	server_ssl_count_total	8	Total SSL Server Count
	gtp_c_half_open_counter	8	GTP-C Half Open
	gtp_cum_conn_counter	8	GTP cumulative Conn Count
	gtp_echo_counter	8	GTP-Echo Count
	ip_counter	8	IP Count
	client_template_unknown_err	8	client template unknown error
	server_ssl_session_ticket_reuse_total	8	Total SSL Server Session Ticket Reuse
	total_clientside_early_data_connections	8	Total clientside early data connections
	gtp_c_est_counter	8	GTP-C Established
	conn_type_3_available	8	Conn Type 3 Available
	total_local_conn	8	Total Local Conn
	client_ssl_fatal_alert	8	client ssl fatal alert
	total_ip_nat_conn	8	Total IP Nat Conn
	conn_app_smp_alloc_counter	8	Conn APP SMP Alloc
	conn_type_2_available	8	Conn Type 2 Available
	conn_smp_type_0_available	8	Conn SMP Type 0 Available
	total_l7_packet_count	8	Total L7 Packet Count
	total_tcp_conn	8	Total TCP Conn
	tcp_half_open_counter	8	TCP Half Open
	server_ssl_fatal_alert	8	server ssl fatal alert
	conn_type_1_available	8	Conn Type 1 Available
	gtp_cum_conn_freed_counter	8	GTP cumulative Conn Freed
	client_ssl_fin_rst	8	client ssl fin rst
	ssl_count_total	8	Total SSL Count
	conn_freed_counter	8	Conn Freed
	conn_type_0_available	8	Conn Type 0 Available
	conn_smp_free_counter	8	Conn SMP Free
	total_serverside_failed_early_data-connections	8	Total serverside failed early data connections
	total_fw_conn	8	Total Firewall Conn
	gtp_curr_free_conn	8	GTP Current Available Conn
	curr_free_conn	8	Curr Free Conn
	client_ssl_reuse_total	8	Total SSL Client Reuse
	udp_counter	8	UDP Count
	conn_smp_type_2_available	8	Conn SMP Type 2 Available
	diameter_concurrent_user_sessions_counter	8	Diameter Concurrent User-Sessions
	gtp_u_counter	8	GTP-U Count
	conn_smp_aged_counter	8	Conn SMP Aged
	conn_smp_type_1_available	8	Conn SMP Type 1 Available
	sctp-half-open-counter	8	SCTP Half Open

Table 2.66 – continued from previous page

	Counter	Size	Description
	total_serverside_early_data_connections	8	Total serverside early data connections
	tcp_syn_half_open_counter	8	TCP SYN Half Open
	server_template_unknown_err	8	server template unknown error
	diameter_conn_freed_counter	8	Diameter Conn Freed
	total_l4_conn_proxy	8	Total L4 Conn Proxy Count
	conn_smp_type_3_available	8	Conn SMP Type 3 Available
	conn_smp_alloc_counter	8	Conn SMP Alloc
	conn_counter	8	Conn Count
	server_ssl_fin_rst	8	server ssl fin rst
	other_counter	8	Non TCP/UDP IP sessions
	total_logging_conn	8	Total Logging Conn
	server_ssl_count_curr	8	Current SSL Server Count
	fp_session_fin_rst	8	FP Session FIN/RST
	server_ssl_reuse_total	8	Total SSL Server Reuse
	conn_smp_type_4_available	8	Conn SMP Type 4 Available
	diameter_conn_counter	8	Diameter Conn Count
	tcp_half_close_counter	8	TCP Half Closed
	total_l4_conn	8	Total L4 Count
	reverse_nat_udp_counter	8	Reverse NAT UDP
	sctp-est-counter	8	SCTP Established
	ssl_count_curr	8	Curr SSL Count

2.99.62 system session-reclaim-limit

Set limits for smp session reclaim

session-reclaim-limit Specification

Type	*Configuration Resource*
Element Name	session-reclaim-limit
Element URI	/axapi/v3/system/session-reclaim-limit
Element Attributes	session-reclaim-limit_attributes
Schema	`session-reclaim-limit schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/session-reclaim-limit

session-reclaim-limit attributes

Get Object

GET

/axapi/v3/system/session-reclaim-limit

session-reclaim-limit attributes

Modify Object

POST

/axapi/v3/system/session-reclaim-limit

session-reclaim-limit attributes

Replace Object

PUT

/axapi/v3/system/session-reclaim-limit

session-reclaim-limit attributes

Delete Object

DELETE

/axapi/v3/system/session-reclaim-limit

session-reclaim-limit attributes

session-reclaim-limit attributes

nscan-limit

Description smp session scan limit (number of smp sessions per scan)

Type: number

Range: 1-20480

Default: 4096

scan-freq

Description smp session scan frequency (scan per second)

Type: number

Range: 5-50

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.63 system set-tcp-syn-per-sec

Configure tcp syn per sec

set-tcp-syn-per-sec Specification

Type	*Configuration Resource*
Element Name	set-tcp-syn-per-sec
Element URI	/axapi/v3/system/set-tcp-syn-per-sec
Element Attributes	set-tcp-syn-per-sec_attributes
Schema	`set-tcp-syn-per-sec schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/set-tcp-syn-per-sec

set-tcp-syn-per-sec attributes

Get Object

GET

/axapi/v3/system/set-tcp-syn-per-sec

set-tcp-syn-per-sec attributes

Modify Object

POST

/axapi/v3/system/set-tcp-syn-per-sec

set-tcp-syn-per-sec attributes

Replace Object

PUT

/axapi/v3/system/set-tcp-syn-per-sec

set-tcp-syn-per-sec attributes

Delete Object

DELETE

/axapi/v3/system/set-tcp-syn-per-sec

set-tcp-syn-per-sec attributes

set-tcp-syn-per-sec attributes

tcp-syn-value

Description Configure Tcp SYN's per sec, default 70

Type: number

Range: 25-128

Default: 70

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.64 system shell-privileges

Configuration for special shell privileges

shell-privileges Specification

Type	*Configuration Resource*
Element Name	shell-privileges
Element URI	/axapi/v3/system/shell-privileges
Element Attributes	shell-privileges_attributes
Schema	`shell-privileges schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/shell-privileges

shell-privileges attributes

Get Object

GET

/axapi/v3/system/shell-privileges

shell-privileges attributes

Modify Object

POST

/axapi/v3/system/shell-privileges

shell-privileges attributes

Replace Object

PUT

/axapi/v3/system/shell-privileges

shell-privileges attributes

Delete Object

DELETE

/axapi/v3/system/shell-privileges

shell-privileges attributes

shell-privileges attributes

enable-shell-privileges

Description enable the shell privileges for a given customer

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.65 system shm-logging

Configure shared memory logging

shm-logging Specification

Type	*Configuration Resource*
Element Name	shm-logging
Element URI	/axapi/v3/system/shm-logging
Element Attributes	shm-logging_attributes
Schema	`shm-logging schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/shm-logging

shm-logging attributes

Get Object

GET

/axapi/v3/system/shm-logging

shm-logging attributes

Modify Object

POST

/axapi/v3/system/shm-logging

shm-logging attributes

Replace Object

PUT

/axapi/v3/system/shm-logging

shm-logging attributes

Delete Object

DELETE

/axapi/v3/system/shm-logging

shm-logging attributes

shm-logging attributes

enable

Description Enable shared memory based logging

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.66 system ssl-req-q

System SSL Request Queue statistics

ssl-req-q Specification

Type	*Configuration Resource*
Element Name	ssl-req-q
Element URI	/axapi/v3/system/ssl-req-q
Element Attributes	ssl-req-q_attributes
Statistics Data URI	/axapi/v3/system/ssl-req-q/stats
Schema	`ssl-req-q schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/ssl-req-q

ssl-req-q attributes

Get Object

GET

/axapi/v3/system/ssl-req-q

ssl-req-q attributes

Modify Object

POST

/axapi/v3/system/ssl-req-q

ssl-req-q attributes

Replace Object

PUT

/axapi/v3/system/ssl-req-q

ssl-req-q attributes

Delete Object

DELETE

/axapi/v3/system/ssl-req-q

ssl-req-q attributes

ssl-req-q attributes

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'num-ssl-queues': num-ssl-queues; 'ssl-req-q-depth-tot': ssl-req-q-depth-tot; 'ssl-req-q-inuse-tot': ssl-req-q-inuse-tot; 'ssl-hw-q-depth-tot': ssl-hw-q-depth-tot; 'ssl-hw-q-inuse-tot': ssl-hw-q-inuse-tot;

Type: string

Supported Values: all, num-ssl-queues, ssl-req-q-depth-tot, ssl-req-q-inuse-tot, ssl-hw-q-depth-tot, ssl-hw-q-inuse-tot

stats data

	Counter	Size	Description
	num-ssl-queues	8	num-ssl-queues
	ssl-hw-q-inuse-tot	8	ssl-hw-q-inuse-tot
	ssl-hw-q-depth-tot	8	ssl-hw-q-depth-tot
	ssl-req-q-depth-tot	8	ssl-req-q-depth-tot
	ssl-req-q-inuse-tot	8	ssl-req-q-inuse-tot

2.99.67 system ssl-scv

To Enable/disable SSL connection server certificate validation

ssl-scv Specification

Type	*Configuration Resource*
Element Name	ssl-scv
Element URI	/axapi/v3/system/ssl-scv
Element Attributes	ssl-scv_attributes
Schema	`ssl-scv schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/ssl-scv

ssl-scv attributes

Get Object

GET

/axapi/v3/system/ssl-scv

ssl-scv attributes

Modify Object

POST

/axapi/v3/system/ssl-scv

ssl-scv attributes

Replace Object

PUT

/axapi/v3/system/ssl-scv

ssl-scv attributes

Delete Object

DELETE

/axapi/v3/system/ssl-scv

ssl-scv attributes

ssl-scv attributes

enable

Description Enable server certificate validation for all SSL connections

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.68 system ssl-scv-verify-crl-sign

To Enable/disable verifying CRL signature during server certificate validation

ssl-scv-verify-crl-sign Specification

Type	*Configuration Resource*
Element Name	ssl-scv-verify-crl-sign
Element URI	/axapi/v3/system/ssl-scv-verify-crl-sign
Element Attributes	ssl-scv-verify-crl-sign_attributes
Schema	`ssl-scv-verify-crl-sign schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/ssl-scv-verify-crl-sign

ssl-scv-verify-crl-sign attributes

Get Object

GET

/axapi/v3/system/ssl-scv-verify-crl-sign

ssl-scv-verify-crl-sign attributes

Modify Object

POST

/axapi/v3/system/ssl-scv-verify-crl-sign

ssl-scv-verify-crl-sign attributes

Replace Object

PUT

/axapi/v3/system/ssl-scv-verify-crl-sign

ssl-scv-verify-crl-sign attributes

Delete Object

DELETE

/axapi/v3/system/ssl-scv-verify-crl-sign

ssl-scv-verify-crl-sign attributes

ssl-scv-verify-crl-sign attributes

enable

Description Enable verify CRL signature during SCV

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.69 system ssl-scv-verify-host

To Enable/disable checking claimed identity in server certificate durning server certificate validation

ssl-scv-verify-host Specification

Type	*Configuration Resource*
Element Name	ssl-scv-verify-host
Element URI	/axapi/v3/system/ssl-scv-verify-host
Element Attributes	ssl-scv-verify-host_attributes
Schema	`ssl-scv-verify-host schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/ssl-scv-verify-host

ssl-scv-verify-host attributes

Get Object

GET

/axapi/v3/system/ssl-scv-verify-host

ssl-scv-verify-host attributes

Modify Object

POST

/axapi/v3/system/ssl-scv-verify-host

ssl-scv-verify-host attributes

Replace Object

PUT

/axapi/v3/system/ssl-scv-verify-host

ssl-scv-verify-host attributes

Delete Object

DELETE

/axapi/v3/system/ssl-scv-verify-host

ssl-scv-verify-host attributes

ssl-scv-verify-host attributes

disable

Description Disable verify host during SCV

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.70 system ssl-set-compatible-cipher

To Enable/disable setting common cipher suite for SSL connections in management plane

ssl-set-compatible-cipher Specification

Type	*Configuration Resource*
Element Name	ssl-set-compatible-cipher
Element URI	/axapi/v3/system/ssl-set-compatible-cipher
Element Attributes	ssl-set-compatible-cipher_attributes
Schema	`ssl-set-compatible-cipher schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/ssl-set-compatible-cipher

ssl-set-compatible-cipher attributes

Get Object

GET

/axapi/v3/system/ssl-set-compatible-cipher

ssl-set-compatible-cipher attributes

Modify Object

POST

/axapi/v3/system/ssl-set-compatible-cipher

ssl-set-compatible-cipher attributes

Replace Object

PUT

/axapi/v3/system/ssl-set-compatible-cipher

ssl-set-compatible-cipher attributes

Delete Object

DELETE

/axapi/v3/system/ssl-set-compatible-cipher

ssl-set-compatible-cipher attributes

ssl-set-compatible-cipher attributes

disable

Description Disable setting common cipher suite in management plane

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.71 system table-integrity

Table integrity for multi-processing unit devices

table-integrity Specification

Type	*Configuration Resource*
Element Name	table-integrity
Element URI	/axapi/v3/system/table-integrity
Element Attributes	table-integrity_attributes
Statistics Data URI	/axapi/v3/system/table-integrity/stats
Schema	`table-integrity schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/table-integrity

table-integrity attributes

Get Object

GET

/axapi/v3/system/table-integrity

table-integrity attributes

Modify Object

POST

/axapi/v3/system/table-integrity

table-integrity attributes

Replace Object

PUT

/axapi/v3/system/table-integrity

table-integrity attributes

Delete Object

DELETE

/axapi/v3/system/table-integrity

table-integrity attributes

table-integrity attributes

audit-action

Description 'enable': Enable table integrity audit; 'disable': Disable table integrity audit;

Type: string

Supported Values: enable, disable

Default: enable

auto-sync-action

Description 'enable': Enable auto-sync; 'disable': Disable auto-sync;

Type: string

Supported Values: enable, disable

Default: enable

sampling-enable

Type: List

table

Description 'all': All tables;

Type: string

Supported Values: all

Default: all

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification

2.99.82 system template

Apply template to the whole system

template Specification

Type	*Configuration Resource*
Element Name	template
Element URI	/axapi/v3/system/template
Element Attributes	template_attributes
Schema	`template schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/template

template attributes

```
POST /axapi/v3/system/template
Payload:
{
    "template": {
        "template-policy": "a"
    }
}
```

Get Object

GET

/axapi/v3/system/template

template attributes

```
GET /axapi/v3/system/template
Reponse:
{
    "template": {
        "template-policy": "a",
        "uuid": "a8a83f7a-afb9-11e9-b244-000c298ae040",
        "a10-url": "/axapi/v3/system/template"
    }
}
```

Modify Object

POST

/axapi/v3/system/template

template attributes

Replace Object

PUT

/axapi/v3/system/template

template attributes

```
PUT /axapi/v3/system/template
Payload:
{
    "template": {
        "template-policy": "a"
    }
}
```

Delete Object

DELETE

/axapi/v3/system/template

template attributes

```
DELETE /axapi/v3/system/template
Reponse:
{
    "response": {
        "status": "OK"
    }
}
```

template attributes

template-policy

Description Apply policy template to the whole system (Policy template name)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/slb/template/policy*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.83 system template-bind

Apply template to the whole system

template-bind Specification

Type	*Intermediate Resource*
Element Name	template-bind
Element URI	/axapi/v3/system/template-bind
Element Attributes	template-bind_attributes
Schema	`template-bind schema`

Operations Allowed:

Get Object

GET

/axapi/v3/system/template-bind

template-bind_attributes

template-bind attributes

monitor-list

Type: List

Refernce Object: */axapi/v3/system/template-bind/monitor/{template-monitor}*

monitor-list

Specification	
Type	*list*
Block object keys	

template-monitor

Description Monitor template ID Number

Type: number

Range: 1-16

Refernce Object: */axapi/v3/slb/template/monitor*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.84 system template-bind monitor

Apply monitor template to the whole system

monitor Specification

Type	*Collection*
Object Key(s)	*template-monitor*
Collection Name	*monitor-list*
Collection URI	/axapi/v3/system/template-bind/monitor
Element Name	monitor
Element URI	/axapi/v3/system/template-bind/monitor/{template-monitor}
Element Attributes	monitor_attributes
Schema	`monitor schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/template-bind/monitor

monitor attributes

Create List

POST

/axapi/v3/system/template-bind/monitor

monitor attributes

Get Object

GET

/axapi/v3/system/template-bind/monitor/{template-monitor}

monitor attributes

Get List

GET

/axapi/v3/system/template-bind/monitor

monitor-list

Modify Object

POST

/axapi/v3/system/template-bind/monitor/{template-monitor}

monitor attributes

Replace Object

PUT

/axapi/v3/system/template-bind/monitor/{template-monitor}

monitor attributes

Replace List

PUT

/axapi/v3/system/template-bind/monitor

monitor-list

Delete Object

DELETE

/axapi/v3/system/template-bind/monitor/{template-monitor}

monitor attributes

monitor-list

monitor-list is **JSON List** of *monitor attributes*

monitor-list : [

{ *monitor attributes* },

{ *monitor attributes* },

...

]

monitor attributes

template-monitor

Description Monitor template ID Number

Type: number

Range: 1-16

Refernce Object: */axapi/v3/slb/template/monitor*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.85 system throughput

System throughput

throughput Specification

Type	*Configuration Resource*
Element Name	throughput
Element URI	/axapi/v3/system/throughput
Element Attributes	throughput_attributes
Statistics Data URI	/axapi/v3/system/throughput/stats
Schema	`throughput schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/throughput

throughput attributes

Get Object

GET

/axapi/v3/system/throughput

throughput attributes

Modify Object

POST

/axapi/v3/system/throughput

throughput attributes

Replace Object

PUT

/axapi/v3/system/throughput

throughput attributes

Delete Object

DELETE

/axapi/v3/system/throughput

throughput attributes

throughput attributes

sampling-enable

Type: List

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'global-system-throughput-bits-per-sec': Global System throughput in bits/sec; 'per-part-throughput-bits-per-sec': Partition throughput in bits/sec;

Type: string

Supported Values: all, global-system-throughput-bits-per-sec, per-part-throughput-bits-per-sec

stats data

	Counter	Size	Description
	global-system-throughput-bits-per-sec	8	Global System throughput in bits/sec
	per-part-throughput-bits-per-sec	8	Partition throughput in bits/sec

2.99.86 system timeout-value

set the timeout to stop transferring a file

timeout-value Specification

Type	*Configuration Resource*
Element Name	timeout-value
Element URI	/axapi/v3/system/timeout-value
Element Attributes	timeout-value_attributes
Schema	`timeout-value schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/timeout-value

timeout-value attributes

Get Object

GET

/axapi/v3/system/timeout-value

timeout-value attributes

Modify Object

POST

/axapi/v3/system/timeout-value

timeout-value attributes

Replace Object

PUT

/axapi/v3/system/timeout-value

timeout-value attributes

Delete Object

DELETE

/axapi/v3/system/timeout-value

timeout-value attributes

timeout-value attributes

ftp

Description set timeout to stop ftp transfer in seconds, 0 is no limit

Type: number

Range: 0-9999

Default: 120

http

Description set timeout to stop http transfer in seconds, 0 is no limit

Type: number

Range: 0-9999

Default: 0

https

Description set timeout to stop https transfer in seconds, 0 is no limit

Type: number

Range: 0-9999

Default: 0

scp

Description set timeout to stop scp transfer in seconds, 0 is no limit

Type: number

Range: 0-9999

Default: 300

sftp

Description set timeout to stop sftp transfer in seconds, 0 is no limit

Type: number

Range: 0-9999

Default: 0

tftp

Description set timeout to stop tftp transfer in seconds, 0 is no limit

Type: number

Range: 0-9999

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.87 system tls-1-3-mgmt

To Enable/disable TLS 1.3 support on ACOS management plane

tls-1-3-mgmt Specification

Type	*Configuration Resource*
Element Name	tls-1-3-mgmt
Element URI	/axapi/v3/system/tls-1-3-mgmt
Element Attributes	tls-1-3-mgmt_attributes
Schema	`tls-1-3-mgmt schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/tls-1-3-mgmt

tls-1-3-mgmt attributes

Get Object

GET

/axapi/v3/system/tls-1-3-mgmt

tls-1-3-mgmt attributes

Modify Object

POST

/axapi/v3/system/tls-1-3-mgmt

tls-1-3-mgmt attributes

Replace Object

PUT

/axapi/v3/system/tls-1-3-mgmt

tls-1-3-mgmt attributes

Delete Object

DELETE

/axapi/v3/system/tls-1-3-mgmt

tls-1-3-mgmt attributes

tls-1-3-mgmt attributes

enable

Description Enable TLS 1.3 support on ACOS management plane

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.88 system trunk

System level Trunk configurations

trunk Specification

Type	*Intermediate Resource*
Element Name	trunk
Element URI	/axapi/v3/system/trunk
Element Attributes	trunk_attributes
Schema	`trunk schema`

Operations Allowed:

Get Object

GET

/axapi/v3/system/trunk

trunk_attributes

trunk attributes

load-balance

Description: load-balance is a **JSON Block**. Please see below for *load-balance*

Type: Object

Refernce Object: */axapi/v3/system/trunk/load-balance*

load-balance

Specification	
Type	*object*

use-l3

Description Layer-3 Header based load balancing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-l3 and use-l4 are mutually exclusive

use-l4

Description Layer-3/4 Header based load balancing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-l4 and use-l3 are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.89 system trunk-hw-hash

Set Trunk HW Hash Mode

trunk-hw-hash Specification

Type	*Configuration Resource*
Element Name	trunk-hw-hash
Element URI	/axapi/v3/system/trunk-hw-hash
Element Attributes	trunk-hw-hash_attributes
Schema	`trunk-hw-hash schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/trunk-hw-hash

trunk-hw-hash attributes

Get Object

GET

/axapi/v3/system/trunk-hw-hash

trunk-hw-hash attributes

Modify Object

POST

/axapi/v3/system/trunk-hw-hash

trunk-hw-hash attributes

Replace Object

PUT

/axapi/v3/system/trunk-hw-hash

trunk-hw-hash attributes

Delete Object

DELETE

/axapi/v3/system/trunk-hw-hash

trunk-hw-hash attributes

trunk-hw-hash attributes

mode

Description Set HW hash mode, default is 6 (1:dst-mac 2:src-mac 3:src-dst-mac 4:src-ip 5:dst-ip 6:rtag6 7:rtag7)

Type: number

Range: 1-7

Default: 6

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.90 system trunk load-balance

Configure Trunk load balancing options

load-balance Specification

Type	*Configuration Resource*
Element Name	load-balance
Element URI	/axapi/v3/system/trunk/load-balance
Element Attributes	load-balance_attributes
Schema	`load-balance schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/trunk/load-balance

load-balance attributes

Get Object

GET

/axapi/v3/system/trunk/load-balance

load-balance attributes

Modify Object

POST

/axapi/v3/system/trunk/load-balance

load-balance attributes

Replace Object

PUT

/axapi/v3/system/trunk/load-balance

load-balance attributes

Delete Object

DELETE

/axapi/v3/system/trunk/load-balance

load-balance attributes

load-balance attributes

use-l3

Description Layer-3 Header based load balancing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-l3 and use-l4 are mutually exclusive

use-l4

Description Layer-3/4 Header based load balancing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: use-l4 and use-l3 are mutually exclusive

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.91 system trunk-xaui-hw-hash

Set Trunk XAUI HW Hash Mode

trunk-xaui-hw-hash Specification

Type	*Configuration Resource*
Element Name	trunk-xaui-hw-hash
Element URI	/axapi/v3/system/trunk-xaui-hw-hash
Element Attributes	trunk-xaui-hw-hash_attributes
Schema	`trunk-xaui-hw-hash schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/trunk-xaui-hw-hash

trunk-xaui-hw-hash attributes

Get Object

GET

/axapi/v3/system/trunk-xaui-hw-hash

trunk-xaui-hw-hash attributes

Modify Object

POST

/axapi/v3/system/trunk-xaui-hw-hash

trunk-xaui-hw-hash attributes

Replace Object

PUT

/axapi/v3/system/trunk-xaui-hw-hash

trunk-xaui-hw-hash attributes

Delete Object

DELETE

/axapi/v3/system/trunk-xaui-hw-hash

trunk-xaui-hw-hash attributes

trunk-xaui-hw-hash attributes

mode

Description Set HW hash mode, default is 6 (1:dst-mac 2:src-mac 3:src-dst-mac 4:src-ip 5:dst-ip 6:rtag6 7:rtag7)

Type: number

Range: 1-7

Default: 6

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.99.92 system ve-mac-scheme

VE MAC allocation scheme

ve-mac-scheme Specification

Type	*Configuration Resource*
Element Name	ve-mac-scheme
Element URI	/axapi/v3/system/ve-mac-scheme
Element Attributes	ve-mac-scheme_attributes
Schema	`ve-mac-scheme schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system/ve-mac-scheme

ve-mac-scheme attributes

```
POST /axapi/v3/system/ve-mac-scheme
Payload:
{
    "ve-mac-scheme": {
        "ve-mac-scheme-val": "hash-based"
    }
}
```

Get Object

GET

/axapi/v3/system/ve-mac-scheme

ve-mac-scheme attributes

```
GET /axapi/v3/system/ve-mac-scheme
Reponse:
{
    "ve-mac-scheme": {
        "ve-mac-scheme-val": "hash-based",

        "ve-mac-scheme-val": "hash-based"
    }
}
```

Delete Object

DELETE

/axapi/v3/system/ve-mac-scheme

ve-mac-scheme attributes

```
DELETE /axapi/v3/system/ve-mac-scheme
Reponse:
{
    "response": {
        "status": "OK",
        "msg": "Changes will come into effect next time you reload the Software."
    }
}
```

ve-mac-scheme attributes

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

ve-mac-scheme-val

Description 'hash-based': Hash-based using the VE number; 'round-robin': Round Robin scheme; 'system-mac': Use system MAC address;

Type: string

Supported Values: hash-based, round-robin, system-mac

Default: hash-based

2.100 system-2x40g-mode

Objects:

2.100.1 system-2x40g-mode

To enable/disable 40G port to split into 2x40g ports

system-2x40g-mode Specification

Type	*Configuration Resource*
Element Name	system-2x40g-mode
Element URI	/axapi/v3/system-2x40g-mode
Element Attributes	system-2x40g-mode_attributes
Schema	`system-2x40g-mode schema`

Operations Allowed:

Create Object

POST

/axapi/v3/system-2x40g-mode

Specification	
Type	*object*

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

monitor

Description Specify monitor TACACS+ server

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description Specify the user password

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-value

Description The user password

Type: string

Format: password

Maximum Length: 31 characters

Maximum Length: 1 characters

port

Description Specify the port number used by TACACS+ server.(default port is 49) (Port number (default 49))

Type: number

Range: 1-65535

Default: 49

timeout

Description Specify the maximum time allowed for setting up a connection with the TACACS+ server. (default timeout is 12 seconds) (Maximum time allowed for setting up a connection with the TACACS+ server, in seconds (default 12))

Type: number

Range: 1-12

Default: 12

username

Description Specify the username

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

host_ipv4-list

Specification	
Type	*list*
Block object keys	

ipv4-addr

Description IPV4 address of TACACS+ server

Type: string

Format: ipv4-address

secret

Description: secret is a **JSON Block**. Please see below for *host_ipv4-list_secret*

Type: Object

uuid

Description uuid of the object

source-ip

Description IP address

Type: string

Format: ipv4-address

source-lif

Description Logical interface (Lif interface number)

Type: number

Range: 1-128

source-loopback

Description Loopback interface (Port number)

Type: number

Format: interface

source-trunk

Description Trunk interface (Trunk interface number)

Type: number

Format: interface

source-ve

Description Virtual ethernet interface (Virtual ethernet interface number)

Type: number

Format: interface

secret_port-cfg

Specification	
Type	*object*

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

monitor

Description Specify monitor TACACS+ server

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password

Description Specify the user password

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

password-value

Description The user password

Type: string

Format: password

Maximum Length: 31 characters

Maximum Length: 1 characters

port

Description Specify the port number used by TACACS+ server.(default port is 49) (Port number (default 49))

Type: number

Range: 1-65535

Default: 49

timeout

Description Specify the maximum time allowed for setting up a connection with the TACACS+ server. (default timeout is 12 seconds) (Maximum time allowed for setting up a connection with the TACACS+ server, in seconds (default 12))

Type: number

Range: 1-12

Default: 12

username

Description Specify the username

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

2.105.4 tacacs-server host ipv6

Specify the hostname of TACACS+ server

ipv6 Specification

Type	*Collection*
Object Key(s)	*ipv6-addr*
Collection Name	*ipv6-list*
Collection URI	/axapi/v3/tacacs-server/host/ipv6

ddos-protection-factor

Description Enable DDoS Protection (Multiplier of the downlink PPS)

Type: number

Range: 1-50

downlink-pps

Description Downlink PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

downlink-throughput

Description Downlink Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

lid-number

Description Lid Number

Type: number

Range: 1-1023

limit-cps

Description Enable Connections Per Second Rate Limit (Number of Connections per second)

Type: number

Range: 1-2147483647

limit-rate

Description 'limit-pps': Enable Packets Per Second Rate Limit; 'limit-throughput': Enable Throughput Rate Limit;

Type: string

Supported Values: limit-pps, limit-throughput

respond-to-user-mac

Description Use the user's source MAC for the next hop rather than the routing table (default:off)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-ip

Description: src-ip is a **JSON Block**. Please see below for *lid-list_src-ip*

Type: Object

total-pps

Description Total PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

total-throughput

Description Total Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

uplink-pps

Description Uplink PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

uplink-throughput

Description Uplink Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 64 characters

Maximum Length: 1 characters

gtp_msisdn-list-list_str-list

Specification	
Type	*list*
Block object keys	

msisdn

Description Specify the MSISDN filter

Type: string

Maximum Length: 15 characters

Maximum Length: 1 characters

gtp_general-policy-list

Specification	
Type	*list*
Block object keys	

handover-timeout

Description Tunnel Inactivity Timeout during Handover in minutes (default: 2 mins)

Type: number

Range: 1-63

Default: 2

max-mesg-length-action

Description 'monitor': Forward failed packet; 'drop': drop packet failing check(Default);

Type: string

Supported Values: monitor, drop

Default: drop

maximum-message-length

Description Maximum message length for a GTP message in bytes

Type: number

Range: 64-1500

Default: 1500

name

Description Specify name of the GTP General Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tunnel-timeout

Description Tunnel Inactivity Timeout in minutes (default: 1440 minutes)

Type: number

Range: 5-60000

Default: 1440

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v0-action

Description 'permit': Permit GTP-C version 0; 'drop': Drop GTP-C version 0(Default);

Type: string

Supported Values: permit, drop

Default: drop

gtp_filtering-policy-list

Specification	
Type	*list*
Block object keys	

apn-imsi-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

apn-imsi-filtering

Description Specify the APN IMSI Inspection Policy

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/template/gtp/apn-imsi-list*

gtp-in-gtp-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

gtp-in-gtp-filtering

Description 'enable': Enable GTP-in-GTP Filtering; 'disable': Disable GTP-in-GTP Filtering;

Type: string

Supported Values: enable, disable

Default: enable

message-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

message-filtering-policy-name

Description Specify the Message Filtering Policy

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/template/gtp/message-filtering-policy*

msisdn-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

msisdn-filtering

Description Specify the MSISDN Inspection Policy

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/template/gtp/msisdn-list*

name

Description Specify name of the GTP Filtering Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

rat-type-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

rat-type-filtering

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Maximum Length: 64 characters

Maximum Length: 1 characters

gtp_filtering-policy-list_rat-type-filtering

Specification	
Type	*list*
Block object keys	

rat-type-value

Description 'utran': RAT Type for 3G Networks; 'geran': RAT Type for 2G Networks; 'wlan': RAT Type for WLAN Networks; 'gan': RAT Type for GAN Networks; 'hspa-evolution': RAT Type for HSPA Networks; 'eutran': RAT Type for 4G Networks;

Type: string

Supported Values: utran, geran, wlan, gan, hspa-evolution, eutran

gtp_rate-limit-policy-list

Specification	
Type	*list*
Block object keys	

gtp-u-downlink-byte-rate

Description Maximum allowed of rate of GTP-U bytes in downlink direction

Type: number

Range: 1-2147483647

gtp-u-downlink-packet-rate

Description Maximum allowed of rate of GTP-U packets in downlink direction

Type: number

Range: 1-2147483647

gtp-u-max-concurrent-tunnels

Description Maximum allowed GTP-U tunnels per Peer/APN Filter

Type: number

Range: 1-2147483647

gtp-u-total-byte-rate

Description Maximum allowed of rate of GTP-U bytes total in both directions

Type: number

Range: 1-2147483647

gtp-u-total-packet-rate

Description Maximum allowed of rate of GTP-U packets total in both directions

Type: number

Range: 1-2147483647

gtp-u-tunnel-create-rate

Description Maximum allowed of rate of GTP-U tunnels

Type: number

Range: 1-2147483647

gtp-u-uplink-byte-rate

Description Maximum allowed of rate of GTP-U bytes in uplink direction

Type: number

Range: 1-2147483647

gtp-u-uplink-packet-rate

Description Maximum allowed of rate of GTP-U packets in uplink direction

Type: number

Range: 1-2147483647

lockout

Description Lockout traffic from the source for a certain time period after rate exceeded (Lockout duration in minutes)

Type: number

Range: 1-1023

name

Description Specify name of the GTP Rate Limit Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

rate-limit-action

Description 'monitor': Forward packet exceeding limit; 'drop': drop packet exceeding limit(default);

Type: string

Supported Values: monitor, drop

Default: drop

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v0-agg-message-type-rate

Description Maximum allowed GTPv0-C message rate of all types

Type: number

Range: 1-2147483647

v1-agg-message-type-rate

Description Maximum allowed GTPv1-C message rate of all types

Type: number

Range: 1-2147483647

v1-create-pdp-request-rate

Description Maximum allowed rate of GTPv1-C Create PDP Request message type

Type: number

Range: 1-2147483647

v1-update-pdp-request-rate

Description Maximum allowed rate of GTPv1-C Update PDP Request message type

Type: number

Range: 1-2147483647

v2-agg-message-type-rate

Description Maximum allowed GTPv2-C message rate of all types

Type: number

Range: 1-2147483647

v2-create-session-request-rate

Description Maximum allowed rate of GTPv2-C Create Session Request message type

Type: number

Range: 1-2147483647

v2-modify-bearer-request-rate

Description Maximum allowed rate of GTPv2-C Modify Bearer Request message type

Type: number

Range: 1-2147483647

apn

Description Specify the APN filter

Type: string

Format: string-rlx

Maximum Length: 100 characters

Maximum Length: 1 characters

imsi

Description Specify the IMSI filter

Type: string

Maximum Length: 15 characters

Maximum Length: 1 characters

Mutual Exclusion: imsi and selection-mode are mutually exclusive

imsi-selection

Description Specify the IMSI filter

Type: string

Maximum Length: 15 characters

Maximum Length: 1 characters

selection-mode

Description 'mobilestation': MS provided APN, subscription not verified; 'network': Network provided APN, subscription not verified; 'verified': MS or Network provided APN, subscription verified;

Type: string

Supported Values: mobilestation, network, verified

Mutual Exclusion: selection-mode and imsi are mutually exclusive

gtp_logging-policy-list

Specification	
Type	*list*
Block object keys	

log

Description: log is a **JSON Block**. Please see below for *gtp_logging-policy-list_log*

Type: Object

name

Description Specify name of the GTP Logging Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Maximum Length: 1 characters

gtp_logging-policy-list_log

Specification	
Type	*object*

anti-spoofing-check

Description Logging Packet Drop due to End User IP Address Spoofing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

apn-imsi-filtering

Description Logging Packet Drop due to APN IMSI filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crosslayer-correlation

Description Logging Packet Drop due to mismatch in IP address and GTP FTEID/GSN address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-in-gtp-filtering

Description Logging Packet Drop due to GTP in GTP filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-header-check

Description Logging Packet Drop due to Invalid Header checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-teid-check

Description Logging Packet Drop due to Invalid Tunnel Endpoint Identifier

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mandatory-ie-check

Description Logging Packet Drop due to Missing Mandatory Information Element

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-message-length-check

Description Logging Packet Drop due to Max Message Length Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-filtering

Description Logging Packet Drop due to Message Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

msisdn-filtering

Description Logging Packet Drop due to MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

msisdn-imsi-correlation

Description Logging Packet Drop due to mismatch in Country Code and Mobile Country Code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-ie-check

Description Logging Packet Drop due to Out of Order Information Elements for GTPv1-C

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-state-ie-check

Description Logging Packet Drop due to Out of State Information Elements

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rat-type-filtering

Description Logging Packet Drop due to RAT type filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved-ie-check

Description Logging Packet Drop due to Presence of Reserved Information Element

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sequence-num-correlation

Description Logging Packet Drop due to mismatch in Sequence number between GTP request and response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Block object keys	

protocol-name

Description 'iua': IUA; 'm2ua': M2UA; 'm3ua': M3UA; 'sua': SUA; 'm2pa': M2PA; 'h.323': H.323;

Type: string

Supported Values: iua, m2ua, m3ua, sua, m2pa, h.323

limit-policy-list

Specification	
Type	*list*
Block object keys	

ddos-protection-factor

Description Enable DDoS Protection (Multiplier of the downlink PPS)

Type: number

Range: 1-50

downlink-pps

Description Downlink PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

downlink-throughput

Description Downlink Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

limit-concurrent-sessions

Description Enable Concurrent Session Limit (Number of Concurrent Sessions)

Type: number

Range: 1-2147483647

limit-cps

Description Enable Connections Per Second Rate Limit (Number of Connections per second)

Type: number

Range: 1-2147483647

limit-rate

Description 'limit-pps': Enable Packets Per Second Rate Limit; 'limit-throughput': Enable Throughput Rate Limit;

Type: string

Supported Values: limit-pps, limit-throughput

limit-scope

Description 'aggregate': Rule Level; 'subscriber-ip': Subscriber IP Level; 'subscriber-prefix': Subscriber Prefix Level;

Type: string

Supported Values: aggregate, subscriber-ip, subscriber-prefix

Default: subscriber-ip

log

Description Log when Session Limit is exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

policy-number

Description Limit Policy Number

Type: number

Range: 1-1023

prefix-length

Description Prefix length

Type: number

Range: 1-128

total-pps

Description Total PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

total-throughput

Description Total Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

uplink-pps

Description Uplink PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

uplink-throughput

Description Uplink Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

syslog-over-tls

Specification	
Type	*object*

ca-str

Description CA Certificate Name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.108.2 template csv

Specify csv template

csv Specification

Type	*Collection*
Object Key(s)	*csv-name*
Collection Name	*csv-list*
Collection URI	/axapi/v3/template/csv
Element Name	csv
Element URI	/axapi/v3/template/csv/{csv-name}
Element Attributes	csv_attributes
Schema	`csv schema`

Operations Allowed:

Create Object

POST

/axapi/v3/template/csv

csv attributes

Create List

POST

/axapi/v3/template/csv

csv attributes

Get Object

GET

/axapi/v3/template/csv/{csv-name}

Delete Object

DELETE

/axapi/v3/template/csv/{csv-name}

csv attributes

csv-list

csv-list is **JSON List** of *csv attributes*

csv-list : [

{ *csv attributes* },

{ *csv attributes* },

...

]

csv attributes

csv-name

Description Specify name of csv template

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

delim-char

Description enter a delimiter character, default ","

Type: string

Format: string-rlx

Maximum Length: 1 characters

Maximum Length: 1 characters

Default: ,

Mutual Exclusion: delim-char and delim-num are mutually exclusive

delim-num

Description enter a delimiter number, default 44 (",")

Type: number

Range: 0-255

Default: 44

Mutual Exclusion: delim-num and delim-char are mutually exclusive

ipv6-enable

Description Support IPv6 IP ranges

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

multiple-fields

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

multiple-fields

Specification	
Type	*list*
Block object keys	

csv-type

Description 'ip-from': Beginning address of IP range or subnet; 'ip-to-mask': Ending address of IP range or Mask; 'continent': Continent; 'country': Country; 'state': State or province; 'city': City;

Type: string

Supported Values: ip-from, ip-to-mask, continent, country, state, city

field

Description Field index number (Index of Field)

Type: number

Range: 1-64

2.108.3 template gtp

Define a GTP template

gtp Specification

Type	*Intermediate Resource*
Element Name	gtp
Element URI	/axapi/v3/template/gtp
Element Attributes	gtp_attributes
Schema	`gtp schema`

Operations Allowed:

Get Object

msisdn

Description Specify the MSISDN filter

Type: string

Maximum Length: 15 characters

Maximum Length: 1 characters

general-policy-list

Specification	
Type	*list*
Block object keys	

handover-timeout

Description Tunnel Inactivity Timeout during Handover in minutes (default: 2 mins)

Type: number

Range: 1-63

Default: 2

max-mesg-length-action

Description 'monitor': Forward failed packet; 'drop': drop packet failing check(Default);

Type: string

Supported Values: monitor, drop

Default: drop

maximum-message-length

Description Maximum message length for a GTP message in bytes

Type: number

Range: 64-1500

Default: 1500

name

Description Specify name of the GTP General Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tunnel-timeout

Description Tunnel Inactivity Timeout in minutes (default: 1440 minutes)

Type: number

Range: 5-60000

Default: 1440

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v0-action

Description 'permit': Permit GTP-C version 0; 'drop': Drop GTP-C version 0(Default);

Type: string

Supported Values: permit, drop

Default: drop

filtering-policy-list

Specification	
Type	*list*
Block object keys	

apn-imsi-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

apn-imsi-filtering

Description Specify the APN IMSI Inspection Policy

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/template/gtp/apn-imsi-list*

gtp-in-gtp-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

gtp-in-gtp-filtering

Description 'enable': Enable GTP-in-GTP Filtering; 'disable': Disable GTP-in-GTP Filtering;

Type: string

Supported Values: enable, disable

Default: enable

message-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

message-filtering-policy-name

Description Specify the Message Filtering Policy

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/template/gtp/message-filtering-policy*

msisdn-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

msisdn-filtering

Description Specify the MSISDN Inspection Policy

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/template/gtp/msisdn-list*

name

Description Specify name of the GTP Filtering Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

rat-type-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Maximum Length: 64 characters

Maximum Length: 1 characters

filtering-policy-list_rat-type-filtering

Specification	
Type	*list*
Block object keys	

rat-type-value

Description 'utran': RAT Type for 3G Networks; 'geran': RAT Type for 2G Networks; 'wlan': RAT Type for WLAN Networks; 'gan': RAT Type for GAN Networks; 'hspa-evolution': RAT Type for HSPA Networks; 'eutran': RAT Type for 4G Networks;

Type: string

Supported Values: utran, geran, wlan, gan, hspa-evolution, eutran

rate-limit-policy-list

Specification	
Type	*list*
Block object keys	

gtp-u-downlink-byte-rate

Description Maximum allowed of rate of GTP-U bytes in downlink direction

Type: number

Range: 1-2147483647

gtp-u-downlink-packet-rate

Description Maximum allowed of rate of GTP-U packets in downlink direction

Type: number

Range: 1-2147483647

gtp-u-max-concurrent-tunnels

Description Maximum allowed GTP-U tunnels per Peer/APN Filter

Type: number

Range: 1-2147483647

gtp-u-total-byte-rate

Description Maximum allowed of rate of GTP-U bytes total in both directions

Type: number

Range: 1-2147483647

gtp-u-total-packet-rate

Description Maximum allowed of rate of GTP-U packets total in both directions

Type: number

Range: 1-2147483647

gtp-u-tunnel-create-rate

Description Maximum allowed of rate of GTP-U tunnels

Type: number

Range: 1-2147483647

gtp-u-uplink-byte-rate

Description Maximum allowed of rate of GTP-U bytes in uplink direction

Type: number

Range: 1-2147483647

gtp-u-uplink-packet-rate

Description Maximum allowed of rate of GTP-U packets in uplink direction

Type: number

Range: 1-2147483647

lockout

Description Lockout traffic from the source for a certain time period after rate exceeded (Lockout duration in minutes)

Type: number

Range: 1-1023

name

Description Specify name of the GTP Rate Limit Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

rate-limit-action

Description 'monitor': Forward packet exceeding limit; 'drop': drop packet exceeding limit(default);

Type: string

Supported Values: monitor, drop

Default: drop

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v0-agg-message-type-rate

Description Maximum allowed GTPv0-C message rate of all types

Type: number

Range: 1-2147483647

v1-agg-message-type-rate

Description Maximum allowed GTPv1-C message rate of all types

Type: number

Range: 1-2147483647

v1-create-pdp-request-rate

Description Maximum allowed rate of GTPv1-C Create PDP Request message type

Type: number

Range: 1-2147483647

v1-update-pdp-request-rate

Description Maximum allowed rate of GTPv1-C Update PDP Request message type

Type: number

Range: 1-2147483647

v2-agg-message-type-rate

Description Maximum allowed GTPv2-C message rate of all types

Type: number

Range: 1-2147483647

v2-create-session-request-rate

Description Maximum allowed rate of GTPv2-C Create Session Request message type

Type: number

Range: 1-2147483647

v2-modify-bearer-request-rate

Description Maximum allowed rate of GTPv2-C Modify Bearer Request message type

Type: number

Range: 1-2147483647

apn-imsi-list-list

Specification	
Type	*list*
Block object keys	

action

Description 'permit': Create a whitelist to permit the packets that match APN IMSI filters; 'deny': Create a blacklist to deny the packets that match APN IMSI filters (default);

Type: string

Supported Values: permit, deny

Default: deny

name

Description Specify name of the GTP APN IMSI list

Type: string

Format: string-rlx

apn

Description Specify the APN filter

Type: string

Format: string-rlx

Maximum Length: 100 characters

Maximum Length: 1 characters

imsi

Description Specify the IMSI filter

Type: string

Maximum Length: 15 characters

Maximum Length: 1 characters

Mutual Exclusion: imsi and selection-mode are mutually exclusive

imsi-selection

Description Specify the IMSI filter

Type: string

Maximum Length: 15 characters

Maximum Length: 1 characters

selection-mode

Description 'mobilestation': MS provided APN, subscription not verified; 'network': Network provided APN, subscription not verified; 'verified': MS or Network provided APN, subscription verified;

Type: string

Supported Values: mobilestation, network, verified

Mutual Exclusion: selection-mode and imsi are mutually exclusive

logging-policy-list

Specification	
Type	*list*
Block object keys	

log

Description: log is a **JSON Block**. Please see below for *logging-policy-list_log*

Type: Object

name

Description Specify name of the GTP Logging Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Maximum Length: 64 characters

Maximum Length: 1 characters

logging-policy-list_log

Specification	
Type	*object*

anti-spoofing-check

Description Logging Packet Drop due to End User IP Address Spoofing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

apn-imsi-filtering

Description Logging Packet Drop due to APN IMSI filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crosslayer-correlation

Description Logging Packet Drop due to mismatch in IP address and GTP FTEID/GSN address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-in-gtp-filtering

Description Logging Packet Drop due to GTP in GTP filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-header-check

Description Logging Packet Drop due to Invalid Header checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-teid-check

Description Logging Packet Drop due to Invalid Tunnel Endpoint Identifier

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mandatory-ie-check

Description Logging Packet Drop due to Missing Mandatory Information Element

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-message-length-check

Description Logging Packet Drop due to Max Message Length Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-filtering

Description Logging Packet Drop due to Message Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

msisdn-filtering

Description Logging Packet Drop due to MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

msisdn-imsi-correlation

Description Logging Packet Drop due to mismatch in Country Code and Mobile Country Code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-ie-check

Description Logging Packet Drop due to Out of Order Information Elements for GTPv1-C

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-state-ie-check

Description Logging Packet Drop due to Out of State Information Elements

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rat-type-filtering

Description Logging Packet Drop due to RAT type filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved-ie-check

Description Logging Packet Drop due to Presence of Reserved Information Element

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sequence-num-correlation

Description Logging Packet Drop due to mismatch in Sequence number between GTP request and response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

validation-policy-list

Specification	
Type	*list*

anomaly-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

anomaly-checks

Description 'enable': Enable Anomaly Checks for GTP Messages; 'disable': Disable Anomaly Checks for GTP Messages;

Type: string

Supported Values: enable, disable

Default: enable

anti-spoofing-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

anti-spoofing-check

Description 'enable': Enable Spoofed IP Address Check for GTP-U Messages; 'disable': Disable Spoofed IP Address Check for GTP Messages;

Type: string

Supported Values: enable, disable

Default: disable

crosslayer-corr-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

crosslayer-correlation

Description 'enable': Enable Cross Layer Correlation for GTP Messages; 'disable': Disable Cross Layer Correlation for GTP Messages;

Type: string

Supported Values: enable, disable

Default: disable

mandatory-ie-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

mandatory-ie-check

Description 'enable': Enable Mandatory IE Check for GTP Messages; 'disable': Disable Mandatory IE Check for GTP Messages;

Type: string

Supported Values: enable, disable

Default: enable

msisdn-imsi-corr-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

msisdn-imsi-correlation

Description 'enable': Enable Country Code Correlation in MSISDN and IMSI for GTP Messages; 'disable': Disable Country Code Correlation in MSISDN and IMSI for GTP Messages;

Type: string

Supported Values: enable, disable

Default: disable

name

Description Specify name of the GTP Validation Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

out-of-order-ie-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

out-of-order-ie-check

...

]

filtering-policy attributes

apn-imsi-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

apn-imsi-filtering

Description Specify the APN IMSI Inspection Policy

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/template/gtp/apn-imsi-list*

gtp-in-gtp-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

gtp-in-gtp-filtering

Description 'enable': Enable GTP-in-GTP Filtering; 'disable': Disable GTP-in-GTP Filtering;

Type: string

Supported Values: enable, disable

Default: enable

message-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

message-filtering-policy-name

Description Specify the Message Filtering Policy

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/template/gtp/message-filtering-policy*

msisdn-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

Type: string

Supported Values: monitor, drop

Default: drop

msisdn-filtering

Description Specify the MSISDN Inspection Policy

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/template/gtp/msisdn-list*

name

Description Specify name of the GTP MSISDN list

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

rat-type-filt-action

Description 'monitor': Forward packet; 'drop': drop packet (default);

general-policy-list

general-policy-list is **JSON List** of *general-policy attributes*

```
general-policy-list : [
        { general-policy attributes },
        { general-policy attributes },
        ...
    ]
```

general-policy attributes

handover-timeout

Description Tunnel Inactivity Timeout during Handover in minutes (default: 2 mins)

Type: number

Range: 1-63

Default: 2

max-mesg-length-action

Description 'monitor': Forward failed packet; 'drop': drop packet failing check(Default);

Type: string

Supported Values: monitor, drop

Default: drop

maximum-message-length

Description Maximum message length for a GTP message in bytes

Type: number

Range: 64-1500

Default: 1500

name

Description Specify name of the GTP General Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

tunnel-timeout

Description Tunnel Inactivity Timeout in minutes (default: 1440 minutes)

Type: number

Range: 5-60000

Default: 1440

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v0-action

Description 'permit': Permit GTP-C version 0;

Type: string

Supported Values: permit, drop

Default: drop

2.108.8 template gtp logging-policy

Configure GTP Logging Policy

logging-policy Specification

Type	*Collection*

logging-policy attributes

log

Description: log is a **JSON Block**. Please see below for *log*

Type: Object

name

Description Specify name of the GTP Logging Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

log

Specification	
Type	*object*

anti-spoofing-check

Description Logging Packet Drop due to End User IP Address Spoofing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

apn-imsi-filtering

Description Logging Packet Drop due to APN IMSI filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crosslayer-correlation

Description Logging Packet Drop due to mismatch in IP address and GTP FTEID/GSN address

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-in-gtp-filtering

Description Logging Packet Drop due to GTP in GTP filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-header-check

Description Logging Packet Drop due to Invalid Header checks

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-teid-check

Description Logging Packet Drop due to Invalid Tunnel Endpoint Identifier

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mandatory-ie-check

Description Logging Packet Drop due to Missing Mandatory Information Element

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

max-message-length-check

Description Logging Packet Drop due to Max Message Length Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

message-filtering

Description Logging Packet Drop due to Message Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

msisdn-filtering

Description Logging Packet Drop due to MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

msisdn-imsi-correlation

Description Logging Packet Drop due to mismatch in Country Code and Mobile Country Code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-ie-check

Description Logging Packet Drop due to Out of Order Information Elements for GTPv1-C

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-state-ie-check

Description Logging Packet Drop due to Out of State Information Elements

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rat-type-filtering

Description Logging Packet Drop due to RAT type filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

reserved-ie-check

Description Logging Packet Drop due to Presence of Reserved Information Element

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sequence-num-correlation

Description Logging Packet Drop due to mismatch in Sequence number between GTP request and response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rate-limit-policy-list is **JSON List** of *rate-limit-policy attributes*

```
rate-limit-policy-list : [
        { rate-limit-policy attributes },
        { rate-limit-policy attributes },
        ...
    ]
```

rate-limit-policy attributes

gtp-u-downlink-byte-rate

Description Maximum allowed of rate of GTP-U bytes in downlink direction

Type: number

Range: 1-2147483647

gtp-u-downlink-packet-rate

Description Maximum allowed of rate of GTP-U packets in downlink direction

Type: number

Range: 1-2147483647

gtp-u-max-concurrent-tunnels

Description Maximum allowed GTP-U tunnels per Peer/APN Filter

Type: number

Range: 1-2147483647

gtp-u-total-byte-rate

Description Maximum allowed of rate of GTP-U bytes total in both directions

Type: number

Range: 1-2147483647

gtp-u-total-packet-rate

Description Maximum allowed of rate of GTP-U packets total in both directions

Type: number

Range: 1-2147483647

gtp-u-tunnel-create-rate

Description Maximum allowed of rate of GTP-U tunnels

Type: number

Range: 1-2147483647

gtp-u-uplink-byte-rate

Description Maximum allowed of rate of GTP-U bytes in uplink direction

Type: number

Range: 1-2147483647

gtp-u-uplink-packet-rate

Description Maximum allowed of rate of GTP-U packets in uplink direction

Type: number

Range: 1-2147483647

lockout

Description Lockout traffic from the source for a certain time period after rate exceeded (Lockout duration in minutes)

Type: number

Range: 1-1023

name

Description Specify name of the GTP Rate Limit Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

rate-limit-action

Description 'monitor': Forward packet exceeding limit; 'drop': drop packet exceeding limit(default);

Type: string

Supported Values: monitor, drop

Default: drop

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

v0-agg-message-type-rate

Description Maximum allowed GTPv0-C message rate of all types

Type: number

Range: 1-2147483647

v1-agg-message-type-rate

Description Maximum allowed GTPv1-C message rate of all types

Type: number

Range: 1-2147483647

v1-create-pdp-request-rate

Description Maximum allowed rate of GTPv1-C Create PDP Request message type

Type: number

Range: 1-2147483647

v1-update-pdp-request-rate

Description Maximum allowed rate of GTPv1-C Update PDP Request message type

Type: number

Range: 1-2147483647

v2-agg-message-type-rate

Description Maximum allowed GTPv2-C message rate of all types

Type: number

Range: 1-2147483647

v2-create-session-request-rate

Description Maximum allowed rate of GTPv2-C Create Session Request message type

Type: number

Range: 1-2147483647

v2-modify-bearer-request-rate

Description Maximum allowed rate of GTPv2-C Modify Bearer Request message type

Type: number

Range: 1-2147483647

2.108.16 template gtp validation-policy

Configure GTP Validation Policy

validation-policy Specification

Type	*Collection*
Object Key(s)	*name*
Collection Name	*validation-policy-list*
Collection URI	/axapi/v3/template/gtp/validation-policy
Element Name	validation-policy

validation-policy-list

validation-policy-list is **JSON List** of *validation-policy attributes*

validation-policy-list : [

{ *validation-policy attributes* },

{ *validation-policy attributes* },

...

]

validation-policy attributes

anomaly-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

anomaly-checks

Description 'enable': Enable Anomaly Checks for GTP Messages; 'disable': Disable Anomaly Checks for GTP Messages;

Type: string

Supported Values: enable, disable

Default: enable

anti-spoofing-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

anti-spoofing-check

Description 'enable': Enable Spoofed IP Address Check for GTP-U Messages; 'disable': Disable Spoofed IP Address Check for GTP Messages;

Type: string

Supported Values: enable, disable

Default: disable

crosslayer-corr-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

crosslayer-correlation

Description 'enable': Enable Cross Layer Correlation for GTP Messages; 'disable': Disable Cross Layer Correlation for GTP Messages;

Type: string

Supported Values: enable, disable

Default: disable

mandatory-ie-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

mandatory-ie-check

Description 'enable': Enable Mandatory IE Check for GTP Messages; 'disable': Disable Mandatory IE Check for GTP Messages;

Type: string

Supported Values: enable, disable

Default: enable

msisdn-imsi-corr-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

msisdn-imsi-correlation

Description 'enable': Enable Country Code Correlation in MSISDN and IMSI for GTP Messages; 'disable': Disable Country Code Correlation in MSISDN and IMSI for GTP Messages;

Type: string

Supported Values: enable, disable

Default: disable

name

Description Specify name of the GTP Validation Policy

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

out-of-order-ie-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

out-of-order-ie-check

Description 'enable': Enable Out of Order IE Check for GTP Messages; 'disable': Disable Out of Order IE Check for GTP Messages;

Type: string

Supported Values: enable, disable

Default: disable

out-of-state-ie-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

out-of-state-ie-check

Description 'enable': Enable Out of State IE Check for GTP Messages; 'disable': Disable Out of State IE Check for GTP Messages;

Type: string

Supported Values: enable, disable

Default: disable

reserved-ie-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

reserved-ie-check

Description 'enable': Enable Reserved IE Check for GTP Messages; 'disable': Disable Reserved IE Check for GTP Messages;

Type: string

Supported Values: enable, disable

Default: enable

sequence-num-corr-action

Description 'monitor': Forward failed packet; 'drop': drop check failed packet(default);

Type: string

Supported Values: monitor, drop

Default: drop

sequence-num-correlation

Description 'enable': Enable Sequence number correlation between GTP Request and Responses; 'disable': Disable Sequence number correlation between GTP Request and Responses;

Type: string

Supported Values: enable, disable

Default: disable

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.108.17 template ip-threat-action

Create an IP Threat Action Template

ip-threat-action Specification

Type	*Collection*
Object Key(s)	*template-number*
Collection Name	*ip-threat-action-list*
Collection URI	/axapi/v3/template/ip-threat-action

ip-threat-action-list

ip-threat-action-list is **JSON List** of *ip-threat-action attributes*

ip-threat-action-list : [

{ *ip-threat-action attributes* },

{ *ip-threat-action attributes* },

...

]

ip-threat-action attributes

idle-timeout

Description Idle timeout in minutes(default:5)

Type: number

Range: 1-1440

Default: 5

log

Description 'enable': Enable logging; 'disable': Disable logging (Default);

Type: string

Supported Values: enable, disable

Default: disable

template-number

Description Template Number

Type: number

Range: 1-8

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.108.18 template lid

Create an Lid

lid Specification

Type	*Collection*
Object Key(s)	*lid-number*
Collection Name	*lid-list*
Collection URI	/axapi/v3/template/lid
Element Name	lid
Element URI	/axapi/v3/template/lid/{lid-number}
Element Attributes	lid_attributes
Schema	`lid schema`

Operations Allowed:

Create Object

POST

/axapi/v3/template/lid/{lid-number}

lid attributes

lid-list

lid-list is **JSON List** of *lid attributes*

lid-list : [

{ *lid attributes* },

{ *lid attributes* },

...

]

lid attributes

ddos-protection-factor

Description Enable DDoS Protection (Multiplier of the downlink PPS)

Type: number

Range: 1-50

downlink-pps

Description Downlink PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

downlink-throughput

Description Downlink Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

lid-number

Description Lid Number

Type: number

Range: 1-1023

limit-cps

Description Enable Connections Per Second Rate Limit (Number of Connections per second)

Type: number

Range: 1-2147483647

limit-rate

Description 'limit-pps': Enable Packets Per Second Rate Limit; 'limit-throughput': Enable Throughput Rate Limit;

Type: string

Supported Values: limit-pps, limit-throughput

respond-to-user-mac

Description Use the user's source MAC for the next hop rather than the routing table (default:off)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

src-ip

Description: src-ip is a **JSON Block**. Please see below for *src-ip*

Type: Object

total-pps

Description Total PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

total-throughput

Description Total Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

uplink-pps

Description Uplink PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

uplink-throughput

Description Uplink Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

src-ip

Specification	
Type	*object*

concurrent-sessions

Description Concurrent Session Limit per Source IP Address (Number of Concurrent Sessions)

Type: number

Range: 1-2147483647

log

Description Log when Session Limit is exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prefix-length

Description Source prefix length

Type: number

Range: 1-128

2.108.19 template limit-policy

Create a Limit Policy

limit-policy Specification

Type	*Collection*
Object Key(s)	*policy-number*
Collection Name	*limit-policy-list*
Collection URI	/axapi/v3/template/limit-policy
Element Name	limit-policy
Element URI	/axapi/v3/template/limit-policy/{policy-number}
Element Attributes	limit-policy_attributes
Schema	`limit-policy schema`

Operations Allowed:

Create Object

POST

/axapi/v3/template/limit-policy

limit-policy attributes

Create List

POST

/axapi/v3/template/limit-policy

limit-policy attributes

Get Object

GET

/axapi/v3/template/limit-policy/{policy-number}

limit-policy attributes

Get List

GET

/axapi/v3/template/limit-policy

limit-policy-list

Modify Object

POST

/axapi/v3/template/limit-policy/{policy-number}

limit-policy attributes

Replace Object

PUT

/axapi/v3/template/limit-policy/{policy-number}

limit-policy attributes

Replace List

PUT

/axapi/v3/template/limit-policy

limit-policy-list

Delete Object

DELETE

/axapi/v3/template/limit-policy/{policy-number}

limit-policy attributes

limit-policy-list

limit-policy-list is **JSON List** of *limit-policy attributes*

limit-policy-list : [

{ *limit-policy attributes* },

{ *limit-policy attributes* },

...

]

limit-policy attributes

ddos-protection-factor

Description Enable DDoS Protection (Multiplier of the downlink PPS)

Type: number

Range: 1-50

downlink-pps

Description Downlink PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

downlink-throughput

Description Downlink Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

limit-concurrent-sessions

Description Enable Concurrent Session Limit (Number of Concurrent Sessions)

Type: number

Range: 1-2147483647

limit-cps

Description Enable Connections Per Second Rate Limit (Number of Connections per second)

Type: number

Range: 1-2147483647

limit-rate

Description 'limit-pps': Enable Packets Per Second Rate Limit; 'limit-throughput': Enable Throughput Rate Limit;

Type: string

Supported Values: limit-pps, limit-throughput

limit-scope

Description 'aggregate': Rule Level; 'subscriber-ip': Subscriber IP Level; 'subscriber-prefix': Subscriber Prefix Level;

Type: string

Supported Values: aggregate, subscriber-ip, subscriber-prefix

Default: subscriber-ip

log

Description Log when Session Limit is exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

policy-number

Description Limit Policy Number

Type: number

Range: 1-1023

prefix-length

Description Prefix length

Type: number

Range: 1-128

total-pps

Description Total PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

total-throughput

Description Total Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

uplink-pps

Description Uplink PPS limit (Number of Packets per second)

Type: number

Range: 1-2147483647

uplink-throughput

Description Uplink Throughput limit (Mega Bits per second)

Type: number

Range: 1-100000

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.108.20 template sctp

Define a SCTP template

sctp Specification

Type	*Collection*
Object Key(s)	*name*
Collection Name	*sctp-list*
Collection URI	/axapi/v3/template/sctp
Element Name	sctp
Element URI	/axapi/v3/template/sctp/{name}
Element Attributes	sctp_attributes
Schema	`sctp schema`

Operations Allowed:

Create Object

POST

/axapi/v3/template/sctp

sctp attributes

Create List

POST

/axapi/v3/template/sctp

sctp attributes

Get Object

GET

/axapi/v3/template/sctp/{name}

sctp attributes

Get List

GET

/axapi/v3/template/sctp

sctp-list

Modify Object

POST

/axapi/v3/template/sctp/{name}

sctp attributes

Replace Object

PUT

/axapi/v3/template/sctp/{name}

sctp attributes

Replace List

PUT

/axapi/v3/template/sctp

sctp-list

Delete Object

DELETE

/axapi/v3/template/sctp/{name}

sctp attributes

sctp-list

sctp-list is **JSON List** of *sctp attributes*

sctp-list : [

{ *sctp attributes* },

{ *sctp attributes* },

...

]

sctp attributes

checksum-check

Description 'enable': Enable Checksum check;

Type: string

Supported Values: enable

log

Description: log is a **JSON Block**. Please see below for *log*

Type: Object

name

Description SCTP Template Name

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

Default: default

permit-payload-protocol

Description: permit-payload-protocol is a **JSON Block**. Please see below for *permit-payload-protocol*

Type: Object

sctp-half-open-idle-timeout

Description Set SCTP half-open timeout (SCTP half-open timeout in seconds (default 4))

Type: number

Range: 2-30

Default: 4

sctp-idle-timeout

Description SCTP idle timeout in minutes (default 5)

Type: number

Range: 1-63

Default: 5

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

log

Specification	
Type	*object*

payload-proto-filtering

Description Log Payload Protocol IDs Filtered

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

permit-payload-protocol

Specification	
Type	*object*

permit-config-id

Type: List

permit-config-name

Type: List

permit-payload-protocol_permit-config-id

Specification	
Type	*list*
Block object keys	

protocol-id

Description Specify SCTP permitted payload protocol IDs

Type: number

Range: 1-63

permit-payload-protocol_permit-config-name

Specification	
Type	*list*
Block object keys	

protocol-name

Description 'iua': IUA; 'm2ua': M2UA; 'm3ua': M3UA; 'sua': SUA; 'm2pa': M2PA; 'h.323': H.323;

Type: string

Supported Values: iua, m2ua, m3ua, sua, m2pa, h.323

2.108.21 template syslog-over-tls

Define a syslog over TLS template

syslog-over-tls Specification

Type	*Configuration Resource*
Element Name	syslog-over-tls
Element URI	/axapi/v3/template/syslog-over-tls
Element Attributes	syslog-over-tls_attributes
Schema	`syslog-over-tls schema`

Operations Allowed:

Create Object

POST

/axapi/v3/template/syslog-over-tls

syslog-over-tls attributes

Get Object

GET

/axapi/v3/template/syslog-over-tls

syslog-over-tls attributes

Modify Object

POST

/axapi/v3/template/syslog-over-tls

syslog-over-tls attributes

Replace Object

PUT

/axapi/v3/template/syslog-over-tls

syslog-over-tls attributes

Delete Object

DELETE

/axapi/v3/template/syslog-over-tls

syslog-over-tls attributes

syslog-over-tls attributes

ca-str

Description CA Certificate Name

Type: string

Format: string-rlx

Maximum Length: 245 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.109 terminal

Objects:

2.109.1 terminal

Set Terminal Startup Parameters

terminal Specification

Type	*Configuration Resource*
Element Name	terminal
Element URI	/axapi/v3/terminal
Element Attributes	terminal_attributes
Schema	`terminal schema`

Operations Allowed:

Create Object

POST

/axapi/v3/terminal

terminal attributes

```
POST /axapi/v3/terminal
Payload:
{
    "terminal": {
        "auto-size": 1
    }
}
```

Get Object

GET

/axapi/v3/terminal

terminal attributes

```
GET /axapi/v3/terminal
Reponse:
{
    "terminal": {
        "auto-size": 0,
        "editing": 1,
        "gslb-cfg": {
            "gslb-prompt": 0
        },
        "history-cfg": {
            "enable": 1,
            "size": 256
        },
        "idle-timeout": 15,
        "prompt-cfg": {
            "prompt": 0
        },
        "uuid": "e2cb7ed0-6c5f-11e9-b8b7-dbe69c1e923a",
        "a10-url": "/axapi/v3/terminal"
    }
}
```

Modify Object

POST

/axapi/v3/terminal

terminal attributes

Replace Object

PUT

/axapi/v3/terminal

terminal attributes

Delete Object

DELETE

/axapi/v3/terminal

terminal attributes

terminal attributes

auto-size

Description Enable terminal length and width automatically (not work if width or length set to 0)

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

Mutual Exclusion: auto-size length and width are mutually exclusive

editing

Description Enable command line editing

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

gslb-cfg

Description: gslb-cfg is a **JSON Block**. Please see below for *gslb-cfg*

Type: Object

history-cfg

Description: history-cfg is a **JSON Block**. Please see below for *history-cfg*

Type: Object

idle-timeout

Description Set interval for closing connection when there is no input detected (Timeout in minutes, 0 means never timeout, default is 15)

Type: number

Range: 0-60

Default: 15

length

Description Set number of lines on a screen(0 for no pausing) (Number of lines on screen, 0 for no pausing, default is 24)

Type: number

Range: 0-512

Default: 24

Mutual Exclusion: length and auto-size are mutually exclusive

prompt-cfg

Description: prompt-cfg is a **JSON Block**. Please see below for *prompt-cfg*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

width

Description Set width of the display terminal (Number of characters on a screen line, 0 means infinite, default is 80)

Type: number

Range: 0-512

Default: 80

Mutual Exclusion: width and auto-size are mutually exclusive

gslb-cfg

Specification	
Type	*object*

disable

Description Group status show disable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

group-role

Description Show GSLB group role on CLI prompt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gslb-prompt

Description The gslb status prompt function set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

symbol

Description Show "gslb" symbol on CLI prompt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

history-cfg

Specification	
Type	*object*

enable

Description Enable terminal history

Type: boolean

Supported Values: true, false, 1, 0

Default: 1

size

Description Set history buffer size (Size of history buffer, default is 256)

Type: number

Range: 0-1000

Default: 256

prompt-cfg

Specification	
Type	*object*

ha-status

Description Display HA status in prompt, eg. Active, Standby, ForcedStandby

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hostname

Description Display hostname in prompt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prompt

Description Configure the normal prompt format

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vcs-cfg

Description: vcs-cfg is a **JSON Block**. Please see below for *prompt-cfg_vcs-cfg*

Type: Object

prompt-cfg_vcs-cfg

Specification	
Type	*object*

vcs-status

Description Display VCS status in prompt, eg. vMaster, vBlade

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

2.110 tftp

Objects:

2.110.1 tftp

TFTP client configuration

tftp Specification

Type	*Configuration Resource*
Element Name	tftp
Element URI	/axapi/v3/tftp
Element Attributes	tftp_attributes
Schema	`tftp schema`

Operations Allowed:

Create Object

POST

/axapi/v3/tftp

tftp attributes

```
POST /axapi/v3/tftp
Payload:
{
    "tftp": {
        "blksize": 512
    }
}
```

Get Object

GET

/axapi/v3/tftp

tftp attributes

```
GET /axapi/v3/tftp
Reponse:
{

threat-list-list

Specification	
Type	*list*
Block object keys	

all-categories

Description Enable all categories

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: all-categoriesspam-sources, windows-exploits, web-attacks, botnets, scanners, dos-attacks, reputation, phishing, proxy, mobile-threats and tor-proxy are mutually exclusive

botnets

Description Botnet C&C channels, and infected zombie machines controlled by Bot master

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: botnets and all-categories are mutually exclusive

dos-attacks

Description IP's participating in DOS, DDOS, anomalous sync flood, and anomalous traffic detection

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: dos-attacks and all-categories are mutually exclusive

mobile-threats

Description IP's associated with mobile threats

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: mobile-threats and all-categories are mutually exclusive

name

Description Threat category List name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

phishing

Description IP addresses hosting phishing sites, ad click fraud or gaming fraud

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: phishing and all-categories are mutually exclusive

proxy

Description IP addresses providing proxy services

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: proxy and all-categories are mutually exclusive

reputation

Description IP addresses currently known to be infected with malware

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: reputation and all-categories are mutually exclusive

sampling-enable

Type: List

scanners

Description IP's associated with probes, host scan, domain scan, and password brute force attack

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: scanners and all-categories are mutually exclusive

spam-sources

Description IP's tunneling spam messages through a proxy, anomalous SMTP activities, and forum spam activities

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: spam-sources and all-categories are mutually exclusive

tor-proxy

Description IP's providing tor proxy services

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: tor-proxy and all-categories are mutually exclusive

type

Description 'webroot': Configure Webroot threat categories;

Type: string

Supported Values: webroot

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

web-attacks

Description IP's associated with cross site scripting, iFrame injection, SQL injection, cross domain injection, or domain password brute fo

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: web-attacks and all-categories are mutually exclusive

windows-exploits

Description IP's associated with malware, shell code, rootkits, worms or viruses

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: windows-exploits and all-categories are mutually exclusive

Specification	
Type	*list*
Block object keys	

domain

Description Realm for NTLM authentication

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

enable

Description Enable module

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

log-level

Description 'disable': Disable all logging; 'error': Log error events; 'warning': Log warning events and above; 'info': Log info events and above; 'debug': Log debug events and above; 'trace': enable all logs;

Type: string

Supported Values: disable, error, warning, info, debug, trace

Default: warning

port

Description Port to query server(default 443)

Type: number

Range: 1-65535

Default: 443

proxy-auth-type

Description 'ntlm': NTLM authentication(default); 'basic': Basic authentication;

Type: string

Supported Values: ntlm, basic

Default: ntlm

proxy-host

Description Proxy server hostname or IP address

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

proxy-password

Description Password for proxy authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy-port

Description Port to connect on proxy server

Type: number

Range: 1-65535

proxy-username

Description Username for proxy authentication

Type: string

Maximum Length: 127 characters

Maximum Length: 1 characters

rtu-update-disable

Description Disables real time updates(default enable)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-string

Description password value

Type: string

Format: password

Maximum Length: 127 characters

Maximum Length: 1 characters

server

Description Server IP or Hostname

Type: string

Maximum Length: 255 characters

Maximum Length: 1 characters

server-timeout

Description Server Timeout in seconds (default: 15s)

Type: number

Range: 1-30

Default: 15

type

Description 'webroot': Configure Webroot module options;

Type: string

Supported Values: webroot

update-interval

Description Interval to check for database or RTU updates(default 120 mins)

Type: number

Range: 10-14400

Default: 120

use-mgmt-port

Description Use management interface for all communication with threat-intel server

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Specification	
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

discovery-mode

Specification	
Type	*object*

action

Description 'Unicast': enable VCS Unicast election; 'Mcast': enable VCS Multicast election; 'Mixed': enable VCS Multicast/Unicastelection;

Type: string

Supported Values: Unicast, Mcast, Mixed

Default: Mcast

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vmaster-take-over

Specification	
Type	*object*

vmaster-take-over

Description vMaster take over priority

Type: number

Range: 1-255

vcs-para

Specification	
Type	*object*

chassis-id

Description Chassis ID

Type: number

Range: 1-8

config-info

Description Configuration information (Configuration tag)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

config-seq

Description Configuration sequence number

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

dead-interval

Description The node will be considered dead as lack of hearbeats after this time (in unit of second, 10 by default)

Type: number

Range: 5-240

Default: 10

failure-retry-count-value

Description 0-255, default is 2

Type: number

Range: 0-255

Default: 2

Mutual Exclusion: failure-retry-count-value and forever are mutually exclusive

floating-ip-cfg

Type: List

floating-ipv6-cfg

Type: List

force-wait-interval

Description The node will wait the specified time interval before it start aVCS (in unit of second (default is 5))

Type: number

Range: 5-240

Default: 5

forever

Description VCS retry forever if fails to join the chassis

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: forever and failure-retry-count-value are mutually exclusive

multicast-ip

Description Multicast (group) IP address (Multicast IP address)

Type: string

Format: ipv4-address

Default: 224.0.0.210

Mutual Exclusion: multicast-ip and multicast-ipv6 are mutually exclusive

multicast-ipv6

Description Multicast (group) IPv6 address (Multicast IPv6 address)

Type: string

Format: ipv6-address

Mutual Exclusion: multicast-ipv6 and multicast-ip are mutually exclusive

multicast-port

Description Port used in multicast communication (Port number)

Type: number

Range: 1-65535

Default: 41217

size

Description file size (MBytes) to transmit to monitor the TCP channel

Type: number

Range: 10-2000

speed_limit

Description speed (KByte/s) limitation for the transmit monitor

Type: number

Range: 5-1000

ssl-enable

Description Enable SSL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-channel-monitor

Description Enable vBlade TCP channel monitor

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

time-interval

Description how long between heartbeats (in unit of second, default is 3)

Type: number

Range: 1-60

Default: 3

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vcs-para_floating-ipv6-cfg

Specification	
Type	*list*
Block object keys	

floating-ipv6

Description Floating IPv6 address

Type: string

Format: ipv6-address-plen

vcs-para_floating-ip-cfg

Specification	
Type	*list*
Block object keys	

floating-ip

Description Floating IP address (IPv4 address)

Type: string

Format: ipv4-address

floating-ip-mask

Description Netmask

Type: string

Format: ipv4-netmask

showdebug

Specification	
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

reload

Specification	
Type	*object*

disable-merge

Description don't merge this vBlade's configuration to aVCS chassis

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

debug

Specification	
Type	*object*

daemon

Description Daemon component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

daemon_msg

Description Daemon message component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

election

Description Election component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

election_pdu

Description Election pdu component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

encoder

Description Encoder component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

handler

Description Handler component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

info

Description Information component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lib

Description Lib component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

net

Description Net component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl

Description SSL component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

util

Description Utility component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vblade

Description vBlade component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vblade_msg

Description vBlade Message component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vmaster

Description vMaster component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

vmaster_msg

Description vMaster Message component

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

stat

vcs-para attributes

chassis-id

Description Chassis ID

Type: number

Range: 1-8

config-info

Description Configuration information (Configuration tag)

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

config-seq

Description Configuration sequence number

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

dead-interval

Description The node will be considered dead as lack of hearbeats after this time (in unit of second, 10 by default)

Type: number

Range: 5-240

Default: 10

failure-retry-count-value

Description 0-255, default is 2

Type: number

Range: 0-255

Default: 2

Mutual Exclusion: failure-retry-count-value and forever are mutually exclusive

floating-ip-cfg

Type: List

floating-ipv6-cfg

Type: List

force-wait-interval

Description The node will wait the specified time interval before it start aVCS (in unit of second (default is 5))

Type: number

Range: 5-240

Default: 5

forever

Description VCS retry forever if fails to join the chassis

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Mutual Exclusion: forever and failure-retry-count-value are mutually exclusive

multicast-ip

Description Multicast (group) IP address (Multicast IP address)

Type: string

Format: ipv4-address

Default: 224.0.0.210

Mutual Exclusion: multicast-ip and multicast-ipv6 are mutually exclusive

multicast-ipv6

Description Multicast (group) IPv6 address (Multicast IPv6 address)

Type: string

Format: ipv6-address

Mutual Exclusion: multicast-ipv6 and multicast-ip are mutually exclusive

multicast-port

Description Port used in multicast communication (Port number)

Type: number

Range: 1-65535

Default: 41217

size

Description file size (MBytes) to transmit to monitor the TCP channel

Type: number

Range: 10-2000

speed_limit

Description speed (KByte/s) limitation for the transmit monitor

Type: number

Range: 5-1000

ssl-enable

Description Enable SSL

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-channel-monitor

Description Enable vBlade TCP channel monitor

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

time-interval

Description how long between heartbeats (in unit of second, default is 3)

Type: number

Range: 1-60

Default: 3

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

floating-ipv6-cfg

Specification	
Type	*list*
Block object keys	

floating-ipv6

Description Floating IPv6 address

Type: string

Format: ipv6-address-plen

floating-ip-cfg

Specification	
Type	*list*
Block object keys	

floating-ip

Description Floating IP address (IPv4 address)

Type: string

Format: ipv4-address

floating-ip-mask

Description Netmask

Type: string

Format: ipv4-netmask

Type: Object

Refernce Object: */axapi/v3/visibility/reporting/template/notification/template-name/{name}/authentication*

debug-mode

Description Enable debug mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

host-name

Description Configure the host name(e.g www.a10networks.com)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Mutual Exclusion: host-name ipv4-address and ipv6-address are mutually exclusive

http-port

Description Configure the http port to use(default 80) (http port(default 80))

Type: number

Range: 1-65535

Default: 80

https-port

Description Configure the https port to use(default 443) (http port(default 443))

Type: number

Range: 1-65535

Default: 443

ipv4-address

Description Configure the host IPv4 address

Type: string

Format: ipv4-address

Mutual Exclusion: ipv4-address ipv6-address and host-name are mutually exclusive

ipv6-address

Description Configure the host IPv6 address

Type: string

Format: ipv6-address

Mutual Exclusion: ipv6-address ipv4-address and host-name are mutually exclusive

name

Description Notification template name

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

protocol

Description 'http': Use http protocol; 'https': Use https protocol(default); (http protocol)

Type: string

Supported Values: http, https

Default: https

relative-uri

Description Configure the relative uri(e.g /example , default /)

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Default: /

sampling-enable

Type: List

test-connectivity

Description Test connectivity to notification receiver

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

use-mgmt-port

Description Use management port for notifications

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

reporting_template_notification_template-name-list_authentication

Specification	
Type	*object*

api-key

Description Configure api-key as a mode of authentication

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

api-key-encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

api-key-string

Description Configure api-key as a mode of authentication

Type: string

Format: password

Maximum Length: 64 characters

Maximum Length: 1 characters

auth-password

Description Configure the authentication user password (Authentication password)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

auth-password-string

Description Configure the authentication user password (Authentication password)

Type: string

Format: password

Maximum Length: 63 characters

Maximum Length: 1 characters

auth-username

Description Configure the authentication user name

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

encrypted

Description Do NOT use this option manually. (This is an A10 reserved keyword.) (The ENCRYPTED secret string)

relative-login-uri

Description Configure the authentication login uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

relative-logoff-uri

Description Configure the authentication logoff uri

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

reporting_template_notification_template-name-list_sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'sent_successful': Sent successful; 'send_fail': Send failures; 'response_fail': Response failures;

Type: string

Supported Values: all, sent_successful, send_fail, response_fail

reporting_telemetry-export-interval

Specification	
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

value

Description Monitored entity telemetry data export interval in mins (Default 5 mins)

Type: number

Range: 1-5

Default: 5

Specification	
Type	*object*

downlink-bytes

Description Track Top-N entities for Downlink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

downlink-pkts

Description Track Top-N entities for Downlink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-apn-filtering

Description Track Top-N entities for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Track Top-N entities for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Track Top-N entities for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Track Top-N entities for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Track Top-N entities for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Track Top-N entities for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Track Top-N entities for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv0-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv1-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Create PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Update PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv2-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Create Session Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Modify Bearer Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Track Top-N entities for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Track Top-N entities for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Track Top-N entities for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Track Top-N entities for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Track Top-N entities for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Track Top-N entities for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Track Top-N entities for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Track Top-N entities for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Track Top-N entities for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Track Top-N entities for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Track Top-N entities for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Track Top-N entities for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Track Top-N entities for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Track Top-N entities for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Track Top-N entities for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Track Top-N entities for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Track Top-N entities for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Track Top-N entities for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Track Top-N entities for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Track Top-N entities for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-unsupported-message-type

Description Track Top-N entities for Validation Drop: Message type not supported by GTP Version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Track Top-N entities for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-path-management-message

Description Track Top-N entities for GTP Path Management Messages Received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-created

Description Track Top-N entities for GTP-U Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-deleted

Description Track Top-N entities for GTP-U Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPV0-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv0-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-closed

Description Track Top-N entities for GTPv0-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-created

Description Track Top-N entities for GTPv0-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted

Description Track Top-N entities for GTPv0-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv0-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-closed

Description Track Top-N entities for GTPv0-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-open

Description Track Top-N entities for GTPv0-C Half open tunnel created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPV0-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPV1-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv1-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-closed

Description Track Top-N entities for GTPv1-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-created

Description Track Top-N entities for GTPv1-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted

Description Track Top-N entities for GTPv1-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv1-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-closed

Description Track Top-N entities for GTPv1-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-open

Description Track Top-N entities for GTPv1-C Half open tunnel created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPV1-C Update PDP Context response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-create-sess-resp-unsuccess

Description Track Top-N entities for GTPV2-C Create Session Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv2-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-mod_bearer-resp-unsuccess

Description Track Top-N entities for GTPV2-C Modify Bearer Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-piggyback-message

Description Track Top-N entities for GTPv2-C Piggyback Messages seen

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-closed

Description Track Top-N entities for GTPv2-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-created

Description Track Top-N entities for GTPv2-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted

Description Track Top-N entities for GTPv2-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv2-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-closed

Description Track Top-N entities for GTPv2-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-open

Description Track Top-N entities for GTPv2-C Half open tunnel created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-bytes

Description Track Top-N entities for Uplink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-pkts

Description Track Top-N entities for Uplink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

topn_gtp-network-element-topn-tmpl-list

Specification	
Type	*list*
Block object keys	

interval

Description '5': 5 minutes; '15': 15 minutes; '30': 30 minutes; '60': 60 minutes; 'all-time': Since template is activated;

Type: string

Supported Values: 5, 15, 30, 60, all-time

metrics

Description: metrics is a **JSON Block**. Please see below for *topn_gtp-network-element-topn-tmpl-list_metrics*

Type: Object

Refernce Object: */axapi/v3/visibility/topn/gtp-network-element-topn-tmpl/{name}/metrics*

name

Description Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

topn-size

Description Congure value of N for topn

Type: number

Range: 10-200

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

topn_gtp-network-element-topn-tmpl-list_metrics

Specification	
Type	*object*

downlink-bytes

Description Track Top-N entities for Downlink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

downlink-pkts

Description Track Top-N entities for Downlink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-apn-filtering

Description Track Top-N entities for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Track Top-N entities for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Track Top-N entities for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Track Top-N entities for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Track Top-N entities for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Track Top-N entities for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Track Top-N entities for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Track Top-N entities for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv0-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv1-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Create PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Track Top-N entities for Rate-limit Drop: GTPv1-C Update PDP Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Track Top-N entities for Rate-limit Drop: Maximum GTPv2-C messages rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Create Session Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Track Top-N entities for Rate-limit Drop: GTPv2-C Modify Bearer Req rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Track Top-N entities for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Track Top-N entities for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Track Top-N entities for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Track Top-N entities for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Track Top-N entities for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Track Top-N entities for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Track Top-N entities for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Track Top-N entities for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Track Top-N entities for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Track Top-N entities for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Track Top-N entities for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Track Top-N entities for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Track Top-N entities for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Track Top-N entities for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Track Top-N entities for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Track Top-N entities for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Track Top-N entities for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Track Top-N entities for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Track Top-N entities for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Track Top-N entities for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Track Top-N entities for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-unsupported-message-type

Description Track Top-N entities for Validation Drop: Message type not supported by GTP Version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Track Top-N entities for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop_vld-gtp-bearer-count-exceed

Description Track Top-N entities for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-path-management-message

Description Track Top-N entities for GTP Path Management Messages Received

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-created

Description Track Top-N entities for GTP-U Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-tunnel-deleted

Description Track Top-N entities for GTP-U Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPv0-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv0-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-reserved-message-allow

Description Track Top-N entities for GTPv0-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-closed

Description Track Top-N entities for GTPv0-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-created

Description Track Top-N entities for GTPv0-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted

Description Track Top-N entities for GTPv0-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv0-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-closed

Description Track Top-N entities for GTPv0-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-tunnel-half-open

Description Track Top-N entities for GTPv0-C Half open tunnel created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v0-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPv0-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-create-pdp-resp-unsuccess

Description Track Top-N entities for GTPv1-C Create PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv1-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-reserved-message-allow

Description Track Top-N entities for GTPv1-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-closed

Description Track Top-N entities for GTPv1-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-created

Description Track Top-N entities for GTPv1-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted

Description Track Top-N entities for GTPv1-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv1-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-closed

Description Track Top-N entities for GTPv1-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-tunnel-half-open

Description Track Top-N entities for GTPv1-C Half open tunnel created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-update-pdp-resp-unsuccess

Description Track Top-N entities for GTPv1-C Update PDP Context Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-create-sess-resp-unsuccess

Description Track Top-N entities for GTPv2-C Create Session Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-half-open-tunnel-closed

Description Track Top-N entities for GTPv2-C Half open tunnel closed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-mod_bearer-resp-unsuccess

Description Track Top-N entities for GTPv2-C Modify Bearer Response Unsuccessful

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-piggyback-message

Description Track Top-N entities for GTPv2-C Piggyback Messages

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-reserved-message-allow

Description Track Top-N entities for GTPv2-C Reserved Message Allow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-closed

Description Track Top-N entities for GTPv2-C Tunnel Marked Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-created

Description Track Top-N entities for GTPv2-C Tunnel Created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted

Description Track Top-N entities for GTPv2-C Tunnel Deleted

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-deleted-restart

Description Track Top-N entities for GTPv2-C Tunnel Deleted with Restart/failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-closed

Description Track Top-N entities for GTPv2-C Tunnel Delete Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-tunnel-half-open

Description Track Top-N entities for GTPv2-C Half open tunnel created

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-bytes

Description Track Top-N entities for Uplink Bytes

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uplink-pkts

Description Track Top-N entities for Uplink Packets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'mon-entity-limit-exceed': Total monitor entity limit exceed failures; 'ha-entity-create-sent': Total montior entity HA create messages sent; 'ha-entity-delete-sent': Total montior entity HA delete messages sent; 'ha-entity-anomaly-on-sent': Total anomaly on HA messages sent; 'ha-entity-anomaly-off-sent': Total anomaly off HA messages sent; 'ha-entity-periodic-sync-sent': Total monitor entity periodic sync messages sent; 'out-of-memory-alloc-failures': Out of memory allocation failures; 'lw-mon-entity-created': Total Light-weight entities created; 'lw-mon-entity-deleted': Total Light-weight entities deleted; 'lw-mon-entity-limit-exceed': Light weight limit exceeded errors; 'lw-out-of-memory-alloc-failures': Light Weight Out-of-memory allocation failures; 'mon-entity-rrd-file-timestamp-err': Total monitor entity rrd file timestamp errors; 'mon-entity-rrd-update-err': Total monitor entity rrd update error; 'mon-entity-rrd-last-update-fetch-failed-err': Total monitor entity rrd last update fetch failed error; 'mon-entity-rrd-tune-err': Total monitor entity rrd tune error; 'mon-entity-rrd-out-of-memory-err': Total monitor entity rrd load failed, out of memory error; 'mon-entity-rrd-file-create-err': Total monitor entity rrd file create error;

Type: string

Supported Values: all, mon-entity-limit-exceed, ha-entity-create-sent, ha-entity-delete-sent, ha-entity-anomaly-on-sent, ha-entity-anomaly-off-sent, ha-entity-periodic-sync-sent, out-of-memory-alloc-failures, lw-mon-entity-created, lw-mon-entity-deleted, lw-mon-entity-limit-exceed, lw-out-of-memory-alloc-failures, mon-entity-rrd-file-timestamp-err, mon-entity-rrd-update-err, mon-entity-rrd-last-update-fetch-failed-err, mon-entity-rrd-tune-err, mon-entity-rrd-out-of-memory-err, mon-entity-rrd-file-create-err

packet-capture

Specification

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Specification	
Type	*object*

admin-bind-failure

Description Enable automatic packet-capture for Admin Bind Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authorize-failure

Description Enable automatic packet-capture for Authorization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bind-failure

Description Enable automatic packet-capture for User Bind Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pw_change_failure

Description Enable automatic packet-capture for Password change failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

search-failure

Description Enable automatic packet-capture for Search Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-failure

Description Enable automatic packet-capture for TLS/SSL Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout-error

Description Enable automatic packet-capture for Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Range: 1-250

Default: 60

server_selection_fail_drop

Description Enable automatic packet-capture for Service selection fail drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_selection_fail_reset

Description Enable automatic packet-capture for Service selection fail reset

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

drop-flt-apn-filtering

Description Enable automatic packet-capture for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Enable automatic packet-capture for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Enable automatic packet-capture for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Enable automatic packet-capture for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Enable automatic packet-capture for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv0-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv1-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Create PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Update PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv2-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Create Session Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Modify Bearer Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Enable automatic packet-capture for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Enable automatic packet-capture for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv0-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-message-length-mismat

Description Enable automatic packet-capture for GTPv0-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv1-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-message-length-mismat

Description Enable automatic packet-capture for GTPv1-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv2-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-message-length-mismat

Description Enable automatic packet-capture for GTPv2-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV0-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV1-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV2-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v0-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv0-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v1-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv1-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v2-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Create Session Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_object-templates_tmpl-gtp-plcy-tmpl-list_trigger-stats-rate

Specification	
Type	*object*

drop-flt-apn-filtering

Description Enable automatic packet-capture for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Enable automatic packet-capture for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Enable automatic packet-capture for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Enable automatic packet-capture for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Enable automatic packet-capture for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv0-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv1-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Create PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Update PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv2-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Create Session Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Modify Bearer Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Enable automatic packet-capture for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Enable automatic packet-capture for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv0-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-message-length-mismat

Description Enable automatic packet-capture for GTPv0-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv1-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-message-length-mismat

Description Enable automatic packet-capture for GTPv1-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv2-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-message-length-mismat

Description Enable automatic packet-capture for GTPv2-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV0-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV1-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV2-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v0-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv0-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v1-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv1-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v2-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Create Session Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Supported Values: true, false, 1, 0

Default: 0

stapling-timeout

Description Enable automatic packet-capture for OCSP Stapling Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

timeout

Description Enable automatic packet-capture for Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_delete-packet-capture-file

Specification	
Type	*object*

all

Description Delete all files in this partition

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-name

Description Specify the name of the packet capture file to be deleted

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

packet-capture_global-templates

Specification	
Type	*object*

activate

Description: activate is a **JSON Block**. Please see below for *packet-capture_global-templates_activate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/activate*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template-list

Type: List

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_activate

Specification	
Type	*object*

template

Description Name of the global templated to be activated

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list

Specification	
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change

Description: trigger-sys-obj-stats-change is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change*

trigger-sys-obj-stats-severity

Description: trigger-sys-obj-stats-severity is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-severity*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-severity*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change

Specification	
Type	*object*

aam-auth-account

Description: aam-auth-account is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-account*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-account*

aam-auth-captcha

Description: aam-auth-captcha is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-captcha*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-captcha*

aam-auth-relay-kerberos

Description: aam-auth-relay-kerberos is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-relay-kerberos*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-relay-kerberos*

aam-auth-saml-global

Description: aam-auth-saml-global is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-saml-global*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-saml-global*

aam-auth-server-ldap

Description: aam-auth-server-ldap is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-server-ldap*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-ldap*

aam-auth-server-ocsp

Description: aam-auth-server-ocsp is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-server-ocsp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-ocsp*

aam-auth-server-radius

Description: aam-auth-server-radius is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-server-radius*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-radius*

aam-auth-server-win

Description: aam-auth-server-win is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-server-win*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-win*

aam-authentication-global

Description: aam-authentication-global is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-authentication-global*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-authentication-global*

cgnv6-ddos-proc

Description: cgnv6-ddos-proc is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-ddos-proc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-ddos-proc*

cgnv6-dhcpv6

Description: cgnv6-dhcpv6 is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-dhcpv6*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-dhcpv6*

cgnv6-dns64

Description: cgnv6-dns64 is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-dns64*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-dns64*

cgnv6-ds-lite-global

Description: cgnv6-ds-lite-global is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-ds-lite-global*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-ds-lite-global*

cgnv6-http-alg

Description: cgnv6-http-alg is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-http-alg*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-http-alg*

cgnv6-icmp

Description: cgnv6-icmp is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-icmp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-icmp*

cgnv6-l4

Description: cgnv6-l4 is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-l4*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-l4*

cgnv6-logging

Description: cgnv6-logging is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-logging*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-logging*

cgnv6-lsn

Description: cgnv6-lsn is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-lsn*

Specification	
Type	*object*

46-known-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-no-prefix-for-ipv4

Description Enable automatic packet-capture for NAT64 Reverse No Prefix Match for IPv4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-unknown-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-known-drop

Description Enable automatic packet-capture for NAT64 Forward Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-midpoint-hop

Description Enable automatic packet-capture for NAT64 Forward Unknown Source Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-unknown-drop

Description Enable automatic packet-capture for NAT64 Forward Unknown ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMP Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-port-info

Description Enable automatic packet-capture for ICMP Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-session-drop

Description Enable automatic packet-capture for ICMP No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp

Description Enable automatic packet-capture for ICMP to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp-err

Description Enable automatic packet-capture for ICMP to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6-err

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-unknown-type

Description Enable automatic packet-capture for ICMP Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMPv6 Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-port-info

Description Enable automatic packet-capture for ICMPv6 Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-session-drop

Description Enable automatic packet-capture for ICMPv6 No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp-err

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6-err

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-unknown-type

Description Enable automatic packet-capture for ICMPv6 Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-icmp_trigger-stats-rate

Specification	
Type	*object*

46-known-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-no-prefix-for-ipv4

Description Enable automatic packet-capture for NAT64 Reverse No Prefix Match for IPv4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-unknown-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-known-drop

Description Enable automatic packet-capture for NAT64 Forward Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-midpoint-hop

Description Enable automatic packet-capture for NAT64 Forward Unknown Source Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-unknown-drop

Description Enable automatic packet-capture for NAT64 Forward Unknown ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

icmp-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMP Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-port-info

Description Enable automatic packet-capture for ICMP Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-session-drop

Description Enable automatic packet-capture for ICMP No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp

Description Enable automatic packet-capture for ICMP to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp-err

Description Enable automatic packet-capture for ICMP to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6-err

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-unknown-type

Description Enable automatic packet-capture for ICMP Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMPv6 Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-port-info

Description Enable automatic packet-capture for ICMPv6 Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-session-drop

Description Enable automatic packet-capture for ICMPv6 No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp-err

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6-err

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-unknown-type

Description Enable automatic packet-capture for ICMPv6 Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-pcp

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-pcp_trigger-stats-inc*

Type: Object

Specification	
Type	*object*

l4-process-error

Description Enable automatic packet-capture for L3/L4 Process Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

noroute-drop

Description Enable automatic packet-capture for Response No Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-not-request-drop

Description Enable automatic packet-capture for Packet Not a PCP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-too-short-drop

Description Enable automatic packet-capture for Packet Too Short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsol_ance_sent_fail

Description Enable automatic packet-capture for Unsolicited Announce Send Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-version

Description Enable automatic packet-capture for Unsupported PCP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Type	*object*

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_slb-pop3-proxy

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_slb-pop3-proxy_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-pop3-proxy/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_slb-pop3-proxy_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-pop3-proxy/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_slb-pop3-proxy_trigger-stats-inc

Specification	
Type	*object*

insert_tuple_fail

Description Enable automatic packet-capture for Serv Sel insert tuple fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for no route failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rsv_persist_conn_fail

Description Enable automatic packet-capture for Serv Sel Persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v4_fail

Description Enable automatic packet-capture for Serv Sel SMPv4 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v6_fail

Description Enable automatic packet-capture for Serv Sel SMPv6 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for source nat failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_slb-pop3-proxy_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Specification	
Type	*object*

drop-gtp-bearer-not-found-in-resp

Description Enable automatic packet-capture for GTP Bearer not found in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-frag-or-jumbo-pkt

Description Enable automatic packet-capture for GTP Fragmented or JUMBO packet Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-missing-cond-ie-bearer-ctx

Description Enable automatic packet-capture for Missing conditional IE in bearer context Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTP Echo IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-out-of-state-

Description Enable automatic packet-capture for GTP Echo Out of State Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-c-handover-request-out-of-state-dro

Description Enable automatic packet-capture for GTP-C Handover Request Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-entry-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-smp-create-failure

Description Enable automatic packet-capture for GTP Rate Limit SMP Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-t3-ctr-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Dynamic Counters Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rr-message-drop

Description Enable automatic packet-capture for GTP Message Dropped in RR Mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-tunnel-rate-limit-entry-create-fail

Description Enable automatic packet-capture for GTP Tunnel Level Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-out-of-state-drop

Description Enable automatic packet-capture for GTP-U Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-nsapi-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv1-C NSAPI Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-res

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-fwd-route

Description Enable automatic packet-capture for No Forward Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-rev-route

Description Enable automatic packet-capture for No Reverse Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-session-memory

Description Enable automatic packet-capture for Out of Tunnel Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

gtp-u-out-of-state-drop

Description Enable automatic packet-capture for GTP-U Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-nsapi-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv1-C NSAPI Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-res

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-fwd-route

Description Enable automatic packet-capture for No Forward Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-rev-route

Description Enable automatic packet-capture for No Reverse Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-session-memory

Description Enable automatic packet-capture for Out of Tunnel Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Default: 0

polling-control-error

Description Enable automatic packet-capture for Total Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-dropped

Description Enable automatic packet-capture for Total Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-error

Description Enable automatic packet-capture for Total Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-timeout

Description Enable automatic packet-capture for Total Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout_error

Description Enable automatic packet-capture for Total Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-server-radius_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

job-start-error

Description Enable automatic packet-capture for Total Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

polling-control-error

Description Enable automatic packet-capture for Total Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-dropped

Description Enable automatic packet-capture for Total Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-error

Description Enable automatic packet-capture for Total Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-timeout

Description Enable automatic packet-capture for Total Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

timeout_error

Description Enable automatic packet-capture for Total Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Specification	
Type	*object*

so_pkts_dest_mac_mistmatch_drop

Description Enable automatic packet-capture for Destination MAC Mistmatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_dropped

Description Enable automatic packet-capture for Total packets dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_dest_mac_zero_drop

Description Enable automatic packet-capture for Destination MAC Address zero Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_interface_not_up

Description Enable automatic packet-capture for L2redirect Intf is not UP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_invalid_redirect_inf

Description Enable automatic packet-capture for Redirect Table Error due to invalid redirect info

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_chassis_dest_mac_er

Description Enable automatic packet-capture for L3 Redirect RX multi-slot Destination MAC Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_non_ipv4_vxla

Description Enable automatic packet-capture for L3 Redirect received non ipv4 VXLAN packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_rx_encap_para

Description Enable automatic packet-capture for L3 Redirect decap Rx encap params error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_vlan_sanity_d

Description Enable automatic packet-capture for L3 Redirect Decap VLAN Sanity Drop during receipt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_error_drop

Description Enable automatic packet-capture for L3 Redirect encap error drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_ipv4_jumbo_fr

Description Enable automatic packet-capture for L3 Redirect ipv4 packet after encap more than max jumbo size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_ipv6_jumbo_fr

Description Enable automatic packet-capture for L3 Redirect tx ipv6 packet after encap more than max jumbo size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_fragmentation_error

Description Enable automatic packet-capture for L3 redirect encap Fragmentation error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_inner_mac_zero_drop

Description Enable automatic packet-capture for L3 Redirect inner mac zero drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_invalid_dev_dir

Description Enable automatic packet-capture for L3 Redirect Invalid Device direction during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_rcvd_in_l2_mode_dro

Description Enable automatic packet-capture for Recevied l3 redirect packets in L2 mode Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_error

Description Enable automatic packet-capture for L3 Redirect Table error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_no_entry_foun

Description Enable automatic packet-capture for L3 redirect Table no redirect entry found error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_too_large_pkts_in_d

Description Enable automatic packet-capture for Received L3 Redirected fragmented packets too large

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_scaleout_not_active_drop

Description Enable automatic packet-capture for Scaleout Not Active Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_release_fail

Description Enable automatic packet-capture for Total SLB NAT release failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_reserve_fail

Description Enable automatic packet-capture for Total SLB NAT reserve failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_traffic_map_not_found_drop

Description Enable automatic packet-capture for Traffic MAP Not Found Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

polling-control-error

Description Enable automatic packet-capture for Total Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pw-change-failure

Description Enable automatic packet-capture for Total password change failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-dropped

Description Enable automatic packet-capture for Total Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-error

Description Enable automatic packet-capture for Total Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-timeout

Description Enable automatic packet-capture for Total Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

search-failure

Description Enable automatic packet-capture for Total Search Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-failure

Description Enable automatic packet-capture for TLS/SSL Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

timeout-error

Description Enable automatic packet-capture for Total Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_fw-ddos-protection

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_fw-ddos-protection_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-ddos-protection/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_fw-ddos-protection_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-ddos-protection/trigger-stats-rate*

bad_ip_flg

Description Enable automatic packet-capture for Bad IP Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_frg_offset

Description Enable automatic packet-capture for Bad IP Fragment Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_hdrlen

Description Enable automatic packet-capture for Bad IP Header Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_payload_len

Description Enable automatic packet-capture for Bad IP Payload Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_ttl

Description Enable automatic packet-capture for Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_tcp_urg_offset

Description Enable automatic packet-capture for TCP Bad Urgent Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

csum

Description Enable automatic packet-capture for Bad IP Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_frg

Description Enable automatic packet-capture for Empty Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_mic_frg

Description Enable automatic packet-capture for Micro Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frg

Description Enable automatic packet-capture for IPv4 Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gre_pptp_err

Description Enable automatic packet-capture for GRE PPTP Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_err

Description Enable automatic packet-capture for IP-over-IP Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_msmtch

Description Enable automatic packet-capture for IP-over-IP Tunnel Mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land

Description Enable automatic packet-capture for Land Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_ip_payload

Description Enable automatic packet-capture for No IP Payload drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nvgre_err

Description Enable automatic packet-capture for GRE Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

opt

Description Enable automatic packet-capture for IPv4 Options Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

over_ip_payload

Description Enable automatic packet-capture for Oversize IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pod

Description Enable automatic packet-capture for ICMP Ping of Death Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_ip_hdr

Description Enable automatic packet-capture for Runt IP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_tcp_udp_hdr

Description Enable automatic packet-capture for Runt TCP/UDP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_csum

Description Enable automatic packet-capture for TCP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_iplen

Description Enable automatic packet-capture for TCP Bad IP Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_frg_hdr

Description Enable automatic packet-capture for TCP Fragmented Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_frg

Description Enable automatic packet-capture for TCP Null Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_scan

Description Enable automatic packet-capture for TCP Null Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_opt_err

Description Enable automatic packet-capture for TCP Option Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_sht_hdr

Description Enable automatic packet-capture for TCP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_fin

Description Enable automatic packet-capture for TCP Syn and Fin Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_frg

Description Enable automatic packet-capture for TCP Syn Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas

Description Enable automatic packet-capture for TCP XMAS Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas_scan

Description Enable automatic packet-capture for TCP XMAS Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_csum

Description Enable automatic packet-capture for UDP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_len

Description Enable automatic packet-capture for UDP Bad Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_kerb_frg

Description Enable automatic packet-capture for UDP Kerberos Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_port_lb

Description Enable automatic packet-capture for UDP Port Loopback Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_srt_hdr

Description Enable automatic packet-capture for UDP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan_err

Description Enable automatic packet-capture for VXLAN Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

opt

Description Enable automatic packet-capture for IPv4 Options Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

over_ip_payload

Description Enable automatic packet-capture for Oversize IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pod

Description Enable automatic packet-capture for ICMP Ping of Death Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_ip_hdr

Description Enable automatic packet-capture for Runt IP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_tcp_udp_hdr

Description Enable automatic packet-capture for Runt TCP/UDP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_csum

Description Enable automatic packet-capture for TCP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_iplen

Description Enable automatic packet-capture for TCP Bad IP Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_frg_hdr

Description Enable automatic packet-capture for TCP Fragmented Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_frg

Description Enable automatic packet-capture for TCP Null Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_scan

Description Enable automatic packet-capture for TCP Null Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_opt_err

Description Enable automatic packet-capture for TCP Option Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_sht_hdr

Description Enable automatic packet-capture for TCP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_fin

Description Enable automatic packet-capture for TCP Syn and Fin Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_frg

Description Enable automatic packet-capture for TCP Syn Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas

Description Enable automatic packet-capture for TCP XMAS Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas_scan

Description Enable automatic packet-capture for TCP XMAS Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

udp_bad_csum

Description Enable automatic packet-capture for UDP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_len

Description Enable automatic packet-capture for UDP Bad Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_kerb_frg

Description Enable automatic packet-capture for UDP Kerberos Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_port_lb

Description Enable automatic packet-capture for UDP Port Loopback Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_srt_hdr

Description Enable automatic packet-capture for UDP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan_err

Description Enable automatic packet-capture for VXLAN Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-http-alg

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-http-alg_trigger-stats-inc*

Type: Object

Specification	
Type	*object*

header-insertion-failed

Description Enable automatic packet-capture for Buff Insertion Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-removal-failed

Description Enable automatic packet-capture for Buff Removal Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-memory-dropped

Description Enable automatic packet-capture for Out-of-Memory Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-dropped

Description Enable automatic packet-capture for Packet Out-of-Order Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

queue-len-exceed-dropped

Description Enable automatic packet-capture for Queue Length Exceed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-requst-dropped

Description Enable automatic packet-capture for Query Request Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-response-dropped

Description Enable automatic packet-capture for Query Response Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-http-alg_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

header-insertion-failed

Description Enable automatic packet-capture for Buff Insertion Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-removal-failed

Description Enable automatic packet-capture for Buff Removal Failed

Type: boolean

Supported Values: true, false, 1, 0

Specification	
Type	*object*

ha-standby-dropped

Description Enable automatic packet-capture for HA Standby Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-key

Description Enable automatic packet-capture for Radius Request has Invalid Key Field

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-prefix-length-mismatch

Description Enable automatic packet-capture for Framed IPV6 Prefix Length Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-request-dropped

Description Enable automatic packet-capture for RADIUS Request Dropped (Malformed Packet)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-table-full

Description Enable automatic packet-capture for RADIUS Request Dropped (Table Full)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-bad-secret-dropped

Description Enable automatic packet-capture for RADIUS Request Bad Secret Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-malformed-dropped

Description Enable automatic packet-capture for RADIUS Request Malformed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-no-key-vap-dropped

Description Enable automatic packet-capture for RADIUS Request No Key Attribute Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-not-configured-dropped

Description Enable automatic packet-capture for RADIUS Secret Not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Default: 0

fcs-drop

Description Enable automatic packet-capture for Total FCS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hrx-drop

Description Enable automatic packet-capture for Total HRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-pod-drop

Description Enable automatic packet-capture for Total ICMP POD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-frag

Description Enable automatic packet-capture for Total IP frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-opt-drop

Description Enable automatic packet-capture for Total IPv4 opt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land-drop

Description Enable automatic packet-capture for Total LAND Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mic-frag-drop

Description Enable automatic packet-capture for Total Micro frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mrx-drop

Description Enable automatic packet-capture for Total MRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ip-payload-drop

Description Enable automatic packet-capture for Total No IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

oversize-ip-payload

Description Enable automatic packet-capture for Total Oversize IP PL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

qdr-drop

Description Enable automatic packet-capture for Total QDR Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-ip-hdr

Description Enable automatic packet-capture for Total Runt IP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-tcpudp-hdr

Description Enable automatic packet-capture for Total Runt TCPUDP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

siz-drop

Description Enable automatic packet-capture for Total Size Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-chksum

Description Enable automatic packet-capture for Total TCP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-ip-len

Description Enable automatic packet-capture for Total TCP Bad IP Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-urg-offet

Description Enable automatic packet-capture for Total TCP bad urg off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-fin-sin

Description Enable automatic packet-capture for Total TCP SYN&FIN Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-frag-hdr

Description Enable automatic packet-capture for Total TCP frag header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-flags

Description Enable automatic packet-capture for Total TCP null flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-scan

Description Enable automatic packet-capture for Total TCP null scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-short-hdr

Description Enable automatic packet-capture for Total TCP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-syn-frag

Description Enable automatic packet-capture for Total TCP SYN frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-flags

Description Enable automatic packet-capture for Total TCP XMAS FLAGS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-scan

Description Enable automatic packet-capture for Total TCP XMAS scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tun-mismatch

Description Enable automatic packet-capture for Total Tun mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-chksum

Description Enable automatic packet-capture for Total UDP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-ip-len

Description Enable automatic packet-capture for Total UDP bad leng Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-kb-frags

Description Enable automatic packet-capture for Total UDP KB frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-port-lb

Description Enable automatic packet-capture for Total UDP port LB Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-short-hdr

Description Enable automatic packet-capture for Total UDP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_system-fpga-drop_trigger-stats-rate

Specification	
Type	*object*

bad-ip-chksum-drop

Description Enable automatic packet-capture for Total Bad IP csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-flags-drop

Description Enable automatic packet-capture for Total Bad IP Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-frag-offset

Description Enable automatic packet-capture for Total Bad IP frag off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-hdr-len

Description Enable automatic packet-capture for Total Bad IP hdr len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-payload-len

Description Enable automatic packet-capture for Total Bad IP PL len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-ttl-drop

Description Enable automatic packet-capture for Total Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

empty-frag-drop

Description Enable automatic packet-capture for Total Empty frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fcs-drop

Description Enable automatic packet-capture for Total FCS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hrx-drop

Description Enable automatic packet-capture for Total HRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-pod-drop

Description Enable automatic packet-capture for Total ICMP POD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-frag

Description Enable automatic packet-capture for Total IP frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-opt-drop

Description Enable automatic packet-capture for Total IPv4 opt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land-drop

Description Enable automatic packet-capture for Total LAND Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mic-frag-drop

Description Enable automatic packet-capture for Total Micro frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mrx-drop

Description Enable automatic packet-capture for Total MRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ip-payload-drop

Description Enable automatic packet-capture for Total No IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

oversize-ip-payload

Description Enable automatic packet-capture for Total Oversize IP PL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

qdr-drop

Description Enable automatic packet-capture for Total QDR Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-ip-hdr

Description Enable automatic packet-capture for Total Runt IP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-tcpudp-hdr

Description Enable automatic packet-capture for Total Runt TCPUDP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

siz-drop

Description Enable automatic packet-capture for Total Size Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-chksum

Description Enable automatic packet-capture for Total TCP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-ip-len

Description Enable automatic packet-capture for Total TCP Bad IP Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-urg-offet

Description Enable automatic packet-capture for Total TCP bad urg off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-fin-sin

Description Enable automatic packet-capture for Total TCP SYN&FIN Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-frag-hdr

Description Enable automatic packet-capture for Total TCP frag header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-flags

Description Enable automatic packet-capture for Total TCP null flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-scan

Description Enable automatic packet-capture for Total TCP null scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-short-hdr

Description Enable automatic packet-capture for Total TCP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-syn-frag

Description Enable automatic packet-capture for Total TCP SYN frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-flags

Description Enable automatic packet-capture for Total TCP XMAS FLAGS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-scan

Description Enable automatic packet-capture for Total TCP XMAS scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

tun-mismatch

Description Enable automatic packet-capture for Total Tun mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-chksum

Description Enable automatic packet-capture for Total UDP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-ip-len

Description Enable automatic packet-capture for Total UDP bad leng Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-kb-frags

Description Enable automatic packet-capture for Total UDP KB frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-port-lb

Description Enable automatic packet-capture for Total UDP port LB Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-short-hdr

Description Enable automatic packet-capture for Total UDP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-authentication-global

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-authentication-global_trigger-stats-inc*

Type	*object*

badpkt_drop

Description Enable automatic packet-capture for Bad Pkt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

incorrect_len_drop

Description Enable automatic packet-capture for Incorrect Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_rx_arp_pkt

Description Enable automatic packet-capture for Invalid ARP PKT Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_sender_mac_arp_drop

Description Enable automatic packet-capture for ARP PKT dropped due to invalid sender MAC

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_defrag_invalid_len

Description Enable automatic packet-capture for IP Invalid Length Frag

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_oversize

Description Enable automatic packet-capture for IP Fragment oversize

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_too_many

Description Enable automatic packet-capture for IP Fragment too many

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_ipip_dropped

Description Enable automatic packet-capture for IP Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overlap

Description Enable automatic packet-capture for IP Fragment Overlap

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overload

Description Enable automatic packet-capture for IP Frag Overload Drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_reasmfails

Description Enable automatic packet-capture for IP Fragment Reasm Fails

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_tcp_dropped

Description Enable automatic packet-capture for IP Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_timeout

Description Enable automatic packet-capture for IP Fragment Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_udp_dropped

Description Enable automatic packet-capture for IP Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4_frag_6rd_drop

Description Enable automatic packet-capture for IPv4 Frag 6RD Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_gre_dropped

Description Enable automatic packet-capture for IPv6 Frag gre Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_ipip_dropped

Description Enable automatic packet-capture for IPv6 Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_tcp_dropped

Description Enable automatic packet-capture for IPv6 Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_udp_dropped

Description Enable automatic packet-capture for IPv6 Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prot_down_drop

Description Enable automatic packet-capture for Prot Down Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ttl_exceeded_drop

Description Enable automatic packet-capture for TTL Exceeded Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown_prot_drop

Description Enable automatic packet-capture for Unknown Prot Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-lsn/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-lsn/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn_trigger-stats-inc

Specification	
Type	*object*

adc_port_allocation_failed

Description Enable automatic packet-capture for ADC Port Allocation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_user_quota_exceeded

Description Enable automatic packet-capture for Data Session User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_failure

Description Enable automatic packet-capture for LSN Fullcone Extension Memory Allocate Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_init_faulure

Description Enable automatic packet-capture for LSN Fullcone Extension Initialization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_alloc_single_port_failure

Description Enable automatic packet-capture for H323 ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_filtered

Description Enable automatic packet-capture for Endpoint-Dependent Filtering Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_port_pair_alloc_from_quota_par

Description Enable automatic packet-capture for MGCP ALG Port Pair Allocated From Quota Partition Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

new_user_resource_unavailable

Description Enable automatic packet-capture for New User NAT Resource Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_class_list_match

Description Enable automatic packet-capture for No Class-List Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_inc_overflow

Description Enable automatic packet-capture for Port Overloading Inc Overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_out_of_memory

Description Enable automatic packet-capture for Port Overloading Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_rtp_rtcp_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc RTP/RTCP NAT Ports Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_single_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_quota_inc_failure

Description Enable automatic packet-capture for SIP ALG User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

standby_class_list_drop

Description Enable automatic packet-capture for HA Standby Class-List drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn_trigger-stats-rate

Specification	
Type	*object*

adc_port_allocation_failed

Description Enable automatic packet-capture for ADC Port Allocation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_user_quota_exceeded

Description Enable automatic packet-capture for Data Session User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_failure

Description Enable automatic packet-capture for LSN Fullcone Extension Memory Allocate Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_init_faulure

Description Enable automatic packet-capture for LSN Fullcone Extension Initialization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_alloc_single_port_failure

Description Enable automatic packet-capture for H323 ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_filtered

Description Enable automatic packet-capture for Endpoint-Dependent Filtering Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_port_pair_alloc_from_quota_par

Description Enable automatic packet-capture for MGCP ALG Port Pair Allocated From Quota Partition Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

new_user_resource_unavailable

Description Enable automatic packet-capture for New User NAT Resource Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_class_list_match

Description Enable automatic packet-capture for No Class-List Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_inc_overflow

Description Enable automatic packet-capture for Port Overloading Inc Overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_out_of_memory

Description Enable automatic packet-capture for Port Overloading Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_rtp_rtcp_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc RTP/RTCP NAT Ports Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_single_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_quota_inc_failure

Description Enable automatic packet-capture for SIP ALG User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

standby_class_list_drop

Description Enable automatic packet-capture for HA Standby Class-List drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Specification	
Type	*object*

bw_rate_limit_exceed

Description Enable automatic packet-capture for BW-Limit Exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

concurrent_conn_exceed

Description Enable automatic packet-capture for L3V Conn Limit Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn_rate_limit_drop

Description Enable automatic packet-capture for Conn rate limit drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn_rate_limit_reset

Description Enable automatic packet-capture for Conn rate limit resets

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connlimit_drop

Description Enable automatic packet-capture for Conn Limit drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_policy_drop

Description Enable automatic packet-capture for DNS Policy Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4_cps_exceed

Description Enable automatic packet-capture for L4 CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l7_cps_exceed

Description Enable automatic packet-capture for L7 CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_cps_exceed

Description Enable automatic packet-capture for NAT CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_resourse_drop

Description Enable automatic packet-capture for No resource drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_vport_drop

Description Enable automatic packet-capture for vport not matching drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

novport_drop

Description Enable automatic packet-capture for NAT no session drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for Source NAT failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_cps_exceed

Description Enable automatic packet-capture for SSL CPS exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl_tpt_exceed

Description Enable automatic packet-capture for SSL TPT exceed drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrselfail

Description Enable automatic packet-capture for Server sel failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syncookiescheckfailed

Description Enable automatic packet-capture for TCP SYN cookie failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syncookiessentfailed

Description Enable automatic packet-capture for TCP SYN cookie snt fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_fw-global_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

fullcone_creation_failure

Description Enable automatic packet-capture for Full-Cone Creation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_slb-spdy-proxy

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_slb-spdy-proxy_trigger-stats-inc*

err-pkt-drop

Description Enable automatic packet-capture for Total error packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-ring-drop

Description Enable automatic packet-capture for Total IO core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-rx-que-drop

Description Enable automatic packet-capture for Total IO core Rx queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-tx-que-drop

Description Enable automatic packet-capture for Total IO core TX queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-drop

Description Enable automatic packet-capture for Total packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-lnk-down-drop

Description Enable automatic packet-capture for Total packets link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-align-err

Description Enable automatic packet-capture for Total RX packet align error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-crc-err

Description Enable automatic packet-capture for Total RX packet CRC error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-csum-offload-err

Description Enable automatic packet-capture for Total Rx packet check-sum offload error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-err

Description Enable automatic packet-capture for Total RX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-frame-err

Description Enable automatic packet-capture for Total RX packet frame error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-len-err

Description Enable automatic packet-capture for Total RX packet length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-long-len-err

Description Enable automatic packet-capture for Total RX packet long length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-miss-err

Description Enable automatic packet-capture for Total RX packet miss error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-no-buff-err

Description Enable automatic packet-capture for Total RX packet no buffer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-over-err

Description Enable automatic packet-capture for Total RX packet over error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-short-len-err

Description Enable automatic packet-capture for Total RX packet short length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-abort-err

Description Enable automatic packet-capture for Total TX packet abort error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-carrier-err

Description Enable automatic packet-capture for Total TX packert carrier error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-drop

Description Enable automatic packet-capture for Total TX packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-err

Description Enable automatic packet-capture for Total TX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-fifo-err

Description Enable automatic packet-capture for Total TX packet fifo error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-hbeat-err

Description Enable automatic packet-capture for Total TX packet HBEAT error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-windows-err

Description Enable automatic packet-capture for Total TX windows error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_slb-imap-proxy_trigger-stats-inc

Specification	
Type	*object*

cl_est_err

Description Enable automatic packet-capture for Client EST state erro

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cl_request_err

Description Enable automatic packet-capture for Client RQ state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_send_fail

Description Enable automatic packet-capture for data send fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_server_conn_fail

Description Enable automatic packet-capture for data svr conn fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

insert_tuple_fail

Description Enable automatic packet-capture for Serv Sel insert tuple fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for no route failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rsv_persist_conn_fail

Description Enable automatic packet-capture for Serv Sel Persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ser_connecting_err

Description Enable automatic packet-capture for Serv CTNG state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

server_response_err

Description Enable automatic packet-capture for Serv RESP state error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_create_fail

Description Enable automatic packet-capture for smp create fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v4_fail

Description Enable automatic packet-capture for Serv Sel SMPv4 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v6_fail

Description Enable automatic packet-capture for Serv Sel SMPv6 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for source nat failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type	*object*

crl_cache_status_revoked

Description Enable automatic packet-capture for CRL cache status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_connection_error

Description Enable automatic packet-capture for CRL connection errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_other_error

Description Enable automatic packet-capture for CRL other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_response_status_revoked

Description Enable automatic packet-capture for CRL response status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_response_status_unknown

Description Enable automatic packet-capture for CRL response status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_https

Description Enable automatic packet-capture for CRL URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_not_found

Description Enable automatic packet-capture for CRL URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_unsupported

Description Enable automatic packet-capture for CRL URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_cache_miss

Description Enable automatic packet-capture for OCSP cache miss

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_cache_status_revoked

Description Enable automatic packet-capture for OCSP cache status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_revoked

Description Enable automatic packet-capture for Certificate chain status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_unknown

Description Enable automatic packet-capture for Certificate chain status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_connection_error

Description Enable automatic packet-capture for OCSP connection error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_other_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_no_nonce

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_nonce_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_revoked

Description Enable automatic packet-capture for OCSP response status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_unknown

Description Enable automatic packet-capture for OCSP response status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_https

Description Enable automatic packet-capture for Log OCSP URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_not_found

Description Enable automatic packet-capture for OCSP URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_unsupported

Description Enable automatic packet-capture for OCSP URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-l4_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

icmp-host-unreachable-sent

Description Enable automatic packet-capture for ICMP Host Unreachable Sent

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-reply-no-session-drop

Description Enable automatic packet-capture for ICMP Reply No Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-dst-invalid-unicast

Description Enable automatic packet-capture for IPv4 Destination Not Valid Unicast

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip-src-invalid-unicast

Description Enable automatic packet-capture for IPv4 Source Not Valid Unicast

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip-truncated

Description Enable automatic packet-capture for IPIP Truncated Packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-fwd-route

Description Enable automatic packet-capture for No Forward Route for Session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-rev-route

Description Enable automatic packet-capture for No Reverse Route for Session

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-session-memory

Description Enable automatic packet-capture for Out of Session Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rate_drop_reset_unkn

Description Enable automatic packet-capture for Rate Drop reset

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-saml-global

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *packet-capture_global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-saml-global_trigger-stats-inc*

Specification	
Type	*object*

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_user_quota_exceeded

Description Enable automatic packet-capture for Data Session User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_pool_unusable

Description Enable automatic packet-capture for NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_unusable_drop

Description Enable automatic packet-capture for User-Quota Unusable Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Type	*object*

alloc_fail_total

Description Enable automatic packet-capture for Alloc Fail - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

buff_alloc_error

Description Enable automatic packet-capture for Buff alloc error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_control_frame

Description Enable automatic packet-capture for Cant allocate control frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_goaway_frame

Description Enable automatic packet-capture for Cant allocate GOAWAY frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_ping_frame

Description Enable automatic packet-capture for Cant allocate PING frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_rst_frame

Description Enable automatic packet-capture for Cant allocate RST_STREAM frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_settings_frame

Description Enable automatic packet-capture for Cant allocate SETTINGS frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_stream

Description Enable automatic packet-capture for Cant allocate stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_window_frame

Description Enable automatic packet-capture for Cant allocate WINDOW_UPDATE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_queue_alloc_error

Description Enable automatic packet-capture for Data Queue Alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_global-templates_template-list_trigger-sys-obj-stats-severity

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

packet-capture_capture-config-list

Specification	
Type	*list*
Block object keys	

concurrent-captures

Description Enable and specify maximum concurrent 3 tuple filter based captures in seperate pcaps.

Type: number

Range: 1-5000

Mutual Exclusion: concurrent-captures and concurrent-conn-tag are mutually exclusive

concurrent-captures-age

Description Specify the time in minutes upto which a 3 tuple filter based capture will be kept active(default 1)

Type: number

Range: 1-10

Default: 1

concurrent-conn-per-capture

Description Specify maximum number of concurrent connnections(5 tuple matches) to be captured within in a 3 tuple based capture. (default 1

Type: number

Range: 1-1000

Default: 100

concurrent-conn-tag

Description Enable and specify maximum concurrent connnections(only 5 tuple based) to be captured in common pcaps.

Type: number

Range: 1-1000

Mutual Exclusion: concurrent-conn-tag and concurrent-captures are mutually exclusive

create-pcap-files-now

Description Operational command to force create temporary pcapng files before completion (for global/non 3 tuple based captures)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable packet capture (default enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-auto-merge

Description Disable auto merging per CPU pcapng files(default enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-continuous-global-capture

Description Enable continuous capture of packets for the global capture(non 3 tuple based capture) overriding size limits

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-count

Description Specify the number of continuous pcapng files that can be created for capturing packets (default 10)

Type: number

Range: 1-50

Default: 10

file-size

Description Specify pcapng filesize in MB, Will be distributed per CPU (default 1)

Type: number

Range: 1-300

Default: 1

keep-pcap-files-after-merge

Description Keep original per CPU pcapng files after auto merging pcapng files(default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Specify the name of the capture-config

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

number-of-packets-per-capture

Description Specify Maximum number of packets per global or dynamic capture (default 0 unlimited)

Type: number

Range: 0-1000

Default: 0

number-of-packets-per-conn

Description Specify maximum number of packets to be captured in a 5 tuple based connection (default 0 unlimited).

Type: number

Range: 0-1000

Default: 0

number-of-packets-total

Description Specify Maximum number of packets for all captures (default 0 unlimited)

Type: number

Range: 0-15000

Default: 0

packet-length

Description Packet length in Bytes to capture (Default 128)

Type: number

Range: 64-1518

Default: 128

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

file

Specification	
Type	*object*

metrics

Description: metrics is a **JSON Block**. Please see below for *file_metrics*

Type: Object

Refernce Object: */axapi/v3/visibility/file/metrics*

file_metrics

Specification	
Type	*object*

action

Description 'enable': Enable persistent storage(default); 'disable': Disable persistent storage;

Type: string

Supported Values: enable, disable

Default: disable

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

anomaly-detection

Specification	
Type	*object*

feature-status

Description 'enable': Enable anomaly-detection (Not valid for source-nat-ip and source monitor types); 'disable': Disable anomaly detection (default);

Type: string

Supported Values: enable, disable

Default: disable

logging

Description 'per-entity': Enable per entity logging; 'per-metric': Enable per metric logging with threshold details; 'disable': Disable anomaly notifications (Default);

Type: string

Supported Values: per-entity, per-metric, disable

Default: disable

restart-learning-on-anomaly

Description Relearn anomaly detection parameters after detecting an anomaly

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sensitivity

Description 'high': Highly sensitive anomaly detection. Can lead to false positives; 'low': Low sensitivity anomaly detection. Can cause delay in detection and might not detect certain attacks. (default);

Type: string

Supported Values: high, low

Default: low

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zbar

Specification	
Type	*object*

action

Description 'enable': Enable zbar infra; 'disable': Disable zbar infra(default);

Type: string

Supported Values: enable, disable

Default: disable

dest

Description: dest is a **JSON Block**. Please see below for *zbar_dest*

Type: Object

Refernce Object: */axapi/v3/visibility/zbar/dest*

truples

Description: truples is a **JSON Block**. Please see below for *zbar_truples*

Type: Object

Refernce Object: */axapi/v3/visibility/zbar/truples*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zbar_dest

Specification	
Type	*object*

bad-sources

Description: bad-sources is a **JSON Block**. Please see below for *zbar_dest_bad-sources*

Type: Object

Refernce Object: */axapi/v3/visibility/zbar/dest/bad-sources*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zbar_dest_bad-sources

Specification	
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

zbar_truples

Specification	
Type	*object*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

monitor

Specification	
Type	*object*

agent-list

Type: List

Refernce Object: */axapi/v3/visibility/monitor/agent/{agent-name}*

debug-list

Type: List

Refernce Object: */axapi/v3/visibility/monitor/debug/{debug-ip-addr}+{debug-port}+{debug-protocol}*

delete-debug-file

Description: delete-debug-file is a **JSON Block**. Please see below for *monitor_delete-debug-file*

Type: Object

Refernce Object: */axapi/v3/visibility/monitor/delete-debug-file/{debug-ip-addr}*

index-sessions

Description Start indexing associated sessions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

index-sessions-type

Description 'per-cpu': Use per cpu list;

Type: string

Supported Values: per-cpu

mon-entity-topk

Description Enable topk for primary entities

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

monitor-key

Description 'source': Monitor traffic from all sources; 'dest': Monitor traffic to any destination; 'service': Monitor traffic to any service; 'source-nat-ip': Monitor traffic to all source nat IPs;

Type: string

Supported Values: source, dest, service, source-nat-ip

netflow

Description: netflow is a **JSON Block**. Please see below for *monitor_netflow*

Type: Object

Refernce Object: */axapi/v3/visibility/monitor/netflow*

primary-monitor

Description 'traffic': Mointor traffic;

Type: string

Supported Values: traffic

replay-debug-file

Description: replay-debug-file is a **JSON Block**. Please see below for *monitor_replay-debug-file*

Type: Object

Refernce Object: */axapi/v3/visibility/monitor/replay-debug-file/{debug-ip-addr}*

secondary-monitor

Description: secondary-monitor is a **JSON Block**. Please see below for *monitor_secondary-monitor*

Type: Object

Refernce Object: */axapi/v3/visibility/monitor/secondary-monitor*

sflow

Description: sflow is a **JSON Block**. Please see below for *monitor_sflow*

Type: Object

Refernce Object: */axapi/v3/visibility/monitor/sflow*

source-entity-topk

Description Enable topk for sources to primary-entities

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template

Description: template is a **JSON Block**. Please see below for *monitor_template*

Type: Object

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

monitor_debug-list

Specification	
Type	*list*
Block object keys	

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

monitor_sflow

Specification	
Type	*object*

listening-port

Description sFlow port to receive packets (sFlow port number(default 6343))

Type: number

Range: 1-65535

Default: 6343

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

monitor_delete-debug-file

Specification	
Type	*object*

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

monitor_template

Specification	
Type	*object*

notification

Type: List

monitor_template_notification

Specification	
Type	*list*
Block object keys	

notif-template-name

Description

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/visibility/reporting/template/notification/template-name*

monitor_replay-debug-file

Specification	
Type	*object*

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

monitor_netflow

Specification	
Type	*object*

listening-port

Description Netflow port to receive packets (Netflow port number(default 9996))

Type: number

Range: 1-65535

Default: 9996

template-active-timeout

Description Configure active timeout of the netflow templates received in mins (Template active timeout(mins)(default 30mins))

Type: number

Range: 2-300

Default: 30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

monitor_secondary-monitor

Specification	
Type	*object*

debug-list

Type: List

Refernce Object: */axapi/v3/visibility/monitor/secondary-monitor/debug/{debug-ip-addr}+{debug-port}+{debug-protocol}*

delete-debug-file

Description: delete-debug-file is a **JSON Block**. Please see below for *monitor_secondary-monitor_delete-debug-file*

Type: Object

Refernce Object: */axapi/v3/visibility/monitor/secondary-monitor/delete-debug-file/{debug-ip-addr}*

mon-entity-topk

Description Enable topk for secondary entities

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

replay-debug-file

Description: replay-debug-file is a **JSON Block**. Please see below for *monitor_secondary-monitor_replay-debug-file*

Type: Object

Refernce Object: */axapi/v3/visibility/monitor/secondary-monitor/replay-debug-file/{debug-ip-addr}*

secondary-monitoring-key

Description 'service': Monitor traffic to any service;

Type: string

Supported Values: service

source-entity-topk

Description Enable topk for sources to secondary-entities

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

monitor_secondary-monitor_debug-list

Specification	
Type	*list*
Block object keys	

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

monitor_secondary-monitor_delete-debug-file

Specification	
Type	*object*

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

monitor_secondary-monitor_replay-debug-file

Specification	
Type	*object*

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

monitor_agent-list

Specification	
Type	*list*
Block object keys	

agent-name

Description Specify name for the agent

Type: string

Format: string-rlx

Maximum Length: 63 characters

Maximum Length: 1 characters

agent-v4-addr

Description Configure agent's IPv4 address

Type: string

Format: ipv4-address

agent-v6-addr

Description Configure agent's IPv6 address

Type: string

Format: ipv6-address

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

monitor_agent-list_sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'sflow-packets-received': sFlow Packets Received; 'sflow-samples-received': sFlow Samples Received; 'sflow-samples-bad-len': sFlow Samples Bad Length; 'sflow-samples-non-std': sFlow Samples Non-standard; 'sflow-samples-skipped': sFlow Samples Skipped; 'sflow-sample-record-bad-len': sFlow Sample Records Bad Length; 'sflow-samples-sent-for-detection': sFlow Samples Processed For Detection; 'sflow-sample-record-invalid-layer2': sFlow Sample Records Unknown Layer-2; 'sflow-sample-ipv6-hdr-parse-fail': sFlow Sample IPv6 Record Header Parse Failures; 'sflow-disabled': sFlow Packet Samples Processing Disabled; 'netflow-disabled': Netflow Flow Samples Processing Disabled; 'netflow-v5-packets-received': Netflow v5 Packets Received; 'netflow-v5-samples-received': Netflow v5 Samples Received; 'netflow-v5-samples-sent-for-detection': Netflow v5 Samples Processed For Detection; 'netflow-v5-sample-records-bad-len': Netflow v5 Sample Records Bad Length; 'netflow-v5-max-records-exceed': Netflow v5 Sample Max Records

Error; 'netflow-v9-packets-received': Netflow v9 Packets Received; 'netflow-v9-samples-received': Netflow v9 Samples Received; 'netflow-v9-samples-sent-for-detection': Netflow v9 Samples Processed For Detection; 'netflow-v9-sample-records-bad-len': Netflow v9 Sample Records Bad Length; 'netflow-v9-max-records-exceed': Netflow v9 Sample Max Records Error; 'netflow-v10-packets-received': Netflow v10 Packets Received; 'netflow-v10-samples-received': Netflow v10 Samples Received; 'netflow-v10-samples-sent-for-detection': Netflow v10 Samples Procssed For Detection; 'netflow-v10-sample-records-bad-len': Netflow v10 Sample Records Bad Length; 'netflow-v10-max-records-exceed': Netflow v10 Sample Max records Error; 'netflow-tcp-sample-received': Netflow TCP Samples Received; 'netflow-udp-sample-received': Netflow UDP Samples received; 'netflow-icmp-sample-received': Netflow ICMP Samples Received; 'netflow-other-sample-received': Netflow OTHER Samples Received; 'netflow-record-copy-oom-error': Netflow Data Record Copy Fail OOM; 'netflow-record-rse-invalid': Netflow Data Record Reduced Size Invalid; 'netflow-sample-flow-dur-error': Netflow Sample Flow Duration Error;

Type: string

Supported Values: all, sflow-packets-received, sflow-samples-received, sflow-samples-bad-len, sflow-samples-non-std, sflow-samples-skipped, sflow-sample-record-bad-len, sflow-samples-sent-for-detection, sflow-sample-record-invalid-layer2, sflow-sample-ipv6-hdr-parse-fail, sflow-disabled, netflow-disabled, netflow-v5-packets-received, netflow-v5-samples-received, netflow-v5-samples-sent-for-detection, netflow-v5-sample-records-bad-len, netflow-v5-max-records-exceed, netflow-v9-packets-received, netflow-v9-samples-received, netflow-v9-samples-sent-for-detection, netflow-v9-sample-records-bad-len, netflow-v9-max-records-exceed, netflow-v10-packets-received, netflow-v10-samples-received, netflow-v10-samples-sent-for-detection, netflow-v10-sample-records-bad-len, netflow-v10-max-records-exceed, netflow-tcp-sample-received, netflow-udp-sample-received, netflow-icmp-sample-received, netflow-other-sample-received, netflow-record-copy-oom-error, netflow-record-rse-invalid, netflow-sample-flow-dur-error

stats data

	Counter	Size	Description
	ha-entity-delete-sent	8	Total montior entity HA delete messages sent
	out-of-memory-alloc-failures	8	Out of memory allocation failures
	mon-entity-rrd-tune-err	8	Total monitor entity rrd tune error
	mon-entity-rrd-file-timestamp-err	8	Total monitor entity rrd file timestamp errors
	lw-mon-entity-limit-exceed	8	Light weight limit exceeded errors
	ha-entity-periodic-sync-sent	8	Total monitor entity periodic sync messages sent
	mon-entity-rrd-last-update-fetch-failed-err	8	Total monitor entity rrd last update fetch failed error
	ha-entity-create-sent	8	Total montior entity HA create messages sent
	lw-mon-entity-created	8	Total Light-weight entities created
	mon-entity-rrd-update-err	8	Total monitor entity rrd update error
	mon-entity-rrd-out-of-memory-err	8	Total monitor entity rrd load failed, out of memory error
	ha-entity-anomaly-off-sent	8	Total anomaly off HA messages sent
	mon-entity-rrd-file-create-err	8	Total monitor entity rrd file create error
	mon-entity-limit-exceed	8	Total monitor entity limit exceed failures
	lw-mon-entity-deleted	8	Total Light-weight entities deleted
	lw-out-of-memory-alloc-failures	8	Light Weight Out-of-memory allocation failures
	ha-entity-anomaly-on-sent	8	Total anomaly on HA messages sent

2.115.2 visibility anomaly-detection

Anomaly detection parameters

anomaly-detection Specification

Type	*Configuration Resource*
Element Name	anomaly-detection
Element URI	/axapi/v3/visibility/anomaly-detection

agent-v6-addr

Description Configure agent's IPv6 address

Type: string

Format: ipv6-address

sampling-enable

Type: List

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

sampling-enable

Specification	
Type	*list*
Block object keys	

counters1

Description 'all': all; 'sflow-packets-received': sFlow Packets Received; 'sflow-samples-received': sFlow Samples Received; 'sflow-samples-bad-len': sFlow Samples Bad Length; 'sflow-samples-non-std': sFlow Samples Non-standard; 'sflow-samples-skipped': sFlow Samples Skipped; 'sflow-sample-record-bad-len': sFlow Sample Records Bad Length; 'sflow-samples-sent-for-detection': sFlow Samples Processed For Detection; 'sflow-sample-record-invalid-layer2': sFlow Sample Records Unknown Layer-2; 'sflow-sample-ipv6-hdr-parse-fail': sFlow Sample IPv6 Record Header Parse Failures; 'sflow-disabled': sFlow Packet Samples Processing Disabled; 'netflow-disabled': Netflow Flow Samples Processing Disabled; 'netflow-v5-packets-received': Netflow v5 Packets Received; 'netflow-v5-samples-received': Netflow v5 Samples Received; 'netflow-v5-samples-sent-for-detection': Netflow v5 Samples Processed For Detection; 'netflow-v5-sample-records-bad-len': Netflow v5 Sample Records Bad Length; 'netflow-v5-max-records-exceed': Netflow v5 Sample Max Records Error; 'netflow-v9-packets-received': Netflow v9 Packets Received; 'netflow-v9-samples-received': Netflow v9 Samples Received; 'netflow-v9-samples-sent-for-detection': Netflow v9 Samples Processed For Detection; 'netflow-v9-sample-records-bad-len': Netflow v9 Sample Records Bad Length; 'netflow-v9-max-records-exceed': Netflow v9 Sample Max Records Error; 'netflow-v10-packets-received': Netflow v10 Packets Received; 'netflow-v10-samples-received': Netflow v10 Samples Received; 'netflow-v10-samples-sent-for-detection': Netflow v10 Samples Procssed For Detection; 'netflow-v10-sample-records-bad-len': Netflow v10 Sample Records Bad Length; 'netflow-v10-max-records-exceed': Netflow v10 Sample Max records Error; 'netflow-tcp-sample-received': Netflow TCP Samples Received; 'netflow-udp-sample-received': Netflow UDP Samples received; 'netflow-icmp-sample-received': Netflow ICMP Samples Received; 'netflow-other-sample-received': Netflow OTHER Samples Received; 'netflow-record-copy-oom-error': Netflow Data Record Copy Fail OOM; 'netflow-record-rse-invalid': Netflow Data Record Reduced Size Invalid; 'netflow-sample-flow-dur-error': Netflow Sample Flow Duration Error;

Type: string

Supported Values: all, sflow-packets-received, sflow-samples-received, sflow-samples-bad-len, sflow-samples-non-std, sflow-samples-skipped, sflow-sample-record-bad-len, sflow-samples-sent-for-detection, sflow-sample-record-invalid-layer2, sflow-sample-ipv6-hdr-parse-fail, sflow-disabled, netflow-disabled, netflow-v5-packets-received, netflow-v5-samples-received, netflow-v5-samples-sent-for-detection, netflow-v5-sample-records-bad-len, netflow-v5-max-records-exceed, netflow-v9-packets-received, netflow-v9-samples-received, netflow-v9-samples-sent-for-detection, netflow-v9-sample-records-bad-len, netflow-v9-max-records-exceed, netflow-v10-packets-received, netflow-v10-samples-received, netflow-v10-samples-sent-for-detection, netflow-v10-sample-records-bad-len, netflow-v10-max-records-exceed, netflow-tcp-sample-received, netflow-udp-sample-received, netflow-icmp-sample-received, netflow-other-sample-received, netflow-record-copy-oom-error, netflow-record-rse-invalid, netflow-sample-flow-dur-error

stats data

	Counter	Size	Description
	netflow-v10-packets-received	8	Netflow v10 Packets Received
	netflow-v9-sample-records-bad-len	8	Netflow v9 Sample Records Bad Length
	sflow-disabled	8	sFlow Packet Samples Processing Disabled
	netflow-v5-max-records-exceed	8	Netflow v5 Sample Max Records Error
	netflow-v5-sample-records-bad-len	8	Netflow v5 Sample Records Bad Length
	netflow-tcp-sample-received	8	Netflow TCP Samples Received
	netflow-v10-samples-received	8	Netflow v10 Samples Received
	netflow-record-rse-invalid	8	Netflow Data Record Reduced Size Invalid
	sflow-samples-skipped	8	sFlow Samples Skipped

2.115.16 visibility monitor debug

Enable store and replay for the entitites

debug Specification

Type	*Collection*
Object Key(s)	*debug-ip-addr, debug-port, debug-protocol*
Collection Name	*debug-list*
Collection URI	/axapi/v3/visibility/monitor/debug
Element Name	debug
Element URI	/axapi/v3/visibility/monitor/debug/{debug-ip-addr}+{debug-port}+{debug-protocol}
Element Attributes	debug_attributes
Schema	`debug schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/monitor/debug

debug attributes

Create List

POST

/axapi/v3/visibility/monitor/debug

debug attributes

Get Object

GET

/axapi/v3/visibility/monitor/debug/{debug-ip-addr}+{debug-port}+{debug-protocol}

debug attributes

Get List

GET

/axapi/v3/visibility/monitor/debug

debug-list

Modify Object

POST

/axapi/v3/visibility/monitor/debug/{debug-ip-addr}+{debug-port}+{debug-protocol}

debug attributes

Replace Object

PUT

/axapi/v3/visibility/monitor/debug/{debug-ip-addr}+{debug-port}+{debug-protocol}

debug attributes

Replace List

PUT

/axapi/v3/visibility/monitor/debug

debug-list

Delete Object

DELETE

/axapi/v3/visibility/monitor/debug/{debug-ip-addr}+{debug-port}+{debug-protocol}

debug attributes

debug-list

debug-list is **JSON List** of *debug attributes*

debug-list : [

{ *debug attributes* },

{ *debug attributes* },

...

]

debug attributes

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.115.17 visibility monitor netflow

Configure Netflow parameters for flow based monitoring

netflow Specification

Type	*Configuration Resource*
Element Name	netflow
Element URI	/axapi/v3/visibility/monitor/netflow
Element Attributes	netflow_attributes
Schema	`netflow schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/monitor/netflow

netflow attributes

Get Object

GET

/axapi/v3/visibility/monitor/netflow

netflow attributes

Modify Object

POST

/axapi/v3/visibility/monitor/netflow

netflow attributes

Replace Object

PUT

/axapi/v3/visibility/monitor/netflow

netflow attributes

Delete Object

DELETE

/axapi/v3/visibility/monitor/netflow

netflow attributes

netflow attributes

listening-port

Description Netflow port to receive packets (Netflow port number(default 9996))

Type: number

Range: 1-65535

Default: 9996

template-active-timeout

Description Configure active timeout of the netflow templates received in mins (Template active timeout(mins)(default 30mins))

Type: number

Range: 2-300

Default: 30

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.115.18 visibility monitor secondary-monitor

Configure secondary monitoring key

secondary-monitor Specification

Type	*Configuration Resource*
Element Name	secondary-monitor
Element URI	/axapi/v3/visibility/monitor/secondary-monitor
Element Attributes	secondary-monitor_attributes
Schema	`secondary-monitor schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/monitor/secondary-monitor

secondary-monitor attributes

Get Object

GET

/axapi/v3/visibility/monitor/secondary-monitor

secondary-monitor attributes

Modify Object

POST

/axapi/v3/visibility/monitor/secondary-monitor

secondary-monitor attributes

Replace Object

PUT

/axapi/v3/visibility/monitor/secondary-monitor

secondary-monitor attributes

Delete Object

DELETE

/axapi/v3/visibility/monitor/secondary-monitor

secondary-monitor attributes

secondary-monitor attributes

debug-list

Type: List

Refernce Object: */axapi/v3/visibility/monitor/secondary-monitor/debug/{debug-ip-addr}+{debug-port}+{debug-protocol}*

delete-debug-file

Description: delete-debug-file is a **JSON Block**. Please see below for *delete-debug-file*

Type: Object

Refernce Object: */axapi/v3/visibility/monitor/secondary-monitor/delete-debug-file/{debug-ip-addr}*

mon-entity-topk

Description Enable topk for secondary entities

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

replay-debug-file

Description: replay-debug-file is a **JSON Block**. Please see below for *replay-debug-file*

Type: Object

Refernce Object: */axapi/v3/visibility/monitor/secondary-monitor/replay-debug-file/{debug-ip-addr}*

secondary-monitoring-key

Description 'service': Monitor traffic to any service;

Type: string

Supported Values: service

source-entity-topk

Description Enable topk for sources to secondary-entities

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

debug-list

Specification	
Type	*list*
Block object keys	

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

delete-debug-file

Specification	
Type	*object*

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

replay-debug-file

Specification	
Type	*object*

debug-ip-addr

Description Specify source/dest ip addr

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

debug-port

Description Specify port

Type: number

Range: 1-65535

debug-protocol

Description 'TCP': TCP; 'UDP': UDP; 'ICMP': ICMP;

Type: string

Supported Values: TCP, UDP, ICMP

2.115.19 visibility monitor secondary-monitor debug

Enable store and replay for the entitites

object-templates_dns_vport-tmpl-list_trigger-stats-inc

Specification	
Type	*object*

dns_filter_class_any_drop

Description Enable automatic packet-capture for counters DNS Filter Class ANY Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_chaos_drop

Description Enable automatic packet-capture for counters DNS Filter Class CHAOS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_hesiod_drop

Description Enable automatic packet-capture for counters DNS Filter Class HESIOD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_internet_drop

Description Enable automatic packet-capture for counters DNS Filter Class INTERNET Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_none_drop

Description Enable automatic packet-capture for counters DNS Filter Class NONE Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_class_others_drop

Description Enable automatic packet-capture for counters DNS Filter Class OTHER Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_a_drop

Description Enable automatic packet-capture for counters DNS Filter Type A Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_aaaa_drop

Description Enable automatic packet-capture for counters DNS Filter Type AAAA Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_any_drop

Description Enable automatic packet-capture for counters DNS Filter Type Any Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_cname_drop

Description Enable automatic packet-capture for counters DNS Filter Type CNAME Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_mx_drop

Description Enable automatic packet-capture for counters DNS Filter Type MX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_ns_drop

Description Enable automatic packet-capture for counters DNS Filter Type NS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_others_drop

Description Enable automatic packet-capture for counters DNS Filter Type OTHERS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_ptr_drop

Description Enable automatic packet-capture for counters DNS Filter Type PTR Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_soa_drop

Description Enable automatic packet-capture for counters DNS Filter Type SOA Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_srv_drop

Description Enable automatic packet-capture for counters DNS Filter Type SRV Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_filter_type_txt_drop

Description Enable automatic packet-capture for counters DNS Filter Type TXT Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns_rpz_action_drop

Description Enable automatic packet-capture for DNS RPZ Action Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dnsrrl_total_dropped

Description Enable automatic packet-capture for dns rrl drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gslb_query_bad

Description Enable automatic packet-capture for gslb query bad

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gslb_response_bad

Description Enable automatic packet-capture for gslb response bad

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_dns_filter_class_drop

Description Enable automatic packet-capture for counters Total DNS Filter Class Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_dns_filter_type_drop

Description Enable automatic packet-capture for counters Total DNS Filter Type Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_filter_drop

Description Enable automatic packet-capture for query filter drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

total_max_query_len_drop

Description Enable automatic packet-capture for query too long drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

object-templates_slb-tmpl-cache-tmpl-list_trigger-stats-inc

Specification	
Type	*object*

header_save_error

Description Enable automatic packet-capture for header_save_error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nc_req_header

Description Enable automatic packet-capture for nc_req_header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nc_res_header

Description Enable automatic packet-capture for nc_res_header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

object-templates_slb-tmpl-cache-tmpl-list_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

header_save_error

Description Enable automatic packet-capture for header_save_error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nc_req_header

Description Enable automatic packet-capture for nc_req_header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nc_res_header

Description Enable automatic packet-capture for nc_res_header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

object-templates_tmpl-gtp-plcy-tmpl-list

Specification	
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Packet Capture Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *object-templates_tmpl-gtp-plcy-tmpl-list_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/object-templates/tmpl-gtp-plcy-tmpl/{name}/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *object-templates_tmpl-gtp-plcy-tmpl-list_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/object-templates/tmpl-gtp-plcy-tmpl/{name}/trigger-stats-rate*

trigger-stats-severity

Description: trigger-stats-severity is a **JSON Block**. Please see below for *object-templates_tmpl-gtp-plcy-tmpl-list_trigger-stats-severity*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/object-templates/tmpl-gtp-plcy-tmpl/{name}/trigger-stats-severity*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

object-templates_tmpl-gtp-plcy-tmpl-list_trigger-stats-severity

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

object-templates_tmpl-gtp-plcy-tmpl-list_trigger-stats-inc

Specification	
Type	*object*

drop-flt-apn-filtering

Description Enable automatic packet-capture for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Enable automatic packet-capture for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Enable automatic packet-capture for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Enable automatic packet-capture for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Enable automatic packet-capture for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv0-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv1-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Create PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Update PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv2-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Create Session Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Modify Bearer Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Enable automatic packet-capture for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Enable automatic packet-capture for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv0-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-message-length-mismat

Description Enable automatic packet-capture for GTPv0-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv1-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-message-length-mismat

Description Enable automatic packet-capture for GTPv1-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv2-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-message-length-mismat

Description Enable automatic packet-capture for GTPv2-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV0-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV1-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV2-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v0-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv0-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v1-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv1-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v2-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Create Session Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

object-templates_tmpl-gtp-plcy-tmpl-list_trigger-stats-rate

Specification	
Type	*object*

drop-flt-apn-filtering

Description Enable automatic packet-capture for Filtering Drop: APN IMSI Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-gtp-in-gtp

Description Enable automatic packet-capture for Filtering Drop: GTP in GTP Tunnel Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-message-filtering

Description Enable automatic packet-capture for Filtering Drop: Message Type Not Permitted on Interface

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-msisdn-filtering

Description Enable automatic packet-capture for Filtering Drop: MSISDN Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-flt-rat-type-filtering

Description Enable automatic packet-capture for Filtering Drop: RAT Type Filtering

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-downlink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Downlink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-max-concurrent-tunnels

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Concurrent Tunnels

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-total-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Total packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-tunnel-create

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Tunnel Creation rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-byte

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink byte rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-u-uplink-packet

Description Enable automatic packet-capture for Rate-limit Drop: GTP-U Uplink packet rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v0-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv0-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv1-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-create-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Create PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v1-c-update-pdp-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv1-C Update PDP Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-agg

Description Enable automatic packet-capture for Rate-limit Drop: Maximum GTPv2-C Message rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-create-session-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Create Session Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-rl-gtp-v2-c-modify-bearer-request

Description Enable automatic packet-capture for Rate-limit Drop: GTPv2-C Modify Bearer Request rate

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-country-code-mismatch

Description Enable automatic packet-capture for Validation Drop: Country Code Mismatch in IMSI and MSISDN

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-cross-layer-correlation

Description Enable automatic packet-capture for Validation Drop: Cross Layer IP Address Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-bearer-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP Bearer count exceeded max (11)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-c-handover-in-progress

Description Enable automatic packet-capture for Validation Drop: GTP-C Drop Since Handover In Progress

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-ie-repeat-count-exceed

Description Enable automatic packet-capture for Validation Drop: GTP repeated IE count exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-apn-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid APN Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-invalid-imsi-len-drop

Description Enable automatic packet-capture for Validation Drop: GTP-C Invalid IMSI Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-u-spoofed-source-address

Description Enable automatic packet-capture for Validation Drop: GTP-U IP Address Spoofed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv0-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v0-c-message-length-mismat

Description Enable automatic packet-capture for GTPv0-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv1-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v1-c-message-length-mismat

Description Enable automatic packet-capture for GTPv1-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTPv2-C IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-c-message-length-mismat

Description Enable automatic packet-capture for GTPv2-C Message Length Mismatch Across Layers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-v2-wrong-lbi-create-bearer

Description Enable automatic packet-capture for Validation Drop: GTPV2-C Wrong LBI in Create Bearer Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV0-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv0-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV0-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV1-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv1-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV1-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-seqnum-buffer-full

Description Enable automatic packet-capture for Validation Drop: GTPV2-C conn Sequence number Buffer Full

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtpv2-subscriber-attr-miss

Description Enable automatic packet-capture for Validation Drop: GTPV2-c Subscriber Attributes Missing

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-flow-label-v0

Description Enable automatic packet-capture for Validation Drop: Invalid Flow Label in GTPv0-C Header

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-pkt-len-piggyback

Description Enable automatic packet-capture for Validation Drop: Piggyback message invalid packet length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-invalid-teid

Description Enable automatic packet-capture for Validation Drop: Invalid TEID Value

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-ie-in-grouped-ie

Description Enable automatic packet-capture for Validation Drop: Mandatory IE in Grouped IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-mandatory-information-element

Description Enable automatic packet-capture for Validation Drop: Mandatory IE Not Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-message-length

Description Enable automatic packet-capture for Validation Drop: Message Length Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-order-ie

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Message Out of Order IE

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state

Description Enable automatic packet-capture for Validation Drop: Out Of State GTP Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-out-of-state-ie

Description Enable automatic packet-capture for Validation Drop: Unexpected IE Present in Message

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-protocol-flag-unset

Description Enable automatic packet-capture for Validation Drop: Protocol flag in Header Field not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-field-set

Description Enable automatic packet-capture for Validation Drop: Reserved Header Field Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-reserved-information-element

Description Enable automatic packet-capture for Validation Drop: Reserved IE Field Present

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-failed-piggyback

Description Enable automatic packet-capture for Validation Drop: piggyback message anomaly failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v0-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv0-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v1-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv1-C PDU Notification Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sanity-gtp-v2-c-message-with-t

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Create Session Request with TEID

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-sequence-num-correlation

Description Enable automatic packet-capture for Validation Drop: GTP-C Sequence number Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-tunnel-id-flag

Description Enable automatic packet-capture for Validation Drop: Tunnel Header Flag Not Set

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v0-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv0-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v1-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv1-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-v2-reserved-message-drop

Description Enable automatic packet-capture for Validation Drop: GTPv2-C Reserved Message Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-version-not-supported

Description Enable automatic packet-capture for Validation Drop: Invalid GTP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

output_errors

Description Enable automatic packet-capture for Output errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runts

Description Enable automatic packet-capture for Runts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

object-templates_interface-ethernet-tmpl-list_trigger-stats-rate

Specification	
Type	*object*

collisions

Description Enable automatic packet-capture for Collisions

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crc

Description Enable automatic packet-capture for CRC

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

giants_output

Description Enable automatic packet-capture for Output Giants

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

input_errors

Description Enable automatic packet-capture for Input errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

output_errors

Description Enable automatic packet-capture for Output errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runts

Description Enable automatic packet-capture for Runts

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description Set the threshold to the number of times greater than the previous duration to start the capture, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

object-templates_rule-set-tmpl-list

Specification	
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Packet Capture Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *object-templates_rule-set-tmpl-list_trigger-stats-inc*

Specification	
Type	*object*

46-known-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-no-prefix-for-ipv4

Description Enable automatic packet-capture for NAT64 Reverse No Prefix Match for IPv4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-unknown-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-known-drop

Description Enable automatic packet-capture for NAT64 Forward Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-midpoint-hop

Description Enable automatic packet-capture for NAT64 Forward Unknown Source Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-unknown-drop

Description Enable automatic packet-capture for NAT64 Forward Unknown ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMP Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-port-info

Description Enable automatic packet-capture for ICMP Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-session-drop

Description Enable automatic packet-capture for ICMP No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp

Description Enable automatic packet-capture for ICMP to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp-err

Description Enable automatic packet-capture for ICMP to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6-err

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-unknown-type

Description Enable automatic packet-capture for ICMP Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMPv6 Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-port-info

Description Enable automatic packet-capture for ICMPv6 Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-session-drop

Description Enable automatic packet-capture for ICMPv6 No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp-err

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6-err

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-unknown-type

Description Enable automatic packet-capture for ICMPv6 Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

icmp-no-session-drop

Description Enable automatic packet-capture for ICMP No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp

Description Enable automatic packet-capture for ICMP to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp-err

Description Enable automatic packet-capture for ICMP to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6-err

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-unknown-type

Description Enable automatic packet-capture for ICMP Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMPv6 Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-port-info

Description Enable automatic packet-capture for ICMPv6 Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-session-drop

Description Enable automatic packet-capture for ICMPv6 No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp-err

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6-err

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-unknown-type

Description Enable automatic packet-capture for ICMPv6 Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description Enable automatic packet-capture for hardware forward tag mismatch errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-tx-full-drop

Description Enable automatic packet-capture for hardware forward flow tx full drop count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-unalign-count

Description Enable automatic packet-capture for hardware forward flow unalign count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-underflow-count

Description Enable automatic packet-capture for hardware forward flow underflow count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-invalidation-drop

Description Enable automatic packet-capture for hardware forward invalid drop count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-phyport-mismatch-drop

Description Enable automatic packet-capture for hardware forward phyport mismatch count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-protocol-mismatch-drop

Description Enable automatic packet-capture for hardware forward protocol mismatch count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-vlanid-mismatch-drop

Description Enable automatic packet-capture for hardware forward vlanid mismatch count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-vmid-drop

Description Enable automatic packet-capture for hardware forward vmid mismatch count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_slb-mqtt

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *global-templates_template-list_trigger-sys-obj-stats-change_slb-mqtt_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-mqtt/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *global-templates_template-list_trigger-sys-obj-stats-change_slb-mqtt_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-mqtt/trigger-stats-rate*

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_slb-mqtt_trigger-stats-inc

Specification	
Type	*object*

client_id_null

Description Enable automatic packet-capture for Null client id

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn_null

Description Enable automatic packet-capture for Null conn

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

insertion_failed

Description Enable automatic packet-capture for Insertion failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_connect_fail

Description Enable automatic packet-capture for Parse connect failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_publish_fail

Description Enable automatic packet-capture for Parse publish failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_subscribe_fail

Description Enable automatic packet-capture for Parse subscribe failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_unsubscribe_fail

Description Enable automatic packet-capture for Parse unsubscribe failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session_exist

Description Enable automatic packet-capture for Session already exist

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tuple_already_linked

Description Enable automatic packet-capture for tuple-already-linked failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tuple_not_linked

Description Enable automatic packet-capture for tuple-not-linked failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Specification	
Type	*object*

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Specification	
Type	*object*

drop-gtp-bearer-not-found-in-resp

Description Enable automatic packet-capture for GTP Bearer not found in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-frag-or-jumbo-pkt

Description Enable automatic packet-capture for GTP Fragmented or JUMBO packet Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-missing-cond-ie-bearer-ctx

Description Enable automatic packet-capture for Missing conditional IE in bearer context Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTP Echo IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-out-of-state-

Description Enable automatic packet-capture for GTP Echo Out of State Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-c-handover-request-out-of-state-dro

Description Enable automatic packet-capture for GTP-C Handover Request Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-entry-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-smp-create-failure

Description Enable automatic packet-capture for GTP Rate Limit SMP Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-t3-ctr-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Dynamic Counters Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rr-message-drop

Description Enable automatic packet-capture for GTP Message Dropped in RR Mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-tunnel-rate-limit-entry-create-fail

Description Enable automatic packet-capture for GTP Tunnel Level Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-out-of-state-drop

Description Enable automatic packet-capture for GTP-U Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-nsapi-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv1-C NSAPI Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-res

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-fwd-route

Description Enable automatic packet-capture for No Forward Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-rev-route

Description Enable automatic packet-capture for No Reverse Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-session-memory

Description Enable automatic packet-capture for Out of Tunnel Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

so_pkts_l2redirect_dest_mac_zero_drop

Description Enable automatic packet-capture for Destination MAC Address zero Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_interface_not_up

Description Enable automatic packet-capture for L2redirect Intf is not UP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_invalid_redirect_inf

Description Enable automatic packet-capture for Redirect Table Error due to invalid redirect info

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_chassis_dest_mac_er

Description Enable automatic packet-capture for L3 Redirect RX multi-slot Destination MAC Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_non_ipv4_vxla

Description Enable automatic packet-capture for L3 Redirect received non ipv4 VXLAN packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_rx_encap_para

Description Enable automatic packet-capture for L3 Redirect decap Rx encap params error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_vlan_sanity_d

Description Enable automatic packet-capture for L3 Redirect Decap VLAN Sanity Drop during receipt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_error_drop

Description Enable automatic packet-capture for L3 Redirect encap error drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_ipv4_jumbo_fr

Description Enable automatic packet-capture for L3 Redirect ipv4 packet after encap more than max jumbo size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_ipv6_jumbo_fr

Description Enable automatic packet-capture for L3 Redirect tx ipv6 packet after encap more than max jumbo size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_fragmentation_error

Description Enable automatic packet-capture for L3 redirect encap Fragmentation error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_inner_mac_zero_drop

Description Enable automatic packet-capture for L3 Redirect inner mac zero drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_invalid_dev_dir

Description Enable automatic packet-capture for L3 Redirect Invalid Device direction during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_rcvd_in_l2_mode_dro

Description Enable automatic packet-capture for Recevied l3 redirect packets in L2 mode Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_error

Description Enable automatic packet-capture for L3 Redirect Table error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_no_entry_foun

Description Enable automatic packet-capture for L3 redirect Table no redirect entry found error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_too_large_pkts_in_d

Description Enable automatic packet-capture for Received L3 Redirected fragmented packets too large

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_scaleout_not_active_drop

Description Enable automatic packet-capture for Scaleout Not Active Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_release_fail

Description Enable automatic packet-capture for Total SLB NAT release failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_reserve_fail

Description Enable automatic packet-capture for Total SLB NAT reserve failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_traffic_map_not_found_drop

Description Enable automatic packet-capture for Traffic MAP Not Found Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Description Enable automatic packet-capture for Total Kerberos Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-polling-control-error

Description Enable automatic packet-capture for Total Kerberos Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-pw-expiry

Description Enable automatic packet-capture for Total Kerberos password expiry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-request-dropped

Description Enable automatic packet-capture for Total Kerberos Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-response-error

Description Enable automatic packet-capture for Total Kerberos Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-response-timeout

Description Enable automatic packet-capture for Total Kerberos Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-timeout-error

Description Enable automatic packet-capture for Total Kerberos Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-job-start-error

Description Enable automatic packet-capture for Total NTLM Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-polling-control-error

Description Enable automatic packet-capture for Total NTLM Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-prepare-req-failed

Description Enable automatic packet-capture for Total NTLM Prepare Request Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-proto-negotiation-failure

Description Enable automatic packet-capture for Total NTLM Protocol Negotiation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-request-dropped

Description Enable automatic packet-capture for Total NTLM Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-response-error

Description Enable automatic packet-capture for Total NTLM Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-response-timeout

Description Enable automatic packet-capture for Total NTLM Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-session-setup-failed

Description Enable automatic packet-capture for Total NTLM Session Setup Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-timeout-error

Description Enable automatic packet-capture for Total NTLM Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-server-win_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

kerberos-job-start-error

Description Enable automatic packet-capture for Total Kerberos Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-polling-control-error

Description Enable automatic packet-capture for Total Kerberos Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-pw-expiry

Description Enable automatic packet-capture for Total Kerberos password expiry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-request-dropped

Description Enable automatic packet-capture for Total Kerberos Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-response-error

Description Enable automatic packet-capture for Total Kerberos Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-response-timeout

Description Enable automatic packet-capture for Total Kerberos Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-timeout-error

Description Enable automatic packet-capture for Total Kerberos Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-job-start-error

Description Enable automatic packet-capture for Total NTLM Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-polling-control-error

Description Enable automatic packet-capture for Total NTLM Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-prepare-req-failed

Description Enable automatic packet-capture for Total NTLM Prepare Request Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-proto-negotiation-failure

Description Enable automatic packet-capture for Total NTLM Protocol Negotiation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-request-dropped

Description Enable automatic packet-capture for Total NTLM Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-response-error

Description Enable automatic packet-capture for Total NTLM Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-response-timeout

Description Enable automatic packet-capture for Total NTLM Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-session-setup-failed

Description Enable automatic packet-capture for Total NTLM Session Setup Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-timeout-error

Description Enable automatic packet-capture for Total NTLM Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-server-ldap

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-server-ldap_trigger-stats-inc*

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_ip-anomaly-drop_trigger-stats-inc

Specification	
Type	*object*

bad_ip_flg

Description Enable automatic packet-capture for Bad IP Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_frg_offset

Description Enable automatic packet-capture for Bad IP Fragment Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_hdrlen

Description Enable automatic packet-capture for Bad IP Header Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_payload_len

Description Enable automatic packet-capture for Bad IP Payload Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_ip_ttl

Description Enable automatic packet-capture for Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad_tcp_urg_offset

Description Enable automatic packet-capture for TCP Bad Urgent Offset Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

csum

Description Enable automatic packet-capture for Bad IP Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_frg

Description Enable automatic packet-capture for Empty Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

emp_mic_frg

Description Enable automatic packet-capture for Micro Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frg

Description Enable automatic packet-capture for IPv4 Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gre_pptp_err

Description Enable automatic packet-capture for GRE PPTP Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_err

Description Enable automatic packet-capture for IP-over-IP Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_msmtch

Description Enable automatic packet-capture for IP-over-IP Tunnel Mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land

Description Enable automatic packet-capture for Land Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_ip_payload

Description Enable automatic packet-capture for No IP Payload drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nvgre_err

Description Enable automatic packet-capture for GRE Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

opt

Description Enable automatic packet-capture for IPv4 Options Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

over_ip_payload

Description Enable automatic packet-capture for Oversize IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pod

Description Enable automatic packet-capture for ICMP Ping of Death Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_ip_hdr

Description Enable automatic packet-capture for Runt IP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_tcp_udp_hdr

Description Enable automatic packet-capture for Runt TCP/UDP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_csum

Description Enable automatic packet-capture for TCP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_iplen

Description Enable automatic packet-capture for TCP Bad IP Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_frg_hdr

Description Enable automatic packet-capture for TCP Fragmented Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_frg

Description Enable automatic packet-capture for TCP Null Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_scan

Description Enable automatic packet-capture for TCP Null Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_opt_err

Description Enable automatic packet-capture for TCP Option Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_sht_hdr

Description Enable automatic packet-capture for TCP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_fin

Description Enable automatic packet-capture for TCP Syn and Fin Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_frg

Description Enable automatic packet-capture for TCP Syn Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas

Description Enable automatic packet-capture for TCP XMAS Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas_scan

Description Enable automatic packet-capture for TCP XMAS Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_csum

Description Enable automatic packet-capture for UDP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_len

Description Enable automatic packet-capture for UDP Bad Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_kerb_frg

Description Enable automatic packet-capture for UDP Kerberos Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_port_lb

Description Enable automatic packet-capture for UDP Port Loopback Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_srt_hdr

Description Enable automatic packet-capture for UDP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan_err

Description Enable automatic packet-capture for VXLAN Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-lsn-alg-mgcp/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn-alg-mgcp_trigger-stats-inc

Specification	
Type	*object*

parse-error

Description Enable automatic packet-capture for MGCP Message Parse Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn-alg-mgcp_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

parse-error

Description Enable automatic packet-capture for MGCP Message Parse Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn-alg-sip

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn-alg-sip_trigger-stats-inc*

Type	*object*

bad-ip-chksum-drop

Description Enable automatic packet-capture for Total Bad IP csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-flags-drop

Description Enable automatic packet-capture for Total Bad IP Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-frag-offset

Description Enable automatic packet-capture for Total Bad IP frag off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-hdr-len

Description Enable automatic packet-capture for Total Bad IP hdr len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-payload-len

Description Enable automatic packet-capture for Total Bad IP PL len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-ttl-drop

Description Enable automatic packet-capture for Total Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

empty-frag-drop

Description Enable automatic packet-capture for Total Empty frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fcs-drop

Description Enable automatic packet-capture for Total FCS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hrx-drop

Description Enable automatic packet-capture for Total HRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-pod-drop

Description Enable automatic packet-capture for Total ICMP POD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-frag

Description Enable automatic packet-capture for Total IP frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-opt-drop

Description Enable automatic packet-capture for Total IPv4 opt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land-drop

Description Enable automatic packet-capture for Total LAND Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mic-frag-drop

Description Enable automatic packet-capture for Total Micro frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mrx-drop

Description Enable automatic packet-capture for Total MRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ip-payload-drop

Description Enable automatic packet-capture for Total No IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

oversize-ip-payload

Description Enable automatic packet-capture for Total Oversize IP PL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

qdr-drop

Description Enable automatic packet-capture for Total QDR Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-ip-hdr

Description Enable automatic packet-capture for Total Runt IP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-tcpudp-hdr

Description Enable automatic packet-capture for Total Runt TCPUDP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

siz-drop

Description Enable automatic packet-capture for Total Size Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-chksum

Description Enable automatic packet-capture for Total TCP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-ip-len

Description Enable automatic packet-capture for Total TCP Bad IP Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-urg-offet

Description Enable automatic packet-capture for Total TCP bad urg off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-fin-sin

Description Enable automatic packet-capture for Total TCP SYN&FIN Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-frag-hdr

Description Enable automatic packet-capture for Total TCP frag header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-flags

Description Enable automatic packet-capture for Total TCP null flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-scan

Description Enable automatic packet-capture for Total TCP null scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-short-hdr

Description Enable automatic packet-capture for Total TCP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-syn-frag

Description Enable automatic packet-capture for Total TCP SYN frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-flags

Description Enable automatic packet-capture for Total TCP XMAS FLAGS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-scan

Description Enable automatic packet-capture for Total TCP XMAS scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tun-mismatch

Description Enable automatic packet-capture for Total Tun mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-chksum

Description Enable automatic packet-capture for Total UDP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-ip-len

Description Enable automatic packet-capture for Total UDP bad leng Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-kb-frags

Description Enable automatic packet-capture for Total UDP KB frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-port-lb

Description Enable automatic packet-capture for Total UDP port LB Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-short-hdr

Description Enable automatic packet-capture for Total UDP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 5

transport-alloc-failure

Description Enable automatic packet-capture for Transport Alloc Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_slb-switch

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *global-templates_template-list_trigger-sys-obj-stats-change_slb-switch_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-switch/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *global-templates_template-list_trigger-sys-obj-stats-change_slb-switch_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-switch/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_slb-switch_trigger-stats-inc

Specification	
Type	*object*

badpkt_drop

Description Enable automatic packet-capture for Bad Pkt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

incorrect_len_drop

Description Enable automatic packet-capture for Incorrect Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_rx_arp_pkt

Description Enable automatic packet-capture for Invalid ARP PKT Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_sender_mac_arp_drop

Description Enable automatic packet-capture for ARP PKT dropped due to invalid sender MAC

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_defrag_invalid_len

Description Enable automatic packet-capture for IP Invalid Length Frag

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_oversize

Description Enable automatic packet-capture for IP Fragment oversize

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_too_many

Description Enable automatic packet-capture for IP Fragment too many

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_ipip_dropped

Description Enable automatic packet-capture for IP Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overlap

Description Enable automatic packet-capture for IP Fragment Overlap

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overload

Description Enable automatic packet-capture for IP Frag Overload Drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_reasmfails

Description Enable automatic packet-capture for IP Fragment Reasm Fails

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_tcp_dropped

Description Enable automatic packet-capture for IP Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_timeout

Description Enable automatic packet-capture for IP Fragment Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_udp_dropped

Description Enable automatic packet-capture for IP Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4_frag_6rd_drop

Description Enable automatic packet-capture for IPv4 Frag 6RD Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_gre_dropped

Description Enable automatic packet-capture for IPv6 Frag gre Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_ipip_dropped

Description Enable automatic packet-capture for IPv6 Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_tcp_dropped

Description Enable automatic packet-capture for IPv6 Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_udp_dropped

Description Enable automatic packet-capture for IPv6 Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prot_down_drop

Description Enable automatic packet-capture for Prot Down Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ttl_exceeded_drop

Description Enable automatic packet-capture for TTL Exceeded Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown_prot_drop

Description Enable automatic packet-capture for Unknown Prot Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_slb-switch_trigger-stats-rate

Specification	
Type	*object*

badpkt_drop

Description Enable automatic packet-capture for Bad Pkt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

incorrect_len_drop

Description Enable automatic packet-capture for Incorrect Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_rx_arp_pkt

Description Enable automatic packet-capture for Invalid ARP PKT Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_sender_mac_arp_drop

Description Enable automatic packet-capture for ARP PKT dropped due to invalid sender MAC

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_defrag_invalid_len

Description Enable automatic packet-capture for IP Invalid Length Frag

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_oversize

Description Enable automatic packet-capture for IP Fragment oversize

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_too_many

Description Enable automatic packet-capture for IP Fragment too many

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_ipip_dropped

Description Enable automatic packet-capture for IP Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overlap

Description Enable automatic packet-capture for IP Fragment Overlap

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overload

Description Enable automatic packet-capture for IP Frag Overload Drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_reasmfails

Description Enable automatic packet-capture for IP Fragment Reasm Fails

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_tcp_dropped

Description Enable automatic packet-capture for IP Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_timeout

Description Enable automatic packet-capture for IP Fragment Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_udp_dropped

Description Enable automatic packet-capture for IP Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4_frag_6rd_drop

Description Enable automatic packet-capture for IPv4 Frag 6RD Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_gre_dropped

Description Enable automatic packet-capture for IPv6 Frag gre Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_ipip_dropped

Description Enable automatic packet-capture for IPv6 Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_tcp_dropped

Description Enable automatic packet-capture for IPv6 Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_udp_dropped

Description Enable automatic packet-capture for IPv6 Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prot_down_drop

Description Enable automatic packet-capture for Prot Down Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

ttl_exceeded_drop

Description Enable automatic packet-capture for TTL Exceeded Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown_prot_drop

Description Enable automatic packet-capture for Unknown Prot Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn_trigger-stats-inc*

Specification	
Type	*object*

adc_port_allocation_failed

Description Enable automatic packet-capture for ADC Port Allocation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_user_quota_exceeded

Description Enable automatic packet-capture for Data Session User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_failure

Description Enable automatic packet-capture for LSN Fullcone Extension Memory Allocate Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_init_faulure

Description Enable automatic packet-capture for LSN Fullcone Extension Initialization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_alloc_single_port_failure

Description Enable automatic packet-capture for H323 ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_filtered

Description Enable automatic packet-capture for Endpoint-Dependent Filtering Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_port_pair_alloc_from_quota_par

Description Enable automatic packet-capture for MGCP ALG Port Pair Allocated From Quota Partition Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

new_user_resource_unavailable

Description Enable automatic packet-capture for New User NAT Resource Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_class_list_match

Description Enable automatic packet-capture for No Class-List Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_inc_overflow

Description Enable automatic packet-capture for Port Overloading Inc Overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_out_of_memory

Description Enable automatic packet-capture for Port Overloading Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_rtp_rtcp_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc RTP/RTCP NAT Ports Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_single_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_quota_inc_failure

Description Enable automatic packet-capture for SIP ALG User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

standby_class_list_drop

Description Enable automatic packet-capture for HA Standby Class-List drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-lsn_trigger-stats-rate

Specification	
Type	*object*

adc_port_allocation_failed

Description Enable automatic packet-capture for ADC Port Allocation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_user_quota_exceeded

Description Enable automatic packet-capture for Data Session User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_failure

Description Enable automatic packet-capture for LSN Fullcone Extension Memory Allocate Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_init_faulure

Description Enable automatic packet-capture for LSN Fullcone Extension Initialization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_alloc_single_port_failure

Description Enable automatic packet-capture for H323 ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_filtered

Description Enable automatic packet-capture for Endpoint-Dependent Filtering Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_port_pair_alloc_from_quota_par

Description Enable automatic packet-capture for MGCP ALG Port Pair Allocated From Quota Partition Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

new_user_resource_unavailable

Description Enable automatic packet-capture for New User NAT Resource Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_class_list_match

Description Enable automatic packet-capture for No Class-List Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_inc_overflow

Description Enable automatic packet-capture for Port Overloading Inc Overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_out_of_memory

Description Enable automatic packet-capture for Port Overloading Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_rtp_rtcp_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc RTP/RTCP NAT Ports Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_single_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_quota_inc_failure

Description Enable automatic packet-capture for SIP ALG User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

standby_class_list_drop

Description Enable automatic packet-capture for HA Standby Class-List drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-account/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-account_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-account/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-account_trigger-stats-inc

Specification	
Type	*object*

request-dropped

Description Enable automatic packet-capture for Total Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-error

Description Enable automatic packet-capture for Total Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-timeout

Description Enable automatic packet-capture for Total Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-account_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

request-dropped

Description Enable automatic packet-capture for Total Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-error

Description Enable automatic packet-capture for Total Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-timeout

Description Enable automatic packet-capture for Total Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-captcha

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-captcha_trigger-stats-inc*

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_aam-auth-captcha_trigger-stats-inc

Specification	
Type	*object*

attr-fail

Description Enable automatic packet-capture for Total Attribute Check Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

job-start-error

Description Enable automatic packet-capture for Total Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

json-fail

Description Enable automatic packet-capture for Total Failure JSON Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

polling-control-error

Description Enable automatic packet-capture for Total Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-dropped

Description Enable automatic packet-capture for Total Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-error

Description Enable automatic packet-capture for Total Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-timeout

Description Enable automatic packet-capture for Total Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout-error

Description Enable automatic packet-capture for Total Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Default: 0

rx-miss-err

Description Enable automatic packet-capture for Total RX packet miss error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-no-buff-err

Description Enable automatic packet-capture for Total RX packet no buffer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-over-err

Description Enable automatic packet-capture for Total RX packet over error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-short-len-err

Description Enable automatic packet-capture for Total RX packet short length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-abort-err

Description Enable automatic packet-capture for Total TX packet abort error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-carrier-err

Description Enable automatic packet-capture for Total TX packert carrier error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-drop

Description Enable automatic packet-capture for Total TX packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-err

Description Enable automatic packet-capture for Total TX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-fifo-err

Description Enable automatic packet-capture for Total TX packet fifo error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-hbeat-err

Description Enable automatic packet-capture for Total TX packet HBEAT error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-windows-err

Description Enable automatic packet-capture for Total TX windows error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description Enable automatic packet-capture for Total TX packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-err

Description Enable automatic packet-capture for Total TX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-fifo-err

Description Enable automatic packet-capture for Total TX packet fifo error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-hbeat-err

Description Enable automatic packet-capture for Total TX packet HBEAT error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-windows-err

Description Enable automatic packet-capture for Total TX windows error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

w-link-down-drop

Description Enable automatic packet-capture for Total worker core link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-ring-drop

Description Enable automatic packet-capture for Total worker core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-tx-que-drop

Description Enable automatic packet-capture for Total worker core queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_node_alloc_failure

Description Enable automatic packet-capture for Node alloc failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_other_block_alloc_failure

Description Enable automatic packet-capture for Other block alloc failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_port_block_alloc_failure

Description Enable automatic packet-capture for Port block alloc failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_add_to_bgp_failure

Description Enable automatic packet-capture for L3 Entry BGP add failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_add_to_hw_failure

Description Enable automatic packet-capture for L3 entry HW add failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_drop_max_hw_exceeded

Description Enable automatic packet-capture for L3 Entry Drop due to HW Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_match_drop

Description Enable automatic packet-capture for L3 Entry match drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_match_drop_hw

Description Enable automatic packet-capture for L3 HW entry match drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l3_entry_remove_from_bgp_failure

Description Enable automatic packet-capture for L3 entry BGP remove failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4_entry_list_alloc_failure

Description Enable automatic packet-capture for L4 Entry list alloc failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4_entry_match_drop

Description Enable automatic packet-capture for L4 Entry match drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

l4_entry_match_drop_hw

Description Enable automatic packet-capture for L4 HW Entry match drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syn_cookie_verification_failed

Description Enable automatic packet-capture for SYN cookie verification failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_slb-link-probe_trigger-stats-inc

Specification	
Type	*object*

err_entry_create_failed

Description Enable automatic packet-capture for Entry Creation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_entry_create_oom

Description Enable automatic packet-capture for Entry Creation Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_entry_insert_failed

Description Enable automatic packet-capture for Entry Insert Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_l4_sess_alloc

Description Enable automatic packet-capture for Error allocating L4 session for probe

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_probe_tcp_conn_send

Description Enable automatic packet-capture for Error in initiating TCP connection for probe

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_smart_nat_alloc

Description Enable automatic packet-capture for Error creating Smart NAT Instance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_smart_nat_port_alloc

Description Enable automatic packet-capture for Error obtaining Smart NAT source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_tmpl_probe_create_failed

Description Enable automatic packet-capture for Probe Template Creation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_tmpl_probe_create_oom

Description Enable automatic packet-capture for Probe Template Creation Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_slb-link-probe_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

err_entry_create_failed

Description Enable automatic packet-capture for Entry Creation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_entry_create_oom

Description Enable automatic packet-capture for Entry Creation Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_entry_insert_failed

Description Enable automatic packet-capture for Entry Insert Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_l4_sess_alloc

Description Enable automatic packet-capture for Error allocating L4 session for probe

Default: 0

err_smart_nat_alloc

Description Enable automatic packet-capture for Error creating Smart NAT Instance

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_smart_nat_port_alloc

Description Enable automatic packet-capture for Error obtaining Smart NAT source port

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_tmpl_probe_create_failed

Description Enable automatic packet-capture for Probe Template Creation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

err_tmpl_probe_create_oom

Description Enable automatic packet-capture for Probe Template Creation Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-change_cgnv6-l4

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description Enable automatic packet-capture for Cant allocate PING frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_rst_frame

Description Enable automatic packet-capture for Cant allocate RST_STREAM frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_settings_frame

Description Enable automatic packet-capture for Cant allocate SETTINGS frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_stream

Description Enable automatic packet-capture for Cant allocate stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_window_frame

Description Enable automatic packet-capture for Cant allocate WINDOW_UPDATE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_queue_alloc_error

Description Enable automatic packet-capture for Data Queue Alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

global-templates_template-list_trigger-sys-obj-stats-severity

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

capture-config-list

Specification	
Type	*list*
Block object keys	

concurrent-captures

Description Enable and specify maximum concurrent 3 tuple filter based captures in seperate pcaps.

Type: number

Range: 1-5000

Mutual Exclusion: concurrent-captures and concurrent-conn-tag are mutually exclusive

concurrent-captures-age

Description Specify the time in minutes upto which a 3 tuple filter based capture will be kept active(default 1)

Type: number

Range: 1-10

Default: 1

concurrent-conn-per-capture

Description Specify maximum number of concurrent connnections(5 tuple matches) to be captured within in a 3 tuple based capture. (default 1

Type: number

Range: 1-1000

Default: 100

concurrent-conn-tag

Description Enable and specify maximum concurrent connnections(only 5 tuple based) to be captured in common pcaps.

Type: number

Range: 1-1000

Mutual Exclusion: concurrent-conn-tag and concurrent-captures are mutually exclusive

create-pcap-files-now

Description Operational command to force create temporary pcapng files before completion (for global/non 3 tuple based captures)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable packet capture (default enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-auto-merge

Description Disable auto merging per CPU pcapng files(default enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-continuous-global-capture

Description Enable continuous capture of packets for the global capture(non 3 tuple based capture) overriding size limits

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-count

Description Specify the number of continuous pcapng files that can be created for capturing packets (default 10)

Type: number

Range: 1-50

Default: 10

file-size

Description Specify pcapng filesize in MB, Will be distributed per CPU (default 1)

Type: number

Range: 1-300

Default: 1

keep-pcap-files-after-merge

Description Keep original per CPU pcapng files after auto merging pcapng files(default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Specify the name of the capture-config

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

number-of-packets-per-capture

Description Specify Maximum number of packets per global or dynamic capture (default 0 unlimited)

Type: number

Range: 0-1000

Default: 0

number-of-packets-per-conn

Description Specify maximum number of packets to be captured in a 5 tuple based connection (default 0 unlimited).

Type: number

Range: 0-1000

Default: 0

number-of-packets-total

Description Specify Maximum number of packets for all captures (default 0 unlimited)

Type: number

Range: 0-15000

Default: 0

packet-length

Description Packet length in Bytes to capture (Default 128)

Type: number

Range: 64-1518

Default: 128

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

stats data

	Counter	Size	Description
	Concurrent-capture-by-ctr-anomaly-freed	8	Dynamic Capture(ctr anomaly based) freed
	pktcapture-triggered-by-other-feature	8	Capture triggered by Other feature
	num-conns-tagged-increment	8	Conn tag success (based on ctr increment, dynamic)
	Concurrent-capture-create-failed-by-other-feature	8	Error, Dynamic Capture(Other feature based) create failed
	pktcapture-with-no-conn-failure	8	Capture fail, Packets without conn
	num-conns-tagged-global-other-feature	8	Conn tag success (based on Other feature, Global)
	num-global-counters-deregistered	8	Number of global objects deregistered
	num-of-anomalies-cleared	8	Number of times ctr Anomaly cleared
	num-capture-config-unlinked	8	Number of times capture-config unlinked from template
	auto-pcap-file-merged	8	Auto pcapng files merged
	num-dynamic-capture-config-unlinked	8	Number of times dynamic capture-config unlinked from template

slb_port_tmpl_error_code_return_inc

Description Trigger capture when there is 3xx or 4xx or 5xx responses from server

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

slb_port_tmpl_high_error_code_return

Description Trigger capture when there is high number of 3xx or 4xx or 5xx responses from server

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

stats data

capture-config attributes

concurrent-captures

Description Enable and specify maximum concurrent 3 tuple filter based captures in seperate pcaps.

Type: number

Range: 1-5000

Mutual Exclusion: concurrent-captures and concurrent-conn-tag are mutually exclusive

concurrent-captures-age

Description Specify the time in minutes upto which a 3 tuple filter based capture will be kept active(default 1)

Type: number

Range: 1-10

Default: 1

concurrent-conn-per-capture

Description Specify maximum number of concurrent connnections(5 tuple matches) to be captured within in a 3 tuple based capture. (default 1

Type: number

Range: 1-1000

Default: 100

concurrent-conn-tag

Description Enable and specify maximum concurrent connnections(only 5 tuple based) to be captured in common pcaps.

Type: number

Range: 1-1000

Mutual Exclusion: concurrent-conn-tag and concurrent-captures are mutually exclusive

create-pcap-files-now

Description Operational command to force create temporary pcapng files before completion (for global/non 3 tuple based captures)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable

Description Disable packet capture (default enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

disable-auto-merge

Description Disable auto merging per CPU pcapng files(default enabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

enable-continuous-global-capture

Description Enable continuous capture of packets for the global capture(non 3 tuple based capture) overriding size limits

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

file-count

Description Specify the number of continuous pcapng files that can be created for capturing packets (default 10)

Type: number

Range: 1-50

Default: 10

file-size

Description Specify pcapng filesize in MB, Will be distributed per CPU (default 1)

Type: number

Range: 1-300

Default: 1

keep-pcap-files-after-merge

Description Keep original per CPU pcapng files after auto merging pcapng files(default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

name

Description Specify the name of the capture-config

Type: string

Maximum Length: 63 characters

Maximum Length: 1 characters

number-of-packets-per-capture

Description Specify Maximum number of packets per global or dynamic capture (default 0 unlimited)

Type: number

Range: 0-1000

Default: 0

number-of-packets-per-conn

Description Specify maximum number of packets to be captured in a 5 tuple based connection (default 0 unlimited).

Type: number

Range: 0-1000

Default: 0

number-of-packets-total

Description Specify Maximum number of packets for all captures (default 0 unlimited)

Type: number

Range: 0-15000

Default: 0

packet-length

Description Packet length in Bytes to capture (Default 128)

Type: number

Range: 64-1518

Default: 128

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

	skip-capture-as-conn-created-before-smp	8	Skip capturing, conn was created before the capture started
	pktcapture-triggered-by-anomaly	8	Capture triggered by counter anomaly

2.115.37 visibility packet-capture global-templates

Configure global packet capture templates for T1 counters

global-templates Specification

Type	*Configuration Resource*
Element Name	global-templates
Element URI	/axapi/v3/visibility/packet-capture/global-templates
Element Attributes	global-templates_attributes
Schema	`global-templates schema`

Operations Allowed:

Create Object

POST

/axapi/v3/visibility/packet-capture/global-templates

global-templates attributes

Get Object

GET

/axapi/v3/visibility/packet-capture/global-templates

global-templates attributes

Modify Object

POST

/axapi/v3/visibility/packet-capture/global-templates

global-templates attributes

Replace Object

PUT

/axapi/v3/visibility/packet-capture/global-templates

global-templates attributes

Delete Object

DELETE

/axapi/v3/visibility/packet-capture/global-templates

global-templates attributes

global-templates attributes

activate

Description: activate is a **JSON Block**. Please see below for *activate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/activate*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

template-list

Type: List

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

activate

Specification	
Type	*object*

template

Description Name of the global templated to be activated

Type: string

Maximum Length: 128 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list

Specification	
Type	*list*
Block object keys	

capture-config

Description Specify name of the capture-config to use with this template

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

Refernce Object: */axapi/v3/visibility/packet-capture/capture-config*

name

Description Template Name

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change

Description: trigger-sys-obj-stats-change is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change*

trigger-sys-obj-stats-severity

Description: trigger-sys-obj-stats-severity is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-severity*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-severity*

user-tag

Description Customized tag

Type: string

Format: string-rlx

Maximum Length: 127 characters

Maximum Length: 1 characters

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change

Specification	
Type	*object*

aam-auth-account

Description: aam-auth-account is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-auth-account*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-account*

aam-auth-captcha

Description: aam-auth-captcha is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-auth-captcha*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-captcha*

aam-auth-relay-kerberos

Description: aam-auth-relay-kerberos is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-auth-relay-kerberos*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-relay-kerberos*

aam-auth-saml-global

Description: aam-auth-saml-global is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-auth-saml-global*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-saml-global*

aam-auth-server-ldap

Description: aam-auth-server-ldap is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-auth-server-ldap*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-ldap*

aam-auth-server-ocsp

Description: aam-auth-server-ocsp is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-auth-server-ocsp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-ocsp*

aam-auth-server-radius

Description: aam-auth-server-radius is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-auth-server-radius*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-radius*

aam-auth-server-win

Description: aam-auth-server-win is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-auth-server-win*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-win*

aam-authentication-global

Description: aam-authentication-global is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-authentication-global*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-authentication-global*

cgnv6-ddos-proc

Description: cgnv6-ddos-proc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-ddos-proc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-ddos-proc*

cgnv6-dhcpv6

Description: cgnv6-dhcpv6 is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-dhcpv6*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-dhcpv6*

cgnv6-dns64

Description: cgnv6-dns64 is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-dns64*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-dns64*

cgnv6-ds-lite-global

Description: cgnv6-ds-lite-global is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-ds-lite-global*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-ds-lite-global*

cgnv6-http-alg

Description: cgnv6-http-alg is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-http-alg*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-http-alg*

cgnv6-icmp

Description: cgnv6-icmp is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-icmp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-icmp*

cgnv6-l4

Description: cgnv6-l4 is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-l4*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-l4*

cgnv6-logging

Description: cgnv6-logging is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-logging*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-logging*

cgnv6-lsn

Description: cgnv6-lsn is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-lsn*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-lsn*

cgnv6-lsn-alg-h323

Description: cgnv6-lsn-alg-h323 is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-lsn-alg-h323*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-lsn-alg-h323*

cgnv6-lsn-alg-mgcp

Description: cgnv6-lsn-alg-mgcp is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-lsn-alg-mgcp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-lsn-alg-mgcp*

cgnv6-lsn-alg-sip

Description: cgnv6-lsn-alg-sip is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-lsn-alg-sip*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-lsn-alg-sip*

cgnv6-lsn-radius

Description: cgnv6-lsn-radius is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-lsn-radius*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-lsn-radius*

cgnv6-nat64-global

Description: cgnv6-nat64-global is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-nat64-global*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-nat64-global*

cgnv6-pcp

Description: cgnv6-pcp is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-pcp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-pcp*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fw-alg-rtsp

Description: fw-alg-rtsp is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-alg-rtsp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-alg-rtsp*

fw-ddos-protection

Description: fw-ddos-protection is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-ddos-protection*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-ddos-protection*

fw-global

Description: fw-global is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-global*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-global*

fw-gtp

Description: fw-gtp is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-gtp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-gtp*

fw-logging

Description: fw-logging is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-logging*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-logging*

fw-logging-gtp

Description: fw-logging-gtp is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-logging-gtp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-logging-gtp*

fw-rad-server

Description: fw-rad-server is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-rad-server*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-rad-server*

fw-tcp-syn-cookie

Description: fw-tcp-syn-cookie is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-tcp-syn-cookie*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-tcp-syn-cookie*

ip-anomaly-drop

Description: ip-anomaly-drop is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_ip-anomaly-drop*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/ip-anomaly-drop*

logging-local-log-global

Description: logging-local-log-global is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_logging-local-log-global*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/logging-local-log-global*

slb-crl-srcip

Description: slb-crl-srcip is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-crl-srcip*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-crl-srcip*

slb-fix

Description: slb-fix is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-fix*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-fix*

slb-ftp-proxy

Description: slb-ftp-proxy is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-ftp-proxy*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ftp-proxy*

slb-generic

Description: slb-generic is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-generic*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-generic*

slb-http2

Description: slb-http2 is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-http2*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-http2*

slb-hw-compress

Description: slb-hw-compress is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-hw-compress*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-hw-compress*

slb-icap

Description: slb-icap is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-icap*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-icap*

slb-imap-proxy

Description: slb-imap-proxy is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-imap-proxy*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-imap-proxy*

slb-l4

Description: slb-l4 is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-l4*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-l4*

slb-link-probe

Description: slb-link-probe is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-link-probe*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-link-probe*

slb-mqtt

Description: slb-mqtt is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-mqtt*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-mqtt*

slb-mssql

Description: slb-mssql is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-mssql*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-mssql*

slb-pop3-proxy

Description: slb-pop3-proxy is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-pop3-proxy*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-pop3-proxy*

slb-rc-cache

Description: slb-rc-cache is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-rc-cache*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-rc-cache*

slb-smtp

Description: slb-smtp is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-smtp*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-smtp*

slb-spdy-proxy

Description: slb-spdy-proxy is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-spdy-proxy*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-spdy-proxy*

slb-ssl-cert-revoke

Description: slb-ssl-cert-revoke is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-ssl-cert-revoke*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-cert-revoke*

slb-ssl-forward-proxy

Description: slb-ssl-forward-proxy is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-ssl-forward-proxy*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-ssl-forward-proxy*

slb-switch

Description: slb-switch is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-switch*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-switch*

so-counters

Description: so-counters is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_so-counters*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/so-counters*

system-dpdk-stats

Description: system-dpdk-stats is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_system-dpdk-stats*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/system-dpdk-stats*

system-fpga-drop

Description: system-fpga-drop is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_system-fpga-drop*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/system-fpga-drop*

system-hardware-forward

Description: system-hardware-forward is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_system-hardware-forward*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/system-hardware-forward*

system-radius-server

Description: system-radius-server is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_system-radius-server*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/system-radius-server*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_cgnv6-icmp

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-icmp_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-icmp/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-icmp_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/cgnv6-icmp/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_cgnv6-icmp_trigger-stats-inc

Specification	
Type	*object*

46-known-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-no-prefix-for-ipv4

Description Enable automatic packet-capture for NAT64 Reverse No Prefix Match for IPv4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-unknown-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-known-drop

Description Enable automatic packet-capture for NAT64 Forward Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-midpoint-hop

Description Enable automatic packet-capture for NAT64 Forward Unknown Source Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-unknown-drop

Description Enable automatic packet-capture for NAT64 Forward Unknown ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMP Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-port-info

Description Enable automatic packet-capture for ICMP Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-session-drop

Description Enable automatic packet-capture for ICMP No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp

Description Enable automatic packet-capture for ICMP to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp-err

Description Enable automatic packet-capture for ICMP to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6-err

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-unknown-type

Description Enable automatic packet-capture for ICMP Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMPv6 Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-port-info

Description Enable automatic packet-capture for ICMPv6 Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-session-drop

Description Enable automatic packet-capture for ICMPv6 No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp-err

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6-err

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-unknown-type

Description Enable automatic packet-capture for ICMPv6 Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_cgnv6-icmp_trigger-stats-rate

Specification	
Type	*object*

46-known-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-no-prefix-for-ipv4

Description Enable automatic packet-capture for NAT64 Reverse No Prefix Match for IPv4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-unknown-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-known-drop

Description Enable automatic packet-capture for NAT64 Forward Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-midpoint-hop

Description Enable automatic packet-capture for NAT64 Forward Unknown Source Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-unknown-drop

Description Enable automatic packet-capture for NAT64 Forward Unknown ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

icmp-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMP Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-port-info

Description Enable automatic packet-capture for ICMP Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-session-drop

Description Enable automatic packet-capture for ICMP No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp

Description Enable automatic packet-capture for ICMP to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp-err

Description Enable automatic packet-capture for ICMP to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6-err

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-unknown-type

Description Enable automatic packet-capture for ICMP Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMPv6 Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-port-info

Description Enable automatic packet-capture for ICMPv6 Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-session-drop

Description Enable automatic packet-capture for ICMPv6 No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp-err

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6-err

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-unknown-type

Description Enable automatic packet-capture for ICMPv6 Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_cgnv6-pcp

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_cgnv6-pcp_trigger-stats-inc*

Specification	
Type	*object*

l4-process-error

Description Enable automatic packet-capture for L3/L4 Process Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

noroute-drop

Description Enable automatic packet-capture for Response No Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-not-request-drop

Description Enable automatic packet-capture for Packet Not a PCP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-too-short-drop

Description Enable automatic packet-capture for Packet Too Short

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsol_ance_sent_fail

Description Enable automatic packet-capture for Unsolicited Announce Send Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unsupported-version

Description Enable automatic packet-capture for Unsupported PCP version

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-pop3-proxy

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-pop3-proxy_trigger-stats-inc*

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-pop3-proxy_trigger-stats-inc

Specification	
Type	*object*

insert_tuple_fail

Description Enable automatic packet-capture for Serv Sel insert tuple fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for no route failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rsv_persist_conn_fail

Description Enable automatic packet-capture for Serv Sel Persist fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v4_fail

Description Enable automatic packet-capture for Serv Sel SMPv4 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

smp_v6_fail

Description Enable automatic packet-capture for Serv Sel SMPv6 fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for source nat failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

svrsel_fail

Description Enable automatic packet-capture for Server selection failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-pop3-proxy_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

insert_tuple_fail

Description Enable automatic packet-capture for Serv Sel insert tuple fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_route

Description Enable automatic packet-capture for no route failure

drop-gtp-bearer-not-found-in-resp

Description Enable automatic packet-capture for GTP Bearer not found in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-frag-or-jumbo-pkt

Description Enable automatic packet-capture for GTP Fragmented or JUMBO packet Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-missing-cond-ie-bearer-ctx

Description Enable automatic packet-capture for Missing conditional IE in bearer context Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTP Echo IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-out-of-state-

Description Enable automatic packet-capture for GTP Echo Out of State Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-c-handover-request-out-of-state-dro

Description Enable automatic packet-capture for GTP-C Handover Request Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-entry-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-smp-create-failure

Description Enable automatic packet-capture for GTP Rate Limit SMP Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-t3-ctr-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Dynamic Counters Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rr-message-drop

Description Enable automatic packet-capture for GTP Message Dropped in RR Mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-tunnel-rate-limit-entry-create-fail

Description Enable automatic packet-capture for GTP Tunnel Level Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-out-of-state-drop

Description Enable automatic packet-capture for GTP-U Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-nsapi-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv1-C NSAPI Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-res

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-fwd-route

Description Enable automatic packet-capture for No Forward Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-rev-route

Description Enable automatic packet-capture for No Reverse Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-session-memory

Description Enable automatic packet-capture for Out of Tunnel Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Specification	
Type	*object*

so_pkts_dest_mac_mistmatch_drop

Description Enable automatic packet-capture for Destination MAC Mistmatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_dropped

Description Enable automatic packet-capture for Total packets dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_dest_mac_zero_drop

Description Enable automatic packet-capture for Destination MAC Address zero Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_interface_not_up

Description Enable automatic packet-capture for L2redirect Intf is not UP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_invalid_redirect_inf

Description Enable automatic packet-capture for Redirect Table Error due to invalid redirect info

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_chassis_dest_mac_er

Description Enable automatic packet-capture for L3 Redirect RX multi-slot Destination MAC Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_non_ipv4_vxla

Description Enable automatic packet-capture for L3 Redirect received non ipv4 VXLAN packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_rx_encap_para

Description Enable automatic packet-capture for L3 Redirect decap Rx encap params error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_vlan_sanity_d

Description Enable automatic packet-capture for L3 Redirect Decap VLAN Sanity Drop during receipt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_error_drop

Description Enable automatic packet-capture for L3 Redirect encap error drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_ipv4_jumbo_fr

Description Enable automatic packet-capture for L3 Redirect ipv4 packet after encap more than max jumbo size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_ipv6_jumbo_fr

Description Enable automatic packet-capture for L3 Redirect tx ipv6 packet after encap more than max jumbo size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_fragmentation_error

Description Enable automatic packet-capture for L3 redirect encap Fragmentation error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_inner_mac_zero_drop

Description Enable automatic packet-capture for L3 Redirect inner mac zero drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_invalid_dev_dir

Description Enable automatic packet-capture for L3 Redirect Invalid Device direction during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_rcvd_in_l2_mode_dro

Description Enable automatic packet-capture for Recevied l3 redirect packets in L2 mode Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_error

Description Enable automatic packet-capture for L3 Redirect Table error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_no_entry_foun

Description Enable automatic packet-capture for L3 redirect Table no redirect entry found error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_too_large_pkts_in_d

Description Enable automatic packet-capture for Received L3 Redirected fragmented packets too large

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_scaleout_not_active_drop

Description Enable automatic packet-capture for Scaleout Not Active Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_release_fail

Description Enable automatic packet-capture for Total SLB NAT release failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_reserve_fail

Description Enable automatic packet-capture for Total SLB NAT reserve failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_traffic_map_not_found_drop

Description Enable automatic packet-capture for Traffic MAP Not Found Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ddos_entry_remove_from_bgp_failure

Description Enable automatic packet-capture for DDOS entry BGP remove failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ddos_packet_dropped

Description Enable automatic packet-capture for DDOS Packet Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_fw-tcp-syn-cookie

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-tcp-syn-cookie_trigger-stats-inc*

emp_mic_frg

Description Enable automatic packet-capture for Micro Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

frg

Description Enable automatic packet-capture for IPv4 Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gre_pptp_err

Description Enable automatic packet-capture for GRE PPTP Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_err

Description Enable automatic packet-capture for IP-over-IP Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipip_tnl_msmtch

Description Enable automatic packet-capture for IP-over-IP Tunnel Mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land

Description Enable automatic packet-capture for Land Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_ip_payload

Description Enable automatic packet-capture for No IP Payload drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nvgre_err

Description Enable automatic packet-capture for GRE Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

opt

Description Enable automatic packet-capture for IPv4 Options Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

over_ip_payload

Description Enable automatic packet-capture for Oversize IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pod

Description Enable automatic packet-capture for ICMP Ping of Death Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_ip_hdr

Description Enable automatic packet-capture for Runt IP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt_tcp_udp_hdr

Description Enable automatic packet-capture for Runt TCP/UDP Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_csum

Description Enable automatic packet-capture for TCP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_bad_iplen

Description Enable automatic packet-capture for TCP Bad IP Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_frg_hdr

Description Enable automatic packet-capture for TCP Fragmented Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_frg

Description Enable automatic packet-capture for TCP Null Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_null_scan

Description Enable automatic packet-capture for TCP Null Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_opt_err

Description Enable automatic packet-capture for TCP Option Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_sht_hdr

Description Enable automatic packet-capture for TCP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_fin

Description Enable automatic packet-capture for TCP Syn and Fin Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_syn_frg

Description Enable automatic packet-capture for TCP Syn Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas

Description Enable automatic packet-capture for TCP XMAS Flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_xmas_scan

Description Enable automatic packet-capture for TCP XMAS Scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_csum

Description Enable automatic packet-capture for UDP Bad Checksum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_bad_len

Description Enable automatic packet-capture for UDP Bad Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_kerb_frg

Description Enable automatic packet-capture for UDP Kerberos Fragment Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_port_lb

Description Enable automatic packet-capture for UDP Port Loopback Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_srt_hdr

Description Enable automatic packet-capture for UDP Short Header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

vxlan_err

Description Enable automatic packet-capture for VXLAN Tunnel Error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Specification	
Type	*object*

header-insertion-failed

Description Enable automatic packet-capture for Buff Insertion Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-removal-failed

Description Enable automatic packet-capture for Buff Removal Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-memory-dropped

Description Enable automatic packet-capture for Out-of-Memory Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-dropped

Description Enable automatic packet-capture for Packet Out-of-Order Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

queue-len-exceed-dropped

Description Enable automatic packet-capture for Queue Length Exceed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-requst-dropped

Description Enable automatic packet-capture for Query Request Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-response-dropped

Description Enable automatic packet-capture for Query Response Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_cgnv6-http-alg_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

header-insertion-failed

Description Enable automatic packet-capture for Buff Insertion Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

header-removal-failed

Description Enable automatic packet-capture for Buff Removal Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-memory-dropped

Description Enable automatic packet-capture for Out-of-Memory Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-order-dropped

Description Enable automatic packet-capture for Packet Out-of-Order Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

queue-len-exceed-dropped

Description Enable automatic packet-capture for Queue Length Exceed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-requst-dropped

Description Enable automatic packet-capture for Query Request Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-response-dropped

Description Enable automatic packet-capture for Query Response Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_fw-rad-server

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_fw-rad-server_trigger-stats-inc*

Type	*object*

ha-standby-dropped

Description Enable automatic packet-capture for HA Standby Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid-key

Description Enable automatic packet-capture for Radius Request has Invalid Key Field

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-prefix-length-mismatch

Description Enable automatic packet-capture for Framed IPV6 Prefix Length Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-request-dropped

Description Enable automatic packet-capture for RADIUS Request Dropped (Malformed Packet)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-table-full

Description Enable automatic packet-capture for RADIUS Request Dropped (Table Full)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-bad-secret-dropped

Description Enable automatic packet-capture for RADIUS Request Bad Secret Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-malformed-dropped

Description Enable automatic packet-capture for RADIUS Request Malformed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-no-key-vap-dropped

Description Enable automatic packet-capture for RADIUS Request No Key Attribute Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-not-configured-dropped

Description Enable automatic packet-capture for RADIUS Secret Not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Description Enable automatic packet-capture for Total Bad IP PL len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bad-ip-ttl-drop

Description Enable automatic packet-capture for Total Bad IP TTL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

empty-frag-drop

Description Enable automatic packet-capture for Total Empty frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fcs-drop

Description Enable automatic packet-capture for Total FCS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hrx-drop

Description Enable automatic packet-capture for Total HRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-pod-drop

Description Enable automatic packet-capture for Total ICMP POD Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-frag

Description Enable automatic packet-capture for Total IP frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4-opt-drop

Description Enable automatic packet-capture for Total IPv4 opt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

land-drop

Description Enable automatic packet-capture for Total LAND Attack Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mic-frag-drop

Description Enable automatic packet-capture for Total Micro frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mrx-drop

Description Enable automatic packet-capture for Total MRX Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-ip-payload-drop

Description Enable automatic packet-capture for Total No IP Payload Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

oversize-ip-payload

Description Enable automatic packet-capture for Total Oversize IP PL Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

qdr-drop

Description Enable automatic packet-capture for Total QDR Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-ip-hdr

Description Enable automatic packet-capture for Total Runt IP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

runt-tcpudp-hdr

Description Enable automatic packet-capture for Total Runt TCPUDP hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

siz-drop

Description Enable automatic packet-capture for Total Size Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-chksum

Description Enable automatic packet-capture for Total TCP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-ip-len

Description Enable automatic packet-capture for Total TCP Bad IP Len Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-bad-urg-offet

Description Enable automatic packet-capture for Total TCP bad urg off Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-fin-sin

Description Enable automatic packet-capture for Total TCP SYN&FIN Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-frag-hdr

Description Enable automatic packet-capture for Total TCP frag header Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-flags

Description Enable automatic packet-capture for Total TCP null flags Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-null-scan

Description Enable automatic packet-capture for Total TCP null scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-short-hdr

Description Enable automatic packet-capture for Total TCP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-syn-frag

Description Enable automatic packet-capture for Total TCP SYN frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-flags

Description Enable automatic packet-capture for Total TCP XMAS FLAGS Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp-xmas-scan

Description Enable automatic packet-capture for Total TCP XMAS scan Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

tun-mismatch

Description Enable automatic packet-capture for Total Tun mismatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-chksum

Description Enable automatic packet-capture for Total UDP bad csum Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-bad-ip-len

Description Enable automatic packet-capture for Total UDP bad leng Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-kb-frags

Description Enable automatic packet-capture for Total UDP KB frag Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-port-lb

Description Enable automatic packet-capture for Total UDP port LB Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp-short-hdr

Description Enable automatic packet-capture for Total UDP short hdr Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_aam-authentication-global

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-authentication-global_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-authentication-global/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_aam-authentication-global_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-authentication-global/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_aam-authentication-global_trigger-stats-inc

Specification	
Type	*object*

aflex-authz-fail

Description Enable automatic packet-capture for Total Authorization failure number in aFleX

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authn-failure

Description Enable automatic packet-capture for Total Authentication failure number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authz-failure

Description Enable automatic packet-capture for Total Authorization failure number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connect-failed

Description Enable automatic packet-capture for Total AAM Connect Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-timer-failed

Description Enable automatic packet-capture for Total AAM Timer Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-resolve-failed

Description Enable automatic packet-capture for Total AAM DNS resolve failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

get-socket-option-failed

Description Enable automatic packet-capture for Total AAM Get Socket Option Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

misses

Description Enable automatic packet-capture for Total Authentication Request Missed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

open-socket-failed

Description Enable automatic packet-capture for Total AAM Open Socket Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_aam-authentication-global_trigger-stats-rate

Specification	
Type	*object*

aflex-authz-fail

Description Enable automatic packet-capture for Total Authorization failure number in aFleX

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authn-failure

Description Enable automatic packet-capture for Total Authentication failure number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authz-failure

Description Enable automatic packet-capture for Total Authorization failure number

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

connect-failed

Description Enable automatic packet-capture for Total AAM Connect Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

create-timer-failed

Description Enable automatic packet-capture for Total AAM Timer Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

dns-resolve-failed

Description Enable automatic packet-capture for Total AAM DNS resolve failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

get-socket-option-failed

Description Enable automatic packet-capture for Total AAM Get Socket Option Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

misses

Description Enable automatic packet-capture for Total Authentication Request Missed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

open-socket-failed

Description Enable automatic packet-capture for Total AAM Open Socket Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Specification	
Type	*object*

badpkt_drop

Description Enable automatic packet-capture for Bad Pkt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

incorrect_len_drop

Description Enable automatic packet-capture for Incorrect Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_rx_arp_pkt

Description Enable automatic packet-capture for Invalid ARP PKT Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_sender_mac_arp_drop

Description Enable automatic packet-capture for ARP PKT dropped due to invalid sender MAC

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_defrag_invalid_len

Description Enable automatic packet-capture for IP Invalid Length Frag

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_oversize

Description Enable automatic packet-capture for IP Fragment oversize

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_too_many

Description Enable automatic packet-capture for IP Fragment too many

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_ipip_dropped

Description Enable automatic packet-capture for IP Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overlap

Description Enable automatic packet-capture for IP Fragment Overlap

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overload

Description Enable automatic packet-capture for IP Frag Overload Drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_reasmfails

Description Enable automatic packet-capture for IP Fragment Reasm Fails

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_tcp_dropped

Description Enable automatic packet-capture for IP Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_timeout

Description Enable automatic packet-capture for IP Fragment Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_udp_dropped

Description Enable automatic packet-capture for IP Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4_frag_6rd_drop

Description Enable automatic packet-capture for IPv4 Frag 6RD Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_gre_dropped

Description Enable automatic packet-capture for IPv6 Frag gre Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_ipip_dropped

Description Enable automatic packet-capture for IPv6 Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_tcp_dropped

Description Enable automatic packet-capture for IPv6 Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_udp_dropped

Description Enable automatic packet-capture for IPv6 Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prot_down_drop

Description Enable automatic packet-capture for Prot Down Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ttl_exceeded_drop

Description Enable automatic packet-capture for TTL Exceeded Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown_prot_drop

Description Enable automatic packet-capture for Unknown Prot Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-switch_trigger-stats-rate

Specification	
Type	*object*

badpkt_drop

Description Enable automatic packet-capture for Bad Pkt Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

incorrect_len_drop

Description Enable automatic packet-capture for Incorrect Length Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_rx_arp_pkt

Description Enable automatic packet-capture for Invalid ARP PKT Rcvd

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

invalid_sender_mac_arp_drop

Description Enable automatic packet-capture for ARP PKT dropped due to invalid sender MAC

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_defrag_invalid_len

Description Enable automatic packet-capture for IP Invalid Length Frag

Type: boolean

Default: 0

ip_frag_oversize

Description Enable automatic packet-capture for IP Fragment oversize

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ip_frag_too_many

Description Enable automatic packet-capture for IP Fragment too many

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_ipip_dropped

Description Enable automatic packet-capture for IP Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overlap

Description Enable automatic packet-capture for IP Fragment Overlap

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_overload

Description Enable automatic packet-capture for IP Frag Overload Drops

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_reasmfails

Description Enable automatic packet-capture for IP Fragment Reasm Fails

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_tcp_dropped

Description Enable automatic packet-capture for IP Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_timeout

Description Enable automatic packet-capture for IP Fragment Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipfrag_udp_dropped

Description Enable automatic packet-capture for IP Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv4_frag_6rd_drop

Description Enable automatic packet-capture for IPv4 Frag 6RD Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_gre_dropped

Description Enable automatic packet-capture for IPv6 Frag gre Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_ipip_dropped

Description Enable automatic packet-capture for IPv6 Frag IPIP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_tcp_dropped

Description Enable automatic packet-capture for IPv6 Frag TCP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6frag_udp_dropped

Description Enable automatic packet-capture for IPv6 Frag UDP Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

prot_down_drop

Description Enable automatic packet-capture for Prot Down Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

ttl_exceeded_drop

Description Enable automatic packet-capture for TTL Exceeded Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

unknown_prot_drop

Description Enable automatic packet-capture for Unknown Prot Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_cgnv6-lsn

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Specification	
Type	*object*

adc_port_allocation_failed

Description Enable automatic packet-capture for ADC Port Allocation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_user_quota_exceeded

Description Enable automatic packet-capture for Data Session User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_failure

Description Enable automatic packet-capture for LSN Fullcone Extension Memory Allocate Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_init_faulure

Description Enable automatic packet-capture for LSN Fullcone Extension Initialization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_alloc_single_port_failure

Description Enable automatic packet-capture for H323 ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_filtered

Description Enable automatic packet-capture for Endpoint-Dependent Filtering Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_port_pair_alloc_from_quota_par

Description Enable automatic packet-capture for MGCP ALG Port Pair Allocated From Quota Partition Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

new_user_resource_unavailable

Description Enable automatic packet-capture for New User NAT Resource Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_class_list_match

Description Enable automatic packet-capture for No Class-List Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_inc_overflow

Description Enable automatic packet-capture for Port Overloading Inc Overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_out_of_memory

Description Enable automatic packet-capture for Port Overloading Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_rtp_rtcp_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc RTP/RTCP NAT Ports Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_single_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_quota_inc_failure

Description Enable automatic packet-capture for SIP ALG User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

standby_class_list_drop

Description Enable automatic packet-capture for HA Standby Class-List drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_cgnv6-lsn_trigger-stats-rate

Specification	
Type	*object*

adc_port_allocation_failed

Description Enable automatic packet-capture for ADC Port Allocation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_rate_user_quota_exceeded

Description Enable automatic packet-capture for Conn Rate User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_sesn_user_quota_exceeded

Description Enable automatic packet-capture for Data Session User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

eif_limit_exceeded

Description Enable automatic packet-capture for Endpoint-Independent Filtering Inbound Limit Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

extended_quota_exceeded

Description Enable automatic packet-capture for Extended User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_failure

Description Enable automatic packet-capture for LSN Fullcone Extension Memory Allocate Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_ext_mem_alloc_init_faulure

Description Enable automatic packet-capture for LSN Fullcone Extension Initialization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_failure

Description Enable automatic packet-capture for Full-cone Session Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

fullcone_self_hairpinning_drop

Description Enable automatic packet-capture for Self-Hairpinning Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_alloc_single_port_failure

Description Enable automatic packet-capture for H323 ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

h323_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for H323 ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_batch_type_mismatch

Description Enable automatic packet-capture for HA NAT Pool Batch Type Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ha_nat_pool_unusable

Description Enable automatic packet-capture for HA NAT Pool Unusable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp_user_quota_exceeded

Description Enable automatic packet-capture for ICMP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inbound_filtered

Description Enable automatic packet-capture for Endpoint-Dependent Filtering Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

lid_drop

Description Enable automatic packet-capture for LSN LID Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for MGCP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

mgcp_alg_port_pair_alloc_from_quota_par

Description Enable automatic packet-capture for MGCP ALG Port Pair Allocated From Quota Partition Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

new_user_resource_unavailable

Description Enable automatic packet-capture for New User NAT Resource Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_class_list_match

Description Enable automatic packet-capture for No Class-List Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no_radius_profile_match

Description Enable automatic packet-capture for No RADIUS Profile Match

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_inc_overflow

Description Enable automatic packet-capture for Port Overloading Inc Overflow

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

port_overloading_out_of_memory

Description Enable automatic packet-capture for Port Overloading Out of Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_rtp_rtcp_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc RTP/RTCP NAT Ports Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_alloc_single_port_failure

Description Enable automatic packet-capture for SIP ALG Alloc Single RTP or RTCP NAT Port Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtcp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_rtp_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create RTP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_create_single_fullcone_failure

Description Enable automatic packet-capture for SIP ALG Create Single RTP or RTCP Full-cone Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

sip_alg_quota_inc_failure

Description Enable automatic packet-capture for SIP ALG User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

standby_class_list_drop

Description Enable automatic packet-capture for HA Standby Class-List drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tcp_user_quota_exceeded

Description Enable automatic packet-capture for TCP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

udp_user_quota_exceeded

Description Enable automatic packet-capture for UDP User-Quota Exceeded

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-mssql

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-mssql_trigger-stats-inc*

Default: 0

syncookiescheckfailed

Description Enable automatic packet-capture for TCP SYN cookie failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

syncookiessentfailed

Description Enable automatic packet-capture for TCP SYN cookie snt fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-smtp

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-smtp_trigger-stats-inc*

Specification	
Type	*object*

get_all_headers_fail

Description Enable automatic packet-capture for Get all headers fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

insert_resonse_line_fail

Description Enable automatic packet-capture for Ins response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_extend_fail

Description Enable automatic packet-capture for Line extend fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_table_extend_fail

Description Enable automatic packet-capture for Table extend fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

line_too_long

Description Enable automatic packet-capture for Line too long

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

read_request_line_fail

Description Enable automatic packet-capture for Read request line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

recv_server_unknow_reply_code

Description Enable automatic packet-capture for Recv server unknown-code

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

remove_resonse_line_fail

Description Enable automatic packet-capture for Del response line fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

send_client_service_not_ready

Description Enable automatic packet-capture for Sent client serv-not-rdy

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

snat_fail

Description Enable automatic packet-capture for Source NAT failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

too_many_headers

Description Enable automatic packet-capture for Too many headers

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Default: 0

request-malformed-dropped

Description Enable automatic packet-capture for RADIUS Request Malformed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-no-key-vap-dropped

Description Enable automatic packet-capture for RADIUS Request No Key Attribute Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-not-configured-dropped

Description Enable automatic packet-capture for RADIUS Secret Not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_cgnv6-lsn-radius_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

request-bad-secret-dropped

Description Enable automatic packet-capture for RADIUS Request Bad Secret Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-malformed-dropped

Description Enable automatic packet-capture for RADIUS Request Malformed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-no-key-vap-dropped

Description Enable automatic packet-capture for RADIUS Request No Key Attribute Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-not-configured-dropped

Description Enable automatic packet-capture for RADIUS Secret Not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Type	*object*

err-pkt-drop

Description Enable automatic packet-capture for Total error packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-ring-drop

Description Enable automatic packet-capture for Total IO core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-rx-que-drop

Description Enable automatic packet-capture for Total IO core Rx queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

io-tx-que-drop

Description Enable automatic packet-capture for Total IO core TX queue drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-drop

Description Enable automatic packet-capture for Total packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pkt-lnk-down-drop

Description Enable automatic packet-capture for Total packets link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-align-err

Description Enable automatic packet-capture for Total RX packet align error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-crc-err

Description Enable automatic packet-capture for Total RX packet CRC error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-csum-offload-err

Description Enable automatic packet-capture for Total Rx packet check-sum offload error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-err

Description Enable automatic packet-capture for Total RX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-frame-err

Description Enable automatic packet-capture for Total RX packet frame error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-len-err

Description Enable automatic packet-capture for Total RX packet length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-long-len-err

Description Enable automatic packet-capture for Total RX packet long length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-miss-err

Description Enable automatic packet-capture for Total RX packet miss error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-no-buff-err

Description Enable automatic packet-capture for Total RX packet no buffer error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-over-err

Description Enable automatic packet-capture for Total RX packet over error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rx-short-len-err

Description Enable automatic packet-capture for Total RX packet short length error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-abort-err

Description Enable automatic packet-capture for Total TX packet abort error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-carrier-err

Description Enable automatic packet-capture for Total TX packert carrier error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-drop

Description Enable automatic packet-capture for Total TX packet drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-err

Description Enable automatic packet-capture for Total TX packet error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-fifo-err

Description Enable automatic packet-capture for Total TX packet fifo error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-hbeat-err

Description Enable automatic packet-capture for Total TX packet HBEAT error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tx-windows-err

Description Enable automatic packet-capture for Total TX windows error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

w-link-down-drop

Description Enable automatic packet-capture for Total worker core link down drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

w-ring-drop

Description Enable automatic packet-capture for Total worker core ring drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Description Enable automatic packet-capture for OCSP cache status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_revoked

Description Enable automatic packet-capture for Certificate chain status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_unknown

Description Enable automatic packet-capture for Certificate chain status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_connection_error

Description Enable automatic packet-capture for OCSP connection error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_other_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_no_nonce

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_nonce_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_revoked

Description Enable automatic packet-capture for OCSP response status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_unknown

Description Enable automatic packet-capture for OCSP response status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_https

Description Enable automatic packet-capture for Log OCSP URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_not_found

Description Enable automatic packet-capture for OCSP URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_unsupported

Description Enable automatic packet-capture for OCSP URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-ssl-cert-revoke_trigger-stats-rate

Specification	
Type	*object*

crl_cache_status_revoked

Description Enable automatic packet-capture for CRL cache status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_connection_error

Description Enable automatic packet-capture for CRL connection errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_other_error

Description Enable automatic packet-capture for CRL other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_response_status_revoked

Description Enable automatic packet-capture for CRL response status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_response_status_unknown

Description Enable automatic packet-capture for CRL response status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_https

Description Enable automatic packet-capture for CRL URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_not_found

Description Enable automatic packet-capture for CRL URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

crl_uri_unsupported

Description Enable automatic packet-capture for CRL URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

ocsp_cache_miss

Description Enable automatic packet-capture for OCSP cache miss

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_cache_status_revoked

Description Enable automatic packet-capture for OCSP cache status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_revoked

Description Enable automatic packet-capture for Certificate chain status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_chain_status_unknown

Description Enable automatic packet-capture for Certificate chain status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_connection_error

Description Enable automatic packet-capture for OCSP connection error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_other_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_no_nonce

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_nonce_error

Description Enable automatic packet-capture for Log OCSP other errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_revoked

Description Enable automatic packet-capture for OCSP response status revoked

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_response_status_unknown

Description Enable automatic packet-capture for OCSP response status unknown

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_https

Description Enable automatic packet-capture for Log OCSP URI https

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_not_found

Description Enable automatic packet-capture for OCSP URI not found

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ocsp_uri_unsupported

Description Enable automatic packet-capture for OCSP URI unsupported

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_system-radius-server

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_system-radius-server_trigger-stats-inc*

Specification	
Type	*object*

ha-standby-dropped

Description Enable automatic packet-capture for HA Standby Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ipv6-prefix-length-mismatch

Description Enable automatic packet-capture for Framed IPV6 Prefix Length Mismatch

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

radius-request-dropped

Description Enable automatic packet-capture for RADIUS Request Dropped (Malformed Packet)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-bad-secret-dropped

Description Enable automatic packet-capture for RADIUS Request Bad Secret Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-ignored

Description Enable automatic packet-capture for RADIUS Request Ignored

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-malformed-dropped

Description Enable automatic packet-capture for RADIUS Request Malformed Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-no-key-vap-dropped

Description Enable automatic packet-capture for RADIUS Request No Key Attribute Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

secret-not-configured-dropped

Description Enable automatic packet-capture for RADIUS Secret Not Configured Dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Default: 0

nat_port_unavailable_icmp

Description Enable automatic packet-capture for ICMP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_tcp

Description Enable automatic packet-capture for TCP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

nat_port_unavailable_udp

Description Enable automatic packet-capture for UDP NAT Port Unavailable

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

user_quota_failure

Description Enable automatic packet-capture for User-Quota Creation Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

user_quota_unusable_drop

Description Enable automatic packet-capture for User-Quota Unusable Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-rc-cache

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-rc-cache_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-rc-cache/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *template-list_trigger-sys-obj-stats-change_slb-rc-cache_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/slb-rc-cache/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-rc-cache_trigger-stats-inc

Specification	
Type	*object*

entry_create_failures

Description Enable automatic packet-capture for Entry Create failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rv_failure

Description Enable automatic packet-capture for Revalidation Failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-change_slb-rc-cache_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

entry_create_failures

Description Enable automatic packet-capture for Entry Create failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

rv_failure

Description Enable automatic packet-capture for Revalidation Failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Specification	
Type	*object*

alloc_fail_total

Description Enable automatic packet-capture for Alloc Fail - Total

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

buff_alloc_error

Description Enable automatic packet-capture for Buff alloc error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_control_frame

Description Enable automatic packet-capture for Cant allocate control frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_goaway_frame

Description Enable automatic packet-capture for Cant allocate GOAWAY frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_ping_frame

Description Enable automatic packet-capture for Cant allocate PING frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_rst_frame

Description Enable automatic packet-capture for Cant allocate RST_STREAM frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_settings_frame

Description Enable automatic packet-capture for Cant allocate SETTINGS frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_stream

Description Enable automatic packet-capture for Cant allocate stream

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

cant_allocate_window_frame

Description Enable automatic packet-capture for Cant allocate WINDOW_UPDATE frame

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

data_queue_alloc_error

Description Enable automatic packet-capture for Data Queue Alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

deflate_alloc_fail

Description Enable automatic packet-capture for deflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

inflate_alloc_fail

Description Enable automatic packet-capture for inflate alloc fail

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

proxy_alloc_error

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Description Enable automatic packet-capture for HTTP2 Proxy alloc Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

template-list_trigger-sys-obj-stats-severity

Specification	
Type	*object*

drop-counter

Description Enable packet capture on all drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-alert

Description Enable packet capture on all alert drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-critical

Description Enable packet capture on all critical drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-out-of-res

Description Enable packet capture on all out of resource drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-policy

Description Enable packet capture on all policy drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-counter-warning

Description Enable packet capture on all warning drop counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter

Description Enable packet capture on all error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-alert

Description Enable packet capture on all alert error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-critical

Description Enable packet capture on all critical error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-out-of-res

Description Enable packet capture on all out of resource error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

error-counter-warning

Description Enable packet capture on all warning error counters (Default disabled)

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

2.115.38 visibility packet-capture global-templates activate

Activate global packet capture template

activate Specification

Type	*Configuration Resource*
Element Name	activate
Element URI	/axapi/v3/visibility/packet-capture/global-templates/activate
Element Attributes	activate_attributes
Schema	`activate schema`

Operations Allowed:

Create Object

POST

trigger-sys-obj-stats-change_cgnv6-icmp_trigger-stats-inc

Specification	
Type	*object*

46-known-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMP Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-no-prefix-for-ipv4

Description Enable automatic packet-capture for NAT64 Reverse No Prefix Match for IPv4

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

46-unknown-drop

Description Enable automatic packet-capture for NAT64 Reverse Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-known-drop

Description Enable automatic packet-capture for NAT64 Forward Known ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-midpoint-hop

Description Enable automatic packet-capture for NAT64 Forward Unknown Source Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

64-unknown-drop

Description Enable automatic packet-capture for NAT64 Forward Unknown ICMPv6 Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMP Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-port-info

Description Enable automatic packet-capture for ICMP Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-no-session-drop

Description Enable automatic packet-capture for ICMP No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp

Description Enable automatic packet-capture for ICMP to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp-err

Description Enable automatic packet-capture for ICMP to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6-err

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-unknown-type

Description Enable automatic packet-capture for ICMP Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMPv6 Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-port-info

Description Enable automatic packet-capture for ICMPv6 Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-session-drop

Description Enable automatic packet-capture for ICMPv6 No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp-err

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6-err

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-unknown-type

Description Enable automatic packet-capture for ICMPv6 Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

icmp-to-icmp

Description Enable automatic packet-capture for ICMP to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmp-err

Description Enable automatic packet-capture for ICMP to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-to-icmpv6-err

Description Enable automatic packet-capture for ICMP to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmp-unknown-type

Description Enable automatic packet-capture for ICMP Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-bad-type

Description Enable automatic packet-capture for Bad Embedded ICMPv6 Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-port-info

Description Enable automatic packet-capture for ICMPv6 Port Info Not Included

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-no-session-drop

Description Enable automatic packet-capture for ICMPv6 No Matching Session Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmp-err

Description Enable automatic packet-capture for ICMPv6 to ICMP Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-to-icmpv6-err

Description Enable automatic packet-capture for ICMPv6 to ICMPv6 Conversion Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

icmpv6-unknown-type

Description Enable automatic packet-capture for ICMPv6 Unknown Type

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-qdr-full-drop

Description Enable automatic packet-capture for hardware forward flow qdr full drop count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-seq-mismatch

Description Enable automatic packet-capture for hardware forward sequence mismatch errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-singlebit-errors

Description Enable automatic packet-capture for hardware forward singlebit Errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-tag-mismatch

Description Enable automatic packet-capture for hardware forward tag mismatch errors

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-tx-full-drop

Description Enable automatic packet-capture for hardware forward flow tx full drop count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-unalign-count

Description Enable automatic packet-capture for hardware forward flow unalign count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-flow-underflow-count

Description Enable automatic packet-capture for hardware forward flow underflow count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-invalidation-drop

Description Enable automatic packet-capture for hardware forward invalid drop count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-phyport-mismatch-drop

Description Enable automatic packet-capture for hardware forward phyport mismatch count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-protocol-mismatch-drop

Description Enable automatic packet-capture for hardware forward protocol mismatch count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-vlanid-mismatch-drop

Description Enable automatic packet-capture for hardware forward vlanid mismatch count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

hw-fwd-vmid-drop

Description Enable automatic packet-capture for hardware forward vmid mismatch count

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_slb-mqtt

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_slb-mqtt_trigger-stats-inc*

trigger-sys-obj-stats-change_slb-mqtt_trigger-stats-inc

Specification	
Type	*object*

client_id_null

Description Enable automatic packet-capture for Null client id

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

conn_null

Description Enable automatic packet-capture for Null conn

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

insertion_failed

Description Enable automatic packet-capture for Insertion failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_connect_fail

Description Enable automatic packet-capture for Parse connect failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_publish_fail

Description Enable automatic packet-capture for Parse publish failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_subscribe_fail

Description Enable automatic packet-capture for Parse subscribe failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

parse_unsubscribe_fail

Description Enable automatic packet-capture for Parse unsubscribe failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

session_exist

Description Enable automatic packet-capture for Session already exist

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tuple_already_linked

Description Enable automatic packet-capture for tuple-already-linked failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

tuple_not_linked

Description Enable automatic packet-capture for tuple-not-linked failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_fw-gtp_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-gtp/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_fw-gtp_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-gtp/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_fw-gtp_trigger-stats-inc

Specification	
Type	*object*

drop-gtp-bearer-not-found-in-resp

Description Enable automatic packet-capture for GTP Bearer not found in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-frag-or-jumbo-pkt

Description Enable automatic packet-capture for GTP Fragmented or JUMBO packet Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-missing-cond-ie-bearer-ctx

Description Enable automatic packet-capture for Missing conditional IE in bearer context Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTP Echo IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-out-of-state-

Description Enable automatic packet-capture for GTP Echo Out of State Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-c-handover-request-out-of-state-dro

Description Enable automatic packet-capture for GTP-C Handover Request Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-entry-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-smp-create-failure

Description Enable automatic packet-capture for GTP Rate Limit SMP Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-t3-ctr-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Dynamic Counters Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rr-message-drop

Description Enable automatic packet-capture for GTP Message Dropped in RR Mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-tunnel-rate-limit-entry-create-fail

Description Enable automatic packet-capture for GTP Tunnel Level Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-out-of-state-drop

Description Enable automatic packet-capture for GTP-U Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-nsapi-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv1-C NSAPI Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-res

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-fwd-route

Description Enable automatic packet-capture for No Forward Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-rev-route

Description Enable automatic packet-capture for No Reverse Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-session-memory

Description Enable automatic packet-capture for Out of Tunnel Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_fw-gtp_trigger-stats-rate

Specification	
Type	*object*

drop-gtp-bearer-not-found-in-resp

Description Enable automatic packet-capture for GTP Bearer not found in response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-frag-or-jumbo-pkt

Description Enable automatic packet-capture for GTP Fragmented or JUMBO packet Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-gtp-missing-cond-ie-bearer-ctx

Description Enable automatic packet-capture for Missing conditional IE in bearer context Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-ie-len-exceed-msg-len

Description Enable automatic packet-capture for GTP Echo IE Length Exceeds Message Length

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

drop-vld-gtp-echo-out-of-state-

Description Enable automatic packet-capture for GTP Echo Out of State Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

gtp-c-handover-request-out-of-state-dro

Description Enable automatic packet-capture for GTP-C Handover Request Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-entry-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-smp-create-failure

Description Enable automatic packet-capture for GTP Rate Limit SMP Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rate-limit-t3-ctr-create-failure

Description Enable automatic packet-capture for GTP Rate Limit Dynamic Counters Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-rr-message-drop

Description Enable automatic packet-capture for GTP Message Dropped in RR Mode

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-tunnel-rate-limit-entry-create-fail

Description Enable automatic packet-capture for GTP Tunnel Level Rate Limit Entry Create Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-u-out-of-state-drop

Description Enable automatic packet-capture for GTP-U Out of state Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v1-c-nsapi-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv1-C NSAPI Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-req

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

gtp-v2-c-bearer-not-found-in-delete-res

Description Enable automatic packet-capture for GTPv2-C Bearer Not Found in GTP Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-fwd-route

Description Enable automatic packet-capture for No Forward Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

no-rev-route

Description Enable automatic packet-capture for No Reverse Route

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

out-of-session-memory

Description Enable automatic packet-capture for Out of Tunnel Memory

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

so_pkts_dest_mac_mistmatch_drop

Description Enable automatic packet-capture for Destination MAC Mistmatch Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_dropped

Description Enable automatic packet-capture for Total packets dropped

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_dest_mac_zero_drop

Description Enable automatic packet-capture for Destination MAC Address zero Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_interface_not_up

Description Enable automatic packet-capture for L2redirect Intf is not UP

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l2redirect_invalid_redirect_inf

Description Enable automatic packet-capture for Redirect Table Error due to invalid redirect info

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_chassis_dest_mac_er

Description Enable automