enable brute force protections; 'disable': Disable brute force protections (default);

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_request-check

Specification	
Type	*object*

bot-check

Description Check User-Agent for known bots

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bot-check-policy-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

command-injection-check

Description Check to protect against command injection attacks

Type: string

Format: enum-list

command-injection-check-policy-file

Description Name of WAF policy command injection list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

lifetime

Description Session lifetime in minutes (default 10)

Type: number

Range: 1-1440

Default: 10

redirect-whitelist

Description Check Redirect URL against list of previously learned redirects

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

referer-check

Description Check referer to protect against CSRF attacks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

referer-domain-list

Description List of referer domains allowed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Mutual Exclusion: referer-domain-list and referer-domain-list-only are mutually exclusive

referer-domain-list-only

Description List of referer domains allowed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Mutual Exclusion: referer-domain-list-only and referer-domain-list are mutually exclusive

referer-safe-url

Description Safe URL to redirect to if referer is missing

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

session-check

Description Enable session checking via session cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sqlia-check

Description 'reject': Reject requests with SQLIA patterns; 'sanitize': Remove bad SQL from request;

Type: string

Supported Values: reject

sqlia-check-policy-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

url-blacklist

Description specify name of WAF policy list file to blacklist

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

url-learned-list

Description Check URL against list of previously learned URLs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

url-whitelist

Description specify name of WAF policy list file to whitelist

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

waf-blacklist-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

waf-whitelist-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

xss-check

Description 'reject': Reject requests with bad cookies; 'sanitize': Remove bad cookies from request;

Type: string

Supported Values: reject

xss-check-policy-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

template-list_cookie-security

Specification	
Type	*object*

cookie-policy

Type: List

set-cookie-policy

Type: List

tamper-protection-grace-period

Description Allow unrecognized cookies for a period of time after cookie encryption being applied (default 120 minutes)

Type: number

Range: 0-43200

Default: 120

tamper-protection-http-only

Description Add HttpOnly flag to cookies not in set-cookie-policy list (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

tamper-protection-samesite

Description 'none': none; 'lax': lax; 'strict': strict;

Type: string

Supported Values: none, lax, strict

Default: none

tamper-protection-secret

Description Cookie encryption secret

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

tamper-protection-secure

Description Add Secure flag to cookies not in set-cookie-policy list (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

tamper-protection-session-cookie-only

Description Only encrypt session cookies

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_cookie-security_set-cookie-policy

Specification	
Type	*list*
Block object keys	

set-cookie-policy-allow

Description Allow the cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-cookie-policy-http-only

Description Add HttpOnly flag to cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-cookie-policy-name

Description Name of cookie

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

set-cookie-policy-samesite

Description 'none': none; 'lax': lax; 'strict': strict;

Type: string

Supported Values: none, lax, strict

set-cookie-policy-secret

Description Cookie encryption secret

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

set-cookie-policy-secret-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

set-cookie-policy-secure

Description Add Secure flag to cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template-list_cookie-security_cookie-policy

Specification	
Type	*list*
Block object keys	

cookie-policy-allow

Description Allow the cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-policy-disallow

Description Block the cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-policy-name

Description Name of cookie

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

template-list_response-cloaking

Specification	
Type	*object*

filter-headers

Description Removes web server's identifying headers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hide-status-codes

Description Hides response status codes that are not allowed (default 4xx, 5xx)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hide-status-codes-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_json-check

Specification	
Type	*object*

format-check

Description Check HTTP body for JSON format compliance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-array-values

Description Maximum number of values in an array in a JSON request body (default 256) (Maximum number of values in a JSON array (default 256))

Type: number

Range: 0-4096

Default: 256

max-depth

Description Maximum recursion depth in a value in a JSON requesnt body (default 16) (Maximum recursion depth in a JSON value (default 16))

Type: number

Range: 0-4096

Default: 16

max-object-members

Description Maximum number of members in an object in a JSON request body (default 256) (Maximum number of members in a JSON object (default 256))

Type: number

Range: 0-4096

Default: 256

max-string-length

Description Maximum length of a string in a JSON request body (default 64) (Maximum length of a JSON string (default 64))

Type: number

Range: 0-4096

Default: 64

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_http-protocol-check

Specification	
Type	*object*

allowed-headers

Description List of allowed HTTP headers. Default is "". (List of HTTP headers allowed (default ""))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allowed-headers-list

Description Allowed HTTP headers. Default "Host Referer User-Agent Accept Accept-Encoding ..." (see docs for full list) (Allowed HTTP headers (default "Host Referer User-Agent Accept Accept-Encoding ..." (see docs for full list)))

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Default: Host Referer User-Agent Accept Accept-Encoding Accept-Language Accept-Language Authorization Cache-Control Content-Length

allowed-methods

Description List of allowed HTTP methods. Default is "GET POST". (List of HTTP methods allowed (default "GET POST"))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allowed-methods-list

Description List of allowed HTTP methods. Default is "GET POST". (List of HTTP methods allowed (default "GET POST"))

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Default: GET POST

allowed-versions

Description Enable allowed-versions check (default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allowed-versions-list

Description List of allowed HTTP versions (default "1.0 1.1 2")

Type: string

Format: enum-list

Default: 1.0,1.1,2

bad-multipart-request

Description Check for bad multipart/form-data request body

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

body-without-content-type

Description Check for Body request without Content-Type header in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

get-with-content

Description Check for GET request with Content-Length headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

head-with-content

Description Check for HEAD request with Content-Length headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

host-header-with-ip

Description Check for Host header with IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-url-encoding

Description Check for invalid URL encoding in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-content-length

Description Check for malformed content-length in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-header

Description Check for malformed HTTP header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-parameter

Description Check for malformed HTTP query/POST parameter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-request

Description Check for malformed HTTP request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-request-line

Description Check for malformed HTTP request line

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-header-value

Description Check for missing header value in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-host-header

Description Check for missing Host header in HTTP/1.1 request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multiple-content-length

Description Check for multiple Content-Length headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-ssl-cookie-prefix

Description Check for Bad __Secure- or __Host- Cookie Name prefixes in non-ssl request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

post-with-0-content

Description Check for POST request with Content-Length 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

post-without-content

Description Check for POST request without Content-Length/Chunked Encoding headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

post-without-content-type

Description Check for POST request without Content-Type header in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_xml-check

Specification	
Type	*object*

format

Description Check HTTP body for XML format compliance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-attr

Description Maximum number of attributes of an XML element (default 256)

Type: number

Range: 0-256

Default: 256

max-attr-name-len

Description Maximum length of an attribute name (default 128)

Type: number

Range: 0-2048

Default: 128

max-attr-value-len

Description Maximum length of an attribute text value (default 128)

Type: number

Range: 0-4096

Default: 128

max-cdata-len

Description Maximum length of an CDATA section of an element (default 65535)

Type: number

Range: 0-65535

Default: 65535

max-elem

Description Maximum number of XML elements (default 1024)

Type: number

Range: 0-8192

Default: 1024

max-elem-child

Description Maximum number of children of an XML element (default 1024)

Type: number

Range: 0-4096

Default: 1024

max-elem-depth

Description Maximum recursion level for element definition (default 256)

Type: number

Range: 0-4096

Default: 256

max-elem-name-len

Description Maximum length for an element name (default 128)

Type: number

Range: 0-65535

Default: 128

max-entity-decl

Description Maximum number of entity declarations (default 1024)

Type: number

Range: 0-1024

Default: 1024

max-entity-depth

Description Maximum depth of entities (default 32)

Type: number

Range: 0-32

Default: 32

max-namespace

Description Maximum number of namespace declarations (default 16)

Type: number

Range: 0-256

Default: 16

max-namespace-uri-len

Description Maximum length of a namespace URI (default 256)

Type: number

Range: 0-1024

Default: 256

sqlia

Description Check XML data against SQLIA policy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

xss

Description Check XML data against XSS policy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template-list_http-limit-check

Specification	
Type	*object*

max-content-length

Description Max length of content (default 4096) (Maximum length of content allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-content-length-value

Description Max length of content (default 4096) (Maximum length of content allowed (default 4096))

Type: number

Range: 0-2147483647

Default: 4096

max-cookie-header-length

Description Max Cookie header length allowed in request (default 4096) (Maximum length of cookie header allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookie-header-length-value

Description Max Cookie header length allowed in request (default 4096) (Maximum length of cookie header allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-cookie-name-length

Description Max Cookie name length allowed in request (default 64) (Maximum length of cookie name allowed (default 64))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookie-name-length-value

Description Max Cookie name length allowed in request (default 64) (Maximum length of cookie name allowed (default 64))

Type: number

Range: 0-65535

Default: 64

max-cookie-value-length

Description Max Cookie value length allowed in request (default 4096) (Maximum length of cookie value allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookie-value-length-value

Description Max Cookie value length allowed in request (default 4096) (Maximum length of cookie value allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-cookies

Description Max Cookies allowed in request (default 256) (Maximum number of cookie allowed (default 256))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookies-length

Description Total Cookies length allowed in request (default 4096) (Maximum length of all cookies in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookies-length-value

Description Total Cookies length allowed in request (default 4096) (Maximum length of all cookies in request (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-cookies-value

Description Max Cookies allowed in request (default 20) (Maximum number of cookie allowed (default 20))

Type: number

Range: 0-1023

Default: 20

max-entities

Description Maximum number of MIME entities allowed in request (default 10)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-entities-value

Description Maximum number of MIME entities allowed in request (default 10)

Type: number

Range: 0-512

Default: 10

max-header-length

Description Max header length allowed in request (default 4096) (Maximum length of header allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-header-length-value

Description Max header length allowed in request (default 4096) (Maximum length of header allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-header-name-length

Description Max header name length allowed in request (default 64) (Maximum length of header name allowed (default 64))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-header-name-length-value

Description Max header name length allowed in request (default 64) (Maximum length of header name allowed (default 64))

Type: number

Range: 0-65535

Default: 64

max-header-value-length

Description Max header value length allowed in request (default 4096) (Maximum length of header value allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-header-value-length-value

Description Max header value length allowed in request (default 4096) (Maximum length of header value allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-headers

Description Total headers length allowed in request (default 4096) (Maximum length of all headers in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-headers-length

Description Total headers length allowed in request (default 4096) (Maximum length of all headers in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-headers-length-value

Description Total headers length allowed in request (default 4096) (Maximum length of all headers in request (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-headers-value

Description Total number of headers allowed in request (default 64) (Maximum number of headers in request (default 64))

Type: number

Range: 0-255

Default: 64

max-param-name-length

Description Max query/POST parameter name length allowed in request (default 64) (Maximum length of query/POST parameter names allowed (default 64))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-param-name-length-value

Description Max query/POST parameter name length allowed in request (default 256) (Maximum length of query/POST parameter names allowed (default 256))

Type: number

Range: 0-65535

Default: 256

max-param-value-length

Description Max query/POST parameter value length allowed in request (default 4096) (Maximum length of query/POST parameter value allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-param-value-length-value

Description Max query/POST parameter value length allowed in request (default 4096) (Maximum length of query/POST parameter value allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-params

Description Total query/POST parameters allowed in request (default 4096) (Maximum number of query/POST parameters in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-params-length

Description Total query/POST paramaters length allowed in request (default 4096) (Maximum length of all params in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-params-length-value

Description Total query/POST parameters length allowed in request (default 4096) (Maximum length of all params in request (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-params-value

Description Total query/POST parameters allowed in request (default 64) (Maximum number of query/POST parameters in request (default 64))

Type: number

Range: 0-1024

Default: 64

max-post-length

Description Maximum content length allowed in POST request (default 20480)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-post-length-value

Description Maximum content length allowed in POST request (default 20480)

Type: number

Range: 0-2147483647

Default: 20480

max-query-length

Description Max length of query string (default 4096) (Maximum length of query string allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-query-length-value

Description Max length of query string (default 4096) (Maximum length of query string allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-request-length

Description Max length of request (default 4096) (Maximum length of request allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-request-length-value

Description Max length of request (default 20480) (Maximum length of request allowed (default 20480))

Type: number

Range: 0-2147483647

Default: 20480

max-request-line-length

Description Max length of request line (default 4096) (Maximum length of request line (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-request-line-length-value

Description Max length of request line (default 4096) (Maximum length of request line (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-url-length

Description Max length of url (default 4096) (Maximum length of url allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-url-length-value

Description Max length of url (default 4096) (Maximum length of url allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_evasion-check

Specification	
Type	*object*

apache-whitespace

Description Check for whitespace characters in URL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decode-entities

Description Decode entities in internal url

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

decode-escaped-chars

Description Decode escaped characters such as r n " xXX u00YY in internal url

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

decode-plus-chars

Description Decode '+' as space in URL (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

decode-unicode-chars

Description Check for evasion attempt using %u encoding of Unicode chars to bypass

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

dir-traversal

Description Check for directory traversal attempt

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

high-ascii-bytes

Description Check for evasion attempt using ASCII bytes with values

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

invalid-hex-encoding

Description Check for evasion attempt using invalid hex characters (not in 0-9,a-f)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-levels

Description Max levels of encoding allowed in request (default 2)

Type: number

Range: 0-64

Default: 2

multiple-slashes

Description Check for evasion attempt using multiple slashes/backslashes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove-comments

Description Remove comments from internal url

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove-spaces

Description Remove spaces from internal url

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_form-protection

Specification	
Type	*object*

csrf-check

Description Tag the form to protect against Cross-site Request Forgery

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

field-consistency-check

Description Form input consistency check

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-caching

Description Disable caching for response with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-non-ssl

Description Check whether SSL is used for request with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-request-non-post

Description Check whether POST is used for request with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-response-non-post

Description Check whether form method POST is used for response with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-response-non-post-sanitize

Description Change form method GET to POST (Use with caution: make sure server application still work)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-check-autocomplete

Description Check to protect against server-generated form which contain password fields that allow autocomplete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-check-non-masked

Description Check forms that have a password field with a textual type, resulting in this field not being masked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-check-non-ssl

Description Check forms that has a password field if the form is not sent over an SSL connection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

xml-schema

Specification	
Type	*object*

max-filesize

Description Set maximum XML-Schema file size (Maximum file size in KBytes, default is 32K)

Type: number

Range: 16-256

Default: 32

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

policy

Specification	
Type	*object*

max-filesize

Description Set maximum WAF policy file size (Maximum file size in KBytes, default is 32K)

Type: number

Range: 16-10240

Default: 32

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

wsdl

Specification	
Type	*object*

max-filesize

Description Set maximum WSDL file size (Maximum file size in KBytes, default is 32K)

Type: number

Range: 16-256

Default: 32

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.2 waf global

WAF global stats

global Specification

Type	*Configuration Resource*
Element Name	global
Element URI	/axapi/v3/waf/global
Element Attributes	global_attributes
Statistics Data URI	/axapi/v3/waf/global/stats
Schema	`global schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/global

global attributes

```
POST /axapi/v3/waf/global
Payload:
{
    "global": {
        "sampling-enable": [
            {
                "counters1": "all"
            }
        ]
    }
}
```

Get Object

GET

/axapi/v3/waf/global

global attributes

```
GET /axapi/v3/waf/global
Reponse:
{
    "global": {
        "uuid": "044827ea-c86b-11e9-ba2d-9778838992f8",
        "sampling-enable": [
            {
                "counters1": "all"
            }
        ],
        "a10-url": "/axapi/v3/waf/global"
```

(continues on next page)

(continued from previous page)

```
    }
}
```

Modify Object

POST

/axapi/v3/waf/global

global attributes

Replace Object

PUT

/axapi/v3/waf/global

global attributes

```
PUT /axapi/v3/waf/global
Payload:
{
    "global": {
        "sampling-enable": [
            {
                "counters1": "total_req"
            }
        ]
    }
}
```

Delete Object

DELETE

/axapi/v3/waf/global

global attributes

```
DELETE /axapi/v3/waf/global
Reponse:
{
    "response": {
        "status": "OK"
    }
}
```

global attributes

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys

Table 2.78 – continued from previous page

	Counter	Size	Description
	action_deny_redirect	8	Request Deny with Redirect
	http_limit_max_param_name_length_success	8	Limit check - MAX parameter name length check passed
	dlp_ccn_diners_violation	8	Diners Club Credit Card Number Detected
	http_protocol_malformed_parameter_success	8	Malformed parameter check passed
	http_protocol_invalid_url_encoding_violation	8	Invalid url encoding check violation
	xml_check_max_attr_value_len_success	8	XML Limit Value Length check passed
	request_check_url_whitelist_violation	8	URI White List violation
	request_check_xss_cookie_success	8	XSS Check Cookie passed
	request_check_command_injection_form_body_success	8	Command Injection Check form body arguments passed
	http_protocol_success	8	HTTP Check passed
	http_protocol_bad_multipart_request_violation	8	Bad multi-part request check violation
	xml_check_max_namespace_success	8	XML Limit Namespace check passed
	action_response_drop	8	Number of Dropped Responses
	dlp_ccn_mastercard_masked	8	MasterCard Credit Card Number Masked
	form_check_success	8	Post Form Check passed
	action_deny_custom_response	8	Request Deny with custom response
	xml_check_sqlia_violation	8	XML Sqlia Check violation
	cookie_security_sign_violation	8	Cookie Security - signing violation
	evasion_check_decode_escaped_chars_violation	8	Decode Escaped Chars check violation
	too_many_sessions	8	Too many sessions consumed
	cookie_security_add_secure_violation	8	Cookie Security - secure flag violation
	json_check_max_array_value_count_violation	8	JSON Limit Array Value Count violation
	evasion_check_max_levels_success	8	Max Levels check passed
	http_limit_max_query_length_violation	8	Limit check - MAX query length violation
	xml_check_max_elem_name_len_violation	8	XML Limit Element Name Length violation
	http_protocol_multiple_content_length_success	8	Multiple content-length headers check passed
	regex_violation	8	Regular expression failure
	xml_check_max_attr_violation	8	XML Limit Attribute violation
	http_limit_max_header_value_length_violation	8	MAX header value length check violation
	http_limit_max_request_line_length_success	8	Limit check - MAX request line length check passed
	cookie_security_disallowed_session_cookies	8	Cookie Security - disallowed session cookies
	xml_content_check_schema_success	8	XML Schema passed
	evasion_check_high_ascii_bytes_success	8	High Ascii Bytes check passed
	http_protocol_head_with_content_success	8	HEAD with content check passed
	http_limit_max_content_length_violation	8	MAX content-length check violation
	http_protocol_missing_header_value_violation	8	Missing header value check violation
	http_limit_max_cookie_header_length_violation	8	MAX cookie header length violation
	xml_check_max_cdata_len_success	8	XML Limit CData Length check passed
	response_cloaking_filter_headers_success	8	Response Headers Filter check passed

continues on next page

Table 2.78 – continued from previous page

	Counter	Size	Description
	cookie_security_missing_cookie_success	8	Cookie Security - request with missing cookie
	http_protocol_post_without_content_violation	8	POST without content check violation
	cookie_security_persistent_cookies_signed	8	Cookie Security - signed persistent cookies
	soap_check_success	8	Soap Check passed
	request_check_redirect_wlist_violation	8	Redirect Whitelist violation
	http_limit_max_request_line_length_violation	8	Limit check - MAX request line length violation
	action_response_log	8	Log response violation
	xml_check_max_elem_child_success	8	XML Limit Element Child check passed
	http_limit_max_post_length_success	8	MAX POST length check passed
	request_check_url_blacklist_violation	8	URI Black List violation
	dlp_ccn_discover_violation	8	Discover Credit Card Number Detected
	http_limit_max_headers_violation	8	Max Headers violation
	xml_check_max_elem_name_len_success	8	XML Limit Element Name Length check passed
	request_check_sqlia_post_body_sanitize	8	SQLIA Check Post Sanitized
	form_csrf_tag_violation	8	Form CSRF tag violation
	form_non_masked_password_success	8	Form Non Masked Password check passed
	json_check_max_string_violation	8	JSON Limit String violation
	http_protocol_non_ssl_cookie_prefix_violation	8	Cookie Name Prefix check violation
	http_limit_max_entities_success	8	Max Entities check passed
	action_drop	8	Number of Dropped Requests
	http_protocol_missing_header_value_success	8	Missing header value check violation
	action_response_allow	8	Response Action allowed
	xml_check_format_violation	8	XML Check violation
	request_check_xss_post_body_success	8	XSS Check Post passed
	xml_check_max_attr_success	8	XML Limit Attribute check passed
	dlp_ccn_amex_masked	8	Amex Credit Card Number Masked
	form_password_autocomplete_violation	8	Form Password Autocomplete violation
	response_cloaking_hide_status_code_violation	8	Response Hide Code violation
	request_check_sqlia_url_success	8	SQLIA Check URL passed
	http_protocol_allowed_headers_violation	8	HTTP headers check violation
	brute_force_violation	8	Brute-Force checks violation
	brute_force_challenge_captcha_success	8	Captcha challenge check passed
	brute_force_response_headers_triggered	8	Brute Force Response Headers Triggered
	http_limit_max_param_name_length_violation	8	Limit check - MAX parameter name length violation
	cookie_security_add_samesite_success	8	Cookie Security - samesite attribute added successfully
	evasion_check_remove_comments_violation	8	Remove Comments check violation
	request_check_command_injection_form_body_violation	8	Command Injection Check form body arguments violation
	evasion_check_decode_entities_violation	8	Decode Entities check violation

continues on next page

Table 2.78 – continued from previous page

	Counter	Size	Description
	request_check_session_check_violation	8	Session Check violation
	form_non_ssl_success	8	Form Non SSL check passed
	cookie_security_session_cookies_signed	8	Cookie Security - signed session cookies
	xml_check_max_entity_depth_violation	8	XML Limit Entity Depth violation
	xml_content_check_wsdl_violation	8	WSDL violation
	json_check_max_depth_success	8	JSON Limit Depth check passed
	http_protocol_get_with_content_violation	8	GET with content check violation
	cookie_security_allowed_session_set_cookies	8	Cookie Security - allowed session Set-Cookies
	xml_check_namespace_uri_len_success	8	XML Limit Namespace URI Length check passed
	evasion_check_multiple_slashes_success	8	Multiple Slashes check passed
	http_limit_max_params_length_violation	8	Limit check - MAX parameters total length violation
	http_protocol_violation	8	HTTP Check violation
	csp_header_inserted	8	CSP header Inserted
	form_non_ssl_violation	8	Form Non SSL violation
	http_protocol_host_header_with_ip_success	8	Host header with IP check passed
	sessions_freed	8	Sessions freed
	out_of_sessions	8	Out of sessions
	dlp_ssn_violation	8	Social Security Number Mask violation
	form_response_non_post_success	8	Response form method was POST
	sessions_alloc	8	Sessions allocated
	request_check_command_injection_headers_violation	8	Command Injection Check headers violation
	form_response_non_post_sanitize	8	Changed response form method to POST
	action_response_deny_redirect	8	Response Deny with Redirect
	request_check_referer_success	8	Referer Check passed
	cookie_security_missing_cookie_violation	8	Cookie Security - missing cookie violation
	http_protocol_malformed_content_length_violation	8	Malformed content-length check violation
	cookie_security_persistent_cookies_encrypted	8	Cookie Security - encrypted persistent cookies
	evasion_check_decode_unicode_chars_violation	8	Decode Unicode Chars check violation
	evasion_check_invalid_hex_encoding_success	8	Invalid Hex Encoding check passed
	evasion_check_apache_whitespace_violation	8	Apache Whitespace check violation
	cookie_security_signature_check_success	8	Cookie Security - signature check successful
	brute_force_challenge_limit_violation	8	Lockout limit violation
	total_req	8	Total Requests
	http_limit_max_cookie_value_length_success	8	MAX cookie value length check passed
	http_protocol_multiple_content_length_violation	8	Multiple content-length headers check violation
	action_deny_403	8	Request Deny with 403
	action_response_deny_reset	8	Deny with Resets

continues on next page

Table 2.78 – continued from previous page

	Counter	Size	Description
	form_csrf_tag_success	8	Form CSRF tag passed
	http_protocol_post_with_0_content_success	8	POST with 0 content check passed
	cookie_security_encrypt_success	8	Cookie Security - encrypt successful
	request_check_xss_cookie_sanitize	8	XSS Check Cookie Sanitized
	cookie_security_cookie_policy_success	8	Cookie Security - cookie policy passed
	xml_content_check_wsdl_success	8	WSDL passed
	cookie_security_disallowed_persistent_set_cookie	8	Cookie Security - disallowed persistent Set-Cookies
	action_response_deny_403	8	Response Deny with 403
	cookie_security_decrypt_violation	8	Cookie Security - decrypt violation
	http_protocol_get_with_content_success	8	GET with content check passed
	request_check_redirect_wlist_learn	8	Redirect Whitelist Learn
	http_limit_max_header_value_length_success	8	MAX header value length check passed
	evasion_check_remove_comments_success	8	Remove Comments check passed
	brute_force_challenge_javascript_violation	8	JavaScript challenge violation
	evasion_check_multiple_encoding_levels_success	8	Multiple Encoding Levels check passed
	cookie_security_allowed_persistent_cookie	8	Cookie Security - allowed persistent cookies
	http_protocol_allowed_method_check_success	8	HTTP Method Check passed
	request_check_url_list_violation	8	URL Check violation
	cookie_security_add_samesite_violation	8	Cookie Security - samesite attribute violation
	http_limit_max_query_length_success	8	Limit check - MAX query length check passed
	cookie_security_add_http_only_success	8	Cookie Security - http-only flag added successfully
	dlp_ccn_amex_violation	8	Amex Credit Card Number Detected
	json_check_max_string_success	8	JSON Limit String check passed
	http_limit_max_cookie_value_length_violation	8	MAX cookie value length violation
	brute_force_challenge_captcha_violation	8	Captcha challenge violation
	dlp_pcre_success	8	PCRE Mask check passed
	xml_check_max_entity_exp_success	8	XML Limit Entity Expansions check passed
	cookie_security_session_cookies_encrypted	8	Cookie Security - encrypted session cookies
	http_limit_max_cookies_violation	8	Max Cookies violation

2.118.3 waf policy

Manage WAF Policy files

policy Specification

Type	*Configuration Resource*
Element Name	policy
Element URI	/axapi/v3/waf/policy
Element Attributes	policy_attributes
Schema	`policy schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/policy

policy attributes

```
POST /axapi/v3/waf/policy
Payload:
{
    "policy": {
        "max-filesize": 16
    }
}
```

Get Object

GET

/axapi/v3/waf/policy

policy attributes

```
GET /axapi/v3/waf/policy
Reponse:
{
    "policy": {
        "max-filesize": 16,
        "uuid": "248dc9ea-6130-11d9-a3e6-001fa00680a0",
        "a10-url": "/axapi/v3/waf/policy"
    }
}
```

Modify Object

POST

/axapi/v3/waf/policy

policy attributes

Replace Object

PUT

/axapi/v3/waf/policy

policy attributes

```
PUT /axapi/v3/waf/policy
Payload:
{
    "policy": {
        "max-filesize": 17
    }
}
```

Delete Object

DELETE

/axapi/v3/waf/policy

policy attributes

```
DELETE /axapi/v3/waf/policy
Reponse:
{
    "response": {
        "status": "OK"
    }
}
```

policy attributes

max-filesize

Description Set maximum WAF policy file size (Maximum file size in KBytes, default is 32K)

Type: number

Range: 16-10240

Default: 32

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.4 waf template

Manage WAF template configuration

template Specification

Type	*Collection*
Object Key(s)	*name*
Collection Name	*template-list*
Collection URI	/axapi/v3/waf/template
Element Name	template
Element URI	/axapi/v3/waf/template/{name}
Element Attributes	template_attributes
Schema	`template schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template

template attributes

```
POST /axapi/v3/waf/template/
Payload:
{
    "template": {
        "name": "a",
        "user-tag": "a"
    }
}
```

Create List

POST

/axapi/v3/waf/template

template attributes

Get Object

GET

/axapi/v3/waf/template/{name}

template attributes

```
GET /axapi/v3/waf/template/a
Reponse:
{
    "template": {
        "name": "a",
        "csp": 0,
        "http-resp-200": 0,

    }
}
```

template-list

template-list is **JSON List** of *template attributes*

template-list : [

{ *template attributes* },

{ *template attributes* },

...

]

template attributes

brute-force-protection

Description: brute-force-protection is a **JSON Block**. Please see below for *brute-force-protection*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/brute-force-protection*

cookie-security

Description: cookie-security is a **JSON Block**. Please see below for *cookie-security*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/cookie-security*

csp

Description Insert HTTP header Content-Security-Policy if necessary

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

csp-insert-type

Description 'insert-if-not-exist': Only insert the header when it does not exist; 'insert-always': Always insert the header even when there is a header with the same name;

Type: string

Supported Values: insert-if-not-exist, insert-always

csp-value

Description CSP header value, e.g., "script-src 'none'"

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

data-leak-prevention

Description: data-leak-prevention is a **JSON Block**. Please see below for *data-leak-prevention*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/data-leak-prevention*

deploy-mode

Description 'active': Deploy WAF in active (blocking) mode; 'passive': Deploy WAF in passive (log-only) mode; 'learning': Deploy WAF in learning mode;

Type: string

Supported Values: active, passive, learning

Default: active

evasion-check

Description: evasion-check is a **JSON Block**. Please see below for *evasion-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/evasion-check*

form-protection

Description: form-protection is a **JSON Block**. Please see below for *form-protection*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/form-protection*

http-limit-check

Description: http-limit-check is a **JSON Block**. Please see below for *http-limit-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/http-limit-check*

http-protocol-check

Description: http-protocol-check is a **JSON Block**. Please see below for *http-protocol-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/http-protocol-check*

http-redirect

Description Send HTTP redirect response (302 Found) to specifed URL (URL to redirect to when denying request)

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Mutual Exclusion: http-redirecthttp-resp-200, reset-conn and http-resp-403 are mutually exclusive

http-resp-200

Description Send HTTP response with status code 200 OK

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: http-resp-200http-redirect, reset-conn and http-resp-403 are mutually exclusive

http-resp-403

Description Send HTTP response with status code 403 Forbidden (default)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: http-resp-403http-redirect, http-resp-200 and reset-conn are mutually exclusive

json-check

Description: json-check is a **JSON Block**. Please see below for *json-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/json-check*

log-succ-reqs

Description Log successful waf requests

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

logging

Description Logging template (Logging Config name)

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/slb/template/logging*

name

Description WAF Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

parent

Description inherit from parent template

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parent-template-waf

Description WAF template (WAF Config name)

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/waf/template*

request-check

Description: request-check is a **JSON Block**. Please see below for *request-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/request-check*

reset-conn

Description Reset the client connection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: reset-connhttp-redirect, http-resp-200 and http-resp-403 are mutually exclusive

resp-url-200

Description Response content to send client when denying request

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

resp-url-403

Description Response content to send client when denying request

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

response-cloaking

Description: response-cloaking is a **JSON Block**. Please see below for *response-cloaking*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/response-cloaking*

soap-format-check

Description Check XML document for SOAP format compliance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

violation-log-mask

Description: violation-log-mask is a **JSON Block**. Please see below for *violation-log-mask*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/violation-log-mask*

wsdl-file

Description Specify name of WSDL file for verifying XML body contents

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: wsdl-file and wsdl-resp-val-file are mutually exclusive

wsdl-resp-val-file

Description Specify name of WSDL file for verifying XML body contents

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: wsdl-resp-val-file and wsdl-file are mutually exclusive

xml-check

Description: xml-check is a **JSON Block**. Please see below for *xml-check*

Type: Object

Refernce Object: */axapi/v3/waf/template/{name}/xml-check*

xml-schema-file

Description Specify name of XML-Schema file for verifying XML body contents

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: xml-schema-file and xml-schema-resp-val-file are mutually exclusive

xml-schema-resp-val-file

Description Specify name of XML-Schema file for verifying XML body contents

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: xml-schema-resp-val-file and xml-schema-file are mutually exclusive

violation-log-mask

Specification	
Type	*object*

query-param-name-equal-type

Description 'equals': Mask the query value if the query name equals to the string;

Type: string

Supported Values: equals

query-param-name-value

Description The list of Query parameter names

Type: string

Format: string-rlx

Maximum Length: 1031 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

data-leak-prevention

Specification	
Type	*object*

ccn-mask

Description Mask credit card numbers in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keep-end

Description Number of unmasked characters at the end (default: 0)

Type: number

Range: 0-65535

keep-start

Description Number of unmasked characters at the beginning (default: 0)

Type: number

Range: 0-65535

mask

Description Character to mask the matched pattern (default: X)

Type: string

Format: string-rlx

Maximum Length: 1 characters

Maximum Length: 1 characters

pcre-mask

Description Mask matched PCRE pattern in response

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssn-mask

Description Mask US Social Security numbers in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

brute-force-protection

Specification	
Type	*object*

brute-force-challenge-limit

Description Maximum brute-force events before sending challenge (default 2) (Maximum brute-force events before locking out client (default 2))

Type: number

Range: 0-65535

Default: 2

brute-force-global

Description Brute-force triggers apply globally instead of per-client (Apply brute-force triggers globally)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-lockout-limit

Description Maximum brute-force events before locking out client (default 5)

Type: number

Range: 0-65535

Default: 5

brute-force-lockout-period

Description Number of seconds client should be locked out (default 600)

Type: number

Range: 0-1800

Default: 600

brute-force-resp-codes

Description Trigger brute-force check on HTTP response code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-resp-codes-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

brute-force-resp-headers

Description Trigger brute-force check on HTTP response header names

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-resp-headers-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

brute-force-resp-string

Description Trigger brute-force check on HTTP response reason phrase

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-resp-string-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

brute-force-test-period

Description Number of seconds for brute-force event counting (default 60)

Type: number

Range: 0-600

Default: 60

challenge-action-cookie

Description Use Set-Cookie to determine if client allows cookies

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-action-javascript

Description Add JavaScript to response to test if client allows JavaScript

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-disable-action

Description 'enable': Enable brute force protections; 'disable': Disable brute force protections (default);

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

request-check

Specification	
Type	*object*

bot-check

Description Check User-Agent for known bots

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bot-check-policy-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

command-injection-check

Description Check to protect against command injection attacks

Type: string

Format: enum-list

command-injection-check-policy-file

Description Name of WAF policy command injection list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

lifetime

Description Session lifetime in minutes (default 10)

Type: number

Range: 1-1440

Default: 10

redirect-whitelist

Description Check Redirect URL against list of previously learned redirects

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

referer-check

Description Check referer to protect against CSRF attacks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

referer-domain-list

Description List of referer domains allowed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Mutual Exclusion: referer-domain-list and referer-domain-list-only are mutually exclusive

referer-domain-list-only

Description List of referer domains allowed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Mutual Exclusion: referer-domain-list-only and referer-domain-list are mutually exclusive

referer-safe-url

Description Safe URL to redirect to if referer is missing

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

session-check

Description Enable session checking via session cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sqlia-check

Description 'reject': Reject requests with SQLIA patterns;

Type: string

Supported Values: reject

sqlia-check-policy-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

url-blacklist

Description specify name of WAF policy list file to blacklist

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

url-learned-list

Description Check URL against list of previously learned URLs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

url-whitelist

Description specify name of WAF policy list file to whitelist

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

waf-blacklist-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

waf-whitelist-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

xss-check

Description 'reject': Reject requests with bad cookies;

Type: string

Supported Values: reject

xss-check-policy-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

cookie-security

Specification	
Type	*object*

cookie-policy

Type: List

set-cookie-policy

Type: List

tamper-protection-grace-period

Description Allow unrecognized cookies for a period of time after cookie encryption being applied (default 120 minutes)

Type: number

Range: 0-43200

Default: 120

tamper-protection-http-only

Description Add HttpOnly flag to cookies not in set-cookie-policy list (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

tamper-protection-samesite

Description 'none': none; 'lax': lax; 'strict': strict;

Type: string

Supported Values: none, lax, strict

Default: none

tamper-protection-secret

Description Cookie encryption secret

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

tamper-protection-secure

Description Add Secure flag to cookies not in set-cookie-policy list (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

tamper-protection-session-cookie-only

Description Only encrypt session cookies

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

cookie-security_set-cookie-policy

Specification	
Type	*list*
Block object keys	

set-cookie-policy-allow

Description Allow the cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-cookie-policy-http-only

Description Add HttpOnly flag to cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-cookie-policy-name

Description Name of cookie

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

set-cookie-policy-samesite

Description 'none': none; 'lax': lax; 'strict': strict;

Type: string

Supported Values: none, lax, strict

set-cookie-policy-secret

Description Cookie encryption secret

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

set-cookie-policy-secret-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

set-cookie-policy-secure

Description Add Secure flag to cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-security_cookie-policy

Specification	
Type	*list*
Block object keys	

cookie-policy-allow

Description Allow the cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-policy-disallow

Description Block the cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-policy-name

Description Name of cookie

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

response-cloaking

Specification	
Type	*object*

filter-headers

Description Removes web server's identifying headers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hide-status-codes

Description Hides response status codes that are not allowed (default 4xx, 5xx)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hide-status-codes-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

json-check

Specification	
Type	*object*

format-check

Description Check HTTP body for JSON format compliance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-array-values

Description Maximum number of values in an array in a JSON request body (default 256) (Maximum number of values in a JSON array (default 256))

Type: number

Range: 0-4096

Default: 256

max-depth

Description Maximum recursion depth in a value in a JSON requesnt body (default 16) (Maximum recursion depth in a JSON value (default 16))

Type: number

Range: 0-4096

Default: 16

max-object-members

Description Maximum number of members in an object in a JSON request body (default 256) (Maximum number of members in a JSON object (default 256))

Type: number

Range: 0-4096

Default: 256

max-string-length

Description Maximum length of a string in a JSON request body (default 64) (Maximum length of a JSON string (default 64))

Type: number

Range: 0-4096

Default: 64

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

http-protocol-check

Specification	
Type	*object*

allowed-headers

Description Enable allowed-headers check (default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allowed-headers-list

Description Allowed HTTP headers. Default "Host Referer User-Agent Accept Accept-Encoding ..." (see docs for full list) (Allowed HTTP headers (default "Host Referer User-Agent Accept Accept-Encoding ..." (see docs for full list)))

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Default: Host Referer User-Agent Accept Accept-Encoding Accept-Language Accept-Language Authorization Cache-Control Content-Length

allowed-methods

Description Enable allowed-methods check (default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allowed-methods-list

Description List of allowed HTTP methods. Default is "GET POST". (List of HTTP methods allowed (default "GET POST"))

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Default: GET POST

allowed-versions

Description Enable allowed-versions check (default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allowed-versions-list

Description List of allowed HTTP versions (default "1.0 1.1 2")

Type: string

Format: enum-list

Default: 1.0,1.1,2

bad-multipart-request

Description Check for bad multipart/form-data request body

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

body-without-content-type

Description Check for Body request without Content-Type header in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

get-with-content

Description Check for GET request with Content-Length headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

head-with-content

Description Check for HEAD request with Content-Length headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

host-header-with-ip

Description Check for Host header with IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-url-encoding

Description Check for invalid URL encoding in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-content-length

Description Check for malformed content-length in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-header

Description Check for malformed HTTP header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-parameter

Description Check for malformed HTTP query/POST parameter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-request

Description Check for malformed HTTP request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-request-line

Description Check for malformed HTTP request line

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-header-value

Description Check for missing header value in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-host-header

Description Check for missing Host header in HTTP/1.1 request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multiple-content-length

Description Check for multiple Content-Length headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-ssl-cookie-prefix

Description Check for Bad __Secure- or __Host- Cookie Name prefixes in non-ssl request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

post-with-0-content

Description Check for POST request with Content-Length 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

post-without-content

Description Check for POST request without Content-Length/Chunked Encoding headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

post-without-content-type

Description Check for POST request without Content-Type header in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

xml-check

Specification	
Type	*object*

format

Description Check HTTP body for XML format compliance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-attr

Description Maximum number of attributes of an XML element (default 256)

Type: number

Range: 0-256

Default: 256

max-attr-name-len

Description Maximum length of an attribute name (default 128)

Type: number

Range: 0-2048

Default: 128

max-attr-value-len

Description Maximum length of an attribute text value (default 128)

Type: number

Range: 0-4096

Default: 128

max-cdata-len

Description Maximum length of an CDATA section of an element (default 65535)

Type: number

Range: 0-65535

Default: 65535

max-elem

Description Maximum number of XML elements (default 1024)

Type: number

Range: 0-8192

Default: 1024

max-elem-child

Description Maximum number of children of an XML element (default 1024)

Type: number

Range: 0-4096

Default: 1024

max-elem-depth

Description Maximum recursion level for element definition (default 256)

Type: number

Range: 0-4096

Default: 256

max-elem-name-len

Description Maximum length for an element name (default 128)

Type: number

Range: 0-65535

Default: 128

max-entity-decl

Description Maximum number of entity declarations (default 1024)

Type: number

Range: 0-1024

Default: 1024

max-entity-depth

Description Maximum depth of entities (default 32)

Type: number

Range: 0-32

Default: 32

max-namespace

Description Maximum number of namespace declarations (default 16)

Type: number

Range: 0-256

Default: 16

max-namespace-uri-len

Description Maximum length of a namespace URI (default 256)

Type: number

Range: 0-1024

Default: 256

sqlia

Description Check XML data against SQLIA policy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

xss

Description Check XML data against XSS policy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

http-limit-check

Specification	
Type	*object*

max-content-length

Description Max length of content (Maximum length of content allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-content-length-value

Description Max length of content (default 4096) (Maximum length of content allowed (default 4096))

Type: number

Range: 0-2147483647

Default: 4096

max-cookie-header-length

Description Max Cookie header length allowed in request (Maximum length of cookie header allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookie-header-length-value

Description Max Cookie header length allowed in request (default 4096) (Maximum length of cookie header allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-cookie-name-length

Description Max Cookie name length allowed in request (Maximum length of cookie name allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookie-name-length-value

Description Max Cookie name length allowed in request (default 64) (Maximum length of cookie name allowed (default 64))

Type: number

Range: 0-65535

Default: 64

max-cookie-value-length

Description Max Cookie value length allowed in request (Maximum length of cookie value allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookie-value-length-value

Description Max Cookie value length allowed in request (default 4096) (Maximum length of cookie value allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-cookies

Description Max Cookies allowed in request (Maximum number of cookie allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookies-length

Description Total Cookies length allowed in request (Maximum length of all cookies in request)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookies-length-value

Description Total Cookies length allowed in request (default 4096) (Maximum length of all cookies in request (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-cookies-value

Description Max Cookies allowed in request (default 20) (Maximum number of cookie allowed (default 20))

Type: number

Range: 0-1023

Default: 20

max-entities

Description Maximum number of MIME entities allowed in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-entities-value

Description Maximum number of MIME entities allowed in request (default 10)

Type: number

Range: 0-512

Default: 10

max-header-length

Description Max header length allowed in request (Maximum length of header allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-header-length-value

Description Max header length allowed in request (default 4096) (Maximum length of header allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-header-name-length

Description Max header name length allowed in request (Maximum length of header name allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-header-name-length-value

Description Max header name length allowed in request (default 64) (Maximum length of header name allowed (default 64))

Type: number

Range: 0-65535

Default: 64

max-header-value-length

Description Max header value length allowed in request (Maximum length of header value allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-header-value-length-value

Description Max header value length allowed in request (default 4096) (Maximum length of header value allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-headers

Description Total number of headers allowed in request (Maximum number of headers in request)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-headers-length

Description Total headers length allowed in request (Maximum length of all headers in request)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-headers-length-value

Description Total headers length allowed in request (default 4096) (Maximum length of all headers in request (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-headers-value

Description Total number of headers allowed in request (default 64) (Maximum number of headers in request (default 64))

Type: number

Range: 0-255

Default: 64

max-param-name-length

Description Max query/POST parameter name length allowed in request (Maximum length of query/POST parameter names allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-param-name-length-value

Description Max query/POST parameter name length allowed in request (default 256) (Maximum length of query/POST parameter names allowed (default 256))

Type: number

Range: 0-65535

Default: 256

max-param-value-length

Description Max query/POST parameter value length allowed in request (Maximum length of query/POST parameter value allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-param-value-length-value

Description Max query/POST parameter value length allowed in request (default 4096) (Maximum length of query/POST parameter value allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-params

Description Total query/POST parameters allowed in request (Maximum number of query/POST parameters in request)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-params-length

Description Total query/POST parameters length allowed in request (Maximum length of all params in request)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-params-length-value

Description Total query/POST parameters length allowed in request (default 4096) (Maximum length of all params in request (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-params-value

Description Total query/POST parameters allowed in request (default 64) (Maximum number of query/POST parameters in request (default 64))

Type: number

Range: 0-1024

Default: 64

max-post-length

Description Maximum content length allowed in POST request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-post-length-value

Description Maximum content length allowed in POST request (default 20480)

Type: number

Range: 0-2147483647

Default: 20480

max-query-length

Description Max length of query string (Maximum length of query string allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-query-length-value

Description Max length of query string (default 4096) (Maximum length of query string allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-request-length

Description Max length of request (Maximum length of request allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-request-length-value

Description Max length of request (default 20480) (Maximum length of request allowed (default 20480))

Type: number

Range: 0-2147483647

Default: 20480

max-request-line-length

Description Max length of request line (Maximum length of request line)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-request-line-length-value

Description Max length of request line (default 4096) (Maximum length of request line (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-url-length

Description Max length of url (Maximum length of url allowed)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-url-length-value

Description Max length of url (default 4096) (Maximum length of url allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

evasion-check

Specification	
Type	*object*

apache-whitespace

Description Check for whitespace characters in URL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decode-entities

Description Decode entities in internal url (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

decode-escaped-chars

Description Decode escaped characters such as r n " xXX u00YY in internal url (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

decode-plus-chars

Description Decode '+' as space in URL (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

decode-unicode-chars

Description Check for evasion attempt using %u encoding of Unicode chars to bypass (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

dir-traversal

Description Check for directory traversal attempt (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

high-ascii-bytes

Description Check for evasion attempt using ASCII bytes with values

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

invalid-hex-encoding

Description Check for evasion attempt using invalid hex characters (not in 0-9,a-f)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-levels

Description Max levels of encoding allowed in request (default 2)

Type: number

Range: 0-64

Default: 2

multiple-slashes

Description Check for evasion attempt using multiple slashes/backslashes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove-comments

Description Remove comments from internal url

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove-spaces

Description Remove spaces from internal url (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

form-protection

Specification	
Type	*object*

csrf-check

Description Tag the form to protect against Cross-site Request Forgery

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

field-consistency-check

Description Form input consistency check

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-caching

Description Disable caching for response with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-non-ssl

Description Check whether SSL is used for request with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-request-non-post

Description Check whether POST is used for request with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-response-non-post

Description Check whether form method POST is used for response with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-response-non-post-sanitize

Description Change form method GET to POST (Use with caution: make sure server application still work)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-check-autocomplete

Description Check to protect against server-generated form which contain password fields that allow autocomplete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-check-non-masked

Description Check forms that have a password field with a textual type, resulting in this field not being masked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-check-non-ssl

Description Check forms that has a password field if the form is not sent over an SSL connection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

stats data

	Counter	Size	Description
	response_cloaking_hide_status_code_success	8	Response Hide Code check passed
	http_limit_max_header_name_length_violation	8	MAX header name length check violation
	dlp_ccn_mastercard_violation	8	MasterCard Credit Card Number Detected

Table 2.79 – continued from previous page

	Counter	Size	Description
	brute_force_challenge_cookie_sent	8	Cookie Challenge Sent
	http_limit_max_post_length_violation	8	MAX POST length violation
	cookie_security_signature_check_violation	8	Cookie Security - signature check violation
	http_protocol_host_header_with_ip_violation	8	Host header with IP check violation
	json_check_max_depth_violation	8	JSON Limit Depth violation
	evasion_check_decode_entities_success	8	Decode Entities check passed
	xml_check_max_namespace_violation	8	XML Limit Namespace violation
	brute_force_response_string_triggered	8	Brute Force Response string Triggered
	action_learn	8	Request Learning Updates
	request_check_url_list_success	8	URL Check passed
	http_protocol_malformed_request_line_violation	8	Malformed request line check violation
	http_limit_max_params_length_success	8	Limit check - MAX parameters total length check passed
	resp_denied	8	Responses Denied
	request_check_sqlia_post_body_success	8	SQLIA Check Post passed
	cookie_security_decrypt_success	8	Cookie Security - decrypt successful
	http_limit_max_param_value_length_success	8	Limit check - MAX parameter value length check passed
	xml_check_max_attr_name_len_violation	8	XML Limit Name Length violation
	cookie_security_session_cookies	8	Cookie Security - session cookies
	request_check_sqlia_url_violation	8	SQLIA Check URL violation
	form_tag_inserted	8	Form A10 Tag Inserted
	max_url_length_success	8	Limit check - MAX URL length check passed
	brute_force_response_codes_triggered	8	Response Codes Triggered
	http_limit_max_cookies_success	8	Max Cookies check passed
	http_limit_max_content_length_success	8	MAX content-length check passed
	cookie_security_sign_skip_rcache	8	Cookie Security - signing skipped - RAM Cache
	xml_check_max_attr_value_len_violation	8	XML Limit Value Length violation
	http_protocol_post_with_0_content_violation	8	POST with 0 content check violation
	cookie_security_disallowed_persistent_cookies	8	Cookie Security - disallowed persistent cookies
	xml_content_check_schema_violation	8	XML Schema violation
	evasion_check_multiple_slashes_violation	8	Multiple Slashes check violation
	http_limit_max_request_length_success	8	Limit check - MAX request length check passed
	response_cloaking_filter_headers_violation	8	Response Headers Filter violation
	request_check_command_injection_uri_query_violation	8	Command Injection Check url query arguments violation
	csp_header_violation	8	CSP header missing
	http_protocol_post_without_content_type_violation	8	POST without content type check violation
	http_limit_max_cookie_header_length_success	8	MAX cookie header length check passed
	http_protocol_post_without_content_success	8	POST without content check passed
	json_check_format_success	8	JSON Check passed
	xml_check_max_elem_success	8	XML Limit Element check passed
	xml_check_xss_success	8	XML XSS Check passed
	response_action_log	8	Log response violation

2.118.5 waf template brute-force-protection

Protect brute force attacks

brute-force-protection Specification

Type	*Configuration Resource*
Element Name	brute-force-protection
Element URI	/axapi/v3/waf/template/{name}/brute-force-protection
Element Attributes	brute-force-protection_attributes
Schema	`brute-force-protection schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template/{name}/brute-force-protection

brute-force-protection attributes

Get Object

GET

/axapi/v3/waf/template/{name}/brute-force-protection

brute-force-protection attributes

Modify Object

POST

/axapi/v3/waf/template/{name}/brute-force-protection

brute-force-protection attributes

Replace Object

PUT

/axapi/v3/waf/template/{name}/brute-force-protection

brute-force-protection attributes

Delete Object

DELETE

/axapi/v3/waf/template/{name}/brute-force-protection

brute-force-protection attributes

brute-force-protection attributes

brute-force-challenge-limit

Description Maximum brute-force events before sending challenge (default 2) (Maximum brute-force events before locking out client (default 2))

Type: number

Range: 0-65535

Default: 2

brute-force-global

Description Brute-force triggers apply globally instead of per-client (Apply brute-force triggers globally)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-lockout-limit

Description Maximum brute-force events before locking out client (default 5)

Type: number

Range: 0-65535

Default: 5

brute-force-lockout-period

Description Number of seconds client should be locked out (default 600)

Type: number

Range: 0-1800

Default: 600

brute-force-resp-codes

Description Trigger brute-force check on HTTP response code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-resp-codes-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

brute-force-resp-headers

Description Trigger brute-force check on HTTP response header names

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-resp-headers-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

brute-force-resp-string

Description Trigger brute-force check on HTTP response line

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

brute-force-resp-string-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

brute-force-test-period

Description Number of seconds for brute-force event counting (default 60)

Type: number

Range: 0-600

Default: 60

challenge-action-cookie

Description Use Set-Cookie to determine if client allows cookies

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

challenge-action-javascript

Description Add JavaScript to response to test if client allows JavaScript

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-disable-action

Description 'enable': Enable brute force protections; 'disable': Disable brute force protections (default);

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.6 waf template cookie-security

Protections to secure cookies

cookie-security Specification

Type	*Configuration Resource*
Element Name	cookie-security
Element URI	/axapi/v3/waf/template/{name}/cookie-security
Element Attributes	cookie-security_attributes
Schema	`cookie-security schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template/{name}/cookie-security

cookie-security attributes

Get Object

GET

/axapi/v3/waf/template/{name}/cookie-security

cookie-security attributes

cookie-security attributes

cookie-security attributes

cookie-policy

Type: List

set-cookie-policy

Type: List

tamper-protection-grace-period

Description Allow unrecognized cookies for a period of time after cookie encryption being applied (default 120 minutes)

Type: number

Range: 0-43200

Default: 120

tamper-protection-http-only

Description Add HttpOnly flag to cookies not in set-cookie-policy list (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

tamper-protection-samesite

Description 'none': none; 'lax': lax; 'strict': strict;

Type: string

Supported Values: none, lax, strict

Default: none

tamper-protection-secret

Description Cookie encryption secret

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

tamper-protection-secure

Description Add Secure flag to cookies not in set-cookie-policy list (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

tamper-protection-session-cookie-only

Description Only encrypt session cookies

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

set-cookie-policy

Specification	
Type	*list*
Block object keys	

set-cookie-policy-allow

Description Allow the cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-cookie-policy-http-only

Description Add HttpOnly flag to cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

set-cookie-policy-name

Description Name of cookie

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

set-cookie-policy-samesite

Description 'none': none; 'lax': lax; 'strict': strict;

Type: string

Supported Values: none, lax, strict

set-cookie-policy-secret

Description Cookie encryption secret

Type: string

Format: password

Maximum Length: 128 characters

Maximum Length: 1 characters

set-cookie-policy-secret-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

set-cookie-policy-secure

Description Add Secure flag to cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-policy

Specification	
Type	*list*
Block object keys	

cookie-policy-allow

Description Allow the cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-policy-disallow

Description Block the cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cookie-policy-name

Description Name of cookie

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

2.118.7 waf template data-leak-prevention

Data leak prevention

data-leak-prevention Specification

Type	*Configuration Resource*
Element Name	data-leak-prevention
Element URI	/axapi/v3/waf/template/{name}/data-leak-prevention
Element Attributes	data-leak-prevention_attributes
Schema	`data-leak-prevention schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template/{name}/data-leak-prevention

data-leak-prevention attributes

Get Object

GET

/axapi/v3/waf/template/{name}/data-leak-prevention

data-leak-prevention attributes

Modify Object

POST

/axapi/v3/waf/template/{name}/data-leak-prevention

data-leak-prevention attributes

Replace Object

PUT

/axapi/v3/waf/template/{name}/data-leak-prevention

data-leak-prevention attributes

Delete Object

DELETE

/axapi/v3/waf/template/{name}/data-leak-prevention

data-leak-prevention attributes

data-leak-prevention attributes

ccn-mask

Description Mask credit card numbers in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keep-end

Description Number of unmasked characters at the end (default: 0)

Type: number

Range: 0-65535

keep-start

Description Number of unmasked characters at the beginning (default: 0)

Type: number

Range: 0-65535

mask

Description Character to mask the matched pattern (default: X)

Type: string

Format: string-rlx

Maximum Length: 1 characters

Maximum Length: 1 characters

pcre-mask

Description Mask matched PCRE pattern in response

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

ssn-mask

Description Mask US Social Security numbers in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.8 waf template evasion-check

Check for evasion attempt

evasion-check Specification

Type	*Configuration Resource*
Element Name	evasion-check
Element URI	/axapi/v3/waf/template/{name}/evasion-check
Element Attributes	evasion-check_attributes
Schema	`evasion-check schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template/{name}/evasion-check

evasion-check attributes

Get Object

GET

/axapi/v3/waf/template/{name}/evasion-check

evasion-check attributes

Modify Object

POST

/axapi/v3/waf/template/{name}/evasion-check

evasion-check attributes

Replace Object

PUT

/axapi/v3/waf/template/{name}/evasion-check

evasion-check attributes

Delete Object

DELETE

/axapi/v3/waf/template/{name}/evasion-check

evasion-check attributes

evasion-check attributes

apache-whitespace

Description Check for whitespace characters in URL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

decode-entities

Description Decode entities in internal url

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

decode-escaped-chars

Description Decode escaped characters such as r n " xXX u00YY in internal url

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

decode-plus-chars

Description Decode '+' as space in URL (default on)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

decode-unicode-chars

Description Check for evasion attempt using %u encoding of Unicode chars to bypass

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

dir-traversal

Description Check for directory traversal attempt

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

high-ascii-bytes

Description Check for evasion attempt using ASCII bytes with values

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

invalid-hex-encoding

Description Check for evasion attempt using invalid hex characters (not in 0-9,a-f)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-levels

Description Max levels of encoding allowed in request (default 2)

Type: number

Range: 0-64

Default: 2

multiple-slashes

Description Check for evasion attempt using multiple slashes/backslashes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove-comments

Description Remove comments from internal url

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove-spaces

Description Remove spaces from internal url

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.9 waf template form-protection

Web form protection

form-protection Specification

Type	*Configuration Resource*
Element Name	form-protection
Element URI	/axapi/v3/waf/template/{name}/form-protection
Element Attributes	form-protection_attributes
Schema	`form-protection schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template/{name}/form-protection

form-protection attributes

Get Object

GET

/axapi/v3/waf/template/{name}/form-protection

form-protection attributes

Modify Object

POST

/axapi/v3/waf/template/{name}/form-protection

form-protection attributes

Replace Object

PUT

/axapi/v3/waf/template/{name}/form-protection

form-protection attributes

Delete Object

DELETE

form-protection attributes

form-protection attributes

csrf-check

Description Tag the form to protect against Cross-site Request Forgery

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

field-consistency-check

Description Form input consistency check

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-caching

Description Disable caching for response with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-non-ssl

Description Check whether SSL is used for request with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-request-non-post

Description Check whether POST is used for request with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-response-non-post

Description Check whether form method POST is used for response with forms

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

form-check-response-non-post-sanitize

Description Change form method GET to POST (Use with caution: make sure server application still work)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-check-autocomplete

Description Check to protect against server-generated form which contain password fields that allow autocomplete

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-check-non-masked

Description Check forms that have a password field with a textual type, resulting in this field not being masked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-check-non-ssl

Description Check forms that has a password field if the form is not sent over an SSL connection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.10 waf template http-limit-check

HTTP limit check

http-limit-check Specification

Type	*Configuration Resource*
Element Name	http-limit-check
Element URI	/axapi/v3/waf/template/{name}/http-limit-check

http-limit-check attributes

max-content-length

Description Max length of content (default 4096) (Maximum length of content allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-content-length-value

Description Max length of content (default 4096) (Maximum length of content allowed (default 4096))

Type: number

Range: 0-2147483647

Default: 4096

max-cookie-header-length

Description Max Cookie header length allowed in request (default 4096) (Maximum length of cookie header allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookie-header-length-value

Description Max Cookie header length allowed in request (default 4096) (Maximum length of cookie header allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-cookie-name-length

Description Max Cookie name length allowed in request (default 64) (Maximum length of cookie name allowed (default 64))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookie-name-length-value

Description Max Cookie name length allowed in request (default 64) (Maximum length of cookie name allowed (default 64))

Type: number

Range: 0-65535

Default: 64

max-cookie-value-length

Description Max Cookie value length allowed in request (default 4096) (Maximum length of cookie value allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookie-value-length-value

Description Max Cookie value length allowed in request (default 4096) (Maximum length of cookie value allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-cookies

Description Max Cookies allowed in request (default 256) (Maximum number of cookie allowed (default 256))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookies-length

Description Total Cookies length allowed in request (default 4096) (Maximum length of all cookies in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-cookies-length-value

Description Total Cookies length allowed in request (default 4096) (Maximum length of all cookies in request (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-cookies-value

Description Max Cookies allowed in request (default 20) (Maximum number of cookie allowed (default 20))

Type: number

Range: 0-1023

Default: 20

max-entities

Description Maximum number of MIME entities allowed in request (default 10)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-entities-value

Description Maximum number of MIME entities allowed in request (default 10)

Type: number

Range: 0-512

Default: 10

max-header-length

Description Max header length allowed in request (default 4096) (Maximum length of header allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-header-length-value

Description Max header length allowed in request (default 4096) (Maximum length of header allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-header-name-length

Description Max header name length allowed in request (default 64) (Maximum length of header name allowed (default 64))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-header-name-length-value

Description Max header name length allowed in request (default 64) (Maximum length of header name allowed (default 64))

Type: number

Range: 0-65535

Default: 64

max-header-value-length

Description Max header value length allowed in request (default 4096) (Maximum length of header value allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-header-value-length-value

Description Max header value length allowed in request (default 4096) (Maximum length of header value allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-headers

Description Total headers length allowed in request (default 4096) (Maximum length of all headers in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-headers-length

Description Total headers length allowed in request (default 4096) (Maximum length of all headers in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-headers-length-value

Description Total headers length allowed in request (default 4096) (Maximum length of all headers in request (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-headers-value

Description Total number of headers allowed in request (default 64) (Maximum number of headers in request (default 64))

Type: number

Range: 0-255

Default: 64

max-param-name-length

Description Max query/POST parameter name length allowed in request (default 64) (Maximum length of query/POST parameter names allowed (default 64))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-param-name-length-value

Description Max query/POST parameter name length allowed in request (default 256) (Maximum length of query/POST parameter names allowed (default 256))

Type: number

Range: 0-65535

Default: 256

max-param-value-length

Description Max query/POST parameter value length allowed in request (default 4096) (Maximum length of query/POST parameter value allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-param-value-length-value

Description Max query/POST parameter value length allowed in request (default 4096) (Maximum length of query/POST parameter value allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-params

Description Total query/POST parameters allowed in request (default 4096) (Maximum number of query/POST parameters in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-params-length

Description Total query/POST paramaters length allowed in request (default 4096) (Maximum length of all params in request (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-params-length-value

Description Total query/POST parameters length allowed in request (default 4096) (Maximum length of all params in request (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-params-value

Description Total query/POST parameters allowed in request (default 64) (Maximum number of query/POST parameters in request (default 64))

Type: number

Range: 0-1024

Default: 64

max-post-length

Description Maximum content length allowed in POST request (default 20480)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-post-length-value

Description Maximum content length allowed in POST request (default 20480)

Type: number

Range: 0-2147483647

Default: 20480

max-query-length

Description Max length of query string (default 4096) (Maximum length of query string allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-query-length-value

Description Max length of query string (default 4096) (Maximum length of query string allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-request-length

Description Max length of request (default 4096) (Maximum length of request allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-request-length-value

Description Max length of request (default 20480) (Maximum length of request allowed (default 20480))

Type: number

Range: 0-2147483647

Default: 20480

max-request-line-length

Description Max length of request line (default 4096) (Maximum length of request line (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-request-line-length-value

Description Max length of request line (default 4096) (Maximum length of request line (default 4096))

Type: number

Range: 0-65535

Default: 4096

max-url-length

Description Max length of url (default 4096) (Maximum length of url allowed (default 4096))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-url-length-value

Description Max length of url (default 4096) (Maximum length of url allowed (default 4096))

Type: number

Range: 0-65535

Default: 4096

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.11 waf template http-protocol-check

New HTTP protocol check

http-protocol-check Specification

Type	*Configuration Resource*
Element Name	http-protocol-check
Element URI	/axapi/v3/waf/template/{name}/http-protocol-check
Element Attributes	http-protocol-check_attributes
Schema	`http-protocol-check schema`

allowed-headers

Description List of allowed HTTP headers. Default is “”. (List of HTTP headers allowed (default “”))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allowed-headers-list

Description Allowed HTTP headers. Default “Host Referer User-Agent Accept Accept-Encoding …” (see docs for full list) (Allowed HTTP headers (default “Host Referer User-Agent Accept Accept-Encoding …” (see docs for full list)))

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Default: Host Referer User-Agent Accept Accept-Encoding Accept-Language Accept-Language Authorization Cache-Control Content-Length

allowed-methods

Description List of allowed HTTP methods. Default is “GET POST”. (List of HTTP methods allowed (default “GET POST”))

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allowed-methods-list

Description List of allowed HTTP methods. Default is “GET POST”. (List of HTTP methods allowed (default “GET POST”))

Type: string

Format: string-rlx

Maximum Length: 1023 characters

Maximum Length: 1 characters

Default: GET POST

allowed-versions

Description Enable allowed-versions check (default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

allowed-versions-list

Description List of allowed HTTP versions (default "1.0 1.1 2")

Type: string

Format: enum-list

Default: 1.0,1.1,2

bad-multipart-request

Description Check for bad multipart/form-data request body

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

body-without-content-type

Description Check for Body request without Content-Type header in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

get-with-content

Description Check for GET request with Content-Length headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

head-with-content

Description Check for HEAD request with Content-Length headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

host-header-with-ip

Description Check for Host header with IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-url-encoding

Description Check for invalid URL encoding in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-content-length

Description Check for malformed content-length in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-header

Description Check for malformed HTTP header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-parameter

Description Check for malformed HTTP query/POST parameter

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-request

Description Check for malformed HTTP request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

malformed-request-line

Description Check for malformed HTTP request line

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-header-value

Description Check for missing header value in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

missing-host-header

Description Check for missing Host header in HTTP/1.1 request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multiple-content-length

Description Check for multiple Content-Length headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-ssl-cookie-prefix

Description Check for Bad __Secure- or __Host- Cookie Name prefixes in non-ssl request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

post-with-0-content

Description Check for POST request with Content-Length 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

post-without-content

Description Check for POST request without Content-Length/Chunked Encoding headers in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

post-without-content-type

Description Check for POST request without Content-Type header in request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.12 waf template json-check

JSON check

json-check Specification

Type	*Configuration Resource*
Element Name	json-check
Element URI	/axapi/v3/waf/template/{name}/json-check

json-check attributes

format-check

Description Check HTTP body for JSON format compliance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-array-values

Description Maximum number of values in an array in a JSON request body (default 256) (Maximum number of values in a JSON array (default 256))

Type: number

Range: 0-4096

Default: 256

max-depth

Description Maximum recursion depth in a value in a JSON requesnt body (default 16) (Maximum recursion depth in a JSON value (default 16))

Type: number

Range: 0-4096

Default: 16

max-object-members

Description Maximum number of members in an object in a JSON request body (default 256) (Maximum number of members in a JSON object (default 256))

Type: number

Range: 0-4096

Default: 256

max-string-length

Description Maximum length of a string in a JSON request body (default 64) (Maximum length of a JSON string (default 64))

Type: number

Range: 0-4096

Default: 64

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.13 waf template request-check

Request check

request-check Specification

Type	*Configuration Resource*
Element Name	request-check
Element URI	/axapi/v3/waf/template/{name}/request-check
Element Attributes	request-check_attributes
Schema	`request-check schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template/{name}/request-check

request-check attributes

Get Object

GET

/axapi/v3/waf/template/{name}/request-check

request-check attributes

Modify Object

POST

/axapi/v3/waf/template/{name}/request-check

request-check attributes

Replace Object

PUT

/axapi/v3/waf/template/{name}/request-check

request-check attributes

Delete Object

DELETE

/axapi/v3/waf/template/{name}/request-check

request-check attributes

request-check attributes

bot-check

Description Check User-Agent for known bots

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bot-check-policy-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

command-injection-check

Description Check to protect against command injection attacks

Type: string

Format: enum-list

command-injection-check-policy-file

Description Name of WAF policy command injection list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

lifetime

Description Session lifetime in minutes (default 10)

Type: number

Range: 1-1440

Default: 10

redirect-whitelist

Description Check Redirect URL against list of previously learned redirects

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

referer-check

Description Check referer to protect against CSRF attacks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

referer-domain-list

Description List of referer domains allowed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Mutual Exclusion: referer-domain-list and referer-domain-list-only are mutually exclusive

referer-domain-list-only

Description List of referer domains allowed

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

Mutual Exclusion: referer-domain-list-only and referer-domain-list are mutually exclusive

referer-safe-url

Description Safe URL to redirect to if referer is missing

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

session-check

Description Enable session checking via session cookie

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sqlia-check

Description 'reject': Reject requests with SQLIA patterns; 'sanitize': Remove bad SQL from request;

Type: string

Supported Values: reject

sqlia-check-policy-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

url-blacklist

Description specify name of WAF policy list file to blacklist

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

url-learned-list

Description Check URL against list of previously learned URLs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

url-whitelist

Description specify name of WAF policy list file to whitelist

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

waf-blacklist-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

waf-whitelist-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

xss-check

Description 'reject': Reject requests with bad cookies; 'sanitize': Remove bad cookies from request;

Type: string

Supported Values: reject

xss-check-policy-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

2.118.14 waf template response-cloaking

Response cloaking

response-cloaking Specification

Type	*Configuration Resource*
Element Name	response-cloaking
Element URI	/axapi/v3/waf/template/{name}/response-cloaking
Element Attributes	response-cloaking_attributes
Schema	`response-cloaking schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template/{name}/response-cloaking

response-cloaking attributes

Get Object

GET

/axapi/v3/waf/template/{name}/response-cloaking

response-cloaking attributes

/axapi/v3/waf/template/{name}/response-cloaking

response-cloaking attributes

Delete Object

DELETE

/axapi/v3/waf/template/{name}/response-cloaking

response-cloaking attributes

response-cloaking attributes

filter-headers

Description Removes web server's identifying headers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hide-status-codes

Description Hides response status codes that are not allowed (default 4xx, 5xx)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hide-status-codes-file

Description Name of WAF policy list file

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.15 waf template violation-log-mask

violation log mask

violation-log-mask Specification

Type	*Configuration Resource*
Element Name	violation-log-mask
Element URI	/axapi/v3/waf/template/{name}/violation-log-mask
Element Attributes	violation-log-mask_attributes
Schema	`violation-log-mask schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template/{name}/violation-log-mask

violation-log-mask attributes

Get Object

GET

/axapi/v3/waf/template/{name}/violation-log-mask

violation-log-mask attributes

Modify Object

POST

/axapi/v3/waf/template/{name}/violation-log-mask

violation-log-mask attributes

Replace Object

PUT

/axapi/v3/waf/template/{name}/violation-log-mask

violation-log-mask attributes

Delete Object

DELETE

/axapi/v3/waf/template/{name}/violation-log-mask

violation-log-mask attributes

violation-log-mask attributes

query-param-name-equal-type

Description 'equals': Mask the query value if the query name equals to the string;

Type: string

Supported Values: equals

query-param-name-value

Description The list of Query parameter names

Type: string

Format: string-rlx

Maximum Length: 1031 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.16 waf template xml-check

XML check

xml-check Specification

Type	*Configuration Resource*
Element Name	xml-check
Element URI	/axapi/v3/waf/template/{name}/xml-check
Element Attributes	xml-check_attributes
Schema	`xml-check schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/template/{name}/xml-check

xml-check attributes

Get Object

GET

/axapi/v3/waf/template/{name}/xml-check

xml-check attributes

Modify Object

POST

/axapi/v3/waf/template/{name}/xml-check

xml-check attributes

Replace Object

PUT

/axapi/v3/waf/template/{name}/xml-check

xml-check attributes

Delete Object

DELETE

/axapi/v3/waf/template/{name}/xml-check

xml-check attributes

xml-check attributes

format

Description Check HTTP body for XML format compliance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-attr

Description Maximum number of attributes of an XML element (default 256)

Type: number

Range: 0-256

Default: 256

max-attr-name-len

Description Maximum length of an attribute name (default 128)

Type: number

Range: 0-2048

Default: 128

max-attr-value-len

Description Maximum length of an attribute text value (default 128)

Type: number

Range: 0-4096

Default: 128

max-cdata-len

Description Maximum length of an CDATA section of an element (default 65535)

Type: number

Range: 0-65535

Default: 65535

max-elem

Description Maximum number of XML elements (default 1024)

Type: number

Range: 0-8192

Default: 1024

max-elem-child

Description Maximum number of children of an XML element (default 1024)

Type: number

Range: 0-4096

Default: 1024

max-elem-depth

Description Maximum recursion level for element definition (default 256)

Type: number

Range: 0-4096

Default: 256

max-elem-name-len

Description Maximum length for an element name (default 128)

Type: number

Range: 0-65535

Default: 128

max-entity-decl

Description Maximum number of entity declarations (default 1024)

Type: number

Range: 0-1024

Default: 1024

max-entity-depth

Description Maximum depth of entities (default 32)

Type: number

Range: 0-32

Default: 32

max-namespace

Description Maximum number of namespace declarations (default 16)

Type: number

Range: 0-256

Default: 16

max-namespace-uri-len

Description Maximum length of a namespace URI (default 256)

Type: number

Range: 0-1024

Default: 256

sqlia

Description Check XML data against SQLIA policy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

xss

Description Check XML data against XSS policy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.118.17 waf wsdl

Manage Web Services Definition Language files

wsdl Specification

Type	*Configuration Resource*
Element Name	wsdl
Element URI	/axapi/v3/waf/wsdl
Element Attributes	wsdl_attributes
Schema	`wsdl schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/wsdl

wsdl attributes

```
POST /axapi/v3/waf/wsdl
Payload:
{
    "wsdl": {
        "max-filesize": 16
    }
}
```

Get Object

GET

/axapi/v3/waf/wsdl

wsdl attributes

```
GET /axapi/v3/waf/wsdl
Reponse:
{
    "wsdl": {
        "max-filesize": 16,
        "uuid": "418c6f38-6130-11d9-a3e6-001fa00680a0",
        "a10-url": "/axapi/v3/waf/wsdl"
    }
}
```

Modify Object

POST

/axapi/v3/waf/wsdl

wsdl attributes

Replace Object

PUT

/axapi/v3/waf/wsdl

wsdl attributes

```
PUT /axapi/v3/waf/wsdl
Payload:
{
    "wsdl": {
        "max-filesize": 17
    }
}
```

Delete Object

DELETE

/axapi/v3/waf/wsdl

wsdl attributes

```
DELETE /axapi/v3/waf/wsdl
Reponse:
{
    "response": {
        "status": "OK"
    }
}
```

wsdl attributes

max-filesize

Description Set maximum WSDL file size (Maximum file size in KBytes, default is 32K)

Type: number

Range: 16-256

Default: 32

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.118.18 waf xml-schema

Manage XML-Schema files

xml-schema Specification

Type	*Configuration Resource*
Element Name	xml-schema
Element URI	/axapi/v3/waf/xml-schema
Element Attributes	xml-schema_attributes
Schema	`xml-schema schema`

Operations Allowed:

Create Object

POST

/axapi/v3/waf/xml-schema

xml-schema attributes

```
POST /axapi/v3/waf/xml-schema
Payload:
{
    "xml-schema": {
        "max-filesize": 16
    }
}
```

Get Object

GET

/axapi/v3/waf/xml-schema

xml-schema attributes

```
GET /axapi/v3/waf/xml-schema
Reponse:
{
    "xml-schema": {

category-list-list

Type: List

Refernce Object: */axapi/v3/web-category/category-list/{name}*

cloud-query-cache-size

Description Maximum cache size for storing cloud query results

Type: number

cloud-query-disable

Description Disables cloud queries for URL's not present in local database(default enable)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

database-server

Description BrightCloud Database Server

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

db-update-time

Description Time of day to update database (default: 00:00)

Type: string

Format: time-hhmm

enable

Description Enable BrightCloud SDK

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

intercepted-urls

Description: intercepted-urls is a **JSON Block**. Please see below for *intercepted-urls*

Type: Object

Refernce Object: */axapi/v3/web-category/intercepted-urls*

license

Description: license is a **JSON Block**. Please see below for *license*

Type: Object

Refernce Object: */axapi/v3/web-category/license*

port

Description BrightCloud Query Server Listening Port(default 80)

Type: number

Range: 1-65535

Default: 80

proxy-server

Description: proxy-server is a **JSON Block**. Please see below for *proxy-server*

Type: Object

Refernce Object: */axapi/v3/web-category/proxy-server*

remote-syslog-enable

Description Enable data plane logging to a remote syslog server

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reputation-scope-list

Type: List

Refernce Object: */axapi/v3/web-category/reputation-scope/{name}*

rtu-cache-size

Description Maximum cache size for storing RTU updates

Type: number

rtu-update-disable

Description Disables real time updates(default enable)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rtu-update-interval

Description Interval to check for real time updates if enabled in mins(default 60)

Type: number

Range: 10-14400

Default: 60

server

Description BrightCloud Query Server

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-timeout

Description BrightCloud Servers Timeout in seconds (default: 15s)

Type: number

Range: 1-30

Default: 15

ssl-port

Description BrightCloud Servers SSL Port(default 443)

Type: number

Range: 1-65535

Default: 443

statistics

Description: statistics is a **JSON Block**. Please see below for *statistics*

Type: Object

Refernce Object: */axapi/v3/web-category/statistics*

url

Description: url is a **JSON Block**. Please see below for *url*

Type: Object

Refernce Object: */axapi/v3/web-category/url*

use-mgmt-port

Description Use management interface for all communication with BrightCloud

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-reputation

Description: web-reputation is a **JSON Block**. Please see below for *web-reputation*

Maximum Length: 1 characters

proxy-server

Specification	
Type	*object*

auth-type

Description 'ntlm': NTLM authentication(default); 'basic': Basic authentication;

Type: string

Supported Values: ntlm, basic

Default: ntlm

domain

Description Realm for NTLM authentication

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

http-port

Description Proxy server HTTP port

Type: number

Range: 1-65535

https-port

Description Proxy server HTTPS port(HTTP port will be used if not configured)

Type: number

Range: 1-65535

password

Description Password for proxy authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy-host

Description Proxy server hostname or IP address

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

secret-string

Description password value

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

username

Description Username for proxy authentication

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

proxy-server attributes

auth-type

Description 'ntlm': NTLM authentication(default); 'basic': Basic authentication;

Type: string

Supported Values: ntlm, basic

Default: ntlm

domain

Description Realm for NTLM authentication

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

http-port

Description Proxy server HTTP port

Type: number

Range: 1-65535

https-port

Description Proxy server HTTPS port(HTTP port will be used if not configured)

Type: number

Range: 1-65535

password

Description Password for proxy authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy-host

Description Proxy server hostname or IP address

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

secret-string

Description password value

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

username

Description Username for proxy authentication

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/network/vlan*

CHAPTER

THREE

OPERATIONAL APIS:

3.1 aam

Objects:

3.1.1 aam access-log

Access Log Info

access-log Specification

Type	*operational*
Element Name	access-log
Element URI	/axapi/v3/aam/access-log
Element Attributes	access-log_attributes
Operational Data URI	/axapi/v3/aam/access-log/oper
Schema	`access-log schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/aam/access-log

access-log attributes

access-log attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	access-status	string	access-status
	last	number	last
	target	string	target
	top	number	top
	log-list		log-list
	tail	number	tail
	host-name	string	host-name
	total	number	total

3.1.2 aam auth-log

Authentication Log Info

auth-log Specification

Type	*operational*
Element Name	auth-log
Element URI	/axapi/v3/aam/auth-log
Element Attributes	auth-log_attributes
Operational Data URI	/axapi/v3/aam/auth-log/oper
Schema	`auth-log schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/aam/auth-log

auth-log attributes

auth-log attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	last	number	last
	target	string	target
	top	number	top
	log-list		log-list
	tail	number	tail
	auth-status	string	auth-status
	total	number	total

3.1.3 aam file-category-log count-in-interval

Count in an interval

count-in-interval Specification

Type	*operational*
Element Name	count-in-interval
Element URI	/axapi/v3/aam/file-category-log/count-in-interval
Element Attributes	count-in-interval_attributes
Operational Data URI	/axapi/v3/aam/file-category-log/count-in-interval/oper
Schema	`count-in-interval schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/aam/file-category-log/count-in-interval

count-in-interval attributes

count-in-interval attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	interval	number	interval
	log-list		log-list

3.1.4 aam file-category-log log

Log List

log Specification

Type	*operational*
Element Name	log
Element URI	/axapi/v3/aam/file-category-log/log
Element Attributes	log_attributes
Operational Data URI	/axapi/v3/aam/file-category-log/log/oper
Schema	`log schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/aam/file-category-log/log

log attributes

log attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	tail	number	tail
	total	number	total
	last	number	last
	log-list		log-list

3.1.5 aam file-category-log top-destip

TOP destination IP

top-destip Specification

Type	*operational*
Element Name	top-destip
Element URI	/axapi/v3/aam/file-category-log/top-destip
Element Attributes	top-destip_attributes
Operational Data URI	/axapi/v3/aam/file-category-log/top-destip/oper
Schema	`top-destip schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/aam/file-category-log/top-destip

top-destip attributes

top-destip attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	top	number	top
	log-list		log-list

3.1.6 aam file-category-log top-fileext

Top file extention

top-fileext Specification

Type	*operational*
Element Name	top-fileext
Element URI	/axapi/v3/aam/file-category-log/top-fileext
Element Attributes	top-fileext_attributes
Operational Data URI	/axapi/v3/aam/file-category-log/top-fileext/oper
Schema	`top-fileext schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/aam/file-category-log/top-fileext

top-fileext attributes

top-fileext attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	top	number	top
	log-list		log-list

3.1.7 aam file-category-log top-filename

TOP filename

top-filename Specification

Type	*operational*
Element Name	top-filename
Element URI	/axapi/v3/aam/file-category-log/top-filename
Element Attributes	top-filename_attributes
Operational Data URI	/axapi/v3/aam/file-category-log/top-filename/oper
Schema	`top-filename schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/aam/file-category-log/top-filename

top-filename attributes

top-filename attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	top	number	top
	log-list		log-list

3.1.8 aam file-category-log top-srcip

Top source IP

top-srcip Specification

Type	*operational*
Element Name	top-srcip
Element URI	/axapi/v3/aam/file-category-log/top-srcip
Element Attributes	top-srcip_attributes
Operational Data URI	/axapi/v3/aam/file-category-log/top-srcip/oper
Schema	`top-srcip schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/aam/file-category-log/top-srcip

top-srcip attributes

top-srcip attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	top	number	top
	log-list		log-list

3.1.9 aam file-category-log top-url

Top url

top-url Specification

Type	*operational*
Element Name	top-url
Element URI	/axapi/v3/aam/file-category-log/top-url
Element Attributes	top-url_attributes
Operational Data URI	/axapi/v3/aam/file-category-log/top-url/oper
Schema	`top-url schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/aam/file-category-log/top-url

top-url attributes

top-url attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	top	number	top
	log-list		log-list

3.2 access-list

Objects:

3.2.1 access-list summary

summary Specification

Type	*operational*
Element Name	summary
Element URI	/axapi/v3/access-list/summary
Element Attributes	summary_attributes
Operational Data URI	/axapi/v3/access-list/summary/oper
Schema	`summary schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/access-list/summary

summary attributes

summary attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	acl-list		acl-list

3.3 active-partition

Objects:

3.3.1 active-partition

Change active partition

active-partition Specification

Type	*operational*
Element Name	active-partition
Element URI	/axapi/v3/active-partition
Element Attributes	active-partition_attributes
Schema	`active-partition schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/active-partition

active-partition attributes

active-partition attributes

curr_part_name

Description current active patition

Type: string

Maximum Length: 14 characters

Maximum Length: 1 characters

shared

Description Shared partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.4 admin

Objects:

3.4.1 admin aws-accesskey

Config AWS authorized access key

aws-accesskey Specification

Type	*operational*
Element Name	aws-accesskey
Element URI	/axapi/v3/admin/{user}/aws-accesskey
Element Attributes	aws-accesskey_attributes
Schema	`aws-accesskey schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/admin/{user}/aws-accesskey

aws-accesskey attributes

aws-accesskey attributes

delete

Description Delete an authorized aws accesskey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-url

Description File URL

Type: string

Format: url

import

Description Import an aws-accesskey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

show

Description Show authorized aws accesskey

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.4.2 admin azure-cred

Config Azure credentials

azure-cred Specification

Type	*operational*
Element Name	azure-cred
Element URI	/axapi/v3/admin/{user}/azure-cred
Element Attributes	azure-cred_attributes
Schema	`azure-cred schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/admin/{user}/azure-cred

azure-cred attributes

azure-cred attributes

delete

Description Delete an authorized Azure credentials

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-url

Description File URL

Type: string

Format: url

import

Description Import an azure-credentials

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

show

Description Show authorized azure credentials

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.4.3 admin ssh-pubkey

Config openssh authorized public keys management

ssh-pubkey Specification

Type	*operational*
Element Name	ssh-pubkey
Element URI	/axapi/v3/admin/{user}/ssh-pubkey
Element Attributes	ssh-pubkey_attributes
Schema	`ssh-pubkey schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/admin/{user}/ssh-pubkey

ssh-pubkey attributes

ssh-pubkey attributes

delete

Description Delete an authorized public key (SSH key index)

Type: number

Range: 1-1000000

file-url

Description File URL

Type: string

Format: url

import

Description Import an authorized public key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

list

Description List all authorized public keys

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.5 admin-detail

Objects:

3.5.1 admin-detail

get admin user priviledge

admin-detail Specification

Type	*operational*
Element Name	admin-detail
Element URI	/axapi/v3/admin-detail
Element Attributes	admin-detail_attributes
Operational Data URI	/axapi/v3/admin-detail/oper
Schema	`admin-detail schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/admin-detail

admin-detail attributes

admin-detail attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	user-list		user-list

3.6 admin-session

Objects:

3.6.1 admin-session

Admin session management

admin-session Specification

Type	*operational*
Element Name	admin-session
Element URI	/axapi/v3/admin-session
Element Attributes	admin-session_attributes
Operational Data URI	/axapi/v3/admin-session/oper
Schema	`admin-session schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/admin-session

admin-session attributes

admin-session attributes

all

Description Clear all admin sessions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clear

Description clear admin session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sid

Description Session ID

Type: number

Range: 0-2147483647

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	session-list		session-list

3.7 automatic-update

Objects:

3.7.1 automatic-update check-now

Manually check for update now

check-now Specification

Type	*operational*
Element Name	check-now
Element URI	/axapi/v3/automatic-update/check-now
Element Attributes	check-now_attributes
Schema	`check-now schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/automatic-update/check-now

check-now attributes

check-now attributes

feature-name

Description 'app-fw': Application Firewall;

Type: string

Supported Values: app-fw, ca-bundle, a10-threat-intel

from-staging-server

Description Get files from GLM Staging storage

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prod-ver

Description update to this specific version, if this option is not configured, update to the latest version

Type: string

Maximum Length: 70 characters

Maximum Length: 1 characters

stage-ver

Description update this specific version

Type: string

Maximum Length: 70 characters

Maximum Length: 1 characters

3.7.2 automatic-update checknow

Manually check for update from axapi

checknow Specification

Type	*operational*
Element Name	checknow
Element URI	/axapi/v3/automatic-update/checknow
Element Attributes	checknow_attributes
Statistics Data URI	/axapi/v3/automatic-update/checknow/stats
Operational Data URI	/axapi/v3/automatic-update/checknow/oper
Schema	`checknow schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/automatic-update/checknow

checknow attributes

checknow attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

stats data

	Counter	Size	Description
	dummy	8	Entry for a10countergen

operational data

	Counter	Size	Description
	feature-name	string	feature-name
	result	string	result

3.7.3 automatic-update info

automatic-update information opers

info Specification

Type	*operational*
Element Name	info
Element URI	/axapi/v3/automatic-update/info
Element Attributes	info_attributes
Statistics Data URI	/axapi/v3/automatic-update/info/stats
Operational Data URI	/axapi/v3/automatic-update/info/oper
Schema	`info schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/automatic-update/info

info attributes

info attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

stats data

	Counter	Size	Description
	dummy	8	Entry for a10countergen

operational data

	Counter	Size	Description
	feature-list		feature-list

3.7.4 automatic-update reset

Manually reset to default software version

reset Specification

Type	*operational*
Element Name	reset
Element URI	/axapi/v3/automatic-update/reset
Element Attributes	reset_attributes
Schema	`reset schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/automatic-update/reset

reset attributes

reset attributes

feature-name

Description 'app-fw': Application Firewall;

Type: string

Supported Values: app-fw, ca-bundle

3.7.5 automatic-update revert

Manually revert to previous software version

revert Specification

Type	*operational*
Element Name	revert
Element URI	/axapi/v3/automatic-update/revert
Element Attributes	revert_attributes
Schema	`revert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/automatic-update/revert

revert attributes

revert attributes

feature-name

Description 'app-fw': Application Firewall;

Type: string

Supported Values: app-fw, a10-threat-intel

3.8 axdebug

Objects:

3.8.1 axdebug apply-config

Apply AXDebug config file

apply-config Specification

Type	*operational*
Element Name	apply-config
Element URI	/axapi/v3/axdebug/apply-config
Element Attributes	apply-config_attributes
Schema	`apply-config schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/axdebug/apply-config

apply-config attributes

apply-config attributes

config-file

Description config file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

3.8.2 axdebug capture

Dump packets

capture Specification

Type	*operational*
Element Name	capture
Element URI	/axapi/v3/axdebug/capture
Element Attributes	capture_attributes
Schema	`capture schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/axdebug/capture

capture attributes

capture attributes

brief

Description Print basic packet information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

current-slot

Description Only for current-slot of chassis

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Include packet payload

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-stop

Description Non-stop execution

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

save

Description Save packets into file (Specify filename to save packets)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

3.8.3 axdebug delete

delete axdebug file

delete Specification

Type	*operational*
Element Name	delete
Element URI	/axapi/v3/axdebug/delete
Element Attributes	delete_attributes
Schema	`delete schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/axdebug/delete

delete attributes

delete attributes

capture-file

Description Delete a capture file (Specify target filename to change)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

config-file

Description Delete AXDebug config file (Specify target filename to change)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

3.8.4 axdebug exit

exit from axdebug and stop capture

exit Specification

Type	*operational*
Element Name	exit
Element URI	/axapi/v3/axdebug/exit
Element Attributes	exit_attributes
Schema	`exit schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/axdebug/exit

exit attributes

exit attributes

stop-capture

Description stop capture traffic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.8.5 axdebug save-config

save AXDebug config file

save-config Specification

Type	*operational*
Element Name	save-config
Element URI	/axapi/v3/axdebug/save-config
Element Attributes	save-config_attributes
Schema	`save-config schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/axdebug/save-config

save-config attributes

save-config attributes

config-file

Description config file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

default

Description save to default config file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.9 backup

Objects:

3.9.1 backup

Backup system files

backup Specification

Type	*operational*
Element Name	backup
Element URI	/axapi/v3/backup
Element Attributes	backup_attributes
Schema	`backup schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/backup

backup attributes

backup attributes

log

Description: log is a **JSON Block**. Please see below for *log*

Type: Object

Refernce Object: */axapi/v3/backup/log*

status

Description: status is a **JSON Block**. Please see below for *status*

Type: Object

Refernce Object: */axapi/v3/backup/status*

store

Description: store is a **JSON Block**. Please see below for *store*

Type: Object

Refernce Object: */axapi/v3/backup/store*

system

Description: system is a **JSON Block**. Please see below for *system*

Type: Object

Refernce Object: */axapi/v3/backup/system*

status

Specification	
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

system

Specification	
Type	*object*

encrypt

Description Encrypt the backup file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

remote-file

Description profile name for remote url

Type: string

Format: url

store-name

Description Save backup store information

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

store

Specification	
Type	*object*

creat-cfg

Description: creat-cfg is a **JSON Block**. Please see below for *store_creat-cfg*

Type: Object

delete-cfg

Description: delete-cfg is a **JSON Block**. Please see below for *store_delete-cfg*

Type: Object

store_delete-cfg

Specification	
Type	*object*

delete

Description Delete store

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

store-name-del

Description profile name for deleting

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

store_creat-cfg

Specification	
Type	*object*

create

Description Create store

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remote-file

Description profile name for remote url

Type: string

Format: url

store-name

Description profile name to store remote url

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

log

Specification	
Type	*object*

all

Description all log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

date

Description specify number of days

Type: number

Range: 1-31

day

Description Most recent day

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

expedite

Description Expedite the Backup

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

month

Description Most recent month

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

period

Description Specify backup period

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remote-file

Description profile name for remote url

Type: string

Format: url

stats-data

Description Backup web statistical data

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

store-name

Description Save backup store information

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

week

Description Most recent week

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.9.2 backup log

Backup log files

log Specification

Type	*operational*
Element Name	log
Element URI	/axapi/v3/backup/log
Element Attributes	log_attributes
Schema	`log schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/backup/log

log attributes

log attributes

all

Description all log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

date

Description specify number of days

Type: number

Range: 1-31

day

Description Most recent day

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

expedite

Description Expedite the Backup

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

month

Description Most recent month

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

period

Description Specify backup period

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remote-file

Description profile name for remote url

Type: string

Format: url

stats-data

Description Backup web statistical data

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

store-name

Description Save backup store information

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

week

Description Most recent week

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.9.3 backup status

Get backup system or backup log status

status Specification

Type	*operational*
Element Name	status
Element URI	/axapi/v3/backup/status
Element Attributes	status_attributes
Operational Data URI	/axapi/v3/backup/status/oper
Schema	`status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/backup/status

status attributes

status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	status	number	status
	message	string	message

3.9.4 backup store

Save backup store information

store Specification

Type	*operational*
Element Name	store
Element URI	/axapi/v3/backup/store
Element Attributes	store_attributes
Schema	`store schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/backup/store

store attributes

store attributes

creat-cfg

Description: creat-cfg is a **JSON Block**. Please see below for *creat-cfg*

Type: Object

delete-cfg

Description: delete-cfg is a **JSON Block**. Please see below for *delete-cfg*

Type: Object

delete-cfg

Specification	
Type	*object*

delete

Description Delete store

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

store-name-del

Description profile name for deleting

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

creat-cfg

Specification	
Type	*object*

create

Description Create store

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remote-file

Description profile name for remote url

Type: string

Format: url

store-name

Description profile name to store remote url

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

3.9.5 backup system

Backup system files

system Specification

Type	*operational*
Element Name	system
Element URI	/axapi/v3/backup/system
Element Attributes	system_attributes
Schema	`system schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/backup/system

system attributes

system attributes

encrypt

Description Encrypt the backup file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

remote-file

Description profile name for remote url

Type: string

Format: url

store-name

Description Save backup store information

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.10 boot-block-fix

Objects:

3.10.1 boot-block-fix

Fix booting problem

boot-block-fix Specification

Type	*operational*
Element Name	boot-block-fix
Element URI	/axapi/v3/boot-block-fix
Element Attributes	boot-block-fix_attributes
Schema	`boot-block-fix schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/boot-block-fix

boot-block-fix attributes

boot-block-fix attributes

cf

Description Compact flash

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hd

Description Hard disk

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.11 bootimage

Objects:

3.11.1 bootimage

Set next Boot Image

bootimage Specification

Type	*operational*
Element Name	bootimage
Element URI	/axapi/v3/bootimage
Element Attributes	bootimage_attributes
Operational Data URI	/axapi/v3/bootimage/oper
Schema	`bootimage schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/bootimage

bootimage attributes

bootimage attributes

cf-cfg

Description: cf-cfg is a **JSON Block**. Please see below for *cf-cfg*

Type: Object

hd-cfg

Description: hd-cfg is a **JSON Block**. Please see below for *hd-cfg*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

hd-cfg

Specification	
Type	*object*

hd

Description Hard disk

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pri

Description Primary image

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sec

Description Secondary image

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cf-cfg

Specification	
Type	*object*

cf

Description Compact flash

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cf-pri

Description Primary image

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

operational data

	Counter	Size	Description
	hd-sec	string	hd-sec
	cf-default	string	cf-default
	hd-pri	string	hd-pri
	cf-pri	string	cf-pri
	cf-sec	string	cf-sec
	hd-default	string	hd-default

3.12 cgnv6

Objects:

3.12.1 cgnv6 fixed-nat disable

Disable fixed-nat configuration (Operation)

disable Specification

Type	*operational*
Element Name	disable
Element URI	/axapi/v3/cgnv6/fixed-nat/disable
Element Attributes	disable_attributes
Schema	`disable schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/cgnv6/fixed-nat/disable

disable attributes

disable attributes

clear-session

Description Clear all sessions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inside-end-v4address

Description IPv4 Inside User End Address

Type: string

Format: ipv4-address

inside-end-v6address

Description IPv6 Inside User End Address

Type: string

Format: ipv6-address

inside-start-v4address

Description IPv4 Inside User Start Address

Type: string

Format: ipv4-address

inside-start-v6address

Description IPv6 Inside User Start Address

Type: string

Format: ipv6-address

ip-list

Description Name of IP List used to specify Inside Users

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

partition

Description Inside User Partition (Partition Name)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

v4-netmask

Description IPv4 Netmask

Type: string

Format: ipv4-netmask-brief

v6-netmask

Description Inside User IPv6 Netmask

Type: number

Range: 64-128

3.12.2 cgnv6 lw-4o6 binding-table

Configure LW-4over6 Binding Table

binding-table Specification

Type	*operational*
Object Key(s)	*name*
Element Name	binding-table
Element URI	/axapi/v3/cgnv6/lw-4o6/binding-table/{name}
Element Attributes	binding-table_attributes
Schema	`binding-table schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/cgnv6/lw-4o6/binding-table/{name}

binding-table attributes

binding-table-list

binding-table-list is **JSON List** of *binding-table attributes*

binding-table-list : [

{ *binding-table attributes* },

{ *binding-table attributes* },

...

]

binding-table attributes

name

Description LW-4over6 Binding Table Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tunnel-address-list

Type: List

Refernce Object: */axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

tunnel-address-list

Specification	
Type	*list*
Block object keys	

ipv6-tunnel-addr

Description Tunnel IPv6 Endpoint Address

Type: string

Format: ipv6-address

nat-address-list

Type: List

Refernce Object: */axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}/nat-address/{ipv4-nat-addr}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

tunnel-address-list_nat-address-list

Specification	
Type	*list*
Block object keys	

ipv4-nat-addr

Description NAT IPv4 Address

Type: string

Format: ipv4-address

port-range-list

Type: List

Refernce Object: */axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}/nat-address/{ipv4-nat-addr}/port-range/{port-start}+{port-end}+{tunnel-endpoint-address}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

tunnel-address-list_nat-address-list_port-range-list

Specification	
Type	*list*
Block object keys	

port-end

Description Port Range End

Type: number

Range: 1-65535

port-start

Description Single Port or Port Range Start

Type: number

Range: 1-65535

tunnel-endpoint-address

Description Configure LW-4over6 IPIP Tunnel Endpoint Address (LW-4over6 Tunnel Endpoint Address)

Type: string

Format: ipv6-address

3.12.3 cgnv6 lw-4o6 binding-table tunnel-address

Tunnel IPv6 Endpoint Address

tunnel-address Specification

Type	*operational*
Object Key(s)	*ipv6-tunnel-addr*
Element Name	tunnel-address
Element URI	/axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}
Element Attributes	tunnel-address_attributes
Schema	`tunnel-address schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}

tunnel-address attributes

tunnel-address-list

tunnel-address-list is **JSON List** of *tunnel-address attributes*

tunnel-address-list : [

{ *tunnel-address attributes* },

{ *tunnel-address attributes* },

...

]

tunnel-address attributes

ipv6-tunnel-addr

Description Tunnel IPv6 Endpoint Address

Type: string

Format: ipv6-address

nat-address-list

Type: List

Refernce Object: */axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}/nat-address/{ipv4-nat-addr}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

nat-address-list

Specification	
Type	*list*
Block object keys	

ipv4-nat-addr

Description NAT IPv4 Address

Type: string

Format: ipv4-address

port-range-list

Type: List

Refernce Object: */axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}/nat-address/{ipv4-nat-addr}/port-range/{port-start}+{port-end}+{tunnel-endpoint-address}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

nat-address-list_port-range-list

Specification	
Type	*list*
Block object keys	

port-end

Description Port Range End

Type: number

Range: 1-65535

port-start

Description Single Port or Port Range Start

Type: number

Range: 1-65535

tunnel-endpoint-address

Description Configure LW-4over6 IPIP Tunnel Endpoint Address (LW-4over6 Tunnel Endpoint Address)

Type: string

Format: ipv6-address

3.12.4 cgnv6 lw-4o6 binding-table tunnel-address nat-address

NAT IPv4 address

nat-address Specification

Type	*operational*
Object Key(s)	*ipv4-nat-addr*
Element Name	nat-address
Element URI	/axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}/nat-address/{ipv4-nat-addr}
Element Attributes	nat-address_attributes
Schema	`nat-address schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}/nat-address/{ipv4-nat-addr}

nat-address attributes

nat-address-list

nat-address-list is **JSON List** of *nat-address attributes*

nat-address-list : [

{ *nat-address attributes* },

{ *nat-address attributes* },

...

]

nat-address attributes

ipv4-nat-addr

Description NAT IPv4 Address

Type: string

Format: ipv4-address

port-range-list

Type: List

Refernce Object: */axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}/nat-address/{ipv4-nat-addr}/port-range/{port-start}+{port-end}+{tunnel-endpoint-address}*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

port-range-list

Specification	
Type	*list*
Block object keys	

port-end

Description Port Range End

Type: number

Range: 1-65535

port-start

Description Single Port or Port Range Start

Type: number

Range: 1-65535

tunnel-endpoint-address

Description Configure LW-4over6 IPIP Tunnel Endpoint Address (LW-4over6 Tunnel Endpoint Address)

Type: string

Format: ipv6-address

3.12.5 cgnv6 lw-4o6 binding-table tunnel-address nat-address port-range

Single Port or Port Range Start

port-range Specification

Type	*operational*
Object Key(s)	*port-start, port-end, tunnel-endpoint-address*
Element Name	port-range
Element URI	/axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}/nat-address/{ipv4-nat-addr}/port-range/{port-start}+{port-end}+{tunnel-endpoint-address}
Element Attributes	port-range_attributes
Schema	`port-range schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/cgnv6/lw-4o6/binding-table/{name}/tunnel-address/{ipv6-tunnel-addr}/nat-address/{ipv4-nat-addr}/port-range/{port-start}+{port-end}+{tunnel-endpoint-address}

port-range attributes

port-range-list

port-range-list is **JSON List** of *port-range attributes*

port-range-list : [

{ *port-range attributes* },

{ *port-range attributes* },

...

]

port-range attributes

port-end

Description Port Range End

Type: number

Range: 1-65535

port-start

Description Single Port or Port Range Start

Type: number

Range: 1-65535

tunnel-endpoint-address

Description Configure LW-4over6 IPIP Tunnel Endpoint Address (LW-4over6 Tunnel Endpoint Address)

Type: string

Format: ipv6-address

3.12.6 cgnv6 lw-4o6 binding-table-validate

Check for errors in LW-4over6 Binding Table

binding-table-validate Specification

Type	*operational*
Element Name	binding-table-validate
Element URI	/axapi/v3/cgnv6/lw-4o6/binding-table-validate
Element Attributes	binding-table-validate_attributes
Schema	`binding-table-validate schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/cgnv6/lw-4o6/binding-table-validate

binding-table-validate attributes

binding-table-validate attributes

binding-name

Description LW-4over6 Binding Table Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

3.12.7 cgnv6 scaleout address-mapping

address-mapping Specification

Type	*operational*
Element Name	address-mapping
Element URI	/axapi/v3/cgnv6/scaleout/address-mapping
Element Attributes	address-mapping_attributes
Operational Data URI	/axapi/v3/cgnv6/scaleout/address-mapping/oper
Schema	`address-mapping schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/cgnv6/scaleout/address-mapping

address-mapping attributes

address-mapping attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	active-node	number	active-node
	user-group	number	user-group
	standby-node	number	standby-node
	ip	ipv4-address	ip
	nat-ip	ipv4-address	nat-ip
	nat-pool	string	nat-pool
	ip-list		ip-list
	ipv6	ipv6-address	ipv6

3.13 chassis-info

Objects:

3.13.1 chassis-info

Info regarding the chassis state

chassis-info Specification

Type	*operational*
Element Name	chassis-info
Element URI	/axapi/v3/chassis-info
Element Attributes	chassis-info_attributes
Schema	`chassis-info schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/chassis-info

chassis-info attributes

chassis-info attributes

brief

Description Give brief Chassis State Info

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.14 chassis-infra

Objects:

3.14.1 chassis-infra

Chassis infrastructure commands

chassis-infra Specification

Type	*operational*
Element Name	chassis-infra
Element URI	/axapi/v3/chassis-infra
Element Attributes	chassis-infra_attributes
Schema	`chassis-infra schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/chassis-infra

chassis-infra attributes

chassis-infra attributes

debug-disable

Description Disable chassis infrastruture debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

debug-enable

Description Enable chassis infrastruture debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

debug-status

Description Show chassis infrastruture debugging status

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detailed

Description Give Chassis filesystem info(USED BY TAC ONLY)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sys-sync

Description Synchronize the Master and Blade filesystems (For A10 TAC Use Only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

system-sync-verify

Description Validate chassis filesytem synchronization status (For A10 TAC Use Only)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.15 clock

Objects:

3.15.1 clock

Configure time-of-day Clock

clock Specification

Type	*operational*
Element Name	clock
Element URI	/axapi/v3/clock
Element Attributes	clock_attributes
Schema	`clock schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/clock

clock attributes

clock attributes

set

Description: set is a **JSON Block**. Please see below for *set*

Type: Object

Refernce Object: */axapi/v3/clock/set*

show

Description: show is a **JSON Block**. Please see below for *show*

Type: Object

Refernce Object: */axapi/v3/clock/show*

set

Specification	
Type	*object*

time-cfg

Description: time-cfg is a **JSON Block**. Please see below for *set_time-cfg*

Type: Object

set_time-cfg

Specification	
Type	*object*

day-of-month

Description Day of the Month

Type: number

Range: 1-31

day-of-month-2

Description Day of the Month

Type: number

Range: 1-31

month

Description 'January': Month of the year; 'February': Month of the year; 'March': Month of the year; 'April': Month of the year; 'May': Month of the year; 'June': Month of the year; 'July': Month of the year; 'August': Month of the year; 'September': Month of the year; 'October': Month of the year; 'November': Month of the year; 'December': Month of the year;

Type: string

Supported Values: January, February, March, April, May, June, July, August, September, October, November, December

month-2

Description 'January': Month of the year; 'February': Month of the year; 'March': Month of the year; 'April': Month of the year; 'May': Month of the year; 'June': Month of the year; 'July': Month of the year; 'August': Month of the year; 'September': Month of the year; 'October': Month of the year; 'November': Month of the year; 'December': Month of the year;

Type: string

Supported Values: January, February, March, April, May, June, July, August, September, October, November, December

time

Description Current Time

Type: string

Format: time

year

Description Year

Type: number

Range: 2005-2035

show

Specification	
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.15.2 clock set

Set the Time and Date

set Specification

Type	*operational*
Element Name	set
Element URI	/axapi/v3/clock/set
Element Attributes	set_attributes
Schema	`set schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/clock/set

set attributes

set attributes

time-cfg

Description: time-cfg is a **JSON Block**. Please see below for *time-cfg*

Type: Object

time-cfg

Specification	
Type	*object*

day-of-month

Description Day of the Month

Type: number

Range: 1-31

day-of-month-2

Description Day of the Month

Type: number

Range: 1-31

month

Description 'January': Month of the year; 'February': Month of the year; 'March': Month of the year; 'April': Month of the year; 'May': Month of the year; 'June': Month of the year; 'July': Month of the year; 'August': Month of the year; 'September': Month of the year; 'October': Month of the year; 'November': Month of the year; 'December': Month of the year;

Type: string

Supported Values: January, February, March, April, May, June, July, August, September, October, November, December

month-2

Description 'January': Month of the year; 'February': Month of the year; 'March': Month of the year; 'April': Month of the year; 'May': Month of the year; 'June': Month of the year; 'July': Month of the year; 'August': Month of the year; 'September': Month of the year; 'October': Month of the year; 'November': Month of the year; 'December': Month of the year;

Type: string

Supported Values: January, February, March, April, May, June, July, August, September, October, November, December

time

Description Current Time

Type: string

Format: time

year

Description Year

Type: number

Range: 2005-2035

3.15.3 clock show

Configure time-of-day Clock

show Specification

Type	*operational*
Element Name	show
Element URI	/axapi/v3/clock/show
Element Attributes	show_attributes
Operational Data URI	/axapi/v3/clock/show/oper
Schema	`show schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/clock/show

show attributes

show attributes

uuid

Description uuid of the object

Type: string

	date	string	date
	timezone	string	timezone
	source-type	number	source-type
	day	string	day

3.16 cmcov

Objects:

3.16.1 cmcov

CM code coverage

cmcov Specification

Type	*operational*
Element Name	cmcov
Element URI	/axapi/v3/cmcov
Element Attributes	cmcov_attributes
Schema	`cmcov schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/cmcov

cmcov attributes

cmcov attributes

dump

Description Dump code coverage data and and generate report}

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

export

Description Export code coverage report

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.17 config-filter

Objects:

3.17.1 config-filter

Filter for config-replace-{start/end}

config-filter Specification

Type	*operational*
Element Name	config-filter
Element URI	/axapi/v3/config-filter
Element Attributes	config-filter_attributes
Schema	`config-filter schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/config-filter

config-filter attributes

config-filter attributes

action

Description 'skip': Skip current lineage during replace; 'accept': Skip other lineages during replace;

Type: string

Supported Values: skip, accept

lineage

Description lineage to filter

Type: string

Format: string-rlx

Maximum Length: 256 characters

Maximum Length: 1 characters

3.18 config-sync-status

Objects:

3.18.1 config-sync-status

display config sync status for all partitions

config-sync-status Specification

Type	*operational*
Element Name	config-sync-status
Element URI	/axapi/v3/config-sync-status
Element Attributes	config-sync-status_attributes
Operational Data URI	/axapi/v3/config-sync-status/oper
Schema	`config-sync-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/config-sync-status

config-sync-status attributes

config-sync-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	config-sync-list		config-sync-list

3.19 configure

Objects:

3.19.1 configure

Configure sync Commands

configure Specification

Type	*Intermediate Resource*
Element Name	configure
Element URI	/axapi/v3/configure
Element Attributes	configure_attributes
Schema	`configure schema`

Operations Allowed:

Get Object

GET

/axapi/v3/configure

configure_attributes

configure attributes

sync

Description: sync is a **JSON Block**. Please see below for *sync*

Type: Object

Refernce Object: */axapi/v3/configure/sync*

sync

Specification	
Type	*object*

address

Description Specify the destination ip address to sync

Type: string

Format: ipv4-address

all-partitions

Description All partition configurations

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auto-authentication

Description Authenticate with local username and password

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

partition-name

Description Partition name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/partition*

private-key

Description Use private key for authentication

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

pwd

Description

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

pwd-enc

Description

shared

Description Shared partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

type

Description 'running': Sync local running to peer's running configuration; 'all': Sync local running to peer's running configuration, and local startup to peer's startup configuration;

Type: string

Supported Values: running, all

usr

Description

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

3.19.2 configure sync

Sync operation

sync Specification

Type	*operational*
Element Name	sync
Element URI	/axapi/v3/configure/sync
Element Attributes	sync_attributes
Schema	`sync schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/configure/sync

sync attributes

sync attributes

address

Description Specify the destination ip address to sync

Type: string

Format: ipv4-address

all-partitions

Description All partition configurations

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auto-authentication

Description Authenticate with local username and password

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

partition-name

Description Partition name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/partition*

private-key

Description Use private key for authentication

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

pwd

Description

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

pwd-enc

Description

shared

Description Shared partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

type

Description 'running': Sync local running to peer's running configuration; 'all': Sync local running to peer's running configuration, and local startup to peer's startup configuration;

Type: string

Supported Values: running, all

usr

Description

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

3.20 copy

Objects:

3.20.1 copy

Copy configuration to/from remote server

copy Specification

Type	*operational*
Element Name	copy
Element URI	/axapi/v3/copy
Element Attributes	copy_attributes
Schema	`copy schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/copy

copy attributes

copy attributes

dest-profile

Description Local Configuration Profile Name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

dest-remote-file

Description Remote file path

Type: string

Format: url

dest-use-mgmt-port

Description Use management port as destination port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

profile

Description From Startup-config Profile

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

remote-file

Description Remote file path

Type: string

Format: url

running-config

Description From Running Config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

startup-config

Description From Startup Config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

to-profile

Description To Local Configuration Profile

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

to-running-config

Description To Running Config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

to-startup-config

Description To Startup Config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.21 debug

Objects:

3.21.1 debug a10support

Enter the password

a10support Specification

Type	*operational*
Element Name	a10support
Element URI	/axapi/v3/debug/a10support
Element Attributes	a10support_attributes
Schema	`a10support schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/a10support

a10support attributes

a10support attributes

duration

Description Duration in minutes

Type: number

Range: 1-10080

Default: 2

password

Description Password to be set

Type: string

Format: password

Maximum Length: 24 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.2 debug aflow

Debug aFlow

aflow Specification

Type	*operational*
Element Name	aflow
Element URI	/axapi/v3/debug/aflow
Element Attributes	aflow_attributes
Schema	`aflow schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/aflow

aflow attributes

aflow attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.3 debug all

All logging debug switches

all Specification

Type	*operational*
Element Name	all
Element URI	/axapi/v3/debug/all
Element Attributes	all_attributes
Schema	`all schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/all

all attributes

all attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.4 debug appcls

Debug application classification

appcls Specification

Type	*operational*
Element Name	appcls
Element URI	/axapi/v3/debug/appcls
Element Attributes	appcls_attributes
Schema	`appcls schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/appcls

appcls attributes

appcls attributes

level

Description '1': Display critical errors only; '2': Display all unusual results; '3': Display all appcls engine information;

Type: string

Supported Values: 1, 2, 3

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.5 debug auth

Debug authentication

auth Specification

Type	*operational*
Element Name	auth
Element URI	/axapi/v3/debug/auth
Element Attributes	auth_attributes
Schema	`auth schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/auth

auth attributes

auth attributes

authd

Description enable detail authd log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

client-addr

Description Filter SAML logs by client IP address

Type: string

Format: ipv4-address

level

Description '1': Diagnose Problems; '2': Detail packet flow;

Type: string

Supported Values: 1, 2

saml

Description Enable debug SAML authentication logs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

saml-sp

Description Filter SAML logs by SAML service provider name (SAML SP name)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

username

Description Show the logs of specific username (User name)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

virtual-server

Description Show the logs of specific virtual-server (Virtual-server name)

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

3.21.6 debug backtrace

add backtrace into rima_log

backtrace Specification

Type	*operational*
Element Name	backtrace
Element URI	/axapi/v3/debug/backtrace
Element Attributes	backtrace_attributes
Schema	`backtrace schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/backtrace

backtrace attributes

backtrace attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.7 debug bgp

Debug Border Gateway Protocol (BGP)

bgp Specification

Type	*operational*
Element Name	bgp
Element URI	/axapi/v3/debug/bgp
Element Attributes	bgp_attributes
Schema	`bgp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/bgp

bgp attributes

bgp attributes

all

Description all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bfd

Description Bidirectional Forwarding Detection (BFD)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dampening

Description BGP Dampening

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description BGP events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

filters

Description BGP filters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fsm

Description BGP Finite State Machine

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

in

Description Inbound updates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keepalives

Description BGP keepalives

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nht

Description NHT message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Description NSM message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out

Description Outbound updates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

updates

Description BGP updates

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.8 debug bridge-vlan-group

Debug bridge vlan traffic

bridge-vlan-group Specification

Type	*operational*
Element Name	bridge-vlan-group
Element URI	/axapi/v3/debug/bridge-vlan-group
Element Attributes	bridge-vlan-group_attributes
Schema	`bridge-vlan-group schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/bridge-vlan-group

bridge-vlan-group attributes

bridge-vlan-group attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.9 debug cache

Debug RAM caching

cache Specification

Type	*operational*
Element Name	cache
Element URI	/axapi/v3/debug/cache
Element Attributes	cache_attributes
Schema	`cache schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/cache

cache attributes

cache attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.10 debug cgn

CGN packet debugging

cgn Specification

Type	*operational*
Element Name	cgn
Element URI	/axapi/v3/debug/cgn
Element Attributes	cgn_attributes
Schema	`cgn schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/cgn

cgn attributes

cgn attributes

drops

Description Debug logs for packet drops in CGN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description Debug logs for errors in CGN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.11 debug cli

CLI module parameters

cli Specification

Type	*operational*
Element Name	cli
Element URI	/axapi/v3/debug/cli
Element Attributes	cli_attributes
Schema	`cli schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/cli

cli attributes

cli attributes

all

Description CLI all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io

Description CLI debug input-output switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parser

Description CLI debug parser switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.12 debug conn-reuse

Debug connection reuse

conn-reuse Specification

Type	*operational*
Element Name	conn-reuse
Element URI	/axapi/v3/debug/conn-reuse
Element Attributes	conn-reuse_attributes
Schema	`conn-reuse schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/conn-reuse

conn-reuse attributes

conn-reuse attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.13 debug cpu

Debug CPU

cpu Specification

Type	*operational*
Element Name	cpu
Element URI	/axapi/v3/debug/cpu
Element Attributes	cpu_attributes
Schema	`cpu schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/cpu

cpu attributes

cpu attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.14 debug diameter

Debug diameter proxy

diameter Specification

Type	*operational*
Element Name	diameter
Element URI	/axapi/v3/debug/diameter
Element Attributes	diameter_attributes
Schema	`diameter schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/diameter

diameter attributes

diameter attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.15 debug dns-cache

Debug DNS cache

dns-cache Specification

Type	*operational*
Element Name	dns-cache
Element URI	/axapi/v3/debug/dns-cache
Element Attributes	dns-cache_attributes
Schema	`dns-cache schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/dns-cache

dns-cache attributes

dns-cache attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.16 debug dns-rrl

Debug DNS Response-Rate-Limiting

dns-rrl Specification

Type	*operational*
Element Name	dns-rrl
Element URI	/axapi/v3/debug/dns-rrl
Element Attributes	dns-rrl_attributes
Schema	`dns-rrl schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/dns-rrl

dns-rrl attributes

dns-rrl attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.17 debug drop

Debug Packet Drop

drop Specification

Type	*operational*
Element Name	drop
Element URI	/axapi/v3/debug/drop
Element Attributes	drop_attributes
Schema	`drop schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/drop

drop attributes

drop attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.18 debug dumpthread

Generate system threads info

dumpthread Specification

Type	*operational*
Element Name	dumpthread
Element URI	/axapi/v3/debug/dumpthread
Element Attributes	dumpthread_attributes
Schema	`dumpthread schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/dumpthread

dumpthread attributes

dumpthread attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.19 debug es

Debug external service

es Specification

Type	*operational*
Element Name	es
Element URI	/axapi/v3/debug/es
Element Attributes	es_attributes
Schema	`es schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/es

es attributes

es attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.20 debug fix

Debug FIX Proxy

fix Specification

Type	*operational*
Element Name	fix
Element URI	/axapi/v3/debug/fix
Element Attributes	fix_attributes
Schema	`fix schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/fix

fix attributes

fix attributes

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.21 debug ftp

Debug FTP

ftp Specification

Type	*operational*
Element Name	ftp
Element URI	/axapi/v3/debug/ftp
Element Attributes	ftp_attributes
Schema	`ftp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ftp

ftp attributes

ftp attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.22 debug ftp-proxy

Debug FTP Proxy

ftp-proxy Specification

Type	*operational*
Element Name	ftp-proxy
Element URI	/axapi/v3/debug/ftp-proxy
Element Attributes	ftp-proxy_attributes
Schema	`ftp-proxy schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ftp-proxy

ftp-proxy attributes

ftp-proxy attributes

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.23 debug fw

Debug DCFW

fw Specification

Type	*operational*
Element Name	fw
Element URI	/axapi/v3/debug/fw
Element Attributes	fw_attributes
Schema	`fw schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/fw

fw attributes

fw attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.24 debug generic-proxy

Debug generic proxy

generic-proxy Specification

Type	*operational*
Element Name	generic-proxy
Element URI	/axapi/v3/debug/generic-proxy
Element Attributes	generic-proxy_attributes
Schema	`generic-proxy schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/generic-proxy

generic-proxy attributes

generic-proxy attributes

debug-level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.25 debug gslb

Debug GSLB

gslb Specification

Type	*operational*
Element Name	gslb
Element URI	/axapi/v3/debug/gslb
Element Attributes	gslb_attributes
Schema	`gslb schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/gslb

gslb attributes

gslb attributes

glname

Description Debug for matched Geo-location

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

group

Description: group is a **JSON Block**. Please see below for *group*

Type: Object

Refernce Object: */axapi/v3/debug/gslb/group*

id

Description Specify ID

Type: number

Range: 0-128

Default: 0

ip-addr

Description Debug for matched IP address

Type: string

Format: ipv4-address

ipv6-addr

Description Debug for matched IPv6 address

Type: string

Format: ipv6-address

memory

Description Debug GSLB memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

one-shot

Description Stop after get 64 states

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

protocol

Description: protocol is a **JSON Block**. Please see below for *protocol*

Type: Object

Refernce Object: */axapi/v3/debug/gslb/protocol*

state

Description Keep GSLB state information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

group

Specification	
Type	*object*

all

Description All trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cache

Description Cache trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description EVENTS trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fsm

Description FSM trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip

Description Remote IP address of GSLB controller of the group

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipc

Description IPC trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keep-alive

Description KEEPALIVE trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message

Description Debug GSLB group message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-all

Description All messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-control

Description GMP control messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-group

Description GMP group messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-keepalive

Description GMP keepalive messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-notify

Description GMP notify messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-open

Description GMP open messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-query

Description GMP query messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Name of GSLB group

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

normal

Description Normal trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-ipv4

Description Specify remote IPv4 Address

Type: string

Format: ipv4-address

peer-ipv6

Description Specify remote IPv6 Address

Type: string

Format: ipv6-address

timer

Description Timer trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

update

Description Update trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

protocol

Specification	
Type	*object*

active-rdt

Description ARDT trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all

Description All trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cache

Description Cache trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description EVENTS trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fsm

Description FSM trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip

Description Specify the remote IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipc

Description IPC trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keep-alive

Description KEEPALIVE trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message

Description Debug GSLB protocol message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-all

Description All messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-ardt-query

Description GMP ardt-query messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-ardt-report

Description GMP ardt-report messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-control

Description GMP control messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-keepalive

Description GMP keepalive messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-notify

Description GMP notify messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-open

Description GMP open messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-query

Description GMP query messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-update

Description GMP update messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Specify the slb device name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

normal

Description Normal trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-ipv4

Description Specify remote IPv4 Address

Type: string

Format: ipv4-address

peer-ipv6

Description Specify remote IPv6 Address

Type: string

Format: ipv6-address

timer

Description Timer trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

update

Description Update trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.26 debug gslb group

Debug GSLB group

group Specification

Type	*operational*
Element Name	group
Element URI	/axapi/v3/debug/gslb/group
Element Attributes	group_attributes
Schema	`group schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/gslb/group

group attributes

group attributes

all

Description All trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cache

Description Cache trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description EVENTS trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fsm

Description FSM trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip

Description Remote IP address of GSLB controller of the group

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipc

Description IPC trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keep-alive

Description KEEPALIVE trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message

Description Debug GSLB group message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-all

Description All messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-control

Description GMP control messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-group

Description GMP group messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-keepalive

Description GMP keepalive messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-notify

Description GMP notify messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-open

Description GMP open messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-query

Description GMP query messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Name of GSLB group

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

normal

Description Normal trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-ipv4

Description Specify remote IPv4 Address

Type: string

Format: ipv4-address

peer-ipv6

Description Specify remote IPv6 Address

Type: string

Format: ipv6-address

timer

Description Timer trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

update

Description Update trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.27 debug gslb protocol

Debug GSLB protocol

protocol Specification

Type	*operational*
Element Name	protocol
Element URI	/axapi/v3/debug/gslb/protocol
Element Attributes	protocol_attributes
Schema	`protocol schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/gslb/protocol

protocol attributes

protocol attributes

active-rdt

Description ARDT trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all

Description All trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cache

Description Cache trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description EVENTS trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fsm

Description FSM trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip

Description Specify the remote IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipc

Description IPC trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

keep-alive

Description KEEPALIVE trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message

Description Debug GSLB protocol message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-all

Description All messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-ardt-query

Description GMP ardt-query messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-ardt-report

Description GMP ardt-report messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-control

Description GMP control messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-keepalive

Description GMP keepalive messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-notify

Description GMP notify messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-open

Description GMP open messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-query

Description GMP query messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-update

Description GMP update messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Specify the slb device name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

normal

Description Normal trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

peer-ipv4

Description Specify remote IPv4 Address

Type: string

Format: ipv4-address

peer-ipv6

Description Specify remote IPv6 Address

Type: string

Format: ipv6-address

timer

Description Timer trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

update

Description Update trace information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.28 debug gtp

Debug GTP

gtp Specification

Type	*operational*
Element Name	gtp
Element URI	/axapi/v3/debug/gtp
Element Attributes	gtp_attributes
Schema	`gtp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/gtp

gtp attributes

gtp attributes

level

Description Debug level (Level 1: Errors Level 2: Minimal_info Level 3: Detailed_info)

Type: number

Range: 1-3

Default: 1

packet

Description Debug GTP packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.29 debug h323

Debug H323

h323 Specification

Type	*operational*
Element Name	h323
Element URI	/axapi/v3/debug/h323
Element Attributes	h323_attributes
Schema	`h323 schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/h323

h323 attributes

h323 attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.30 debug ha

Debug HA

ha Specification

Type	*operational*
Element Name	ha
Element URI	/axapi/v3/debug/ha
Element Attributes	ha_attributes
Schema	`ha schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ha

ha attributes

ha attributes

debug-level

Description Debug level (Level 1-6)

Type: number

Range: 1-7

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.31 debug hc

Debug Harmony Controller

hc Specification

Type	*operational*
Element Name	hc
Element URI	/axapi/v3/debug/hc
Element Attributes	hc_attributes
Schema	`hc schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/hc

hc attributes

hc attributes

anomaly

Description Dump per-request in anomaly cases only

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

app-svc-id

Description Application service id (virtual-server_port_protocol)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

error

Description Debug logs for harmony controller (error)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

metrics

Description Debug logs for harmony controller (metrics)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

object-uuid

Description UUID of the object to filter

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

per-connection

Description Debug logs for harmony controller (per-connection)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

per-request

Description Debug logs for harmony controller (per-request)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

registration

Description Debug logs for harmony controller (registration)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uri

Description URI of the object to filter

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.32 debug hm

Debug health monitor

hm Specification

Type	*operational*
Element Name	hm
Element URI	/axapi/v3/debug/hm
Element Attributes	hm_attributes
Schema	`hm schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/hm

hm attributes

hm attributes

level

Description Debug level (Level 1-3)

Type: number

Range: 1-3

method-type

Description 'icmp': ICMP type; 'tcp': TCP type; 'udp': UDP type; 'ftp': FTP type; 'http': HTTP type; 'snmp': SNMP type; 'smtp': SMTP type; 'dns': DNS type; 'dns-tcp': DNS TCP type; 'pop3': POP3 type; 'imap': IMAP type; 'sip': SIP type; 'sip-tcp': SIP TCP type; 'radius': RADIUS type; 'ldap': LDAP type; 'rtsp': RTSP type; 'kerberos-kdc': Kerberos KDC type; 'database': DATABASE type; 'external': EXTERNAL type; 'https': HTTPS type; 'ntp': NTP type; 'compound': Compound type;

Type: string

Supported Values: icmp, tcp, udp, ftp, http, snmp, smtp, dns, dns-tcp, pop3, imap, sip, sip-tcp, radius, ldap, rtsp, kerberos-kdc, database, external, https, ntp, compound

pin-uid

Description Debug Pin Unique Id

Type: number

Range: 1-2000000000

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.33 debug http2

Debug HTTP/2 processing

http2 Specification

Type	*operational*
Element Name	http2
Element URI	/axapi/v3/debug/http2
Element Attributes	http2_attributes
Schema	`http2 schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/http2

http2 attributes

http2 attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.34 debug http-proxy

Debug HTTP proxy

http-proxy Specification

Type	*operational*
Element Name	http-proxy
Element URI	/axapi/v3/debug/http-proxy
Element Attributes	http-proxy_attributes
Schema	`http-proxy schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/http-proxy

http-proxy attributes

http-proxy attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.35 debug hw-compression

Debug Hardware Compression

hw-compression Specification

Type	*operational*
Element Name	hw-compression
Element URI	/axapi/v3/debug/hw-compression
Element Attributes	hw-compression_attributes
Schema	`hw-compression schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/hw-compression

hw-compression attributes

hw-compression attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.36 debug imap-proxy

Debug IMAP proxy

imap-proxy Specification

Type	*operational*
Element Name	imap-proxy
Element URI	/axapi/v3/debug/imap-proxy
Element Attributes	imap-proxy_attributes
Schema	`imap-proxy schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/imap-proxy

imap-proxy attributes

imap-proxy attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.37 debug imish

Debug imish outputs

imish Specification

Type	*operational*
Element Name	imish
Element URI	/axapi/v3/debug/imish
Element Attributes	imish_attributes
Schema	`imish schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/imish

imish attributes

imish attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.38 debug imish-profile

add imish expect time profile into rima_log

imish-profile Specification

Type	*operational*
Element Name	imish-profile
Element URI	/axapi/v3/debug/imish-profile
Element Attributes	imish-profile_attributes
Schema	`imish-profile schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/imish-profile

imish-profile attributes

imish-profile attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.39 debug ip

Debug IP Functions

ip Specification

Type	*operational*
Element Name	ip
Element URI	/axapi/v3/debug/ip
Element Attributes	ip_attributes
Schema	`ip schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ip

ip attributes

ip attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.40 debug ipv6

Internet Protocol version 6 (IPv6)

ipv6 Specification

Type	*operational*
Element Name	ipv6
Element URI	/axapi/v3/debug/ipv6
Element Attributes	ipv6_attributes
Schema	`ipv6 schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6

ipv6 attributes

ipv6 attributes

ospf

Description: ospf is a **JSON Block**. Please see below for *ospf*

Type: Object

Refernce Object: */axapi/v3/debug/ipv6/ospf*

Refernce Object: */axapi/v3/debug/ipv6/ospf/nsm*

packet

Description: packet is a **JSON Block**. Please see below for *ospf_packet*

Type: Object

Refernce Object: */axapi/v3/debug/ipv6/ospf/packet*

route

Description: route is a **JSON Block**. Please see below for *ospf_route*

Type: Object

Refernce Object: */axapi/v3/debug/ipv6/ospf/route*

ospf_all

Specification	
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_ifsm

Specification	
Type	*object*

events

Description IFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description IFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description IFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_lsa

Specification	
Type	*object*

flooding

Description LSA Flooding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gererate

Description LSA Generation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description LSA Installation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

maxage

Description LSA MaxAge processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refresh

Description LSA Refreshment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_route

Specification	
Type	*object*

ase

Description External route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ia

Description Inter-Area route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description Route installation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spf

Description SPF calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_bfd

Specification	
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_nfsm

Specification	
Type	*object*

events

Description NFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description NFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description NFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_packet

Specification	
Type	*object*

dd

Description OSPFv3 Database Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detail information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hello

Description OSPFv3 Hello

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-ack

Description OSPFv3 Link State Acknowledgment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-request

Description OSPFv3 Link State Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-update

Description OSPFv3 Link State Update

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description Packet received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description Packet sent

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ospf_events

Specification	
Type	*object*

abr

Description OSPF ABR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

asbr

Description OSPF ASBR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

os

Description OS events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

router

Description Other router events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlink

Description Virtual-Link event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ospf_nsm

Specification	
Type	*object*

interface

Description NSM interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

redistribute

Description NSM redistribute

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

rip

Specification	
Type	*object*

all

Description Enable all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detailed information display

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description RIPng events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Description RIPng and NSM communication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description RIPng packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description RIPng receive packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description RIPng send packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.21.41 debug ipv6 ospf

Open Shortest Path First (OSPF) for IPv6

ospf Specification

Type	*operational*
Element Name	ospf
Element URI	/axapi/v3/debug/ipv6/ospf
Element Attributes	ospf_attributes
Schema	`ospf schema`

Operations Allowed:

EXECUTE Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.42 debug ipv6 ospf all

Enable all debugging

all Specification

Type	*operational*
Element Name	all
Element URI	/axapi/v3/debug/ipv6/ospf/all
Element Attributes	all_attributes
Schema	`all schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/ospf/all

all attributes

all attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.43 debug ipv6 ospf bfd

Bidirectional Forwarding Detection (BFD)

bfd Specification

Type	*operational*
Element Name	bfd
Element URI	/axapi/v3/debug/ipv6/ospf/bfd
Element Attributes	bfd_attributes
Schema	`bfd schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/ospf/bfd

bfd attributes

bfd attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.44 debug ipv6 ospf events

OSPFv3 event

events Specification

Type	*operational*
Element Name	events
Element URI	/axapi/v3/debug/ipv6/ospf/events
Element Attributes	events_attributes
Schema	`events schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/ospf/events

events attributes

events attributes

abr

Description OSPF ABR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

asbr

Description OSPF ASBR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

os

Description OS events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

router

Description Other router events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlink

Description Virtual-Link event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.21.45 debug ipv6 ospf ifsm

OSPFv3 Interface State Machine

ifsm Specification

Type	*operational*
Element Name	ifsm
Element URI	/axapi/v3/debug/ipv6/ospf/ifsm
Element Attributes	ifsm_attributes
Schema	`ifsm schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/ospf/ifsm

ifsm attributes

ifsm attributes

events

Description IFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description IFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description IFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.46 debug ipv6 ospf lsa

OSPFv3 Link State Advertisement

lsa Specification

Type	*operational*
Element Name	lsa
Element URI	/axapi/v3/debug/ipv6/ospf/lsa
Element Attributes	lsa_attributes
Schema	`lsa schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/ospf/lsa

lsa attributes

lsa attributes

flooding

Description LSA Flooding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gererate

Description LSA Generation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description LSA Installation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

maxage

Description LSA MaxAge processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refresh

Description LSA Refreshment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.47 debug ipv6 ospf nfsm

OSPFv3 Neighbor State Machine

nfsm Specification

Type	*operational*
Element Name	nfsm
Element URI	/axapi/v3/debug/ipv6/ospf/nfsm
Element Attributes	nfsm_attributes
Schema	`nfsm schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/ospf/nfsm

nfsm attributes

nfsm attributes

events

Description NFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description NFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description NFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.48 debug ipv6 ospf nsm

OSPFv3 NSM information

nsm Specification

Type	*operational*
Element Name	nsm
Element URI	/axapi/v3/debug/ipv6/ospf/nsm
Element Attributes	nsm_attributes
Schema	`nsm schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/ospf/nsm

nsm attributes

nsm attributes

interface

Description NSM interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

redistribute

Description NSM redistribute

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.49 debug ipv6 ospf packet

OSPFv3 packets

packet Specification

Type	*operational*
Element Name	packet
Element URI	/axapi/v3/debug/ipv6/ospf/packet
Element Attributes	packet_attributes
Schema	`packet schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/ospf/packet

packet attributes

packet attributes

dd

Description OSPFv3 Database Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detail information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hello

Description OSPFv3 Hello

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-ack

Description OSPFv3 Link State Acknowledgment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-request

Description OSPFv3 Link State Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-update

Description OSPFv3 Link State Update

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description Packet received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description Packet sent

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.50 debug ipv6 ospf route

OSPFv3 route information

route Specification

Type	*operational*
Element Name	route
Element URI	/axapi/v3/debug/ipv6/ospf/route
Element Attributes	route_attributes
Schema	`route schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/ospf/route

route attributes

route attributes

ase

Description External route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ia

Description Inter-Area route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description Route installation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spf

Description SPF calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.51 debug ipv6 rip

Routing Information Protocol (RIP) for IPv6

rip Specification

Type	*operational*
Element Name	rip
Element URI	/axapi/v3/debug/ipv6/rip
Element Attributes	rip_attributes
Schema	`rip schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ipv6/rip

rip attributes

rip attributes

all

Description Enable all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detailed information display

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description RIPng events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Description RIPng and NSM communication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description RIPng packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description RIPng receive packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description RIPng send packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.21.52 debug isis

Intermediate System - Intermediate System (IS-IS)

isis Specification

Type	*operational*
Element Name	isis
Element URI	/axapi/v3/debug/isis
Element Attributes	isis_attributes
Schema	`isis schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/isis

isis attributes

isis attributes

all

Description Enable all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bfd

Description Bidirectional Forwarding Detection (BFD)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description IS-IS Events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ifsm

Description IS-IS Interface Finite State Machine

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lsp

Description IS-IS Link State PDU

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nfsm

Description IS-IS Neighbor Finite State Machine

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Description IS-IS NSM information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pdu

Description IS-IS Protocol Data Unit

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spf

Description IS-IS SPF Calculation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.53 debug l2-redirect

Debug L2 SSLi Redirect

l2-redirect Specification

Type	*operational*
Element Name	l2-redirect
Element URI	/axapi/v3/debug/l2-redirect
Element Attributes	l2-redirect_attributes
Schema	`l2-redirect schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/l2-redirect

l2-redirect attributes

l2-redirect attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.54 debug l4

Debug Layer 4

l4 Specification

Type	*operational*
Element Name	l4
Element URI	/axapi/v3/debug/l4
Element Attributes	l4_attributes
Schema	`l4 schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/l4

l4 attributes

l4 attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.55 debug l7session

Debug L7 session processing

l7session Specification

Type	*operational*
Element Name	l7session
Element URI	/axapi/v3/debug/l7session
Element Attributes	l7session_attributes
Schema	`l7session schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/l7session

l7session attributes

l7session attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.56 debug lacp

lacp - LACP commands

lacp Specification

Type	*operational*
Element Name	lacp
Element URI	/axapi/v3/debug/lacp
Element Attributes	lacp_attributes
Schema	`lacp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/lacp

lacp attributes

lacp attributes

all

Description all - turn on all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cli

Description cli - echo commands to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description detail - echo timer start/stop to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description event - echo events to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha

Description ha - echo High availability events to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description packet - echo packet contents to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sync

Description sync - echo synchronization to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timer

Description timer - echo timer expiry to console

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.57 debug layer2

Layer2 module parameters

layer2 Specification

Type	*operational*
Element Name	layer2
Element URI	/axapi/v3/debug/layer2
Element Attributes	layer2_attributes
Schema	`layer2 schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/layer2

layer2 attributes

layer2 attributes

all

Description Layer2 all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

arp

Description Layer2 debug arp switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interface

Description Layer2 debug interface switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

misc

Description Layer2 debug misc switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trace

Description Layer2 debug trace switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlan

Description Layer2 debug vlan switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.21.58 debug lb

Load Balancing debug switch parameter

lb Specification

Type	*operational*
Element Name	lb
Element URI	/axapi/v3/debug/lb
Element Attributes	lb_attributes
Schema	`lb schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/lb

lb attributes

lb attributes

all

Description Load Balancing debug all switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cfg

Description Load Balancing configuration debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

clb

Description Cache Load Balancing debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

flow

Description Packet flow debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fwlb

Description Firewall Load Balancing debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

llb

Description Link Load Balancing debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

slb

Description Server Load Balancing debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.59 debug link-probe

Link Probe module parameters

link-probe Specification

Type	*operational*
Element Name	link-probe
Element URI	/axapi/v3/debug/link-probe
Element Attributes	link-probe_attributes
Schema	`link-probe schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/link-probe

link-probe attributes

link-probe attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.60 debug list_all_cli

list_all_cli Specification

Type	*operational*
Element Name	list_all_cli
Element URI	/axapi/v3/debug/list_all_cli
Element Attributes	list_all_cli_attributes
Schema	`list_all_cli schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/list_all_cli

list_all_cli attributes

list_all_cli attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.61 debug local-log

Debug LOCAL log

local-log Specification

Type	*operational*
Element Name	local-log
Element URI	/axapi/v3/debug/local-log
Element Attributes	local-log_attributes
Schema	`local-log schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/local-log

local-log attributes

local-log attributes

group

Description 'query': Debug local log query (axapi).; 'db-mgr': Debug local log database management.; 'db-write': Debug local log insert local log into database.; 'queue': Debug local log generate and inqueue/dequeue.;

Type: string

Supported Values: query, db-mgr, db-write, queue

level

Description Debug level (Level 1-3. 1:error, 2:notice, 3:Info)

Type: number

Range: 1-3

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.62 debug logging

Logging module parameters

logging Specification

Type	*operational*
Element Name	logging
Element URI	/axapi/v3/debug/logging
Element Attributes	logging_attributes
Schema	`logging schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/logging

logging attributes

logging attributes

all

Description Logging all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

command

Description Logging debug command switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description Logging debug error switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.63 debug lsn

Debug LSN

lsn Specification

Type	*operational*
Element Name	lsn
Element URI	/axapi/v3/debug/lsn
Element Attributes	lsn_attributes
Schema	`lsn schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/lsn

lsn attributes

lsn attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.64 debug management

management module parameters

management Specification

Type	*operational*
Element Name	management
Element URI	/axapi/v3/debug/management
Element Attributes	management_attributes
Schema	`management schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/management

management attributes

management attributes

all

Description management all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

system

Description management system debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.65 debug mgcp

Debug mgcp

mgcp Specification

Type	*operational*
Element Name	mgcp
Element URI	/axapi/v3/debug/mgcp
Element Attributes	mgcp_attributes
Schema	`mgcp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/mgcp

mgcp attributes

mgcp attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.66 debug migration

Debug VIP Migration

migration Specification

Type	*operational*
Element Name	migration
Element URI	/axapi/v3/debug/migration
Element Attributes	migration_attributes
Schema	`migration schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/migration

migration attributes

migration attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.67 debug mlb

Debug MLB

mlb Specification

Type	*operational*
Element Name	mlb
Element URI	/axapi/v3/debug/mlb
Element Attributes	mlb_attributes
Schema	`mlb schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/mlb

mlb attributes

mlb attributes

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.68 debug monitor

Monitor debug output

monitor Specification

Type	*operational*
Element Name	monitor
Element URI	/axapi/v3/debug/monitor
Element Attributes	monitor_attributes
Schema	`monitor schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/monitor

monitor attributes

monitor attributes

all-slots

Description Display debug output of both Master and Blade

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cpuid

Description CPU id to debug (0,1,. . .)

Type: number

Range: 0-65535

filename

Description Filename to save debug output

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

filesize

Description maximum file size to save debug messages (MB)

Type: number

Range: 1-300

Default: 1

no-stop

Description Donot spawn another rimacli

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout

Description timeout to stop debug monitor in minutes

Type: number

Range: 1-9999

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.69 debug mqtt

Debug MQTT

mqtt Specification

Type	*operational*
Element Name	mqtt
Element URI	/axapi/v3/debug/mqtt
Element Attributes	mqtt_attributes
Schema	`mqtt schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/mqtt

mqtt attributes

mqtt attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.70 debug msg-proxy

Debug msg proxy

msg-proxy Specification

Type	*operational*
Element Name	msg-proxy
Element URI	/axapi/v3/debug/msg-proxy
Element Attributes	msg-proxy_attributes
Schema	`msg-proxy schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/msg-proxy

msg-proxy attributes

msg-proxy attributes

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.71 debug ospf

Debug Open Shortest Path First (OSPF)

ospf Specification

Type	*operational*
Element Name	ospf
Element URI	/axapi/v3/debug/ospf
Element Attributes	ospf_attributes
Schema	`ospf schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf

ospf attributes

ospf attributes

all

Description: all is a **JSON Block**. Please see below for *all*

Type: Object

Refernce Object: */axapi/v3/debug/ospf/all*

bfd

Description: bfd is a **JSON Block**. Please see below for *bfd*

Type: Object

Refernce Object: */axapi/v3/debug/ospf/bfd*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description: events is a **JSON Block**. Please see below for *events*

Type: Object

Refernce Object: */axapi/v3/debug/ospf/events*

ifsm

Description: ifsm is a **JSON Block**. Please see below for *ifsm*

Type: Object

Refernce Object: */axapi/v3/debug/ospf/ifsm*

lsa

Description: lsa is a **JSON Block**. Please see below for *lsa*

Type: Object

Refernce Object: */axapi/v3/debug/ospf/lsa*

nfsm

Description: nfsm is a **JSON Block**. Please see below for *nfsm*

Type: Object

Refernce Object: */axapi/v3/debug/ospf/nfsm*

nsm

Description: nsm is a **JSON Block**. Please see below for *nsm*

Type: Object

Refernce Object: */axapi/v3/debug/ospf/nsm*

packet

Description: packet is a **JSON Block**. Please see below for *packet*

Type: Object

Refernce Object: */axapi/v3/debug/ospf/packet*

route

Description: route is a **JSON Block**. Please see below for *route*

Type: Object

Refernce Object: */axapi/v3/debug/ospf/route*

all

Specification	
Type	*object*

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ifsm

Specification	
Type	*object*

events

Description IFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description IFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description IFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

lsa

Specification	
Type	*object*

flooding

Description LSA Flooding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gererate

Description LSA Generation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description LSA Installation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

maxage

Description LSA MaxAge processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refresh

Description LSA Refreshment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

route

Specification	
Type	*object*

ase

Description External route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ia

Description Inter-Area route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description Route installation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spf

Description SPF calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

bfd

Specification	
Type	*object*

Default: 0

timers

Description NFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet

Specification	
Type	*object*

dd

Description OSPFv3 Database Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detail information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hello

Description OSPFv3 Hello

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-ack

Description OSPFv3 Link State Acknowledgment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-request

Description OSPFv3 Link State Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-update

Description OSPFv3 Link State Update

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description Packet received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description Packet sent

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

events

Specification	
Type	*object*

abr

Description OSPF ABR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

asbr

Description OSPF ASBR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

os

Description OS events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

router

Description Other router events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlink

Description Virtual-Link event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Specification	
Type	*object*

interface

Description NSM interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

redistribute

Description NSM redistribute

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.72 debug ospf all

Enable all debugging

all Specification

Type	*operational*
Element Name	all
Element URI	/axapi/v3/debug/ospf/all
Element Attributes	all_attributes
Schema	`all schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf/all

all attributes

all attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.73 debug ospf bfd

Bidirectional Forwarding Detection (BFD)

bfd Specification

Type	*operational*
Element Name	bfd
Element URI	/axapi/v3/debug/ospf/bfd
Element Attributes	bfd_attributes
Schema	`bfd schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf/bfd

bfd attributes

bfd attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.74 debug ospf events

OSPFv3 event

events Specification

Type	*operational*
Element Name	events
Element URI	/axapi/v3/debug/ospf/events
Element Attributes	events_attributes
Schema	`events schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf/events

events attributes

events attributes

abr

Description OSPF ABR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

asbr

Description OSPF ASBR events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

os

Description OS events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

router

Description Other router events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vlink

Description Virtual-Link event

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.21.75 debug ospf ifsm

OSPFv3 Interface State Machine

ifsm Specification

Type	*operational*
Element Name	ifsm
Element URI	/axapi/v3/debug/ospf/ifsm
Element Attributes	ifsm_attributes
Schema	`ifsm schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf/ifsm

ifsm attributes

ifsm attributes

events

Description IFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description IFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description IFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.76 debug ospf lsa

OSPFv3 Link State Advertisement

lsa Specification

Type	*operational*
Element Name	lsa
Element URI	/axapi/v3/debug/ospf/lsa
Element Attributes	lsa_attributes
Schema	`lsa schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf/lsa

lsa attributes

lsa attributes

flooding

Description LSA Flooding

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gererate

Description LSA Generation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description LSA Installation

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

maxage

Description LSA MaxAge processing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

refresh

Description LSA Refreshment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.77 debug ospf nfsm

OSPFv3 Neighbor State Machine

nfsm Specification

Type	*operational*
Element Name	nfsm
Element URI	/axapi/v3/debug/ospf/nfsm
Element Attributes	nfsm_attributes
Schema	`nfsm schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf/nfsm

nfsm attributes

nfsm attributes

events

Description NFSM Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status

Description NFSM Status Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timers

Description NFSM Timer Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.78 debug ospf nsm

OSPFv3 NSM information

nsm Specification

Type	*operational*
Element Name	nsm
Element URI	/axapi/v3/debug/ospf/nsm
Element Attributes	nsm_attributes
Schema	`nsm schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf/nsm

nsm attributes

nsm attributes

interface

Description NSM interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

redistribute

Description NSM redistribute

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.79 debug ospf packet

OSPFv3 packets

packet Specification

Type	*operational*
Element Name	packet
Element URI	/axapi/v3/debug/ospf/packet
Element Attributes	packet_attributes
Schema	`packet schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf/packet

packet attributes

packet attributes

dd

Description OSPFv3 Database Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detail information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hello

Description OSPFv3 Hello

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-ack

Description OSPFv3 Link State Acknowledgment

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-request

Description OSPFv3 Link State Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ls-update

Description OSPFv3 Link State Update

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description Packet received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description Packet sent

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.80 debug ospf route

OSPFv3 route information

route Specification

Type	*operational*
Element Name	route
Element URI	/axapi/v3/debug/ospf/route
Element Attributes	route_attributes
Schema	`route schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ospf/route

route attributes

route attributes

ase

Description External route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ia

Description Inter-Area route calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

install

Description Route installation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

spf

Description SPF calculation information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.81 debug packet

Debug packet

packet Specification

Type	*operational*
Element Name	packet
Element URI	/axapi/v3/debug/packet
Element Attributes	packet_attributes
Schema	`packet schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/packet

packet attributes

packet attributes

all

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all-ipv4

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all-ipv6

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all-tcp-ports

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

all-udp-ports

Description All

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

arp

Description ARP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

count

Description Maximum packets to capture. Default is 3000 (Specify maximum packet number. For umlimited, specify 0)

Type: number

Range: 0-65535

detail

Description Print packet content

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ethernet

Description Ethernet interface number

Type: number

Format: interface

icmp

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

interface

Description Interface to debug

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip

Description IP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4ad

Description IP Address

Type: string

Format: ipv4-address

ipv6

Description IPV6

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6ad

Description IPV6 Address

Type: string

Format: ipv6-address

l3-protocol

Description Layer 3 protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4-protocol

Description Layer 4 protocol

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

neighbor

Description IPv6 Neighbor/Router

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port-range

Description Port Number

Type: number

Range: 1-65535

tcp

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ve

Description ve number

Type: number

Range: 2-4094

3.21.82 debug packet-capture

Debug packet capture

packet-capture Specification

Type	*operational*
Element Name	packet-capture
Element URI	/axapi/v3/debug/packet-capture
Element Attributes	packet-capture_attributes
Schema	`packet-capture schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/packet-capture

packet-capture attributes

packet-capture attributes

capture-config

Description Specify capture-config. Default all (Capture config)

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

count

Description Maximum packets to capture. Default is 10 (Specify maximum packet number. For umlimited, specify 0)

Type: number

Range: 0-1000

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.83 debug polltech-enable

Enable polltech switch

polltech-enable Specification

Type	*operational*
Element Name	polltech-enable
Element URI	/axapi/v3/debug/polltech-enable
Element Attributes	polltech-enable_attributes
Schema	`polltech-enable schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/polltech-enable

polltech-enable attributes

polltech-enable attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.84 debug pop3-proxy

Debug POP3 proxy

pop3-proxy Specification

Type	*operational*
Element Name	pop3-proxy
Element URI	/axapi/v3/debug/pop3-proxy
Element Attributes	pop3-proxy_attributes
Schema	`pop3-proxy schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/pop3-proxy

pop3-proxy attributes

pop3-proxy attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.85 debug rip

Routing Information Protocol (RIP) for IPv6

rip Specification

Type	*operational*
Element Name	rip
Element URI	/axapi/v3/debug/rip
Element Attributes	rip_attributes
Schema	`rip schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/rip

rip attributes

rip attributes

all

Description Enable all debugging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

detail

Description Detailed information display

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

events

Description RIPng events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nsm

Description RIPng and NSM communication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description RIPng packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv

Description RIPng receive packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send

Description RIPng send packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.21.86 debug rt

Routing module parameters

rt Specification

Type	*operational*
Element Name	rt
Element URI	/axapi/v3/debug/rt
Element Attributes	rt_attributes
Schema	`rt schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/rt

rt attributes

rt attributes

all

Description Routing all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

check

Description ROUTING debug check switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

command

Description Routing debug command switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.87 debug scaleout

Debug scaleout

scaleout Specification

Type	*operational*
Element Name	scaleout
Element URI	/axapi/v3/debug/scaleout
Element Attributes	scaleout_attributes
Schema	`scaleout schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/scaleout

scaleout attributes

scaleout attributes

config

Description Debug logs for scaleout config change

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

debug-level

Description Debug level (Level 1-3)

Type: number

Range: 1-3

event

Description Debug logs for scaleout events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description Debug logs for scaleout packet flow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session-sync

Description Debug logs for scaleout session sync events

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.88 debug sctp

Debug SCTP packets

sctp Specification

Type	*operational*
Element Name	sctp
Element URI	/axapi/v3/debug/sctp
Element Attributes	sctp_attributes
Schema	`sctp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/sctp

sctp attributes

sctp attributes

dummy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.89 debug sess

Debug sessions

sess Specification

Type	*operational*
Element Name	sess
Element URI	/axapi/v3/debug/sess
Element Attributes	sess_attributes
Schema	`sess schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/sess

sess attributes

sess attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.90 debug sip

Debug SIP

sip Specification

Type	*operational*
Element Name	sip
Element URI	/axapi/v3/debug/sip
Element Attributes	sip_attributes
Schema	`sip schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/sip

sip attributes

sip attributes

ACK

Description Method ACK

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

BYE

Description SIP Method BYE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

CANCEL

Description SIP Method CANCEL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

INFO

Description SIP Method INFO

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

INVITE

Description Method INVITE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

MESSAGE

Description SIP Method MESSAGE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

NOTIFY

Description SIP Method NOTIFY

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

OPTIONS

Description SIP Method OPTIONS

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

PRACK

Description SIP Method PRACK

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

PUBLISH

Description SIP Method PUBLISH

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

REFER

Description SIP Method REFER

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

REGISTER

Description SIP Method REGISTER

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

SUBSCRIBE

Description SIP Method SUBSCRIBE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

UPDATE

Description SIP Method UPDATE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

method

Description Set filter with SIP method types

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.91 debug smpp

Debug smpp

smpp Specification

Type	*operational*
Element Name	smpp
Element URI	/axapi/v3/debug/smpp
Element Attributes	smpp_attributes
Schema	`smpp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/smpp

smpp attributes

smpp attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.92 debug smtp

Debug SMTP

smtp Specification

Type	*operational*
Element Name	smtp
Element URI	/axapi/v3/debug/smtp
Element Attributes	smtp_attributes
Schema	`smtp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/smtp

smtp attributes

smtp attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.93 debug snmp

SNMP module parameters

snmp Specification

Type	*operational*
Element Name	snmp
Element URI	/axapi/v3/debug/snmp
Element Attributes	snmp_attributes
Schema	`snmp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/snmp

snmp attributes

snmp attributes

all

Description SNMP all debug switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error

Description SNMP debug error switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

event

Description SNMP debug event switch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.94 debug ssl

Debug SSL operation

ssl Specification

Type	*operational*
Element Name	ssl
Element URI	/axapi/v3/debug/ssl
Element Attributes	ssl_attributes
Schema	`ssl schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ssl

ssl attributes

ssl attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.95 debug ssli

Debug SSLi

ssli Specification

Type	*operational*
Element Name	ssli
Element URI	/axapi/v3/debug/ssli
Element Attributes	ssli_attributes
Schema	`ssli schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/ssli

ssli attributes

ssli attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.96 debug system

System module parameters

system Specification

Type	*operational*
Element Name	system
Element URI	/axapi/v3/debug/system
Element Attributes	system_attributes
Schema	`system schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/system

system attributes

system attributes

debug_system_enum

Description 'all': System all debug switch; 'aaa': System debug aaa switch; 'import-export': System debug import or export switch; 'ssl': System debug ssl switch;

Type: string

Supported Values: all, aaa, import-export, ssl

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.97 debug table-sync-event

Debug table sync events

table-sync-event Specification

Type	*operational*
Element Name	table-sync-event
Element URI	/axapi/v3/debug/table-sync-event
Element Attributes	table-sync-event_attributes
Schema	`table-sync-event schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/table-sync-event

table-sync-event attributes

table-sync-event attributes

all

Description all Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: allmac, arp, nd6, fibv4 and fibv6 are mutually exclusive

arp

Description ARP Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: arpall, mac, nd6, fibv4 and fibv6 are mutually exclusive

fibv4

Description IPv4 FIB Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: fibv4all, mac, arp, nd6 and fibv6 are mutually exclusive

fibv6

Description IPv6 FIB Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: fibv6all, mac, arp, nd6 and fibv4 are mutually exclusive

mac

Description MAC Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: macall, arp, nd6, fibv4 and fibv6 are mutually exclusive

nd6

Description ND6 Event Information

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: nd6all, mac, arp, fibv4 and fibv6 are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.98 debug tcp

Debug TCP

tcp Specification

Type	*operational*
Element Name	tcp
Element URI	/axapi/v3/debug/tcp
Element Attributes	tcp_attributes
Schema	`tcp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/tcp

tcp attributes

tcp attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

stack

Description Debug TCP stack

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.99 debug threat-intel

Debug threat intel module

threat-intel Specification

Type	*operational*
Element Name	threat-intel
Element URI	/axapi/v3/debug/threat-intel
Element Attributes	threat-intel_attributes
Schema	`threat-intel schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/threat-intel

threat-intel attributes

threat-intel attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.100 debug tunnel

Debug IPsec tunnel

tunnel Specification

Type	*operational*
Element Name	tunnel
Element URI	/axapi/v3/debug/tunnel
Element Attributes	tunnel_attributes
Schema	`tunnel schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/tunnel

tunnel attributes

tunnel attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.101 debug vector

Debug vector flow

vector Specification

Type	*operational*
Element Name	vector
Element URI	/axapi/v3/debug/vector
Element Attributes	vector_attributes
Schema	`vector schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/vector

vector attributes

vector attributes

error

Description Debug logs for vector errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet

Description Debug logs for vector packet flow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trace

Description Debug logs for vector callbacks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.102 debug visibility

Debug visibility

visibility Specification

Type	*operational*
Element Name	visibility
Element URI	/axapi/v3/debug/visibility
Element Attributes	visibility_attributes
Schema	`visibility schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/visibility

visibility attributes

visibility attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

xflow

Description debug xflow monitoring

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.21.103 debug vpn

Debug IPsec vpn

vpn Specification

Type	*operational*
Element Name	vpn
Element URI	/axapi/v3/debug/vpn
Element Attributes	vpn_attributes
Schema	`vpn schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/vpn

vpn attributes

vpn attributes

ike-gateway

Description Specify IKE gateway name (gateway filter name)

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/vpn/ike-gateway*

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

strict

Description Only record the logs that can match Ike-gateway name

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.104 debug vtep-error

Debug Overlay errors

vtep-error Specification

Type	*operational*
Element Name	vtep-error
Element URI	/axapi/v3/debug/vtep-error
Element Attributes	vtep-error_attributes
Schema	`vtep-error schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/vtep-error

vtep-error attributes

vtep-error attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.105 debug vtep-event

Debug Overlay related control plane events

vtep-event Specification

Type	*operational*
Element Name	vtep-event
Element URI	/axapi/v3/debug/vtep-event
Element Attributes	vtep-event_attributes
Schema	`vtep-event schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/vtep-event

vtep-event attributes

vtep-event attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.106 debug vtep-packet

Debug Overlay packet forwarding

vtep-packet Specification

Type	*operational*
Element Name	vtep-packet
Element URI	/axapi/v3/debug/vtep-packet
Element Attributes	vtep-packet_attributes
Schema	`vtep-packet schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/vtep-packet

vtep-packet attributes

vtep-packet attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.107 debug waf

Debug Web Application Firewall

waf Specification

Type	*operational*
Element Name	waf
Element URI	/axapi/v3/debug/waf
Element Attributes	waf_attributes
Schema	`waf schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/waf

waf attributes

waf attributes

level

Description Debug level (Level 1-4)

Type: number

Range: 1-4

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.21.108 debug web-category

Debug Web Category

web-category Specification

Type	*operational*
Element Name	web-category
Element URI	/axapi/v3/debug/web-category
Element Attributes	web-category_attributes
Schema	`web-category schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/debug/web-category

web-category attributes

web-category attributes

dumy

Description Dummy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

3.22 delete

Objects:

3.22.1 delete auth-jwks

JWK file

auth-jwks Specification

Type	*operational*
Element Name	auth-jwks
Element URI	/axapi/v3/delete/auth-jwks
Element Attributes	auth-jwks_attributes
Schema	`auth-jwks schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/auth-jwks

auth-jwks attributes

auth-jwks attributes

jwk-name

Description Local File Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

3.22.2 delete auth-portal

Portal file for http authentication

auth-portal Specification

Type	*operational*
Element Name	auth-portal
Element URI	/axapi/v3/delete/auth-portal
Element Attributes	auth-portal_attributes
Schema	`auth-portal schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/auth-portal

auth-portal attributes

auth-portal attributes

portal-name

Description Local File Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

3.22.3 delete auth-portal-image

Image file for default portal

auth-portal-image Specification

Type	*operational*
Element Name	auth-portal-image
Element URI	/axapi/v3/delete/auth-portal-image
Element Attributes	auth-portal-image_attributes
Schema	`auth-portal-image schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/auth-portal-image

auth-portal-image attributes

auth-portal-image attributes

image-name

Description Local File Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

3.22.4 delete auth-saml-idp

SAML metadata of identity provider

auth-saml-idp Specification

Type	*operational*
Element Name	auth-saml-idp
Element URI	/axapi/v3/delete/auth-saml-idp
Element Attributes	auth-saml-idp_attributes
Schema	`auth-saml-idp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/auth-saml-idp

auth-saml-idp attributes

auth-saml-idp attributes

saml-idp-name

Description Local IDP metadata name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

3.22.5 delete bw-list

Blacklist/whitelist

bw-list Specification

Type	*operational*
Element Name	bw-list
Element URI	/axapi/v3/delete/bw-list
Element Attributes	bw-list_attributes
Schema	`bw-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/bw-list

bw-list attributes

bw-list attributes

file-name

Description Blacklist/whitelist Name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

3.22.6 delete cgnv6

Delete cgnv6 related files

cgnv6 Specification

Type	*operational*
Element Name	cgnv6
Element URI	/axapi/v3/delete/cgnv6
Element Attributes	cgnv6_attributes
Schema	`cgnv6 schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/cgnv6

cgnv6 attributes

cgnv6 attributes

filename

Description Specify the port-mapping-file to be deleted

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

fixed-nat

Description Delete fixed-nat port-mapping-file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lw-4o6-binding-table-validation-log

Description LW-4O6 Binding Table validation log File

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lw-filename

Description LW-4O6 Binding Table Validation Log File Name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

3.22.7 delete debug-monitor

Debug File

debug-monitor Specification

Type	*operational*
Element Name	debug-monitor
Element URI	/axapi/v3/delete/debug-monitor
Element Attributes	debug-monitor_attributes
Schema	`debug-monitor schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/debug-monitor

debug-monitor attributes

debug-monitor attributes

file-name

Description Local File Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

3.22.8 delete geo-location

Delete geo-location file

geo-location Specification

Type	*operational*
Element Name	geo-location
Element URI	/axapi/v3/delete/geo-location
Element Attributes	geo-location_attributes
Schema	`geo-location schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/geo-location

geo-location attributes

geo-location attributes

all

Description Delete all files

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: all and filename are mutually exclusive

filename

Description Specify file to be deleted

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

Mutual Exclusion: filename and all are mutually exclusive

3.22.9 delete glm-license

Remove glm license

glm-license Specification

Type	*operational*
Element Name	glm-license
Element URI	/axapi/v3/delete/glm-license
Element Attributes	glm-license_attributes
Schema	`glm-license schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/glm-license

glm-license attributes

glm-license attributes

a10-ti

Description only remove A10 Threat Intel license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipsec-vpn

Description only remove IPSEC VPN license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

qosmos

Description only remove QOSMOS license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threatstop

Description only remove ThreatSTOP license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

webroot

Description only remove Webroot license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

webroot-ti

Description only remove Webroot Threat Intel license

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.22.10 delete guest-file

Delete guest-file

guest-file Specification

Type	*operational*
Element Name	guest-file
Element URI	/axapi/v3/delete/guest-file
Element Attributes	guest-file_attributes
Schema	`guest-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/guest-file

guest-file attributes

guest-file attributes

file-name

Description Guest-File Name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

3.22.11 delete health-external

Address the External Script Program

health-external Specification

Type	*operational*
Element Name	health-external
Element URI	/axapi/v3/delete/health-external
Element Attributes	health-external_attributes
Schema	`health-external schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/health-external

health-external attributes

health-external attributes

file-name

Description Specify the Program Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

3.22.12 delete health-postfile

Address the HTTP Post data file

health-postfile Specification

Type	*operational*
Element Name	health-postfile
Element URI	/axapi/v3/delete/health-postfile
Element Attributes	health-postfile_attributes
Schema	`health-postfile schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/health-postfile

health-postfile attributes

health-postfile attributes

file-name

Description Specify the File Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

3.22.13 delete local-uri-file

Local URI files for http response

local-uri-file Specification

Type	*operational*
Element Name	local-uri-file
Element URI	/axapi/v3/delete/local-uri-file
Element Attributes	local-uri-file_attributes
Schema	`local-uri-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/local-uri-file

local-uri-file attributes

local-uri-file attributes

file-name

Description Local File Name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

3.22.14 delete partition

hard delete a partition

partition Specification

Type	*operational*
Element Name	partition
Element URI	/axapi/v3/delete/partition
Element Attributes	partition_attributes
Schema	`partition schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/partition

partition attributes

partition attributes

id

Description Specify unique Partition id

Type: number

partition-name

Description Object partition name

Type: string

Maximum Length: 14 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/partition*

3.22.15 delete rpz

Delete Response Policy Zone file

rpz Specification

Type	*operational*
Element Name	rpz
Element URI	/axapi/v3/delete/rpz
Element Attributes	rpz_attributes
Schema	`rpz schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/rpz

rpz attributes

rpz attributes

file-name

Description Response Policy Zone File

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

3.22.16 delete service-partition

Hard delete a service partition

service-partition Specification

Type	*operational*
Element Name	service-partition
Element URI	/axapi/v3/delete/service-partition
Element Attributes	service-partition_attributes
Schema	`service-partition schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/service-partition

service-partition attributes

service-partition attributes

id

Description Specify unique service partition id

Type: number

partition-name

Description Object service partition name

Type: string

Maximum Length: 14 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/service-partition*

3.22.17 delete startup-config

Startup Configuration profile

startup-config Specification

Type	*operational*
Element Name	startup-config
Element URI	/axapi/v3/delete/startup-config
Element Attributes	startup-config_attributes
Schema	`startup-config schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/startup-config

startup-config attributes

startup-config attributes

file-name

Description Local Configuration Profile Name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

3.22.18 delete threat-intel

Delete threat-intel files

threat-intel Specification

Type	*operational*
Element Name	threat-intel
Element URI	/axapi/v3/delete/threat-intel
Element Attributes	threat-intel_attributes
Schema	`threat-intel schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/threat-intel

threat-intel attributes

threat-intel attributes

database

Description 'webroot': Delete webroot module database;

Type: string

Supported Values: webroot

3.22.19 delete web-category

Delete web-category database

web-category Specification

Type	*operational*
Element Name	web-category
Element URI	/axapi/v3/delete/web-category
Element Attributes	web-category_attributes
Schema	`web-category schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/delete/web-category

web-category attributes

web-category attributes

database

Description Delete web-category database

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.23 device-context

Objects:

3.23.1 device-context

Switch context to a particular device for VCS config

device-context Specification

Type	*operational*
Element Name	device-context
Element URI	/axapi/v3/device-context
Element Attributes	device-context_attributes
Schema	`device-context schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/device-context

device-context attributes

device-context attributes

device-id

Description Device ID

Type: number

3.24 dnssec

Objects:

3.24.1 dnssec dnskey

DNSKEY Resource Records of child zones

dnskey Specification

Type	*operational*
Element Name	dnskey
Element URI	/axapi/v3/dnssec/dnskey
Element Attributes	dnskey_attributes
Schema	`dnskey schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/dnssec/dnskey

dnskey attributes

dnskey attributes

key-delete

Description Delete the DNSKEY file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-name

Description DNS zone name of the child zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

3.24.2 dnssec ds

Delegation Signer(DS) Resource Records of child zones

ds Specification

Type	*operational*
Element Name	ds
Element URI	/axapi/v3/dnssec/ds
Element Attributes	ds_attributes
Schema	`ds schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/dnssec/ds

ds attributes

ds attributes

ds-delete

Description Delete the DS file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-name

Description DNS zone name of the child zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

3.24.3 dnssec key-rollover

DNSSEC Key rollover

key-rollover Specification

Type	*operational*
Element Name	key-rollover
Element URI	/axapi/v3/dnssec/key-rollover
Element Attributes	key-rollover_attributes
Schema	`key-rollover schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/dnssec/key-rollover

key-rollover attributes

key-rollover attributes

dnssec-key-type

Description 'ZSK': Zone Signing Key; 'KSK': Key Signing Key;

Type: string

Supported Values: ZSK, KSK

ds-ready-in-parent-zone

Description DS RR is already ready in the parent zone

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ksk-start

Description start KSK rollover in emergency mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

zone-name

Description Specify the name for the DNS zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

zsk-start

Description start ZSK rollover in emergency mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.24.4 dnssec sign-zone-now

sign zone right now

sign-zone-now Specification

Type	*operational*
Element Name	sign-zone-now
Element URI	/axapi/v3/dnssec/sign-zone-now
Element Attributes	sign-zone-now_attributes
Schema	`sign-zone-now schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/dnssec/sign-zone-now

sign-zone-now attributes

sign-zone-now attributes

zone-name

Description Specify the name for the DNS zone, empty means sign all zones

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

3.25 enable-password

Objects:

3.25.1 enable-password

Modify enable password parameters

enable-password Specification

Type	*operational*
Element Name	enable-password
Element URI	/axapi/v3/enable-password
Element Attributes	enable-password_attributes
Schema	`enable-password schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/enable-password

enable-password attributes

enable-password attributes

encrypted

Description Specific an ENCRYPTED password string (The ENCRYPTED password string)

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

password

Description The password

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

3.26 erase

Objects:

3.26.1 erase

Erase Configuration

erase Specification

Type	*operational*
Element Name	erase
Element URI	/axapi/v3/erase
Element Attributes	erase_attributes
Schema	`erase schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/erase

erase attributes

erase attributes

all-partitions

Description Wipe out all service config for all partitions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

grubconfig

Description Reset boot grub settings

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-accounts

Description preserve admin accounts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

preserve-management

Description preserve managememt ip and default gateway

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reload

Description reload after erase

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

service-config

Description Wipe out all service config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.27 export

Objects:

3.27.1 export

Put files to remote site

export Specification

Type	*operational*
Element Name	export
Element URI	/axapi/v3/export
Element Attributes	export_attributes
Schema	`export schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/export

export attributes

export attributes

aflex

Description aFleX Script Source File

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-jwks

Description Json web key

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-portal

Description Portal file for http authentication

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-portal-image

Description Image file for default portal

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

axdebug

Description AX Debug Packet File

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

bw-list

Description Black white List File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

ca-cert

Description CA Cert File(enter bulk when export an archive file)

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

class-list

Description Class List File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

csr

Description Certificate Signing Request

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

debug-monitor

Description Debug Monitor Output

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

dnssec-dnskey

Description DNSSEC DNSKEY(KSK) file for child zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

dnssec-ds

Description DNSSEC DS file for child zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

externalfilename

Description Export the External Program from the System

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

fixed-nat

Description Fixed NAT Port Mapping File

Type: string

Maximum Length: 256 characters

Maximum Length: 1 characters

fixed-nat-archive

Description Fixed NAT Port Mapping Archive File

Type: string

Format: string-rlx

Maximum Length: 256 characters

Maximum Length: 1 characters

geo-location

Description Geo-location CSV File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

ip-map-list

Description IP Map List File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

ipsec-error-dump

Description IPsec error dump File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

local-uri-file

Description Local URI files for http response

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

lw-4o6

Description LW-4over6 Binding Table File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

lw-4o6-binding-table-validation-log

Description LW-4over6 Binding Table Validation Log File

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

merged-pcap

Description Export the merged pcap file when there are multiple Export sessions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mon-entity-debug-file

Description Enter Mon entity debug file name

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

per-cpu

Description Export the per-cpu files along with the merged pcap file in .tgz format

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pktcapture-file

Description Enter Pktcapture file name

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

policy

Description WAF policy File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

profile

Description Startup-config Profile

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

remote-file

Description profile name for remote url

Type: string

Format: url

Mutual Exclusion: remote-file and store-name are mutually exclusive

rpz

Description Response Policy Zone File

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

running-config

Description Running Config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

saml-idp-name

Description SAML metadata of identity provider

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

ssl-cert

Description SSL Cert File(enter bulk when export an archive file)

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

ssl-cert-key

Description Local SSL Key/Certificate file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

ssl-crl

Description SSL Crl File

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

ssl-key

Description SSL Key File(enter bulk when export an archive file)

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

startup-config

Description Startup Config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

status-check

Description check export task status

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

store

Description: store is a **JSON Block**. Please see below for *store*

Type: Object

Refernce Object: */axapi/v3/export/store*

store-name

Description Export store name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: store-name and remote-file are mutually exclusive

syslog

Description Syslog file

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

tgz

Description Export the merged pcap in .tgz format

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

thales-kmdata

Description Thales Kmdata files

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

thales-secworld

Description Thales security world files

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

visibility

Description Export Visibility module related files

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wsdl

Description Web Services Definition Language File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

xml-schema

Description XML-Schema File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

store

Specification	
Type	*object*

create

Description Create an export store profile

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

delete

Description Delete an export store profile

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description profile name to store remote url

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

remote-file

Description

Type: string

Format: url

3.27.2 export store

Create store name for remote url

store Specification

Type	*operational*
Element Name	store
Element URI	/axapi/v3/export/store
Element Attributes	store_attributes
Schema	`store schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/export/store

store attributes

store attributes

create

Description Create an export store profile

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

delete

Description Delete an export store profile

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description profile name to store remote url

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

remote-file

Description

Type: string

Format: url

3.28 file

Objects:

3.28.1 file aflex

aflex file information and management commands

aflex Specification

Type	*operational*
Element Name	aflex
Element URI	/axapi/v3/file/aflex
Element Attributes	aflex_attributes
Operational Data URI	/axapi/v3/file/aflex/oper
Schema	`aflex schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/aflex

aflex attributes

aflex attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description aflex local file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description aflex file size in byte

Type: number

Range: 0-2147483647

skip-backup

Description Skip backup logic

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.2 file auth-jwks

JWK file information and management commands

auth-jwks Specification

Type	*operational*
Element Name	auth-jwks
Element URI	/axapi/v3/file/auth-jwks
Element Attributes	auth-jwks_attributes
Operational Data URI	/axapi/v3/file/auth-jwks/oper
Schema	`auth-jwks schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/auth-jwks

auth-jwks attributes

auth-jwks attributes

action

Description 'create': create; 'import': import; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, copy, rename, check, replace, delete

dst-file

Description Destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description JWK local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description Full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description JWK file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.3 file auth-portal

Authentication portal file information and management commands

auth-portal Specification

Type	*operational*
Element Name	auth-portal
Element URI	/axapi/v3/file/auth-portal
Element Attributes	auth-portal_attributes
Operational Data URI	/axapi/v3/file/auth-portal/oper
Schema	`auth-portal schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/auth-portal

auth-portal attributes

auth-portal attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description Destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description Authentication portal local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description Full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description Authentication portal file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.4 file auth-portal-image

Authentication portal image file information and management commands

auth-portal-image Specification

Type	*operational*
Element Name	auth-portal-image
Element URI	/axapi/v3/file/auth-portal-image
Element Attributes	auth-portal-image_attributes
Operational Data URI	/axapi/v3/file/auth-portal-image/oper
Schema	`auth-portal-image schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/auth-portal-image

auth-portal-image attributes

auth-portal-image attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description Destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description Authentication portal image local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description Full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description Authentication portal image file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.5 file auth-saml-idp

SAML metadata file information and management commands

auth-saml-idp Specification

Type	*operational*
Element Name	auth-saml-idp
Element URI	/axapi/v3/file/auth-saml-idp
Element Attributes	auth-saml-idp_attributes
Operational Data URI	/axapi/v3/file/auth-saml-idp/oper
Schema	`auth-saml-idp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/auth-saml-idp

auth-saml-idp attributes

auth-saml-idp attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description Destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description SAML metadata local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description Full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description SAML metadata file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

verify-xml-signature

Description Verify metadata's XML signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

operational data

	Counter	Size	Description
	file-list		file-list

3.28.6 file aws-accesskey

The aws accesskey for admin user

aws-accesskey Specification

Type	*operational*
Element Name	aws-accesskey
Element URI	/axapi/v3/file/aws-accesskey
Element Attributes	aws-accesskey_attributes
Operational Data URI	/axapi/v3/file/aws-accesskey/oper
Schema	`aws-accesskey schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/aws-accesskey

aws-accesskey attributes

aws-accesskey attributes

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

user

Description user name of the pub key

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.7 file axdebug

axdebug file information and management commands

axdebug Specification

Type	*operational*
Element Name	axdebug
Element URI	/axapi/v3/file/axdebug
Element Attributes	axdebug_attributes
Schema	`axdebug schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/axdebug

axdebug attributes

axdebug attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description axdebug local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description axdebug file size in byte

Type: number

Range: 0-2147483647

3.28.8 file bw-list

black white list file information and management commands

bw-list Specification

Type	*operational*
Element Name	bw-list
Element URI	/axapi/v3/file/bw-list
Element Attributes	bw-list_attributes
Operational Data URI	/axapi/v3/file/bw-list/oper
Schema	`bw-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/bw-list

bw-list attributes

bw-list attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description bw-list file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description bw-list file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.9 file ca-cert

ssl certificate file information and management commands

ca-cert Specification

Type	*operational*
Element Name	ca-cert
Element URI	/axapi/v3/file/ca-cert
Element Attributes	ca-cert_attributes
Operational Data URI	/axapi/v3/file/ca-cert/oper
Schema	`ca-cert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/ca-cert

ca-cert attributes

ca-cert attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

certificate-type

Description 'pem': pem; 'der': der; 'pfx': pfx; 'p7b': p7b;

Type: string

Supported Values: pem, der, pfx, p7b

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

file

Description ssl ca certificate local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 300 characters

Maximum Length: 1 characters

pfx-password

Description The password for certificate file (pfx type only)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

pfx-password-export

Description The password for exported certificate file (pfx type only)

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

size

Description ssl ca certificate file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	partition	string	partition
	file-list		file-list

3.28.10 file class-list

class list file information and management commands

class-list Specification

Type	*operational*
Element Name	class-list
Element URI	/axapi/v3/file/class-list
Element Attributes	class-list_attributes
Operational Data URI	/axapi/v3/file/class-list/oper
Schema	`class-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/class-list

class-list attributes

class-list attributes

action

Description 'ceate': ceate; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description class list local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description class list file size in byte

Type: number

Range: 0-2147483647

user-tag

Description Customized tag

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.11 file csr

ssl certificate signing request file

csr Specification

Type	*operational*
Element Name	csr
Element URI	/axapi/v3/file/csr
Element Attributes	csr_attributes
Operational Data URI	/axapi/v3/file/csr/oper
Schema	`csr schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/csr

csr attributes

csr attributes

action

Description 'export': export;

Type: string

Supported Values: export

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

file

Description Specify the File Name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 300 characters

Maximum Length: 1 characters

size

Description CSR file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	ssl-csr		ssl-csr
	sortby-name	flag	sortby-name

3.28.12 file debug-monitor

debug monitor file information and management commands

debug-monitor Specification

Type	*operational*
Element Name	debug-monitor
Element URI	/axapi/v3/file/debug-monitor
Element Attributes	debug-monitor_attributes
Schema	`debug-monitor schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/debug-monitor

debug-monitor attributes

debug-monitor attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description debug monitor local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description debug monitor file size in byte

Type: number

Range: 0-2147483647

3.28.13 file dnssec-dnskey

dnssec dnskey file information and management commands

dnssec-dnskey Specification

Type	*operational*
Element Name	dnssec-dnskey
Element URI	/axapi/v3/file/dnssec-dnskey
Element Attributes	dnssec-dnskey_attributes
Operational Data URI	/axapi/v3/file/dnssec-dnskey/oper
Schema	`dnssec-dnskey schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/dnssec-dnskey

dnssec-dnskey attributes

dnssec-dnskey attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

file

Description dnssec dnskey local file name

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description dnssec dnskey file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.14 file dnssec-ds

dnssec ds file information and management commands

dnssec-ds Specification

Type	*operational*
Element Name	dnssec-ds
Element URI	/axapi/v3/file/dnssec-ds
Element Attributes	dnssec-ds_attributes
Operational Data URI	/axapi/v3/file/dnssec-ds/oper
Schema	`dnssec-ds schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/dnssec-ds

dnssec-ds attributes

dnssec-ds attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

file

Description dnssec ds local file name

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description dnssec ds file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.15 file file-inspection-bw-list

File Inspection black white list file information and management commands

file-inspection-bw-list Specification

Type	*operational*
Element Name	file-inspection-bw-list
Element URI	/axapi/v3/file/file-inspection-bw-list
Element Attributes	file-inspection-bw-list_attributes
Schema	`file-inspection-bw-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/file-inspection-bw-list

file-inspection-bw-list attributes

file-inspection-bw-list attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description bw-list file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description bw-list file size in byte

Type: number

Range: 0-2147483647

3.28.16 file geo-location

Display waf files

geo-location Specification

Type	*operational*
Element Name	geo-location
Element URI	/axapi/v3/file/geo-location
Element Attributes	geo-location_attributes
Operational Data URI	/axapi/v3/file/geo-location/oper
Schema	`geo-location schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/geo-location

geo-location attributes

geo-location attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description geo-location database local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description geo-location database list file size in byte

Type: number

Range: 0-2147483647

user-tag

Description Customized tag

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.17 file glm-cert

GLM certificate

glm-cert Specification

Type	*operational*
Element Name	glm-cert
Element URI	/axapi/v3/file/glm-cert
Element Attributes	glm-cert_attributes
Schema	`glm-cert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/glm-cert

glm-cert attributes

glm-cert attributes

action

Description 'import': import;

Type: string

Supported Values: import

device

Description Device (Device ID)

Type: number

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description glm license local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

3.28.18 file glm-license

glm license file information and management commands

glm-license Specification

Type	*operational*
Element Name	glm-license
Element URI	/axapi/v3/file/glm-license
Element Attributes	glm-license_attributes
Schema	`glm-license schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/glm-license

glm-license attributes

glm-license attributes

action

Description 'import': import;

Type: string

Supported Values: import

device

Description Device (Device ID)

Type: number

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description glm license local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

3.28.19 file hc-pt-mapping

harmony-controller partition tenant mapping

hc-pt-mapping Specification

Type	*operational*
Element Name	hc-pt-mapping
Element URI	/axapi/v3/file/hc-pt-mapping
Element Attributes	hc-pt-mapping_attributes
Schema	`hc-pt-mapping schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/hc-pt-mapping

hc-pt-mapping attributes

hc-pt-mapping attributes

action

Description 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: import, export, copy, rename, check, replace, delete

file

Description harmony-controller local partition tenant mapping file

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

3.28.20 file health-external

Address the External Script Program

health-external Specification

Type	*operational*
Element Name	health-external
Element URI	/axapi/v3/file/health-external
Element Attributes	health-external_attributes
Operational Data URI	/axapi/v3/file/health-external/oper
Schema	`health-external schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/health-external

health-external attributes

health-external attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

description

Description Describe the Program Function briefly

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

file

Description Specify the Program Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description syslog file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.21 file health-postfile

Address the HTTP Post data file

health-postfile Specification

Type	*operational*
Element Name	health-postfile
Element URI	/axapi/v3/file/health-postfile
Element Attributes	health-postfile_attributes
Operational Data URI	/axapi/v3/file/health-postfile/oper
Schema	`health-postfile schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/health-postfile

health-postfile attributes

health-postfile attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 32 characters

Maximum Length: 1 characters

file

Description Specify the File Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description syslog file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.22 file license

license file information and management commands

license Specification

Type	*operational*
Element Name	license
Element URI	/axapi/v3/file/license
Element Attributes	license_attributes
Operational Data URI	/axapi/v3/file/license/oper
Schema	`license schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/license

license attributes

license attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

device

Description Device (Device ID)

Type: number

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description license local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description license file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	feature-list		feature-list
	file-list		file-list
	host-id	string	host-id

3.28.23 file local-uri-file

local uri file information and management commands

local-uri-file Specification

Type	*operational*
Element Name	local-uri-file
Element URI	/axapi/v3/file/local-uri-file
Element Attributes	local-uri-file_attributes
Operational Data URI	/axapi/v3/file/local-uri-file/oper
Schema	`local-uri-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/local-uri-file

local-uri-file attributes

local-uri-file attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description local uri file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.24 file log-backup

Backup system files

log-backup Specification

Type	*operational*
Element Name	log-backup
Element URI	/axapi/v3/file/log-backup
Element Attributes	log-backup_attributes
Schema	`log-backup schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/log-backup

log-backup attributes

log-backup attributes

all

Description all log

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

date

Description specify number of days

Type: number

Range: 1-31

day

Description Most recent day

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

expedite

Description Expedite the Backup

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

month

Description Most recent month

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

period

Description Specify backup period

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stats-data

Description Backup web statistical data

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

week

Description Most recent week

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.28.25 file policy

WAF Policy file information and management commands

policy Specification

Type	*operational*
Element Name	policy
Element URI	/axapi/v3/file/policy
Element Attributes	policy_attributes
Operational Data URI	/axapi/v3/file/policy/oper
Schema	`policy schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/policy

policy attributes

policy attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description Policy local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description Policy file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.26 file ssh-pubkey

The ssh pubkey for admin user

ssh-pubkey Specification

Type	*operational*
Element Name	ssh-pubkey
Element URI	/axapi/v3/file/ssh-pubkey
Element Attributes	ssh-pubkey_attributes
Operational Data URI	/axapi/v3/file/ssh-pubkey/oper
Schema	`ssh-pubkey schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/ssh-pubkey

ssh-pubkey attributes

ssh-pubkey attributes

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

user

Description user name of the pub key

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.27 file ssl-cert

ssl certificate file information and management commands

ssl-cert Specification

Type	*operational*
Element Name	ssl-cert
Element URI	/axapi/v3/file/ssl-cert
Element Attributes	ssl-cert_attributes
Operational Data URI	/axapi/v3/file/ssl-cert/oper
Schema	`ssl-cert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/ssl-cert

ssl-cert attributes

ssl-cert attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

certificate-type

Description 'pem': pem; 'der': der; 'pfx': pfx; 'p7b': p7b;

Type: string

Supported Values: pem, der, pfx, p7b

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

file

Description ssl certificate local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 300 characters

Maximum Length: 1 characters

pfx-password

Description The password for certificate file (pfx type only)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

pfx-password-export

Description The password for exported certificate file (pfx type only)

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

size

Description ssl certificate file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	partition	string	partition
	file-list		file-list

3.28.28 file ssl-cert-key

ssl certificate and key file information and management commands

ssl-cert-key Specification

Type	*operational*
Element Name	ssl-cert-key
Element URI	/axapi/v3/file/ssl-cert-key
Element Attributes	ssl-cert-key_attributes
Schema	`ssl-cert-key schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/ssl-cert-key

ssl-cert-key attributes

ssl-cert-key attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

file

Description ssl certificate local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 300 characters

Maximum Length: 1 characters

secured

Description Mark keys as non-exportable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

size

Description ssl certificate file size in byte

Type: number

Range: 0-2147483647

3.28.29 file ssl-cert-poc

ssl certificate file information and management commands

ssl-cert-poc Specification

Type	*operational*
Element Name	ssl-cert-poc
Element URI	/axapi/v3/file/ssl-cert-poc
Element Attributes	ssl-cert-poc_attributes
Schema	`ssl-cert-poc schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/ssl-cert-poc

ssl-cert-poc attributes

ssl-cert-poc attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

certificate-type

Description 'pem': pem; 'der': der; 'pfx': pfx; 'p7b': p7b;

Type: string

Supported Values: pem, der, pfx, p7b

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

file

Description ssl certificate local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

file-handle

Description public-key

Type: string

Format: string-rlx

Maximum Length: 2048 characters

Maximum Length: 1 characters

pfx-password

Description The password for certificate file (pfx type only)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

size

Description ssl certificate file size in byte

Type: number

Range: 0-2147483647

3.28.30 file ssl-crl

ssl crl file information and management commands

ssl-crl Specification

Type	*operational*
Element Name	ssl-crl
Element URI	/axapi/v3/file/ssl-crl
Element Attributes	ssl-crl_attributes
Operational Data URI	/axapi/v3/file/ssl-crl/oper
Schema	`ssl-crl schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/ssl-crl

ssl-crl attributes

ssl-crl attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

file

Description ssl crl local file name

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 300 characters

Maximum Length: 1 characters

size

Description ssl crl file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	partition	string	partition
	file-list		file-list

3.28.31 file ssl-key

ssl key file information and management commands

ssl-key Specification

Type	*operational*
Element Name	ssl-key
Element URI	/axapi/v3/file/ssl-key
Element Attributes	ssl-key_attributes
Operational Data URI	/axapi/v3/file/ssl-key/oper
Schema	`ssl-key schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/ssl-key

ssl-key attributes

ssl-key attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

file

Description ssl key local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 300 characters

Maximum Length: 1 characters

secured

Description Mark as non-exportable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

size

Description ssl key file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	partition	string	partition
	file-list		file-list

3.28.32 file startup-config

Contents of Startup Configuration

startup-config Specification

Type	*operational*
Element Name	startup-config
Element URI	/axapi/v3/file/startup-config
Element Attributes	startup-config_attributes
Operational Data URI	/axapi/v3/file/startup-config/oper
Schema	`startup-config schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/startup-config

startup-config attributes

startup-config attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: import

dst-file

Description destination file name for copy and rename action

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

file

Description startup-config local file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description startup-config file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	current-startup-config	string-rlx	current-startup-config
	sec-startup-config	string-rlx	sec-startup-config
	pri-startup-config	string-rlx	pri-startup-config
	dirty	number	dirty
	file-list		file-list

3.28.33 file syslog

syslog file information and management commands

syslog Specification

Type	*operational*
Element Name	syslog
Element URI	/axapi/v3/file/syslog
Element Attributes	syslog_attributes
Schema	`syslog schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/syslog

syslog attributes

syslog attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description syslog local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description syslog file size in byte

Type: number

Range: 0-2147483647

3.28.34 file system-backup

Backup system files

system-backup Specification

Type	*operational*
Element Name	system-backup
Element URI	/axapi/v3/file/system-backup
Element Attributes	system-backup_attributes
Schema	`system-backup schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/system-backup

system-backup attributes

system-backup attributes

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

3.28.35 file techsupport

Generate the current showtech file

techsupport Specification

Type	*operational*
Element Name	techsupport
Element URI	/axapi/v3/file/techsupport
Element Attributes	techsupport_attributes
Schema	`techsupport schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/techsupport

techsupport attributes

techsupport attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description techsupport local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

size

Description techsupport file size in byte

Type: number

Range: 0-2147483647

3.28.36 file template

upgrade acos wizard template

template Specification

Type	*operational*
Element Name	template
Element URI	/axapi/v3/file/template
Element Attributes	template_attributes
Operational Data URI	/axapi/v3/file/template/oper
Schema	`template schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/template

template attributes

template attributes

act-type

Description Specify ACT package type (i.e. slug/destination name)

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description aflex local file name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description aflex file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	single-act-upgrade-support	string	single-act-upgrade-support
	file-list		file-list

3.28.37 file waf

Display waf files

waf Specification

Type	*operational*
Element Name	waf
Element URI	/axapi/v3/file/waf
Element Attributes	waf_attributes
Operational Data URI	/axapi/v3/file/waf/oper
Schema	`waf schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/waf

waf attributes

waf attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.38 file web-category-license

License file to enable web-category feature activation

web-category-license Specification

Type	*operational*
Element Name	web-category-license
Element URI	/axapi/v3/file/web-category-license
Element Attributes	web-category-license_attributes
Schema	`web-category-license schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/web-category-license

web-category-license attributes

web-category-license attributes

action

Description 'import': import;

Type: string

Supported Values: import

device

Description Device (Device ID)

Type: number

file

Description Web-Category license local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description Full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description License file size in byte

Type: number

Range: 0-2147483647

use-mgmt-port

Description Enable management port for backend

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.28.39 file web-service-cert-key

Import web service's private key and certificate

web-service-cert-key Specification

Type	*operational*
Element Name	web-service-cert-key
Element URI	/axapi/v3/file/web-service-cert-key
Element Attributes	web-service-cert-key_attributes
Schema	`web-service-cert-key schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/web-service-cert-key

web-service-cert-key attributes

web-service-cert-key attributes

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

3.28.40 file wsdl

WSDL file information and management commands

wsdl Specification

Type	*operational*
Element Name	wsdl
Element URI	/axapi/v3/file/wsdl
Element Attributes	wsdl_attributes
Operational Data URI	/axapi/v3/file/wsdl/oper
Schema	`wsdl schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/wsdl

wsdl attributes

wsdl attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description WSDL local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description WSDL file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.28.41 file xml-schema

XML-Schema file information and management commands

xml-schema Specification

Type	*operational*
Element Name	xml-schema
Element URI	/axapi/v3/file/xml-schema
Element Attributes	xml-schema_attributes
Operational Data URI	/axapi/v3/file/xml-schema/oper
Schema	`xml-schema schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file/xml-schema

xml-schema attributes

xml-schema attributes

action

Description 'create': create; 'import': import; 'export': export; 'copy': copy; 'rename': rename; 'check': check; 'replace': replace; 'delete': delete;

Type: string

Supported Values: create, import, export, copy, rename, check, replace, delete

dst-file

Description destination file name for copy and rename action

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file

Description XML-Schema local file name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

file-handle

Description full path of the uploaded file

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

size

Description XML-Schema file size in byte

Type: number

Range: 0-2147483647

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.29 file-inspection

Objects:

3.29.1 file-inspection data-file

File Inspection black white list file information and management commands

data-file Specification

Type	*operational*
Element Name	data-file
Element URI	/axapi/v3/file-inspection/data-file
Element Attributes	data-file_attributes
Operational Data URI	/axapi/v3/file-inspection/data-file/oper
Schema	`data-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file-inspection/data-file

data-file attributes

data-file attributes

action

Description data file action

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

file-url

Description File URL

Type: string

Format: url

name

Description data file name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

source-ip-address

Description Source IP address

Type: string

Format: ipv4-address

Mutual Exclusion: source-ip-address and use-mgmt-port are mutually exclusive

type

Description data file type

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-mgmt-port and source-ip-address are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-list		file-list

3.29.2 file-inspection status

Get upgrading status

status Specification

Type	*operational*
Element Name	status
Element URI	/axapi/v3/file-inspection/status
Element Attributes	status_attributes
Operational Data URI	/axapi/v3/file-inspection/status/oper
Schema	`status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/file-inspection/status

status attributes

status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	status	number	status
	message	string	message

3.30 fw

Objects:

3.30.1 fw apply-changes

Recompile rule-set immediately

apply-changes Specification

Type	*operational*
Element Name	apply-changes
Element URI	/axapi/v3/fw/apply-changes
Element Attributes	apply-changes_attributes
Schema	`apply-changes schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/fw/apply-changes

apply-changes attributes

apply-changes attributes

forced

Description Force recompile rule-set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.31 glm

Objects:

3.31.1 glm new-license

Create license

new-license Specification

Type	*operational*
Element Name	new-license
Element URI	/axapi/v3/glm/new-license
Element Attributes	new-license_attributes
Schema	`new-license schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/glm/new-license

new-license attributes

new-license attributes

account-name

Description Account Name

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

country

Description Country

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

existing-org

Description Use existing account with organization ID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

existing-user

Description Use an existing account with email and password

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

first-name

Description First Name

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

glm-email

Description GLM email

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

glm-password

Description GLM password

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

last-name

Description Last Name

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

name

Description License name (Configure license name)

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

new-email

Description GLM email

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

new-password

Description GLM password

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

new-user

Description Create a new account

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

org-id

Description GLM organization id

Type: number

Range: 1-899760

phone

Description Phone

Type: string

Format: string-rlx

Maximum Length: 99 characters

Maximum Length: 1 characters

type

Description 'webroot': webroot; 'webroot_trial': webroot_trial; 'webroot_ti': webroot_ti; 'webroot_ti_trial': webroot_ti_trial; 'qosmos': qosmos; 'qosmos_trial': qosmos_trial; 'ipsec_vpn': ipsec_vpn;

Type: string

Supported Values: webroot, webroot_trial, webroot_ti, webroot_ti_trial, qosmos, qosmos_trial, ipsec_vpn

3.31.2 glm send

Trigger GLM Connect

send Specification

Type	*operational*
Element Name	send
Element URI	/axapi/v3/glm/send
Element Attributes	send_attributes
Schema	`send schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/glm/send

send attributes

send attributes

license-request

Description Do a single GLM license retrieval

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.32 gslb

Objects:

3.32.1 gslb geoloc

geoloc Specification

Type	*operational*
Element Name	geoloc
Element URI	/axapi/v3/gslb/geoloc
Element Attributes	geoloc_attributes
Operational Data URI	/axapi/v3/gslb/geoloc/oper
Schema	`geoloc schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/gslb/geoloc

geoloc attributes

geoloc attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	ipv6rangestrt	ipv6-address	ipv6rangestrt
	pol-name	string	pol-name
	total-geolocs	number	total-geolocs
	iprangestrt	ipv4-address	iprangestrt
	filter4	enum	Output contains one of the following values: - ip, ipv6, ipstat, ipv6stat
	depth	number	depth
	iprangeend	ipv4-address	iprangeend
	filter1	enum	Output contains one of the following values: - directory, statistics, global
	filter3	enum	Output contains one of the following values: - directory, statistics, global
	filter2	enum	Output contains one of the following values: - directory, statistics, global
	geo-name	string	geo-name
	geoloc-list		geoloc-list

3.32.2 gslb geoloc-rdt

geoloc-rdt Specification

Type	*operational*
Element Name	geoloc-rdt
Element URI	/axapi/v3/gslb/geoloc-rdt
Element Attributes	geoloc-rdt_attributes
Operational Data URI	/axapi/v3/gslb/geoloc-rdt/oper
Schema	`geoloc-rdt schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/gslb/geoloc-rdt

geoloc-rdt attributes

geoloc-rdt attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	geoloc-rdt-list		geoloc-rdt-list
	geo-name	string	geo-name
	site-name	string	site-name
	active-status	string	active-status
	total-rdt	number	total-rdt

3.32.3 gslb geolocation-file

Geolocation File

geolocation-file Specification

Type	*operational*
Element Name	geolocation-file
Element URI	/axapi/v3/gslb/geolocation-file
Element Attributes	geolocation-file_attributes
Operational Data URI	/axapi/v3/gslb/geolocation-file/oper
Schema	`geolocation-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/gslb/geolocation-file

geolocation-file attributes

geolocation-file attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	geofiles		geofiles

3.32.4 gslb group-info

group-info Specification

Type	*operational*
Element Name	group-info
Element URI	/axapi/v3/gslb/group-info
Element Attributes	group-info_attributes
Operational Data URI	/axapi/v3/gslb/group-info/oper
Schema	`group-info schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/gslb/group-info

group-info attributes

group-info attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	member-list		member-list

3.32.5 gslb ip-list-info

Geo-location ip-lists

ip-list-info Specification

Type	*operational*
Element Name	ip-list-info
Element URI	/axapi/v3/gslb/ip-list-info
Element Attributes	ip-list-info_attributes
Operational Data URI	/axapi/v3/gslb/ip-list-info/oper
Schema	`ip-list-info schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/gslb/ip-list-info

ip-list-info attributes

ip-list-info attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	ip-lists		ip-lists

3.32.6 gslb service-port

service-port Specification

Type	*operational*
Element Name	service-port
Element URI	/axapi/v3/gslb/service-port
Element Attributes	service-port_attributes
Operational Data URI	/axapi/v3/gslb/service-port/oper
Schema	`service-port schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/gslb/service-port

service-port attributes

service-port attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	service-port-list		service-port-list

3.33 harmony-controller

Objects:

3.33.1 harmony-controller profile re-sync

Harmony controller profile

re-sync Specification

Type	*operational*
Element Name	re-sync
Element URI	/axapi/v3/harmony-controller/profile/re-sync
Element Attributes	re-sync_attributes
Schema	`re-sync schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/harmony-controller/profile/re-sync

re-sync attributes

re-sync attributes

analytics-bus

Description re-sync analtyics bus connections

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

schema-registry

Description re-sync the schema registry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.34 health

Objects:

3.34.1 health external copy

Copy external health monitor script

copy Specification

Type	*operational*
Element Name	copy
Element URI	/axapi/v3/health/external/copy
Element Attributes	copy_attributes
Schema	`copy schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/health/external/copy

copy attributes

copy attributes

dst-file

Description Destination external health monitor script file name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

src-file

Description Source external health monitor script file name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

3.34.2 health external create

Create external health monitor script

create Specification

Type	*operational*
Element Name	create
Element URI	/axapi/v3/health/external/create
Element Attributes	create_attributes
Schema	`create schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/health/external/create

create attributes

create attributes

description

Description Describe health external monitor script briefly

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-name

Description External health monitor script file name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

3.34.3 health external delete

Delete external health monitor script

delete Specification

Type	*operational*
Element Name	delete
Element URI	/axapi/v3/health/external/delete
Element Attributes	delete_attributes
Schema	`delete schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/health/external/delete

delete attributes

delete attributes

file-name

Description External health monitor script file name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

3.34.4 health external edit

Edit external health monitor script

edit Specification

Type	*operational*
Element Name	edit
Element URI	/axapi/v3/health/external/edit
Element Attributes	edit_attributes
Schema	`edit schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/health/external/edit

edit attributes

edit attributes

description

Description Describe health external monitor script briefly

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

file-name

Description External health monitor script file name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

3.34.5 health external rename

Rename external health monitor script

rename Specification

Type	*operational*
Element Name	rename
Element URI	/axapi/v3/health/external/rename
Element Attributes	rename_attributes
Schema	`rename schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/health/external/rename

rename attributes

rename attributes

dst-file

Description Destination external health monitor script file name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

src-file

Description Source external health monitor script file name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

3.35 hotfix

Objects:

3.35.1 hotfix

hotfix System

hotfix Specification

Type	*operational*
Element Name	hotfix
Element URI	/axapi/v3/hotfix
Element Attributes	hotfix_attributes
Schema	`hotfix schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/hotfix

hotfix attributes

hotfix attributes

apply

Description: apply is a **JSON Block**. Please see below for *apply*

Type: Object

Refernce Object: */axapi/v3/hotfix/apply*

revoke

Description revoke a hotfix

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

apply

Specification	
Type	*object*

file-url

Description File URL

Type: string

Format: url

image-file

Description image file from AXAPI

Type: string

Format: string-rlx

source-ip-address

Description Source ip address

Type: string

Format: ipv4-address

Mutual Exclusion: source-ip-address and use-mgmt-port are mutually exclusive

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-mgmt-port and source-ip-address are mutually exclusive

3.35.2 hotfix apply

apply a hotfix

apply Specification

Type	*operational*
Element Name	apply
Element URI	/axapi/v3/hotfix/apply
Element Attributes	apply_attributes
Schema	`apply schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/hotfix/apply

apply attributes

apply attributes

file-url

Description File URL

Type: string

Format: url

image-file

Description image file from AXAPI

Type: string

Format: string-rlx

source-ip-address

Description Source ip address

Type: string

Format: ipv4-address

Mutual Exclusion: source-ip-address and use-mgmt-port are mutually exclusive

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-mgmt-port and source-ip-address are mutually exclusive

3.36 import

Objects:

3.36.1 import

Get files from remote site

import Specification

Type	*operational*
Element Name	import
Element URI	/axapi/v3/import
Element Attributes	import_attributes
Schema	`import schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/import

import attributes

import attributes

aflex

Description aFleX Script Source File

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-jwks

Description JSON web key

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-portal

Description Portal file for http authentication

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-portal-image

Description Image file for default portal

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-saml-idp

Description: auth-saml-idp is a **JSON Block**. Please see below for *auth-saml-idp*

Type: Object

Refernce Object: */axapi/v3/import/auth-saml-idp*

bios-file

Description BIOS Image file

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

bw-list

Description Black white List File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

ca-cert

Description CA Cert File(enter bulk when import an archive file)

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

certificate-type

Description 'pem': pem; 'der': der; 'pfx': pfx; 'p7b': p7b;

Type: string

Supported Values: pem, der, pfx, p7b

class-list

Description Class List File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-convert

Description Convert Class List File to A10 format

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

class-list-type

Description 'ac': ac; 'ipv4': ipv4; 'ipv6': ipv6; 'string': string; 'string-case-insensitive': string-case-insensitive;

Type: string

Supported Values: ac, ipv4, ipv6, string, string-case-insensitive

cloud-config

Description Cloud Configuration File

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

cloud-creds

Description Cloud Credentials File

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

dnssec-dnskey

Description DNSSEC DNSKEY(KSK) file for child zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

dnssec-ds

Description DNSSEC DS file for child zone

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

geo-location

Description Geo-location CSV File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

glm-cert

Description GLM certificate

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

glm-license

Description License File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

health-external

Description: health-external is a **JSON Block**. Please see below for *health-external*

Type: Object

Refernce Object: */axapi/v3/import/health-external*

health-postfile

Description: health-postfile is a **JSON Block**. Please see below for *health-postfile*

Type: Object

Refernce Object: */axapi/v3/import/health-postfile*

ip-map-list

Description IP Map List File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

local-uri-file

Description Local URI files for http response

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

lw-4o6

Description LW-4over6 Binding Table File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

overwrite

Description Overwrite existing file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

pfx-password

Description The password for certificate file (pfx type only)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

policy

Description WAF policy File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

remote-file

Description profile name for remote url

Type: string

Format: url

Mutual Exclusion: remote-file terminal and store-name are mutually exclusive

rpz

Description Response Policy Zone File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

secured

Description Mark as non-exportable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-cert

Description SSL Cert File(enter bulk when import an archive file)

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

ssl-cert-key

Description 'bulk': import an archive file;

Type: string

Supported Values: bulk

ssl-crl

Description SSL Crl File

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

ssl-key

Description SSL Key File(enter bulk when import an archive file)

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

store

Description: store is a **JSON Block**. Please see below for *store*

Type: Object

Refernce Object: */axapi/v3/import/store*

store-name

Description Import store name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: store-name terminal and remote-file are mutually exclusive

terminal

Description terminal vi

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: terminal remote-file and store-name are mutually exclusive

thales-kmdata

Description Thales Kmdata files

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

thales-secworld

Description Thales security world files

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

to-device

Description: to-device is a **JSON Block**. Please see below for *to-device*

Type: Object

Refernce Object: */axapi/v3/import/to-device*

usb-license

Description USB License File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

web-category-license

Description License file to enable web-category feature

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

wsdl

Description Web Service Definition Language File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

xml-schema

Description XML-Schema File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

health-external

Specification	
Type	*object*

description

Description Describe the Program Function briefly

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

externalfilename

Description Specify the Program Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

overwrite

Description Overwrite existing file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

remote-file

Description

Type: string

Format: url

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

health-postfile

Specification	
Type	*object*

overwrite

Description Overwrite existing file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

postfilename

Description Specify the File Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

remote-file

Description Profile name for remote url

Type: string

Format: url

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

store

Specification	
Type	*object*

create

Description Create an import store profile

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

delete

Description Delete an import store profile

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description profile name to store remote url

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

remote-file

Description

Type: string

Format: url

to-device

Specification	
Type	*object*

device

Description Device (Device ID)

Type: number

glm-cert

Description GLM certificate

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

glm-license

Description License File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

overwrite

Description Overwrite existing file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remote-file

Description profile name for remote url

Type: string

Format: url

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

web-category-license

Description License file to enable web-category feature

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-saml-idp

Specification	
Type	*object*

overwrite

Description Overwrite existing file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

remote-file

Description Profile name for remote url

Type: string

Format: url

saml-idp-name

Description Metadata name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

verify-xml-signature

Description Verify metadata's XML signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.36.2 import auth-saml-idp

SAML metadata of identity provider

auth-saml-idp Specification

Type	*operational*
Element Name	auth-saml-idp
Element URI	/axapi/v3/import/auth-saml-idp
Element Attributes	auth-saml-idp_attributes
Schema	`auth-saml-idp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/import/auth-saml-idp

auth-saml-idp attributes

auth-saml-idp attributes

overwrite

Description Overwrite existing file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

remote-file

Description Profile name for remote url

Type: string

Format: url

saml-idp-name

Description Metadata name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

verify-xml-signature

Description Verify metadata's XML signature

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.36.3 import health-external

Address the External Script Program

health-external Specification

Type	*operational*
Element Name	health-external
Element URI	/axapi/v3/import/health-external
Element Attributes	health-external_attributes
Schema	`health-external schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/import/health-external

health-external attributes

health-external attributes

description

Description Describe the Program Function briefly

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

externalfilename

Description Specify the Program Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

overwrite

Description Overwrite existing file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

remote-file

Description

Type: string

Format: url

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.36.4 import health-postfile

Address the HTTP Post data file

health-postfile Specification

Type	*operational*
Element Name	health-postfile
Element URI	/axapi/v3/import/health-postfile
Element Attributes	health-postfile_attributes
Schema	`health-postfile schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/import/health-postfile

health-postfile attributes

health-postfile attributes

overwrite

Description Overwrite existing file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

postfilename

Description Specify the File Name

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

remote-file

Description Profile name for remote url

Type: string

Format: url

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.36.5 import store

Create store name for remote url

store Specification

Type	*operational*
Element Name	store
Element URI	/axapi/v3/import/store
Element Attributes	store_attributes
Schema	`store schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/import/store

store attributes

store attributes

create

Description Create an import store profile

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

delete

Description Delete an import store profile

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description profile name to store remote url

Type: string

Maximum Length: 31 characters

Maximum Length: 1 characters

remote-file

Description

Type: string

Format: url

3.36.6 import to-device

specify the target device to import in aVCS

to-device Specification

Type	*operational*
Element Name	to-device
Element URI	/axapi/v3/import/to-device
Element Attributes	to-device_attributes
Schema	`to-device schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/import/to-device

to-device attributes

to-device attributes

device

Description Device (Device ID)

Type: number

glm-cert

Description GLM certificate

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

glm-license

Description License File

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

overwrite

Description Overwrite existing file

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remote-file

Description profile name for remote url

Type: string

Format: url

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

web-category-license

Description License file to enable web-category feature

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

3.37 interface

Objects:

3.37.1 interface packet-size-bucket

display packet sized buckets from Hardware

packet-size-bucket Specification

Type	*operational*
Element Name	packet-size-bucket
Element URI	/axapi/v3/interface/packet-size-bucket
Element Attributes	packet-size-bucket_attributes
Operational Data URI	/axapi/v3/interface/packet-size-bucket/oper
Schema	`packet-size-bucket schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/interface/packet-size-bucket

packet-size-bucket attributes

packet-size-bucket attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	interfaces		interfaces

3.37.2 interface switch-drop-reason

display packet drop reasons from Hardware

switch-drop-reason Specification

Type	*operational*
Element Name	switch-drop-reason
Element URI	/axapi/v3/interface/switch-drop-reason
Element Attributes	switch-drop-reason_attributes
Operational Data URI	/axapi/v3/interface/switch-drop-reason/oper
Schema	`switch-drop-reason schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/interface/switch-drop-reason

switch-drop-reason attributes

switch-drop-reason attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	interfaces		interfaces

3.38 ip

Objects:

3.38.1 ip fib

show ip fib

fib Specification

Type	*operational*
Element Name	fib
Element URI	/axapi/v3/ip/fib
Element Attributes	fib_attributes
Operational Data URI	/axapi/v3/ip/fib/oper
Schema	`fib schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/ip/fib

fib attributes

fib attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	Total_Paths	number	Total_Paths
	Total_Routes	number	Total_Routes
	IPv4-fib		IPv4-fib

3.38.2 ip fib-summary

show ip fib summary

fib-summary Specification

Type	*operational*
Element Name	fib-summary
Element URI	/axapi/v3/ip/fib-summary
Element Attributes	fib-summary_attributes
Operational Data URI	/axapi/v3/ip/fib-summary/oper
Schema	`fib-summary schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/ip/fib-summary

fib-summary attributes

fib-summary attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	static_dynamic_routes	number	static_dynamic_routes
	static_dynamic_paths	number	static_dynamic_paths
	total_routes	number	total_routes
	total_paths	number	total_paths
	connected_routes	number	connected_routes

3.39 ipv6

Objects:

3.39.1 ipv6 fib

show ipv6 fib

fib Specification

Type	*operational*
Element Name	fib
Element URI	/axapi/v3/ipv6/fib
Element Attributes	fib_attributes
Operational Data URI	/axapi/v3/ipv6/fib/oper
Schema	`fib schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/ipv6/fib

fib attributes

fib attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	Total_Paths	number	Total_Paths
	Total_Routes	number	Total_Routes
	IPv6-fib		IPv6-fib

3.39.2 ipv6 fib-summary

show ipv6 fib summary

fib-summary Specification

Type	*operational*
Element Name	fib-summary
Element URI	/axapi/v3/ipv6/fib-summary
Element Attributes	fib-summary_attributes
Operational Data URI	/axapi/v3/ipv6/fib-summary/oper
Schema	`fib-summary schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/ipv6/fib-summary

fib-summary attributes

fib-summary attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	static_dynamic_routes	number	static_dynamic_routes
	static_dynamic_paths	number	static_dynamic_paths
	total_routes	number	total_routes
	total_paths	number	total_paths
	connected_routes	number	connected_routes

3.40 link

Objects:

3.40.1 link

Link to Configuration Profile

link Specification

Type	*operational*
Element Name	link
Element URI	/axapi/v3/link
Element Attributes	link_attributes
Schema	`link schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/link

link attributes

link attributes

startup-config

Description: startup-config is a **JSON Block**. Please see below for *startup-config*

Type: Object

Refernce Object: */axapi/v3/link/startup-config*

startup-config

Specification	
Type	*object*

all-partitions

Description All-partitions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default

Description Default startup-config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-name

Description Local Configuration Profile Name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

primary

Description Create link in primary partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secondary

Description Create link in secondary partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.40.2 link startup-config

Startup Configuration

startup-config Specification

Type	*operational*
Element Name	startup-config
Element URI	/axapi/v3/link/startup-config
Element Attributes	startup-config_attributes
Schema	`startup-config schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/link/startup-config

startup-config attributes

startup-config attributes

all-partitions

Description All-partitions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

default

Description Default startup-config

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-name

Description Local Configuration Profile Name

Type: string

Format: string-rlx

Maximum Length: 31 characters

Maximum Length: 1 characters

primary

Description Create link in primary partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secondary

Description Create link in secondary partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.41 locale

Objects:

3.41.1 locale test

To test current terminal encodings for specific locale

test Specification

Type	*operational*
Element Name	test
Element URI	/axapi/v3/locale/test
Element Attributes	test_attributes
Schema	`test schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/locale/test

test attributes

test attributes

locale

Description 'zh_CN': Chinese locale for PRC; 'zh_TW': Chinese locale for Taiwan; 'ja_JP': Japanese locale for Japan;

Type: string

Supported Values: zh_CN, zh_TW, ja_JP

3.42 logging

Objects:

3.42.1 logging export

Export cached log items to the specified destination

export Specification

Type	*operational*
Element Name	export
Element URI	/axapi/v3/logging/export
Element Attributes	export_attributes
Schema	`export schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/logging/export

export attributes

export attributes

all

Description System support messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remote-file

Description Remote url

Type: string

Format: url

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.42.2 logging local-log access

EP access log Info

access Specification

Type	*operational*
Element Name	access
Element URI	/axapi/v3/logging/local-log/access
Element Attributes	access_attributes
Schema	`access schema`

Operations Allowed:

EXECUTE Object

POST

top-n attributes

top-n attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	log-list		log-list
	interval-position	string	interval-position
	top	string	top
	interval	string	interval
	max-entries	number	max-entries
	action	string	action
	start-time	string	start-time
	total	number	total

3.42.5 logging local-log app-fw

Application firewall

app-fw Specification

Type	*operational*
Element Name	app-fw
Element URI	/axapi/v3/logging/local-log/app-fw
Element Attributes	app-fw_attributes
Operational Data URI	/axapi/v3/logging/local-log/app-fw/oper
Schema	`app-fw schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/logging/local-log/app-fw

app-fw attributes

app-fw attributes

dot-plot

Description: dot-plot is a **JSON Block**. Please see below for *dot-plot*

Type: Object

Refernce Object: */axapi/v3/logging/local-log/app-fw/dot-plot*

top-n

Description: top-n is a **JSON Block**. Please see below for *top-n*

Type: Object

Refernce Object: */axapi/v3/logging/local-log/app-fw/top-n*

	source-threat-category-match	string	source-threat-category-match
	start-time	string	start-time
	total	number	total

3.42.6 logging local-log app-fw dot-plot

Application firewall dot plot

dot-plot Specification

Type	*operational*
Element Name	dot-plot
Element URI	/axapi/v3/logging/local-log/app-fw/dot-plot
Element Attributes	dot-plot_attributes
Operational Data URI	/axapi/v3/logging/local-log/app-fw/dot-plot/oper
Schema	`dot-plot schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/logging/local-log/app-fw/dot-plot

dot-plot attributes

dot-plot attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	log-list		log-list
	client-ip	ipv4-address	client-ip
	application-name	string	application-name
	data	string	data
	interval	string	interval
	interval-position	string	interval-position
	total	number	total
	start-time	string	start-time

3.42.7 logging local-log app-fw top-n

Application firewall

top-n Specification

Type	*operational*
Element Name	top-n
Element URI	/axapi/v3/logging/local-log/app-fw/top-n
Element Attributes	top-n_attributes
Operational Data URI	/axapi/v3/logging/local-log/app-fw/top-n/oper
Schema	`top-n schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/logging/local-log/app-fw/top-n

top-n attributes

top-n attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	category	string	category
	log-list		log-list
	interval-position	string	interval-position
	application-name	string	application-name
	top	string	top
	interval	string	interval
	max-entries	number	max-entries
	action	string	action
	threat-category-match	string	threat-category-match
	threat-category	string	threat-category
	client-ip	ipv4-address	client-ip
	start-time	string	start-time
	total	number	total

3.42.8 logging local-log authentication

authentication log

authentication Specification

Type	*operational*
Element Name	authentication
Element URI	/axapi/v3/logging/local-log/authentication
Element Attributes	authentication_attributes
Schema	`authentication schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/logging/local-log/authentication

authentication attributes

authentication attributes

log

Description: log is a **JSON Block**. Please see below for *log*

	interval	string	interval
	max-entries	number	max-entries
	start-time	string	start-time
	total	number	total

3.42.10 logging local-log authentication top-n

Authentication Log Info

top-n Specification

Type	*operational*
Element Name	top-n
Element URI	/axapi/v3/logging/local-log/authentication/top-n
Element Attributes	top-n_attributes
Operational Data URI	/axapi/v3/logging/local-log/authentication/top-n/oper
Schema	`top-n schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/logging/local-log/authentication/top-n

top-n attributes

top-n attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	auth-result	string	auth-result
	interval-position	string	interval-position
	top	string	top
	interval	string	interval
	log-list		log-list
	max-entries	number	max-entries
	start-time	string	start-time
	total	number	total

3.42.11 logging local-log file-category

File category Info

file-category Specification

Type	*operational*
Element Name	file-category
Element URI	/axapi/v3/logging/local-log/file-category
Element Attributes	file-category_attributes
Operational Data URI	/axapi/v3/logging/local-log/file-category/oper
Schema	`file-category schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/logging/local-log/file-category

file-category attributes

file-category attributes

top-n

Description: top-n is a **JSON Block**. Please see below for *top-n*

Type: Object

Refernce Object: */axapi/v3/logging/local-log/file-category/top-n*

	interval-position	string	interval-position
	interval	string	interval
	max-entries	number	max-entries
	start-time	string	start-time
	total	number	total

3.42.12 logging local-log file-category top-n

File category Info

top-n Specification

Type	*operational*
Element Name	top-n
Element URI	/axapi/v3/logging/local-log/file-category/top-n
Element Attributes	top-n_attributes
Operational Data URI	/axapi/v3/logging/local-log/file-category/top-n/oper
Schema	`top-n schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/logging/local-log/file-category/top-n

top-n attributes

top-n attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	file-category	string	file-category
	log-list		log-list
	interval-position	string	interval-position
	top	string	top
	interval	string	interval
	max-entries	number	max-entries
	start-time	string	start-time
	total	number	total

3.43 miscellenious-alb

Objects:

3.43.1 miscellenious-alb

Miscellenious Information Used for CLI rendering

miscellenious-alb Specification

Type	*operational*
Element Name	miscellenious-alb
Element URI	/axapi/v3/miscellenious-alb
Element Attributes	miscellenious-alb_attributes
Operational Data URI	/axapi/v3/miscellenious-alb/oper
Schema	`miscellenious-alb schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/miscellenious-alb

miscellenious-alb attributes

miscellenious-alb attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	crash-count	number	crash-count
	uptime	number	uptime
	reboot-num	number	reboot-num

3.44 multi-ctrl-cpu

Objects:

3.44.1 multi-ctrl-cpu

Enable Multiple Control CPUs

multi-ctrl-cpu Specification

Type	*operational*
Element Name	multi-ctrl-cpu
Element URI	/axapi/v3/multi-ctrl-cpu
Element Attributes	multi-ctrl-cpu_attributes
Schema	`multi-ctrl-cpu schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/multi-ctrl-cpu

multi-ctrl-cpu attributes

multi-ctrl-cpu attributes

num-ctrl-cpus

Description Enter a number between 1 and less than half of the total number of CPUs, default is 1

Type: number

3.45 network

Objects:

3.45.1 network arp dynamic

Dynamic ARP commands

dynamic Specification

Type	*operational*
Element Name	dynamic
Element URI	/axapi/v3/network/arp/dynamic
Element Attributes	dynamic_attributes
Operational Data URI	/axapi/v3/network/arp/dynamic/oper
Schema	`dynamic schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/network/arp/dynamic

dynamic attributes

dynamic attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	arp-list		arp-list

3.45.2 network mac-address dynamic

dynamic MAC commands

dynamic Specification

Type	*operational*
Element Name	dynamic
Element URI	/axapi/v3/network/mac-address/dynamic
Element Attributes	dynamic_attributes
Operational Data URI	/axapi/v3/network/mac-address/dynamic/oper
Schema	`dynamic schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/network/mac-address/dynamic

dynamic attributes

dynamic attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	Age-time	number	Age-time
	macoper		macoper

3.46 ntp-status

Objects:

3.46.1 ntp-status

Get the status of NTP Servers

ntp-status Specification

Type	*operational*
Element Name	ntp-status
Element URI	/axapi/v3/ntp-status
Element Attributes	ntp-status_attributes
Operational Data URI	/axapi/v3/ntp-status/oper
Schema	`ntp-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/ntp-status

ntp-status attributes

ntp-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	server		server

3.47 partition-all

Objects:

3.47.1 partition-all

Display all partitions in the system

partition-all Specification

Type	*operational*
Element Name	partition-all
Element URI	/axapi/v3/partition-all
Element Attributes	partition-all_attributes
Operational Data URI	/axapi/v3/partition-all/oper
Schema	`partition-all schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/partition-all

partition-all attributes

partition-all attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	partition-list		partition-list
	manageable	flag	manageable
	active-partition-count	number	active-partition-count

3.48 partition-available-id

Objects:

3.48.1 partition-available-id

Display the available id can be used to create partition

partition-available-id Specification

Type	*operational*
Element Name	partition-available-id
Element URI	/axapi/v3/partition-available-id
Element Attributes	partition-available-id_attributes
Operational Data URI	/axapi/v3/partition-available-id/oper
Schema	`partition-available-id schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/partition-available-id

partition-available-id attributes

partition-available-id attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	range-list		range-list

3.49 pki

Objects:

3.49.1 pki ca-cert

ca-cert Specification

Type	*operational*
Element Name	ca-cert
Element URI	/axapi/v3/pki/ca-cert
Element Attributes	ca-cert_attributes
Operational Data URI	/axapi/v3/pki/ca-cert/oper
Schema	`ca-cert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/pki/ca-cert

ca-cert attributes

ca-cert attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	exact-match	flag	exact-match
	sortby-exp	flag	sortby-exp
	certs		certs
	sortby-name	flag	sortby-name
	partition	string	partition

3.49.2 pki cert

cert Specification

Type	*operational*
Element Name	cert
Element URI	/axapi/v3/pki/cert
Element Attributes	cert_attributes
Statistics Data URI	/axapi/v3/pki/cert/stats
Operational Data URI	/axapi/v3/pki/cert/oper
Schema	`cert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/pki/cert

cert attributes

cert attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	exact-match	flag	exact-match
	sortby-exp	flag	sortby-exp
	certs		certs
	sortby-name	flag	sortby-name
	partition	string	partition

3.49.3 pki copy-cert

Copy SSL certificate to another file

copy-cert Specification

Type	*operational*
Element Name	copy-cert
Element URI	/axapi/v3/pki/copy-cert
Element Attributes	copy-cert_attributes
Schema	`copy-cert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/pki/copy-cert

copy-cert attributes

copy-cert attributes

dest-cert

Description Destination certificate file

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

overwrite

Description Overwrite the destination file if already present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rotation

Description Specify rotation number of SCEP generated certificate file

Type: number

Range: 1-4

src-cert

Description Source certificate file

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

3.49.4 pki copy-key

Copy SSL key to another file

copy-key Specification

Type	*operational*
Element Name	copy-key
Element URI	/axapi/v3/pki/copy-key
Element Attributes	copy-key_attributes
Schema	`copy-key schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/pki/copy-key

copy-key attributes

copy-key attributes

dest-key

Description Destination key file

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

overwrite

Description Overwrite the destination file if already present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rotation

Description Specify rotation number of SCEP generated key file

Type: number

Range: 1-4

src-key

Description Source key file

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

3.49.5 pki delete

Delete SSL cert

delete Specification

Type	*operational*
Element Name	delete
Element URI	/axapi/v3/pki/delete
Element Attributes	delete_attributes
Operational Data URI	/axapi/v3/pki/delete/oper
Schema	`delete schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/pki/delete

delete attributes

delete attributes

ca

Description CA certificate file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

cert-name

Description Certificate file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

crl

Description CRL file name

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

csr

Description CSR file name

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

private-key

Description Private key file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

3.49.6 pki ssli generate crl

Generate a CRL for for a vport

crl Specification

Type	*operational*
Element Name	crl
Element URI	/axapi/v3/pki/ssli/generate/crl
Element Attributes	crl_attributes
Schema	`crl schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/pki/ssli/generate/crl

crl attributes

crl attributes

port

Description port number

Type: number

Range: 0-65534

vip-name

Description VIP name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

3.49.7 pki ssli revoke

Revoke an SSLi certificate

revoke Specification

Type	*operational*
Element Name	revoke
Element URI	/axapi/v3/pki/ssli/revoke
Element Attributes	revoke_attributes
Schema	`revoke schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/pki/ssli/revoke

revoke attributes

revoke attributes

port

Description port number

Type: number

Range: 0-65534

serial

Description Serial number in hex

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

vip-name

Description VIP name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

3.50 plat-cpu-drop

Objects:

3.50.1 plat-cpu-drop

Miscellenious Information Used for CLI rendering

plat-cpu-drop Specification

Type	*operational*
Element Name	plat-cpu-drop
Element URI	/axapi/v3/plat-cpu-drop
Element Attributes	plat-cpu-drop_attributes
Operational Data URI	/axapi/v3/plat-cpu-drop/oper
Schema	`plat-cpu-drop schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/plat-cpu-drop

plat-cpu-drop attributes

plat-cpu-drop attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	drop-seg		drop-seg
	rate-limit	number	rate-limit
	fpga-seg		fpga-seg
	rate-limit-drp		rate-limit-drp

3.51 plat-cpu-packet

Objects:

3.51.1 plat-cpu-packet

Miscellenious Information Used for CLI rendering

plat-cpu-packet Specification

Type	*operational*
Element Name	plat-cpu-packet
Element URI	/axapi/v3/plat-cpu-packet
Element Attributes	plat-cpu-packet_attributes
Operational Data URI	/axapi/v3/plat-cpu-packet/oper
Schema	`plat-cpu-packet schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/plat-cpu-packet

plat-cpu-packet attributes

plat-cpu-packet attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	pkt-stats		pkt-stats

3.52 poap

Objects:

3.52.1 poap

Set POAP; when next boot, if startup-config is empty, system will enter POAP Mode

poap Specification

Type	*operational*
Element Name	poap
Element URI	/axapi/v3/poap
Element Attributes	poap_attributes
Schema	`poap schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/poap

poap attributes

poap attributes

action

Description 'enable': Enable POAP mode; 'disable': Disable POAP mode;

Type: string

Supported Values: enable, disable

3.53 reboot

Objects:

3.53.1 reboot

Reboot the System

reboot Specification

Type	*operational*
Element Name	reboot
Element URI	/axapi/v3/reboot
Element Attributes	reboot_attributes
Schema	`reboot schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/reboot

reboot attributes

reboot attributes

all

Description Reboot all devices when VCS is enabled, or only this device itself if VCS is not enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

at

Description Reboot at a Specific time/date

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cancel

Description Cancel Pending Reboot

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

day-of-month

Description Day of the Month

Type: number

Range: 1-31

day-of-month-2

Description Day of the Month

Type: number

Range: 1-31

device

Description Reboot a specific device when VCS is enabled (device id)

Type: number

in

Description Reboot after a time interval (Time in hours and minutes)

Type: string

Format: time-hhmm

month

Description 'January': Month of the year; 'February': Month of the year; 'March': Month of the year; 'April': Month of the year; 'May': Month of the year; 'June': Month of the year; 'July': Month of the year; 'August': Month of the year; 'September': Month of the year; 'October': Month of the year; 'November': Month of the year; 'December': Month of the year;

Type: string

Supported Values: January, February, March, April, May, June, July, August, September, October, November, December

month-2

Description 'January': Month of the year; 'February': Month of the year; 'March': Month of the year; 'April': Month of the year; 'May': Month of the year; 'June': Month of the year; 'July': Month of the r; 'August': Month of the year; 'September': Month of the year; 'October': Month of the year; 'November': Month of the year; 'December': Month of the year;

Type: string

Supported Values: January, February, March, April, May, June, July, August, September, October, November, December

reason

Description Reason for Reboot

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

reason-2

Description Reason for Reboot

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

reason-3

Description Reason for Reboot

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

time

Description Time to Reboot (hh:mm)

Type: string

Format: time-hhmm

3.54 reload

Objects:

3.54.1 reload

Reload the system without rebooting

reload Specification

Type	*operational*
Element Name	reload
Element URI	/axapi/v3/reload
Element Attributes	reload_attributes
Schema	`reload schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/reload

reload attributes

reload attributes

all

Description Reload all devices when VCS is enabled, or only this device itself if VCS is not enabled

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

device

Description Reload a specific device when VCS is enabled (device id)

Type: number

3.55 rename

Objects:

3.55.1 rename

Rename Object Name

rename Specification

Type	*operational*
Element Name	rename
Element URI	/axapi/v3/rename
Element Attributes	rename_attributes
Schema	`rename schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rename

rename attributes

rename attributes

instance-name

Description Old Instance Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

new-instance-name

Description New Instance Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

object

Description Lineage of object class for renaming operation

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

3.56 report

Objects:

3.56.1 report debug

Report debugging options

debug Specification

Type	*operational*
Element Name	debug
Element URI	/axapi/v3/report/debug
Element Attributes	debug_attributes
Schema	`debug schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/report/debug

debug attributes

debug attributes

log

Description Enable Report module's normal logs

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sflow

Description Enable debugging logs of sFlow parser

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.57 restore

Objects:

3.57.1 restore

Restore system files

restore Specification

Type	*operational*
Element Name	restore
Element URI	/axapi/v3/restore
Element Attributes	restore_attributes
Schema	`restore schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/restore

restore attributes

restore attributes

password

Description password for the remote site

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

remote-file

Description Remote file path

Type: string

Format: url

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.58 rrd

Objects:

3.58.1 rrd

RRD statistics

rrd Specification

Type	*Intermediate Resource*

3.58.2 rrd cgn

cgn data in RRD

cgn Specification

Type	*operational*
Element Name	cgn
Element URI	/axapi/v3/rrd/cgn
Element Attributes	cgn_attributes
Operational Data URI	/axapi/v3/rrd/cgn/oper
Schema	`cgn schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/cgn

cgn attributes

cgn attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	cgn-data		cgn-data
	end-time	number	end-time
	start-time	number	start-time

3.58.3 rrd cpu

CPU usage in RRD

cpu Specification

Type	*operational*
Element Name	cpu
Element URI	/axapi/v3/rrd/cpu
Element Attributes	cpu_attributes
Operational Data URI	/axapi/v3/rrd/cpu/oper
Schema	`cpu schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/cpu

cpu attributes

cpu attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	cpu-usage		cpu-usage
	end-time	number	end-time
	start-time	number	start-time

3.58.4 rrd cpuavg

CPU average usage in RRD

cpuavg Specification

Type	*operational*
Element Name	cpuavg
Element URI	/axapi/v3/rrd/cpuavg
Element Attributes	cpuavg_attributes
Operational Data URI	/axapi/v3/rrd/cpuavg/oper
Schema	`cpuavg schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/cpuavg

cpuavg attributes

cpuavg attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	cpu-usage		cpu-usage
	end-time	number	end-time
	start-time	number	start-time

3.58.5 rrd disk

Disk usage in RRD

disk Specification

Type	*operational*
Element Name	disk
Element URI	/axapi/v3/rrd/disk
Element Attributes	disk_attributes
Operational Data URI	/axapi/v3/rrd/disk/oper
Schema	`disk schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/disk

disk attributes

disk attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	end-time	number	end-time
	start-time	number	start-time
	total-disk	string	total-disk
	disk-usage		disk-usage

3.58.6 rrd ethernet

ethernet statistics in RRD

ethernet Specification

Type	*operational*
Element Name	ethernet
Element URI	/axapi/v3/rrd/ethernet
Element Attributes	ethernet_attributes
Operational Data URI	/axapi/v3/rrd/ethernet/oper
Schema	`ethernet schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/ethernet

ethernet attributes

ethernet attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	ethernet-index	number	ethernet-index
	end-time	number	end-time
	start-time	number	start-time
	ethernet-statistics		ethernet-statistics

3.58.7 rrd ethernet-all

all ethernet statistics in RRD

ethernet-all Specification

Type	*operational*
Element Name	ethernet-all
Element URI	/axapi/v3/rrd/ethernet-all
Element Attributes	ethernet-all_attributes
Operational Data URI	/axapi/v3/rrd/ethernet-all/oper
Schema	`ethernet-all schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/ethernet-all

ethernet-all attributes

ethernet-all attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	ethernet-statistics		ethernet-statistics
	end-time	number	end-time
	start-time	number	start-time

3.58.8 rrd global

global session data in RRD

global Specification

Type	*operational*
Element Name	global
Element URI	/axapi/v3/rrd/global
Element Attributes	global_attributes
Operational Data URI	/axapi/v3/rrd/global/oper
Schema	`global schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/global

global attributes

global attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	global-data		global-data
	end-time	number	end-time
	start-time	number	start-time

3.58.9 rrd memory

Memory usage in RRD

memory Specification

Type	*operational*
Element Name	memory
Element URI	/axapi/v3/rrd/memory
Element Attributes	memory_attributes
Operational Data URI	/axapi/v3/rrd/memory/oper
Schema	`memory schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/memory

memory attributes

memory attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	mem-usage		mem-usage
	end-time	number	end-time
	start-time	number	start-time

3.58.10 rrd performance

performance data in RRD

performance Specification

Type	*operational*
Element Name	performance
Element URI	/axapi/v3/rrd/performance
Element Attributes	performance_attributes
Operational Data URI	/axapi/v3/rrd/performance/oper
Schema	`performance schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/performance

performance attributes

performance attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	end-time	number	end-time
	start-time	number	start-time
	performance-data		performance-data

3.58.11 rrd slb-server

slb server statistics in RRD

slb-server Specification

Type	*operational*
Element Name	slb-server
Element URI	/axapi/v3/rrd/slb-server
Element Attributes	slb-server_attributes
Operational Data URI	/axapi/v3/rrd/slb-server/oper
Schema	`slb-server schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/slb-server

slb-server attributes

slb-server attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	slb-server-statistics		slb-server-statistics
	slb-server-name	string	slb-server-name
	end-time	number	end-time
	start-time	number	start-time

3.58.12 rrd slb-service-group

slb service group statistics in RRD

slb-service-group Specification

Type	*operational*
Element Name	slb-service-group
Element URI	/axapi/v3/rrd/slb-service-group
Element Attributes	slb-service-group_attributes
Operational Data URI	/axapi/v3/rrd/slb-service-group/oper
Schema	`slb-service-group schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/slb-service-group

slb-service-group attributes

slb-service-group attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	slb-server-statistics		slb-server-statistics
	end-time	number	end-time
	start-time	number	start-time
	slb-service-group-name	string	slb-service-group-name

3.58.13 rrd slb-virtual-server

slb virtual server statistics in RRD

slb-virtual-server Specification

Type	*operational*
Element Name	slb-virtual-server
Element URI	/axapi/v3/rrd/slb-virtual-server
Element Attributes	slb-virtual-server_attributes
Operational Data URI	/axapi/v3/rrd/slb-virtual-server/oper
Schema	`slb-virtual-server schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rrd/slb-virtual-server

slb-virtual-server attributes

slb-virtual-server attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	slb-server-statistics		slb-server-statistics
	slb-virtual-server-name	string	slb-virtual-server-name
	end-time	number	end-time
	start-time	number	start-time

3.59 rule-set

Objects:

3.59.1 rule-set rule move-rule

Move Rule

move-rule Specification

Type	*operational*
Element Name	move-rule
Element URI	/axapi/v3/rule-set/{name}/rule/{name}/move-rule
Element Attributes	move-rule_attributes
Schema	`move-rule schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/rule-set/{name}/rule/{name}/move-rule

move-rule attributes

move-rule attributes

location

Description 'top': top; 'before': before; 'after': after; 'bottom': bottom;

Type: string

Supported Values: top, before, after, bottom

Default: bottom

target-rule

Description

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

3.60 scaleout

Objects:

3.60.1 scaleout status

status Specification

Type	*operational*
Element Name	status
Element URI	/axapi/v3/scaleout/status
Element Attributes	status_attributes
Operational Data URI	/axapi/v3/scaleout/status/oper
Schema	`status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/scaleout/status

status attributes

status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	active-interface-list		active-interface-list
	follow-shared-redirection	number	follow-shared-redirection
	dest-redirect-ip-list		dest-redirect-ip-list
	l2redirect-trunk	number	l2redirect-trunk
	dest-session-sync-ip-list		dest-session-sync-ip-list
	advertised-session-sync-ip-list		advertised-session-sync-ip-list
	device-list		device-list
	exclude-interface-ip-list		exclude-interface-ip-list
	cluster-mode	string	cluster-mode
	l2redirect-operational	number	l2redirect-operational
	role	string	role
	l2redirect-eth	number	l2redirect-eth
	follow-shared-session-sync	number	follow-shared-session-sync
	l2redirect	number	l2redirect
	advertised-redirect-ip-list		advertised-redirect-ip-list
	l2redirect-vlan	number	l2redirect-vlan
	db_role	string	db_role
	l2redirect-valid	number	l2redirect-valid

3.60.2 scaleout traffic-map

traffic-map Specification

Type	*operational*
Element Name	traffic-map
Element URI	/axapi/v3/scaleout/traffic-map
Element Attributes	traffic-map_attributes
Operational Data URI	/axapi/v3/scaleout/traffic-map/oper
Schema	`traffic-map schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/scaleout/traffic-map

traffic-map attributes

traffic-map attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	virtual-server	string	virtual-server
	virtual-port	number	virtual-port
	map-entries-list-head		map-entries-list-head
	tbl-num	number	tbl-num
	src-ip	ipv4-address	src-ip

3.62.3 sessions smp

smp Specification

Type	*operational*
Element Name	smp
Element URI	/axapi/v3/sessions/smp
Element Attributes	smp_attributes
Operational Data URI	/axapi/v3/sessions/smp/oper
Schema	`smp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/sessions/smp

smp attributes

smp attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	session-smp-list		session-smp-list

3.62.4 sessions smp-table

smp-table Specification

Type	*operational*
Element Name	smp-table
Element URI	/axapi/v3/sessions/smp-table
Element Attributes	smp-table_attributes
Operational Data URI	/axapi/v3/sessions/smp-table/oper
Schema	`smp-table schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/sessions/smp-table

smp-table attributes

smp-table attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	entry-list		entry-list

3.63 set-product-id

Objects:

3.63.1 set-product-id

Set product ID

set-product-id Specification

Type	*operational*
Element Name	set-product-id
Element URI	/axapi/v3/set-product-id
Element Attributes	set-product-id_attributes
Schema	`set-product-id schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/set-product-id

set-product-id attributes

set-product-id attributes

id

Description Enter the desired product ID, default is 2

Type: number

Range: 0-9

3.64 shutdown

Objects:

3.64.1 shutdown

Shutdown the System

shutdown Specification

Type	*operational*
Element Name	shutdown
Element URI	/axapi/v3/shutdown
Element Attributes	shutdown_attributes
Schema	`shutdown schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/shutdown

shutdown attributes

shutdown attributes

at

Description Shutdown at a specific time/date

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cancel

Description Cancel Pending Shutdown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

day-of-month

Description Day of the Month

Type: number

Range: 1-31

day-of-month-2

Description Day of the Month

Type: number

Range: 1-31

in

Description Delay before Shutdown (Time in hours and minutes)

Type: string

Format: time-hhmm

month

Description 'January': Month of the year; 'February': Month of the year; 'March': Month of the year; 'April': Month of the year; 'May': Month of the year; 'June': Month of the year; 'July': Month of the year; 'August': Month of the year; 'September': Month of the year; 'October': Month of the year; 'November': Month of the year; 'December': Month of the year;

Type: string

Supported Values: January, February, March, April, May, June, July, August, September, October, November, December

month-2

Description 'January': Month of the year; 'February': Month of the year; 'March': Month of the year; 'April': Month of the year; 'May': Month of the year; 'June': Month of the year; 'July': Month of the year; 'August': Month of the year; 'September': Month of the year; 'October': Month of the year; 'November': Month of the year; 'December': Month of the year;

Type: string

Supported Values: January, February, March, April, May, June, July, August, September, October, November, December

reason

Description Reason for Shutdown

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

reason-2

Description Reason for Shutdown

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

reason-3

Description Reason for Shutdown

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

time

Description Time to Shutdown (hh:mm)

Type: string

Format: time-hhmm

3.65 slb

Objects:

3.65.1 slb ac-class-list

Aho-Corasic add remove config

ac-class-list Specification

Type	*operational*
Object Key(s)	*name*
Element Name	ac-class-list
Element URI	/axapi/v3/slb/ac-class-list/{name}
Element Attributes	ac-class-list_attributes
Schema	`ac-class-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ac-class-list/{name}

ac-class-list attributes

ac-class-list-list

ac-class-list-list is **JSON List** of *ac-class-list attributes*

ac-class-list-list : [

{ *ac-class-list attributes* },

{ *ac-class-list attributes* },

...

]

ac-class-list attributes

ac-list

Type: List

name

Description Specify name of the class list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: test

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

ac-list

Specification	
Type	*list*
Block object keys	

ac-key-string

Description Specify key string

Type: string

Format: string-rlx

Maximum Length: 255 characters

Maximum Length: 1 characters

ac-key-value

Description Specify value string

Type: string

Format: string-rlx

Maximum Length: 639 characters

Maximum Length: 1 characters

ac-match-type

Description 'contains': String contains another string; 'ends-with': String ends with another string; 'equals': String equals another string; 'starts-with': String starts with another string;

Type: string

Supported Values: contains, ends-with, equals, starts-with

action

Description 'add': Add the entry; 'delete': Delete the entry;

Type: string

Supported Values: add, delete

3.65.2 slb health-check-details

Display Health Monitor Information for a given PIN and PID

health-check-details Specification

Type	*operational*
Element Name	health-check-details
Element URI	/axapi/v3/slb/health-check-details
Element Attributes	health-check-details_attributes
Operational Data URI	/axapi/v3/slb/health-check-details/oper
Schema	`health-check-details schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/health-check-details

health-check-details attributes

health-check-details attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	domain	string	domain
	mac-addr	mac-address	mac-addr

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	down_id	number	down_id
	down_reason	string	health down reason

3.65.5 slb health-up-reason

Show health monitor up reason

health-up-reason Specification

Type	*operational*
Element Name	health-up-reason
Element URI	/axapi/v3/slb/health-up-reason
Element Attributes	health-up-reason_attributes
Operational Data URI	/axapi/v3/slb/health-up-reason/oper
Schema	`health-up-reason schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/health-up-reason

health-up-reason attributes

health-up-reason attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	up_id	number	up_id
	up_reason	string	health up reason

3.65.6 slb ipv6-class-list

IPv6 subnet add remove config

ipv6-class-list Specification

Type	*operational*
Object Key(s)	*name*
Element Name	ipv6-class-list
Element URI	/axapi/v3/slb/ipv6-class-list/{name}
Element Attributes	ipv6-class-list_attributes
Schema	`ipv6-class-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ipv6-class-list/{name}

ipv6-class-list attributes

ipv6-class-list-list

ipv6-class-list-list is **JSON List** of *ipv6-class-list attributes*

ipv6-class-list-list : [

{ *ipv6-class-list attributes* },

{ *ipv6-class-list attributes* },

...

]

ipv6-class-list attributes

ipv6-list

Type: List

name

Description Specify name of the class list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: test

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

ipv6-list

Specification	
Type	*list*
Block object keys	

action

Description 'add': Add the entry; 'delete': Delete the entry;

Type: string

Supported Values: add, delete

glid

Description Use global Limit ID (Specify global LID index)

Type: number

Range: 1-1023

Mutual Exclusion: glidlid, lsn-lid and lsn-radius-profile are mutually exclusive

ipv6-addr

Description Specify IPv6 host or subnet

Type: string

Format: ipv6-address-plen

lid

Description Use Limit ID defined in template (Specify LID index)

Type: number

Range: 1-1023

Mutual Exclusion: lidglid, lsn-lid and lsn-radius-profile are mutually exclusive

lsn-lid

Description LSN Limit ID (LID index)

Type: number

Range: 1-1023

Mutual Exclusion: lsn-lidlid, glid and lsn-radius-profile are mutually exclusive

lsn-radius-profile

Description LSN RADIUS Profile Index

Type: number

Range: 1-16

Mutual Exclusion: lsn-radius-profilelid, glid and lsn-lid are mutually exclusive

3.65.7 slb player-id-list

Player id records config

player-id-list Specification

Type	*operational*
Element Name	player-id-list
Element URI	/axapi/v3/slb/player-id-list
Element Attributes	player-id-list_attributes
Schema	`player-id-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/player-id-list

player-id-list attributes

player-id-list attributes

player-record

Type: List

player-record

Specification	
Type	*list*
Block object keys	

game-server-ipv4

Description Specify IP address

Type: string

Format: ipv4-address

game-server-ipv6

Description Specify IPv6 address

Type: string

Format: ipv6-address

game-server-port-v4

Description Port

Type: number

Range: 0-65534

game-server-port-v6

Description Port

Type: number

Range: 0-65534

player-id

Description 64/32 bit player id based on config

Type: number

Range: 0-2147483647

3.65.8 slb reset-unknown-conn

reset-unknown-conn Specification

Type	*operational*
Element Name	reset-unknown-conn
Element URI	/axapi/v3/slb/reset-unknown-conn
Element Attributes	reset-unknown-conn_attributes
Operational Data URI	/axapi/v3/slb/reset-unknown-conn/oper
Schema	`reset-unknown-conn schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/reset-unknown-conn

reset-unknown-conn attributes

reset-unknown-conn attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	unknown-conn-rate-limit-drop	number	unknown-conn-rate-limit-drop
	unknown-conn-rate-limit	number	unknown-conn-rate-limit

3.65.9 slb rpz

Manage rpz Scripts

rpz Specification

Type	*operational*
Element Name	rpz
Element URI	/axapi/v3/slb/rpz
Element Attributes	rpz_attributes
Statistics Data URI	/axapi/v3/slb/rpz/stats
Operational Data URI	/axapi/v3/slb/rpz/oper
Schema	`rpz schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/rpz

rpz attributes

rpz attributes

check

Description Check Response Policy Zone file

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'set_bw_error': Total RPZ Set Class-list Error; 'parse_error': Total RPZ Parse Error;

Type: string

Supported Values: all, set_bw_error, parse_error

stats data

	Counter	Size	Description
	parse_error	8	Total RPZ Parse Error
	set_bw_error	8	Total RPZ Set Class-list Error

operational data

	Counter	Size	Description
	rpz-file-size-max	number	rpz-file-size-max
	rpz-count	number	rpz-count
	file-list		file-list
	filter_entry	string	filter_entry

3.65.10 slb server-ssl-counters

Server side SSL Vport Statistics

server-ssl-counters Specification

Type	*operational*
Element Name	server-ssl-counters
Element URI	/axapi/v3/slb/server-ssl-counters
Element Attributes	server-ssl-counters_attributes
Operational Data URI	/axapi/v3/slb/server-ssl-counters/oper
Schema	`server-ssl-counters schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/server-ssl-counters

server-ssl-counters attributes

server-ssl-counters attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

3.65.11 slb service-group reset

Reset

reset Specification

Type	*operational*
Element Name	reset
Element URI	/axapi/v3/slb/service-group/{name}/reset
Element Attributes	reset_attributes
Schema	`reset schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/service-group/{name}/reset

reset attributes

reset attributes

auto-switch

Description Reset auto stateless state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.65.12 slb ssl-acme-cert-log

acme log information

ssl-acme-cert-log Specification

Type	*operational*
Element Name	ssl-acme-cert-log
Element URI	/axapi/v3/slb/ssl-acme-cert-log
Element Attributes	ssl-acme-cert-log_attributes
Operational Data URI	/axapi/v3/slb/ssl-acme-cert-log/oper
Schema	`ssl-acme-cert-log schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-acme-cert-log

ssl-acme-cert-log attributes

ssl-acme-cert-log attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	name	string	name
	acme-log-offset	number	acme-log-offset
	acme-log-over	number	acme-log-over
	from-start	flag	from-start
	follow	flag	follow
	num-lines	number	num-lines
	acme-log-list		acme-log-list

3.65.13 slb ssl-acme-cert-status

ssl-acme-cert-status Specification

Type	*operational*
Element Name	ssl-acme-cert-status
Element URI	/axapi/v3/slb/ssl-acme-cert-status
Element Attributes	ssl-acme-cert-status_attributes
Operational Data URI	/axapi/v3/slb/ssl-acme-cert-status/oper
Schema	`ssl-acme-cert-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-acme-cert-status

ssl-acme-cert-status attributes

ssl-acme-cert-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	acme-certs		acme-certs

3.65.14 slb ssl-ca-cert

ssl-ca-cert Specification

Type	*operational*
Element Name	ssl-ca-cert
Element URI	/axapi/v3/slb/ssl-ca-cert
Element Attributes	ssl-ca-cert_attributes
Operational Data URI	/axapi/v3/slb/ssl-ca-cert/oper
Schema	`ssl-ca-cert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-ca-cert

ssl-ca-cert attributes

ssl-ca-cert attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	exact-match	flag	exact-match
	sortby-exp	flag	sortby-exp
	ssl-certs		ssl-certs
	sortby-name	flag	sortby-name
	partition	string	partition

3.65.15 slb ssl-cert

ssl-cert Specification

Type	*operational*
Element Name	ssl-cert
Element URI	/axapi/v3/slb/ssl-cert
Element Attributes	ssl-cert_attributes
Statistics Data URI	/axapi/v3/slb/ssl-cert/stats
Operational Data URI	/axapi/v3/slb/ssl-cert/oper
Schema	`ssl-cert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-cert

ssl-cert attributes

ssl-cert attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	exact-match	flag	exact-match
	sortby-exp	flag	sortby-exp
	ssl-certs		ssl-certs
	sortby-name	flag	sortby-name
	partition	string	partition

3.65.16 slb ssl-cert-expire-check

ssl-cert-expire-check Specification

Type	*operational*
Element Name	ssl-cert-expire-check
Element URI	/axapi/v3/slb/ssl-cert-expire-check
Element Attributes	ssl-cert-expire-check_attributes
Operational Data URI	/axapi/v3/slb/ssl-cert-expire-check/oper
Schema	`ssl-cert-expire-check schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-cert-expire-check

ssl-cert-expire-check attributes

ssl-cert-expire-check attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	expire-check-status	enum	Output contains one of the following values: - Enabled, Disabled
	interval	number	interval
	email-address	string	email-address
	email-address2	string	email-address2
	ssl-exception		ssl-exception
	before	number	before

3.65.17 slb ssl-cmp-cert-log

cmp log information

ssl-cmp-cert-log Specification

Type	*operational*
Element Name	ssl-cmp-cert-log
Element URI	/axapi/v3/slb/ssl-cmp-cert-log
Element Attributes	ssl-cmp-cert-log_attributes
Operational Data URI	/axapi/v3/slb/ssl-cmp-cert-log/oper
Schema	`ssl-cmp-cert-log schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-cmp-cert-log

ssl-cmp-cert-log attributes

ssl-cmp-cert-log attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	name	string	name
	cmp-log-offset	number	cmp-log-offset
	from-start	flag	from-start
	cmp-log-list		cmp-log-list
	follow	flag	follow
	cmp-log-over	number	cmp-log-over
	num-lines	number	num-lines

3.65.18 slb ssl-cmp-cert-status

ssl-cmp-cert-status Specification

Type	*operational*
Element Name	ssl-cmp-cert-status
Element URI	/axapi/v3/slb/ssl-cmp-cert-status
Element Attributes	ssl-cmp-cert-status_attributes
Operational Data URI	/axapi/v3/slb/ssl-cmp-cert-status/oper
Schema	`ssl-cmp-cert-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-cmp-cert-status

ssl-cmp-cert-status attributes

ssl-cmp-cert-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	cmp-certs		cmp-certs

3.65.19 slb ssl-counters

Client side SSL Vport Statistics

ssl-counters Specification

Type	*operational*
Element Name	ssl-counters
Element URI	/axapi/v3/slb/ssl-counters
Element Attributes	ssl-counters_attributes
Operational Data URI	/axapi/v3/slb/ssl-counters/oper
Schema	`ssl-counters schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-counters

ssl-counters attributes

ssl-counters attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	tls1-dhe-rsa-aes-128-gcm-sha256-failures	number	TLS1_DHE_RSA_AES_128_GCM_SHA256 Failures

	no-ciphers-available	number	no ciphers available
	bad-ssl-session-id-length	number	bad ssl session id length
	no-publickey	number	no publickey
	excessive-message-size	number	excessive message size
	peer-error-no-certificate	number	peer error no certificate
	library-bug	number	library bug
	ssl-session-id-has-bad-length	number	ssl session id has bad length
	bad-dh-p-length	number	bad dh p length
	tlsv1-alert-user-cancelled	number	tlsv1 alert user cancelled
	wrong-signature-length	number	wrong signature length
	read-bio-not-set	number	read bio not set
	scsv-received-when-renegotiating	number	scsv received when renegotiating
	illegal-padding	number	illegal padding
	library-has-no-ciphers	number	library has no ciphers

3.65.22 slb ssl-expire-check exception

Config the exception which will not be checked

exception Specification

Type	*operational*
Element Name	exception
Element URI	/axapi/v3/slb/ssl-expire-check/exception
Element Attributes	exception_attributes
Schema	`exception schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-expire-check/exception

exception attributes

exception attributes

action

Description 'add': Add an exception; 'delete': Delete an exception; 'clean': Delete all exception;

Type: string

Supported Values: add, delete, clean

certificate-name

Description The certificate name

Type: string

Maximum Length: 245 characters

Maximum Length: 1 characters

3.65.23 slb ssl-forward-proxy-cert

Show hashed certificates

ssl-forward-proxy-cert Specification

Type	*operational*
Element Name	ssl-forward-proxy-cert
Element URI	/axapi/v3/slb/ssl-forward-proxy-cert
Element Attributes	ssl-forward-proxy-cert_attributes
Operational Data URI	/axapi/v3/slb/ssl-forward-proxy-cert/oper
Schema	`ssl-forward-proxy-cert schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-forward-proxy-cert

ssl-forward-proxy-cert attributes

ssl-forward-proxy-cert attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	server-name	string	Name of the server
	hashed-certificate		hashed-certificate
	vserver	string	virtual server name
	server-port	number	Port of the server
	server-ip	string	IPv4 or IPv6 address of the server
	port	number	Virtual Port

3.65.24 slb ssl-ocsp

SSL Online Certificate Status Protocol

ssl-ocsp Specification

Type	*operational*
Element Name	ssl-ocsp
Element URI	/axapi/v3/slb/ssl-ocsp
Element Attributes	ssl-ocsp_attributes
Operational Data URI	/axapi/v3/slb/ssl-ocsp/oper
Schema	`ssl-ocsp schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/ssl-ocsp

ssl-ocsp attributes

ssl-ocsp attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	total-entries	number	Total Entries
	cached-entries		cached-entries

3.65.25 slb template dblb calc-sha1

Calculate sha1 value of a cleartext password

calc-sha1 Specification

Type	*operational*
Element Name	calc-sha1
Element URI	/axapi/v3/slb/template/dblb/{name}/calc-sha1
Element Attributes	calc-sha1_attributes
Schema	`calc-sha1 schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/template/dblb/{name}/calc-sha1

calc-sha1 attributes

calc-sha1 attributes

sha1-value

Description Cleartext password

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

3.65.26 slb virtual-server migrate-vip

Migrate this virtual server

migrate-vip Specification

Type	*operational*
Element Name	migrate-vip
Element URI	/axapi/v3/slb/virtual-server/{name}/migrate-vip
Element Attributes	migrate-vip_attributes
Operational Data URI	/axapi/v3/slb/virtual-server/{name}/migrate-vip/oper
Schema	`migrate-vip schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/slb/virtual-server/{name}/migrate-vip

migrate-vip attributes

migrate-vip attributes

cancel-migration

Description Cancel migration

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: cancel-migration and finish-migration are mutually exclusive

finish-migration

Description Complete the migration

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: finish-migration and cancel-migration are mutually exclusive

target-data-cpu

Description Number of CPUs on the target platform

Type: number

Range: 1-75

target-floating-ipv4

Description Specify IP address

Type: string

Format: ipv4-address

Mutual Exclusion: target-floating-ipv4 and target-floating-ipv6 are mutually exclusive

target-floating-ipv6

Description Specify IPv6 address

Type: string

Format: ipv6-address

Mutual Exclusion: target-floating-ipv6 and target-floating-ipv4 are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	state	enum	Output contains one of the following values: - Sync started, Sync complete, Quiet mode, Not in migration

3.66 sshd

Objects:

3.66.1 sshd

SSHD service operation

sshd Specification

Type	*operational*
Element Name	sshd
Element URI	/axapi/v3/sshd
Element Attributes	sshd_attributes
Schema	`sshd schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/sshd

sshd attributes

sshd attributes

file-url

Description File URL

Type: string

Format: url

generate

Description Generate SSH key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

load

Description Load SSH key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

regenerate

Description Wipe and generate SSH key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

restart

Description Restart SSH service

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

size

Description '2048': Key size 2048bit; '4096': Key size 4096bit;

Type: string

Supported Values: 2048, 4096

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wipe

Description Wipe SSH key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.67 ssl

Objects:

3.67.1 ssl

Local file Mangement

ssl Specification

Type	*Intermediate Resource*
Element Name	ssl
Element URI	/axapi/v3/ssl
Element Attributes	ssl_attributes
Schema	`ssl schema`

Operations Allowed:

Get Object

GET

/axapi/v3/ssl

ssl_attributes

ssl attributes

certificate

Description: certificate is a **JSON Block**. Please see below for *certificate*

Type: Object

Refernce Object: */axapi/v3/ssl/certificate/{name}*

key

Description: key is a **JSON Block**. Please see below for *key*

Type: Object

Refernce Object: */axapi/v3/ssl/key/{name}*

key

Specification	
Type	*object*

name

Description ssl certificate local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

private-key

Description

Type: string

Format: string-rlx

Maximum Length: 2048 characters

Maximum Length: 1 characters

certificate

Specification	
Type	*object*

certificate-type

Description 'pem': pem; 'der': der; 'pfx': pfx; 'p7b': p7b;

Type: string

Supported Values: pem, der, pfx, p7b

name

Description ssl certificate local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

pfx-password

Description The password for certificate file (pfx type only)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

public-key

Description

Type: string

Format: string-rlx

Maximum Length: 2048 characters

Maximum Length: 1 characters

3.67.2 ssl certificate

ssl certificate file information and management commands

certificate Specification

Type	*operational*
Object Key(s)	*name*
Element Name	certificate
Element URI	/axapi/v3/ssl/certificate/{name}
Element Attributes	certificate_attributes
Schema	`certificate schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/ssl/certificate/{name}

certificate attributes

certificate attributes

certificate-type

Description 'pem': pem; 'der': der; 'pfx': pfx; 'p7b': p7b;

Type: string

Supported Values: pem, der, pfx, p7b

name

Description ssl certificate local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

pfx-password

Description The password for certificate file (pfx type only)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

public-key

Description

Type: string

Format: string-rlx

Maximum Length: 2048 characters

Maximum Length: 1 characters

3.67.3 ssl key

ssl certificate and key file information and management commands

key Specification

Type	*operational*
Object Key(s)	*name*
Element Name	key
Element URI	/axapi/v3/ssl/key/{name}
Element Attributes	key_attributes
Schema	`key schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/ssl/key/{name}

key attributes

key attributes

name

Description ssl certificate local file name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

private-key

Description

Type: string

Format: string-rlx

Maximum Length: 2048 characters

Maximum Length: 1 characters

3.68 sys-audit-log

Objects:

3.68.1 sys-audit-log

System Audit Log Info

sys-audit-log Specification

Type	*operational*
Element Name	sys-audit-log
Element URI	/axapi/v3/sys-audit-log
Element Attributes	sys-audit-log_attributes
Operational Data URI	/axapi/v3/sys-audit-log/oper
Schema	`sys-audit-log schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/sys-audit-log

sys-audit-log attributes

sys-audit-log attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	system-audit-log		system-audit-log

3.69 sys-ut

Objects:

3.69.1 sys-ut run-test

Run currently setup test

run-test Specification

Type	*operational*
Element Name	run-test
Element URI	/axapi/v3/sys-ut/run-test
Element Attributes	run-test_attributes
Schema	`run-test schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/sys-ut/run-test

run-test attributes

run-test attributes

mode

Description 'basic': Run Basic mode; 'fault-injection': Run FI mode. This will also run Basic mode to gather data; 'cpu-rr': Run CPU RR mode; 'frag': Run IP frag mode;

Type: string

Supported Values: basic, fault-injection, cpu-rr, frag

3.70 syslog

Objects:

3.70.1 syslog

System Log Info

syslog Specification

Type	*operational*
Element Name	syslog
Element URI	/axapi/v3/syslog
Element Attributes	syslog_attributes
Operational Data URI	/axapi/v3/syslog/oper
Schema	`syslog schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/syslog

syslog attributes

syslog attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	system-log		system-log
	next-msg-idx	number	next-msg-idx

3.71 system

Objects:

3.71.1 system add-cpu-core

Add CPU cores

add-cpu-core Specification

Type	*operational*
Element Name	add-cpu-core
Element URI	/axapi/v3/system/add-cpu-core
Element Attributes	add-cpu-core_attributes
Schema	`add-cpu-core schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/add-cpu-core

add-cpu-core attributes

add-cpu-core attributes

core-index

Description core index to be added (Specify core index)

Type: number

Range: 0-128

3.71.2 system add-port

Add port to Active list

add-port Specification

Type	*operational*
Element Name	add-port
Element URI	/axapi/v3/system/add-port
Element Attributes	add-port_attributes
Schema	`add-port schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/add-port

add-port attributes

add-port attributes

port-index

Description port index to be configured (Specify port index)

Type: number

Range: 0-32

3.71.3 system cm-update-file-name-ref

update the bind name

cm-update-file-name-ref Specification

Type	*operational*
Element Name	cm-update-file-name-ref
Element URI	/axapi/v3/system/cm-update-file-name-ref
Element Attributes	cm-update-file-name-ref_attributes
Schema	`cm-update-file-name-ref schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/cm-update-file-name-ref

cm-update-file-name-ref attributes

cm-update-file-name-ref attributes

dest_name

Description bind dest name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

id

Description Specify unique Partition id

Type: number

source_name

Description bind source name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

3.71.4 system core

Get core dump

core Specification

Type	*operational*
Element Name	core
Element URI	/axapi/v3/system/core
Element Attributes	core_attributes
Operational Data URI	/axapi/v3/system/core/oper
Schema	`core schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/core

core attributes

core attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	status	number	status

3.71.5 system cosq-show

cosq-show Specification

Type	*operational*
Element Name	cosq-show
Element URI	/axapi/v3/system/cosq-show
Element Attributes	cosq-show_attributes
Operational Data URI	/axapi/v3/system/cosq-show/oper
Schema	`cosq-show schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/cosq-show

cosq-show attributes

cosq-show attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	pkt-percosq	number	pkt-percosq

3.71.6 system cpu-hyper-thread

Cpu Hyperthreading

cpu-hyper-thread Specification

Type	*operational*
Element Name	cpu-hyper-thread
Element URI	/axapi/v3/system/cpu-hyper-thread
Element Attributes	cpu-hyper-thread_attributes
Schema	`cpu-hyper-thread schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/cpu-hyper-thread

cpu-hyper-thread attributes

cpu-hyper-thread attributes

disable

Description Disable CPU Hyperthreading

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable

Description Enable CPU Hyperthreading

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.7 system cpu-list

Bare-Metal cpu list

cpu-list Specification

Type	*operational*
Element Name	cpu-list
Element URI	/axapi/v3/system/cpu-list
Element Attributes	cpu-list_attributes
Operational Data URI	/axapi/v3/system/cpu-list/oper
Schema	`cpu-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/cpu-list

cpu-list attributes

cpu-list attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	system-cpu-list		system-cpu-list

3.71.8 system cpu-map

Bare-Metal cpu map

cpu-map Specification

Type	*operational*
Element Name	cpu-map
Element URI	/axapi/v3/system/cpu-map
Element Attributes	cpu-map_attributes
Operational Data URI	/axapi/v3/system/cpu-map/oper
Schema	`cpu-map schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/cpu-map

cpu-map attributes

cpu-map attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	system-cpu-map		system-cpu-map

3.71.9 system deep-hrxq

Enable or disable FPGA Deep HRXQ deepth settings

deep-hrxq Specification

Type	*operational*
Element Name	deep-hrxq
Element URI	/axapi/v3/system/deep-hrxq
Element Attributes	deep-hrxq_attributes
Schema	`deep-hrxq schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/deep-hrxq

deep-hrxq attributes

deep-hrxq attributes

enable

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.10 system del-port

Add port to Black list

del-port Specification

Type	*operational*
Element Name	del-port
Element URI	/axapi/v3/system/del-port
Element Attributes	del-port_attributes
Schema	`del-port schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/del-port

del-port attributes

del-port attributes

port-index

Description port index to be configured (Specify port index)

Type: number

Range: 0-32

3.71.11 system delete-cpu-core

delete CPU cores

delete-cpu-core Specification

Type	*operational*
Element Name	delete-cpu-core
Element URI	/axapi/v3/system/delete-cpu-core
Element Attributes	delete-cpu-core_attributes
Schema	`delete-cpu-core schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/delete-cpu-core

delete-cpu-core attributes

delete-cpu-core attributes

core-index

Description core index to be deleted (Specify core index)

Type: number

Range: 0-128

3.71.12 system environment

environment Specification

Type	*operational*
Element Name	environment
Element URI	/axapi/v3/system/environment
Element Attributes	environment_attributes
Operational Data URI	/axapi/v3/system/environment/oper
Schema	`environment schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/environment

environment attributes

environment attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	fan4a-value	number	fan4a-value
	physical-temperature2	string	physical-temperature2
	fan3a-report	string	fan3a-report
	fan6a-value	number	fan6a-value
	fan2b-value	number	fan2b-value
	fan3a-value	number	fan3a-value
	power-unit3	string	power-unit3
	power-unit2	string	power-unit2
	fan8a-report	string	fan8a-report
	voltage-label-17	string	voltage-label-17
	voltage-label-16	string	voltage-label-16
	voltage-label-15	string	voltage-label-15
	voltage-label-14	string	voltage-label-14
	voltage-label-13	string	voltage-label-13
	voltage-label-12	string	voltage-label-12
	voltage-label-11	string	voltage-label-11
	voltage-label-10	string	voltage-label-10
	fan7b-value	number	fan7b-value
	fan6b-report	string	fan6b-report

continues on next page

Table 3.7 – continued from previous page

	Counter	Size	Description
	power-unit4	string	power-unit4
	voltage-label-3	string	voltage-label-3
	physical-temperature	string	physical-temperature
	fan9a-value	number	fan9a-value
	voltage-label-2	string	voltage-label-2
	fan2a-value	number	fan2a-value
	fan5a-report	string	fan5a-report
	fan8b-report	string	fan8b-report
	power-unit1	string	power-unit1
	fan2a-report	string	fan2a-report
	fan6b-value	number	fan6b-value
	fan7a-value	number	fan7a-value
	fan5b-report	string	fan5b-report
	fan5a-value	number	fan5a-value
	fan10b-report	string	fan10b-report
	voltage-label-8	string	voltage-label-8
	fan5b-value	number	fan5b-value
	fan7b-report	string	fan7b-report
	fan1b-value	number	fan1b-value
	voltage-label-4	string	voltage-label-4
	fan9b-report	string	fan9b-report
	fan8a-value	number	fan8a-value
	fan1b-report	string	fan1b-report
	fan7a-report	string	fan7a-report
	fan10b-value	number	fan10b-value
	fan4b-value	number	fan4b-value
	fan1a-value	number	fan1a-value
	fan10a-report	string	fan10a-report
	cpu0-temperature	string	cpu0-temperature
	fan8b-value	number	fan8b-value
	fan2b-report	string	fan2b-report
	fan4b-report	string	fan4b-report
	fan9b-value	number	fan9b-value
	fan9a-report	string	fan9a-report
	fan10a-value	number	fan10a-value
	voltage-label-1	string	voltage-label-1
	voltage-label-7	string	voltage-label-7

	fan6a-report	string	fan6a-report
	fan1a-report	string	fan1a-report
	fan4a-report	string	fan4a-report
	cpu1-temperature	string	cpu1-temperature
	fan3b-report	string	fan3b-report
	voltage-label-9	string	voltage-label-9
	fan3b-value	number	fan3b-value

3.71.13 system geoloc

geoloc Specification

Type	*operational*
Element Name	geoloc
Element URI	/axapi/v3/system/geoloc
Element Attributes	geoloc_attributes
Statistics Data URI	/axapi/v3/system/geoloc/stats
Operational Data URI	/axapi/v3/system/geoloc/oper
Schema	`geoloc schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/geoloc

geoloc attributes

geoloc attributes

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'place-holder': place-holder;

Type: string

Supported Values: all, place-holder

operational data

	Counter	Size	Description
	ipv6rangestrt	ipv6-address	ipv6rangestrt
	pol-name	string	pol-name
	total-geolocs	number	total-geolocs
	iprangestrt	ipv4-address	iprangestrt
	filter4	enum	Output contains one of the following values: - ip, ipv6, ipstat, ipv6stat
	depth	number	depth
	iprangeend	ipv4-address	iprangeend
	filter1	enum	Output contains one of the following values: - directory, statistics, global
	filter3	enum	Output contains one of the following values: - directory, statistics, global
	filter2	enum	Output contains one of the following values: - directory, statistics, global
	geo-name	string	geo-name
	geoloc-list		geoloc-list

3.71.14 system geolocation-file

Geolocation File

geolocation-file Specification

Type	*operational*
Element Name	geolocation-file
Element URI	/axapi/v3/system/geolocation-file
Element Attributes	geolocation-file_attributes
Operational Data URI	/axapi/v3/system/geolocation-file/oper
Schema	`geolocation-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/geolocation-file

geolocation-file attributes

geolocation-file attributes

error-info

Description: error-info is a **JSON Block**. Please see below for *error-info*

Type: Object

Refernce Object: */axapi/v3/system/geolocation-file/error-info*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

error-info

Specification	
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	geofiles		geofiles

3.71.15 system geolocation-file error-info

Geolocation File Error Information

error-info Specification

Type	*operational*
Element Name	error-info
Element URI	/axapi/v3/system/geolocation-file/error-info
Element Attributes	error-info_attributes
Operational Data URI	/axapi/v3/system/geolocation-file/error-info/oper
Schema	`error-info schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/geolocation-file/error-info

error-info attributes

error-info attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	error-list		error-list
	filename	string	filename

3.71.16 system guest-file

list guest files

guest-file Specification

Type	*operational*
Element Name	guest-file
Element URI	/axapi/v3/system/guest-file
Element Attributes	guest-file_attributes
Operational Data URI	/axapi/v3/system/guest-file/oper
Schema	`guest-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/guest-file

guest-file attributes

guest-file attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

	Counter	Size	Description
	file-list		file-list

3.71.17 system gui-image-list

Get Gui Image List

gui-image-list Specification

Type	*operational*
Element Name	gui-image-list
Element URI	/axapi/v3/system/gui-image-list
Element Attributes	gui-image-list_attributes
Operational Data URI	/axapi/v3/system/gui-image-list/oper
Schema	`gui-image-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/gui-image-list

gui-image-list attributes

gui-image-list attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	gui-list-pri		gui-list-pri
	pre-sec-gui	string	pre-sec-gui
	pre-pri-gui	string	pre-pri-gui
	gui-list-sec		gui-list-sec

3.71.18 system hardware

hardware Specification

Type	*operational*
Element Name	hardware
Element URI	/axapi/v3/system/hardware
Element Attributes	hardware_attributes
Operational Data URI	/axapi/v3/system/hardware/oper
Schema	`hardware schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/hardware

hardware attributes

hardware attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	disk2-status	string	disk2-status
	psu2_np15	string	psu2_np15
	disk-percentage	number	disk-percentage

slb attributes

slb attributes

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'entry-create': Hardware Entries Created; 'entry-create-failure': Hardware Entries Created; 'entry-create-fail-server-down': Hardware Entries Created; 'entry-create-fail-max-entry': Hardware Entries Created; 'entry-free': Hardware Entries Freed; 'entry-free-opp-entry': Hardware Entries Free due to opposite tuple entry ageout event; 'entry-free-no-hw-prog': Hardware Entry Free no hw prog; 'entry-free-no-conn': Hardware Entry Free no matched conn; 'entry-free-no-sw-entry': Hardware Entry Free no software entry; 'entry-counter': Hardware Entry Count; 'entry-age-out': Hardware Entries Aged Out; 'entry-age-out-idle': Hardware Entries Aged Out Idle; 'entry-age-out-tcp-fin': Hardware Entries Aged Out TCP FIN; 'entry-age-out-tcp-rst': Hardware Entries Aged Out TCP RST; 'entry-age-out-invalid-dst': Hardware Entries Aged Out invalid dst; 'entry-force-hw-invalidate': Hardware Entries Force HW Invalidate; 'entry-invalidate-server-down': Hardware Entries Invalidate due to server down; 'tcam-create': TCAM Entries Created; 'tcam-free': TCAM Entries Freed; 'tcam-counter': TCAM Entry Count;

Type: string

Supported Values: all, entry-create, entry-create-failure, entry-create-fail-server-down, entry-create-fail-max-entry, entry-free, entry-free-opp-entry, entry-free-no-hw-prog, entry-free-no-conn, entry-free-no-sw-entry, entry-counter, entry-age-out, entry-age-out-idle, entry-age-out-tcp-fin, entry-age-out-tcp-rst, entry-age-out-invalid-dst, entry-force-hw-invalidate, entry-invalidate-server-down, tcam-create, tcam-free, tcam-counter

stats data

	Counter	Size	Description
	entry-free	8	Hardware Entries Freed
	entry-create-fail-max-entry	8	Hardware Entries Created
	entry-create-failure	8	Hardware Entries Created
	entry-create	8	Hardware Entries Created
	tcam-free	8	TCAM Entries Freed
	entry-age-out	8	Hardware Entries Aged Out
	tcam-create	8	TCAM Entries Created
	entry-create-fail-server-down	8	Hardware Entries Created
	entry-age-out-idle	8	Hardware Entries Aged Out Idle
	entry-age-out-tcp-rst	8	Hardware Entries Aged Out TCP RST
	entry-invalidate-server-down	8	Hardware Entries Invalidate due to server down
	entry-free-no-sw-entry	8	Hardware Entry Free no software entry
	entry-counter	8	Hardware Entry Count
	entry-free-no-hw-prog	8	Hardware Entry Free no hw prog
	entry-free-opp-entry	8	Hardware Entries Free due to opposite tuple entry ageout event
	tcam-counter	8	TCAM Entry Count
	entry-age-out-invalid-dst	8	Hardware Entries Aged Out invalid dst
	entry-force-hw-invalidate	8	Hardware Entries Force HW Invalidate
	entry-free-no-conn	8	Hardware Entry Free no matched conn
	entry-age-out-tcp-fin	8	Hardware Entries Aged Out TCP FIN

3.71.20 system hrxq-status

hrxq-status Specification

Type	*operational*
Element Name	hrxq-status
Element URI	/axapi/v3/system/hrxq-status
Element Attributes	hrxq-status_attributes
Operational Data URI	/axapi/v3/system/hrxq-status/oper
Schema	`hrxq-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/hrxq-status

hrxq-status attributes

hrxq-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	deep-hrxq-enable	string	deep-hrxq-enable
	hrxq_num_chunks	number	hrxq_num_chunks

3.71.21 system inuse-cpu-list

Bare-Metal lb cpu list

inuse-cpu-list Specification

Type	*operational*
Element Name	inuse-cpu-list
Element URI	/axapi/v3/system/inuse-cpu-list
Element Attributes	inuse-cpu-list_attributes
Operational Data URI	/axapi/v3/system/inuse-cpu-list/oper
Schema	`inuse-cpu-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/inuse-cpu-list

inuse-cpu-list attributes

inuse-cpu-list attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	system-inuse-cpu-list		system-inuse-cpu-list

3.71.22 system inuse-port-list

Bare-Metal lb port list

inuse-port-list Specification

Type	*operational*
Element Name	inuse-port-list
Element URI	/axapi/v3/system/inuse-port-list
Element Attributes	inuse-port-list_attributes
Operational Data URI	/axapi/v3/system/inuse-port-list/oper
Schema	`inuse-port-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/inuse-port-list

inuse-port-list attributes

inuse-port-list attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	system-inuse-port-list		system-inuse-port-list

3.71.23 system io-cpu

IO CPU cores

io-cpu Specification

Type	*operational*
Element Name	io-cpu
Element URI	/axapi/v3/system/io-cpu
Element Attributes	io-cpu_attributes
Schema	`io-cpu schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/io-cpu

io-cpu attributes

io-cpu attributes

max-cores

Description max number of IO cores (Specify number of cores)

Type: number

Range: 0-128

3.71.24 system ipmi

Perform IPMI related operations

ipmi Specification

Type	*operational*
Element Name	ipmi
Element URI	/axapi/v3/system/ipmi
Element Attributes	ipmi_attributes
Schema	`ipmi schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/ipmi

ipmi attributes

ipmi attributes

ip

Description: ip is a **JSON Block**. Please see below for *ip*

Type: Object

Refernce Object: */axapi/v3/system/ipmi/ip*

ipsrc

Description: ipsrc is a **JSON Block**. Please see below for *ipsrc*

Type: Object

Refernce Object: */axapi/v3/system/ipmi/ipsrc*

reset

Description Reset IPMI Controller

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tool

Description: tool is a **JSON Block**. Please see below for *tool*

Type: Object

Refernce Object: */axapi/v3/system/ipmi/tool*

user

Description: user is a **JSON Block**. Please see below for *user*

Type: Object

Refernce Object: */axapi/v3/system/ipmi/user*

ip

Specification	
Type	*object*

default-gateway

Description Default gateway address

Type: string

Format: ipv4-address

ipv4-address

Description IP address

Type: string

Format: ipv4-address

ipv4-netmask

Description IP subnet mask

Type: string

Format: ipv4-netmask

ipsrc

Specification	
Type	*object*

dhcp

Description IP addr obtained by BMC running DHCP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

static

Description Manually configured static IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tool

Specification	
Type	*object*

cmd

Description Command to execute in double quotes

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

user

Specification	
Type	*object*

add

Description Add a new IPMI user (IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

administrator

Description Full control

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

callback

Description Lowest privilege level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable an existing IPMI user (IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

newname

Description New IPMI User Name

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

newpass

Description New Password

Type: string

Format: password

Maximum Length: 17 characters

Maximum Length: 1 characters

operator

Description Most BMC commands are allowed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description Password

Type: string

Format: password

Maximum Length: 17 characters

Maximum Length: 1 characters

privilege

Description Change an existing IPMI user privilege (IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

setname

Description Change User Name (Current IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

setpass

Description Change Password (IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

user

Description Only 'benign' commands are allowed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.25 system ipmi ip

Set IP address for IPMI interface

ip Specification

Type	*operational*
Element Name	ip
Element URI	/axapi/v3/system/ipmi/ip
Element Attributes	ip_attributes
Schema	`ip schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/ipmi/ip

ip attributes

ip attributes

default-gateway

Description Default gateway address

Type: string

Format: ipv4-address

ipv4-address

Description IP address

Type: string

Format: ipv4-address

ipv4-netmask

Description IP subnet mask

Type: string

Format: ipv4-netmask

3.71.26 system ipmi ipsrc

Source of IP Address

ipsrc Specification

Type	*operational*
Element Name	ipsrc
Element URI	/axapi/v3/system/ipmi/ipsrc
Element Attributes	ipsrc_attributes
Schema	`ipsrc schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/ipmi/ipsrc

ipsrc attributes

ipsrc attributes

dhcp

Description IP addr obtained by BMC running DHCP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

static

Description Manually configured static IP address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.27 system ipmi tool

Command to execute in double quotes

tool Specification

Type	*operational*
Element Name	tool
Element URI	/axapi/v3/system/ipmi/tool
Element Attributes	tool_attributes
Schema	`tool schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/ipmi/tool

tool attributes

tool attributes

cmd

Description Command to execute in double quotes

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

3.71.28 system ipmi user

Add, Change or Disable IPMI users

user Specification

Type	*operational*
Element Name	user
Element URI	/axapi/v3/system/ipmi/user
Element Attributes	user_attributes
Schema	`user schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/ipmi/user

user attributes

user attributes

add

Description Add a new IPMI user (IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

administrator

Description Full control

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

callback

Description Lowest privilege level

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable an existing IPMI user (IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

newname

Description New IPMI User Name

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

newpass

Description New Password

Type: string

Format: password

Maximum Length: 17 characters

Maximum Length: 1 characters

operator

Description Most BMC commands are allowed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description Password

Type: string

Format: password

Maximum Length: 17 characters

Maximum Length: 1 characters

privilege

Description Change an existing IPMI user privilege (IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

setname

Description Change User Name (Current IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

setpass

Description Change Password (IPMI User Name)

Type: string

Format: string-rlx

Maximum Length: 16 characters

Maximum Length: 1 characters

user

Description Only 'benign' commands are allowed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.29 system ipsec fpga-decrypt

Enable or disable FPGA decryption offload

fpga-decrypt Specification

Type	*operational*
Element Name	fpga-decrypt
Element URI	/axapi/v3/system/ipsec/fpga-decrypt
Element Attributes	fpga-decrypt_attributes
Schema	`fpga-decrypt schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/ipsec/fpga-decrypt

fpga-decrypt attributes

fpga-decrypt attributes

action

Description 'enable': Enable FPGA decryption offload; 'disable': Disable FPGA decryption offload;

Type: string

Supported Values: enable, disable

Default: disable

3.71.30 system link-monitor

Link Monitoring

link-monitor Specification

Type	*operational*
Element Name	link-monitor
Element URI	/axapi/v3/system/link-monitor
Element Attributes	link-monitor_attributes
Schema	`link-monitor schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/link-monitor

link-monitor attributes

link-monitor attributes

disable

Description Disable Link Monitoring

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable

Description Enable Link Monitoring

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.31 system lro

Large Receive Offload

lro Specification

Type	*operational*
Element Name	lro
Element URI	/axapi/v3/system/lro
Element Attributes	lro_attributes
Schema	`lro schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/lro

lro attributes

lro attributes

disable

Description Disable Large Receive Offload

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable

Description Enable Large Receive Offload

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.32 system management-interface-mode

Configure management interface mode

management-interface-mode Specification

Type	*operational*
Element Name	management-interface-mode
Element URI	/axapi/v3/system/management-interface-mode
Element Attributes	management-interface-mode_attributes
Schema	`management-interface-mode schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/management-interface-mode

management-interface-mode attributes

management-interface-mode attributes

dedicated

Description Set management interface in dedicated mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

non-dedicated

Description Set management interface in non-dedicated mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.33 system mfa-auth

MFA authentication API

mfa-auth Specification

Type	*operational*
Element Name	mfa-auth
Element URI	/axapi/v3/system/mfa-auth
Element Attributes	mfa-auth_attributes
Schema	`mfa-auth schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/mfa-auth

mfa-auth attributes

mfa-auth attributes

second-factor

Description Input second factor paramter

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

username

Description Username for MFA validation

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

3.71.34 system mgmt-port

set management port

mgmt-port Specification

Type	*operational*
Element Name	mgmt-port
Element URI	/axapi/v3/system/mgmt-port
Element Attributes	mgmt-port_attributes
Schema	`mgmt-port schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/mgmt-port

mgmt-port attributes

mgmt-port attributes

mac-address

Description mac-address to be configured as mgmt port

Type: string

Format: mac-address

Maximum Length: 14 characters

Maximum Length: 14 characters

pci-address

Description pci-address to be configured as mgmt port

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

port-index

Description port index to be configured (Specify port index)

Type: number

Range: 0-32

3.71.35 system modify-port

Change port number

modify-port Specification

Type	*operational*
Element Name	modify-port
Element URI	/axapi/v3/system/modify-port
Element Attributes	modify-port_attributes
Schema	`modify-port schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/modify-port

modify-port attributes

modify-port attributes

port-index

Description port index to be configured (Specify port index)

Type: number

Range: 0-32

port-number

Description port number to be configured (Specify port number)

Type: number

Range: 1-32

3.71.36 system multi-queue-support

To Enable/disable Multi-Queue-Support

multi-queue-support Specification

Type	*operational*
Element Name	multi-queue-support
Element URI	/axapi/v3/system/multi-queue-support
Element Attributes	multi-queue-support_attributes
Schema	`multi-queue-support schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/multi-queue-support

multi-queue-support attributes

multi-queue-support attributes

enable

Description Enable Multi-Queue-Support

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.37 system platformtype

platformtype Specification

Type	*operational*
Element Name	platformtype
Element URI	/axapi/v3/system/platformtype
Element Attributes	platformtype_attributes
Operational Data URI	/axapi/v3/system/platformtype/oper
Schema	`platformtype schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/platformtype

platformtype attributes

platformtype attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	platform-lxc	number	platform-lxc
	platform-dpdk	number	platform-dpdk
	platform-info	string	platform-info
	platform-axv	number	platform-axv
	platform-type	string	platform-type
	platform-id	number	platform-id

3.71.38 system port-info

Bare-Metal port info

port-info Specification

Type	*operational*
Element Name	port-info
Element URI	/axapi/v3/system/port-info
Element Attributes	port-info_attributes
Operational Data URI	/axapi/v3/system/port-info/oper
Schema	`port-info schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/port-info

port-info attributes

port-info attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	system-port-info		system-port-info

3.71.39 system port-list

Bare-Metal port list

port-list Specification

Type	*operational*
Element Name	port-list
Element URI	/axapi/v3/system/port-list
Element Attributes	port-list_attributes
Operational Data URI	/axapi/v3/system/port-list/oper
Schema	`port-list schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/port-list

port-list attributes

port-list attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	system-port-list		system-port-list

3.71.40 system psu-info

Display system PSU information like SerialNumber

psu-info Specification

Type	*operational*
Element Name	psu-info
Element URI	/axapi/v3/system/psu-info
Element Attributes	psu-info_attributes
Operational Data URI	/axapi/v3/system/psu-info/oper
Schema	`psu-info schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/psu-info

psu-info attributes

psu-info attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	psu-info		psu-info

3.71.41 system reboot

reboot Specification

Type	*operational*
Element Name	reboot
Element URI	/axapi/v3/system/reboot
Element Attributes	reboot_attributes
Operational Data URI	/axapi/v3/system/reboot/oper
Schema	`reboot schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/reboot

reboot attributes

reboot attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	hostname	string	hostname
	hour	string	hour
	uname	string	uname
	boot-now	number	boot-now
	epoch-time	string	epoch-time
	reason	string-rlx	reason
	boot-scheduled	number	boot-scheduled
	min	string	min

3.71.42 system set-rxtx-desc-size

Set the number of Descriptor size per queue

set-rxtx-desc-size Specification

Type	*operational*
Element Name	set-rxtx-desc-size
Element URI	/axapi/v3/system/set-rxtx-desc-size
Element Attributes	set-rxtx-desc-size_attributes
Schema	`set-rxtx-desc-size schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/set-rxtx-desc-size

set-rxtx-desc-size attributes

set-rxtx-desc-size attributes

port-index

Description port index to be configured (Specify port index)

Type: number

Range: 0-32

rxd-size

Description Set new rx-descriptor size

Type: number

Range: 0-65536

txd-size

Description Set new tx-descriptor size

Type: number

Range: 0-65536

3.71.43 system set-rxtx-queue

Set the number of Queues per port

set-rxtx-queue Specification

Type	*operational*
Element Name	set-rxtx-queue
Element URI	/axapi/v3/system/set-rxtx-queue
Element Attributes	set-rxtx-queue_attributes
Schema	`set-rxtx-queue schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/set-rxtx-queue

set-rxtx-queue attributes

set-rxtx-queue attributes

port-index

Description port index to be configured (Specify port index)

Type: number

Range: 0-32

rxq-size

Description Set number of new rx queues

Type: number

Range: 0-1024

txq-size

Description Set number of new tx queues

Type: number

Range: 0-1024

3.71.44 system shared-poll-mode

Configure shared poll mode

shared-poll-mode Specification

Type	*operational*
Element Name	shared-poll-mode
Element URI	/axapi/v3/system/shared-poll-mode
Element Attributes	shared-poll-mode_attributes
Schema	`shared-poll-mode schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/shared-poll-mode

shared-poll-mode attributes

shared-poll-mode attributes

disable

Description Disable shared poll mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable

Description Enable shared poll mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.45 system shutdown

shutdown Specification

Type	*operational*
Element Name	shutdown
Element URI	/axapi/v3/system/shutdown
Element Attributes	shutdown_attributes
Operational Data URI	/axapi/v3/system/shutdown/oper
Schema	`shutdown schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/shutdown

shutdown attributes

shutdown attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	hostname	string	hostname
	hour	string	hour
	uname	string	uname
	boot-now	number	boot-now
	epoch-time	string	epoch-time
	reason	string-rlx	reason
	boot-scheduled	number	boot-scheduled
	min	string	min

3.71.46 system spe-profile

Set Security Policy Engine Profile

spe-profile Specification

Type	*operational*
Element Name	spe-profile
Element URI	/axapi/v3/system/spe-profile
Element Attributes	spe-profile_attributes
Schema	`spe-profile schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/spe-profile

spe-profile attributes

spe-profile attributes

action

Description 'ipv4-only': Enable IPv4 HW forward entries only; 'ipv6-only': Enable IPv6 HW forward entries only; 'ipv4-ipv6': Enable Both IPv4/IPv6 HW forward entries (shared);

Type: string

Supported Values: ipv4-only, ipv6-only, ipv4-ipv6

Default: ipv4-ipv6

3.71.47 system spe-status

spe-status Specification

Type	*operational*
Element Name	spe-status
Element URI	/axapi/v3/system/spe-status
Element Attributes	spe-status_attributes
Operational Data URI	/axapi/v3/system/spe-status/oper
Schema	`spe-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/spe-status

spe-status attributes

spe-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	ipv4_allowed	number	ipv4_allowed
	spe-profile	string	spe-profile
	enable	string	enable
	ipv6_allowed	number	ipv6_allowed
	spe-setup-status	string	spe-setup-status

3.71.48 system ssl-status

ssl-status Specification

Type	*operational*
Element Name	ssl-status
Element URI	/axapi/v3/system/ssl-status
Element Attributes	ssl-status_attributes
Operational Data URI	/axapi/v3/system/ssl-status/oper
Schema	`ssl-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/ssl-status

ssl-status attributes

ssl-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	num_aes	number	num_aes
	enable	string	enable
	crypto-support	string	crypto-support
	ssl-setup-status	string	ssl-setup-status
	num_chip	number	num_chip

3.71.49 system syslog-time-msec

Enable syslog timestamp in millisecond

syslog-time-msec Specification

Type	*operational*
Element Name	syslog-time-msec
Element URI	/axapi/v3/system/syslog-time-msec
Element Attributes	syslog-time-msec_attributes
Schema	`syslog-time-msec schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/syslog-time-msec

syslog-time-msec attributes

syslog-time-msec attributes

enable-flag

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.50 system tso

TCP Segmentation Offload

tso Specification

Type	*operational*
Element Name	tso
Element URI	/axapi/v3/system/tso
Element Attributes	tso_attributes
Schema	`tso schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/tso

tso attributes

tso attributes

disable

Description Disable TCP Segmentation Offload

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable

Description Enable TCP Segmentation Offload

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.71.51 system upgrade-status

Get upgrading status

upgrade-status Specification

Type	*operational*
Element Name	upgrade-status
Element URI	/axapi/v3/system/upgrade-status
Element Attributes	upgrade-status_attributes
Operational Data URI	/axapi/v3/system/upgrade-status/oper
Schema	`upgrade-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system/upgrade-status

upgrade-status attributes

upgrade-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	status	number	status
	rollback-sec	string	rollback-sec
	message	string	message
	rollback-pri	string	rollback-pri

3.72 system-big-buff-pool

Objects:

3.72.1 system-big-buff-pool

System big buff pool config

system-big-buff-pool Specification

Type	*operational*
Element Name	system-big-buff-pool
Element URI	/axapi/v3/system-big-buff-pool
Element Attributes	system-big-buff-pool_attributes
Schema	`system-big-buff-pool schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/system-big-buff-pool

system-big-buff-pool attributes

system-big-buff-pool attributes

big-buff-pool

Description Configure big I/O buffer pool

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.73 system-cpu

Objects:

3.73.1 system-cpu

System CPU usage

system-cpu Specification

Type	*Intermediate Resource*
Element Name	system-cpu
Element URI	/axapi/v3/system-cpu
Element Attributes	system-cpu_attributes
Schema	`system-cpu schema`

Operations Allowed:

Get Object

GET

/axapi/v3/system-cpu

system-cpu_attributes

delete

Description Delete one local GUI image

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

file-url

Description File URL

Type: string

Format: url

Mutual Exclusion: file-urllocal, rollback, file-url and image-file are mutually exclusive

gui-upload

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

image

Description 'pri': Primary image; 'sec': Secondary image;

Type: string

Supported Values: pri, sec

image-file

Description

Type: string

Format: string-rlx

Mutual Exclusion: image-filelocal, rollback and file-url are mutually exclusive

local

Description Local GUI image name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: local file-url and image-file are mutually exclusive

remote-url

Description

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

rollback

Description Rollback to a specific local GUI image

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: rollbackuse-mgmt-port, source-ip-address, show-percentage, save-gui, upload, file-url and image-file are mutually exclusive

source-ip-address

Description Source IP address

Type: string

Format: ipv4-address

Mutual Exclusion: source-ip-address rollback and use-mgmt-port are mutually exclusive

upload

Description Upload GUI image from remote

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: upload and rollback are mutually exclusive

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-mgmt-port rollback and source-ip-address are mutually exclusive

image

Description 'pri': Primary image; 'sec': Secondary image;

Type: string

Supported Values: pri, sec

image-file

Description

Type: string

Format: string-rlx

Mutual Exclusion: image-filelocal, rollback and file-url are mutually exclusive

local

Description Local GUI image name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: local file-url and image-file are mutually exclusive

remote-url

Description

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

rollback

Description Rollback to a specific local GUI image

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: rollbackuse-mgmt-port, source-ip-address, show-percentage, save-gui, upload, file-url and image-file are mutually exclusive

source-ip-address

Description Source IP address

Type: string

Format: ipv4-address

Mutual Exclusion: source-ip-address rollback and use-mgmt-port are mutually exclusive

upload

Description Upload GUI image from remote

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: upload and rollback are mutually exclusive

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-mgmt-port rollback and source-ip-address are mutually exclusive

3.77.4 upgrade hd

Hard Disk

hd Specification

Type	*operational*
Element Name	hd
Element URI	/axapi/v3/upgrade/hd
Element Attributes	hd_attributes
Schema	`hd schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/upgrade/hd

hd attributes

hd attributes

Device

Description

Type: number

file-url

Description File URL

Type: string

Format: url

Mutual Exclusion: file-urllocal, rollback and image-file are mutually exclusive

image

Description 'pri': Primary image; 'sec': Secondary image;

Type: string

Supported Values: pri, sec

image-file

Description

Type: string

Format: string-rlx

Mutual Exclusion: image-filelocal, rollback and file-url are mutually exclusive

local

Description Use image from local VCS image repository (Specify an image name, format: aximage_XX_XX_XX_XX.tar.gz)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Mutual Exclusion: localuse-mgmt-port, source-ip-address, show-percentage, file-url and image-file are mutually exclusive

reboot-after-upgrade

Description reboot system after upgrade is done

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rollback

Description

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: rollbackuse-mgmt-port, source-ip-address, show-percentage, file-url and image-file are mutually exclusive

source-ip-address

Description Source ip address

Type: string

Format: ipv4-address

Mutual Exclusion: source-ip-addresslocal, rollback and use-mgmt-port are mutually exclusive

staggered-upgrade-mode

Description in staggered upgrade mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-mgmt-portlocal, rollback and source-ip-address are mutually exclusive

3.78 vcs

Objects:

3.78.1 vcs debug

VCS debug

debug Specification

Type	*operational*
Element Name	debug
Element URI	/axapi/v3/vcs/debug
Element Attributes	debug_attributes
Schema	`debug schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vcs/debug

debug attributes

debug attributes

daemon

Description Daemon component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

daemon_msg

Description Daemon message component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

election

Description Election component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

election_pdu

Description Election pdu component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encoder

Description Encoder component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

handler

Description Handler component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

info

Description Information component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lib

Description Lib component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

net

Description Net component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl

Description SSL component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

util

Description Utility component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vblade

Description vBlade component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vblade_msg

Description vBlade Message component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vmaster

Description vMaster component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vmaster_msg

Description vMaster Message component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.78.2 vcs images

VCS Images Information

images Specification

Type	*operational*
Element Name	images
Element URI	/axapi/v3/vcs/images
Element Attributes	images_attributes
Operational Data URI	/axapi/v3/vcs/images/oper
Schema	`images schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vcs/images

images attributes

images attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	images-list		images-list

3.78.3 vcs reload

VCS reload

reload Specification

Type	*operational*
Element Name	reload
Element URI	/axapi/v3/vcs/reload
Element Attributes	reload_attributes
Schema	`reload schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vcs/reload

reload attributes

reload attributes

disable-merge

Description don't merge this vBlade's configuration to aVCS chassis

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.78.4 vcs showdebug

VCS Summary Information

showdebug Specification

Type	*operational*
Element Name	showdebug
Element URI	/axapi/v3/vcs/showdebug
Element Attributes	showdebug_attributes
Operational Data URI	/axapi/v3/vcs/showdebug/oper
Schema	`showdebug schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vcs/showdebug

showdebug attributes

showdebug attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	debugging-buff-size	number	debugging-buff-size
	debugging-switches	string	debugging-switches

3.78.5 vcs vMaster-maintenance

During this period, vMaster can leave and come back to be vMaster again

vMaster-maintenance Specification

Type	*operational*
Element Name	vMaster-maintenance
Element URI	/axapi/v3/vcs/vMaster-maintenance
Element Attributes	vMaster-maintenance_attributes
Schema	`vMaster-maintenance schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vcs/vMaster-maintenance

vMaster-maintenance attributes

vMaster-maintenance attributes

vMaster-maintenance

Description the seconds vMaster will be maintained, 60 by default

Type: number

Range: 0-3600

Default: 60

3.78.6 vcs vcs-summary

VCS Summary Information

vcs-summary Specification

Type	*operational*
Element Name	vcs-summary
Element URI	/axapi/v3/vcs/vcs-summary
Element Attributes	vcs-summary_attributes
Operational Data URI	/axapi/v3/vcs/vcs-summary/oper
Schema	`vcs-summary schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vcs/vcs-summary

vcs-summary attributes

vcs-summary attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	chassis-id	number	chassis-id
	multicast-port	number	multicast-port
	floating-ipv6-list		floating-ipv6-list
	multicast-addr	string	multicast-addr
	vmaster-maintenance-interval	number	vmaster-maintenance-interval
	vcs-handshake-completed-list		vcs-handshake-completed-list
	version	string	version
	vmaster-maintenance-left	number	vmaster-maintenance-left
	member-list		member-list
	floating-ipv4-list		floating-ipv4-list
	vcs-enabled	string	vcs-enabled

3.78.7 vcs vmaster-take-over

Forcefully take over mastership

vmaster-take-over Specification

Type	*operational*
Element Name	vmaster-take-over
Element URI	/axapi/v3/vcs/vmaster-take-over
Element Attributes	vmaster-take-over_attributes
Schema	`vmaster-take-over schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vcs/vmaster-take-over

vmaster-take-over attributes

vmaster-take-over attributes

vmaster-take-over

Description vMaster take over priority

Type: number

Range: 1-255

3.79 vcs-chassis

Objects:

3.79.1 vcs-chassis

Virtual Chassis System

vcs-chassis Specification

Type	*Intermediate Resource*
Element Name	vcs-chassis
Element URI	/axapi/v3/vcs-chassis
Element Attributes	vcs-chassis_attributes
Schema	`vcs-chassis schema`

Operations Allowed:

Get Object

GET

/axapi/v3/vcs-chassis

vcs-chassis_attributes

vcs-chassis attributes

debug

Description: debug is a **JSON Block**. Please see below for *debug*

Type: Object

Refernce Object: */axapi/v3/vcs-chassis/debug*

slot-summary

Description: slot-summary is a **JSON Block**. Please see below for *slot-summary*

Type: Object

Refernce Object: */axapi/v3/vcs-chassis/slot-summary*

debug

Specification	
Type	*object*

daemon

Description Daemon component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

daemon_msg

Description Daemon message component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

election

Description Election component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

election_pdu

Description Election pdu component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encoder

Description Encoder component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

handler

Description Handler component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

info

Description Information component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lib

Description Lib component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

net

Description Net component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl

Description SSL component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

util

Description Utility component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vblade

Description vBlade component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vblade_msg

Description vBlade Message component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vmaster

Description vMaster component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vmaster_msg

Description vMaster Message component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

slot-summary

Specification

	cots-sys-mfg	string	cots-sys-mfg

3.81 visibility

Objects:

3.81.1 visibility monitor delete-debug-file

Delete the debug entity file

delete-debug-file Specification

Type	*operational*
Object Key(s)	*debug-ip-addr*
Element Name	delete-debug-file
Element URI	/axapi/v3/visibility/monitor/delete-debug-file/{debug-ip-addr}
Element Attributes	delete-debug-file_attributes
Schema	`delete-debug-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/visibility/monitor/delete-debug-file/{debug-ip-addr}

delete-debug-file attributes

delete-debug-file attributes

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

3.81.2 visibility monitor replay-debug-file

Replay the debug entity file

replay-debug-file Specification

Type	*operational*
Object Key(s)	*debug-ip-addr*
Element Name	replay-debug-file
Element URI	/axapi/v3/visibility/monitor/replay-debug-file/{debug-ip-addr}
Element Attributes	replay-debug-file_attributes
Schema	`replay-debug-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/visibility/monitor/replay-debug-file/{debug-ip-addr}

replay-debug-file attributes

replay-debug-file attributes

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

3.81.3 visibility monitor secondary-monitor delete-debug-file

Delete the debug entity file

delete-debug-file Specification

Type	*operational*
Object Key(s)	*debug-ip-addr*
Element Name	delete-debug-file
Element URI	/axapi/v3/visibility/monitor/secondary-monitor/delete-debug-file/{debug-ip-addr}
Element Attributes	delete-debug-file_attributes
Schema	`delete-debug-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/visibility/monitor/secondary-monitor/delete-debug-file/{debug-ip-addr}

delete-debug-file attributes

delete-debug-file attributes

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

3.81.4 visibility monitor secondary-monitor replay-debug-file

Replay the debug entity file

replay-debug-file Specification

Type	*operational*
Object Key(s)	*debug-ip-addr*
Element Name	replay-debug-file
Element URI	/axapi/v3/visibility/monitor/secondary-monitor/replay-debug-file/{debug-ip-addr}
Element Attributes	replay-debug-file_attributes
Schema	`replay-debug-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/visibility/monitor/secondary-monitor/replay-debug-file/{debug-ip-addr}

replay-debug-file attributes

replay-debug-file attributes

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

3.81.5 visibility packet-capture delete-packet-capture-file

Delete the Packet capture pcapng file

delete-packet-capture-file Specification

Type	*operational*
Element Name	delete-packet-capture-file
Element URI	/axapi/v3/visibility/packet-capture/delete-packet-capture-file
Element Attributes	delete-packet-capture-file_attributes
Schema	`delete-packet-capture-file schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/visibility/packet-capture/delete-packet-capture-file

delete-packet-capture-file attributes

delete-packet-capture-file attributes

all

Description Delete all files in this partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-name

Description Specify the name of the packet capture file to be deleted

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

3.81.6 visibility reporting template notification debug

Display Notification Template Debug

debug Specification

Type	*operational*
Element Name	debug
Element URI	/axapi/v3/visibility/reporting/template/notification/debug

3.82.3 vpn errordump

Error dump

errordump Specification

Type	*operational*
Element Name	errordump
Element URI	/axapi/v3/vpn/errordump
Element Attributes	errordump_attributes
Operational Data URI	/axapi/v3/vpn/errordump/oper
Schema	`errordump schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vpn/errordump

errordump attributes

errordump attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	IPsec-error-dump-path	string	IPsec-error-dump-path

3.82.4 vpn ike-sa-brief

IKE SA brief

ike-sa-brief Specification

Type	*operational*
Element Name	ike-sa-brief
Element URI	/axapi/v3/vpn/ike-sa-brief
Element Attributes	ike-sa-brief_attributes
Operational Data URI	/axapi/v3/vpn/ike-sa-brief/oper
Schema	`ike-sa-brief schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vpn/ike-sa-brief

ike-sa-brief attributes

ike-sa-brief attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	local-ip	string	local-ip
	name	string	name
	ike-sa-brief-remote-gw		ike-sa-brief-remote-gw

3.82.5 vpn ike-sa-clients

IKE SA clients

ike-sa-clients Specification

Type	*operational*
Element Name	ike-sa-clients
Element URI	/axapi/v3/vpn/ike-sa-clients
Element Attributes	ike-sa-clients_attributes
Operational Data URI	/axapi/v3/vpn/ike-sa-clients/oper
Schema	`ike-sa-clients schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vpn/ike-sa-clients

ike-sa-clients attributes

ike-sa-clients attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	ike-sa-clients-remote-gw		ike-sa-clients-remote-gw
	ike-sa-clients-local-ip	string	ike-sa-clients-local-ip
	name	string	name

3.82.6 vpn ipsec-sa-clients

IPsec SA clients

ipsec-sa-clients Specification

Type	*operational*
Element Name	ipsec-sa-clients
Element URI	/axapi/v3/vpn/ipsec-sa-clients
Element Attributes	ipsec-sa-clients_attributes
Operational Data URI	/axapi/v3/vpn/ipsec-sa-clients/oper
Schema	`ipsec-sa-clients schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vpn/ipsec-sa-clients

ipsec-sa-clients attributes

ipsec-sa-clients attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	ipsec-clients		ipsec-clients

3.82.7 vpn log

Log

log Specification

Type	*operational*
Element Name	log
Element URI	/axapi/v3/vpn/log
Element Attributes	log_attributes
Operational Data URI	/axapi/v3/vpn/log/oper
Schema	`log schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vpn/log

log attributes

log attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	vpn-log-offset	number	vpn-log-offset
	vpn-log-over	number	vpn-log-over
	vpn-log-list		vpn-log-list
	from-start	flag	from-start
	follow	flag	follow
	num-lines	number	num-lines

3.83 vrrp-a

Objects:

3.83.1 vrrp-a detail

display vrrp-a peer detail status

detail Specification

Type	*operational*
Element Name	detail
Element URI	/axapi/v3/vrrp-a/detail
Element Attributes	detail_attributes
Operational Data URI	/axapi/v3/vrrp-a/detail/oper
Schema	`detail schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vrrp-a/detail

detail attributes

detail attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	err_port	number	err_port
	err_parid	number	err_parid
	time_inaccurate_count	number	time_inaccurate_count
	bad_group_rcv	number	bad_group_rcv
	vrrp_version_mismatch	number	vrrp_version_mismatch
	ip_pools_exceeded	number	ip_pools_exceeded
	lock_try	number	lock_try
	set_id_mismatch	number	set_id_mismatch
	l2_no_route	number	l2_no_route
	err_devid	number	err_devid
	peer_info_list		peer_info_list
	dup_id_rcv	number	dup_id_rcv
	local_info_list		local_info_list
	ip6_pools_exceeded	number	ip6_pools_exceeded

3.83.2 vrrp-a force-self-standby

HA VRRP-A Operational Command to force the unit or a group to HA standby state

force-self-standby Specification

Type	*operational*
Element Name	force-self-standby
Element URI	/axapi/v3/vrrp-a/force-self-standby
Element Attributes	force-self-standby_attributes
Schema	`force-self-standby schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vrrp-a/force-self-standby

force-self-standby attributes

force-self-standby attributes

action

Description 'enable': enable vrrp-a force-self-standby; 'disable': disable vrrp-a force-self-standby;

Type: string

Supported Values: enable, disable

all-partitions

Description force all partitions in standby state

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vrid

Description Specify one VRRP-A vrid to force into standby state

Type: number

Range: 0-31

3.83.3 vrrp-a hostid

vrrp-a device serial number or softax UUID

hostid Specification

Type	*operational*
Element Name	hostid
Element URI	/axapi/v3/vrrp-a/hostid
Element Attributes	hostid_attributes
Operational Data URI	/axapi/v3/vrrp-a/hostid/oper
Schema	`hostid schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vrrp-a/hostid

hostid attributes

hostid attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	hostid-list		hostid-list
	set_ID	number	set_ID

3.83.4 vrrp-a mac

corresponding virtual mac

mac Specification

Type	*operational*
Element Name	mac
Element URI	/axapi/v3/vrrp-a/mac
Element Attributes	mac_attributes
Operational Data URI	/axapi/v3/vrrp-a/mac/oper
Schema	`mac schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vrrp-a/mac

mac attributes

mac attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	vrid-mac-list		vrid-mac-list

3.83.5 vrrp-a partition-vrid-all-status

display vrid all status for all partitions

partition-vrid-all-status Specification

Type	*operational*
Element Name	partition-vrid-all-status
Element URI	/axapi/v3/vrrp-a/partition-vrid-all-status
Element Attributes	partition-vrid-all-status_attributes
Operational Data URI	/axapi/v3/vrrp-a/partition-vrid-all-status/oper
Schema	`partition-vrid-all-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vrrp-a/partition-vrid-all-status

partition-vrid-all-status attributes

partition-vrid-all-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	all-partition-list		all-partition-list

3.83.6 vrrp-a partition-vrid-status

display vrrp-a status for all partitions

partition-vrid-status Specification

Type	*operational*
Element Name	partition-vrid-status
Element URI	/axapi/v3/vrrp-a/partition-vrid-status
Element Attributes	partition-vrid-status_attributes
Operational Data URI	/axapi/v3/vrrp-a/partition-vrid-status/oper
Schema	`partition-vrid-status schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vrrp-a/partition-vrid-status

partition-vrid-status attributes

partition-vrid-status attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	all-partition-list		all-partition-list

3.83.7 vrrp-a setid-monitor

monitor set id that has been used

setid-monitor Specification

Type	*operational*
Element Name	setid-monitor
Element URI	/axapi/v3/vrrp-a/setid-monitor
Element Attributes	setid-monitor_attributes
Operational Data URI	/axapi/v3/vrrp-a/setid-monitor/oper
Schema	`setid-monitor schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vrrp-a/setid-monitor

setid-monitor attributes

setid-monitor attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	set-id	number	set-id
	setid-list		setid-list

3.83.8 vrrp-a state-cpu

HA VRRP-A Global Commands

state-cpu Specification

Type	*operational*
Element Name	state-cpu
Element URI	/axapi/v3/vrrp-a/state-cpu
Element Attributes	state-cpu_attributes
Operational Data URI	/axapi/v3/vrrp-a/state-cpu/oper
Schema	`state-cpu schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/vrrp-a/state-cpu

state-cpu attributes

state-cpu attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

operational data

	Counter	Size	Description
	cpu-usage		cpu-usage

3.84 web-service

Objects:

3.84.1 web-service secure

Web-service secure operation

secure Specification

Type	*operational*
Element Name	secure
Element URI	/axapi/v3/web-service/secure
Element Attributes	secure_attributes
Schema	`secure schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/web-service/secure

secure attributes

secure attributes

certificate

Description: certificate is a **JSON Block**. Please see below for *certificate*

Type: Object

Refernce Object: */axapi/v3/web-service/secure/certificate*

generate

Description: generate is a **JSON Block**. Please see below for *generate*

Type: Object

Refernce Object: */axapi/v3/web-service/secure/generate*

private-key

Description: private-key is a **JSON Block**. Please see below for *private-key*

Type: Object

Refernce Object: */axapi/v3/web-service/secure/private-key*

regenerate

Description: regenerate is a **JSON Block**. Please see below for *regenerate*

Type: Object

Refernce Object: */axapi/v3/web-service/secure/regenerate*

restart

Description Restart WEB service

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

wipe

Description Wipe WEB private-key and certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

certificate

Specification	
Type	*object*

file-url

Description File URL

Type: string

Format: url

load

Description Load WEB certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

regenerate

Specification	
Type	*object*

country

Description The country name

Type: string

Maximum Length: 2 characters

Maximum Length: 2 characters

domain-name

Description The domain name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

state

Description The location

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

generate

Specification	
Type	*object*

country

Description The country name

Type: string

Maximum Length: 2 characters

Maximum Length: 2 characters

domain-name

Description The domain name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

state

Description The location

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

private-key

Specification	
Type	*object*

file-url

Description File URL

Type: string

Format: url

load

Description Load WEB private-key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.84.2 web-service secure certificate

Web-service secure certificate operation

certificate Specification

Type	*operational*
Element Name	certificate
Element URI	/axapi/v3/web-service/secure/certificate
Element Attributes	certificate_attributes
Schema	`certificate schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/web-service/secure/certificate

certificate attributes

certificate attributes

file-url

Description File URL

Type: string

Format: url

load

Description Load WEB certificate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.84.3 web-service secure generate

Web-service secure generate operation

generate Specification

Type	*operational*
Element Name	generate
Element URI	/axapi/v3/web-service/secure/generate
Element Attributes	generate_attributes
Schema	`generate schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/web-service/secure/generate

generate attributes

generate attributes

country

Description The country name

Type: string

Maximum Length: 2 characters

Maximum Length: 2 characters

domain-name

Description The domain name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

state

Description The location

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

3.84.4 web-service secure private-key

Web-service secure private-key operation

private-key Specification

Type	*operational*
Element Name	private-key
Element URI	/axapi/v3/web-service/secure/private-key
Element Attributes	private-key_attributes
Schema	`private-key schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/web-service/secure/private-key

private-key attributes

private-key attributes

file-url

Description File URL

Type: string

Format: url

load

Description Load WEB private-key

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port as source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

3.84.5 web-service secure regenerate

Web-service secure regenerate operation

regenerate Specification

Type	*operational*
Element Name	regenerate
Element URI	/axapi/v3/web-service/secure/regenerate
Element Attributes	regenerate_attributes
Schema	`regenerate schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/web-service/secure/regenerate

regenerate attributes

regenerate attributes

country

Description The country name

Type: string

Maximum Length: 2 characters

Maximum Length: 2 characters

domain-name

Description The domain name

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

state

Description The location

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

3.85 write

Objects:

3.85.1 write

Write memory

write Specification

Type	*operational*
Element Name	write
Element URI	/axapi/v3/write
Element Attributes	write_attributes
Schema	`write schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/write

write attributes

write attributes

memory

Description: memory is a **JSON Block**. Please see below for *memory*

Type: Object

Refernce Object: */axapi/v3/write/memory*

memory

Specification	
Type	*object*

destination

Description 'primary': Write to default Primary Configuration; 'secondary': Write to default Secondary Configuration; 'local': Local Configuration Profile Name;

Type: string

Supported Values: primary, secondary, local

partition

Description 'all': All partition configurations; 'shared': Shared partition; 'specified': Specified partition;

Type: string

Supported Values: all, shared, specified

profile

Description Local Configuration Profile Name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

specified-partition

Description Specified partition

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

3.85.2 write memory

Write memory

memory Specification

Type	*operational*
Element Name	memory
Element URI	/axapi/v3/write/memory
Element Attributes	memory_attributes
Schema	`memory schema`

Operations Allowed:

EXECUTE Object

POST

/axapi/v3/write/memory

memory attributes

memory attributes

destination

Description 'primary': Write to default Primary Configuration; 'secondary': Write to default Secondary Configuration; 'local': Local Configuration Profile Name;

Type: string

Supported Values: primary, secondary, local

partition

Description 'all': All partition configurations; 'shared': Shared partition; 'specified': Specified partition;

Type: string

Supported Values: all, shared, specified

profile

Description Local Configuration Profile Name

Type: string

Format: string-rlx

Maximum Length: 128 characters

Maximum Length: 1 characters

specified-partition

Description Specified partition

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters
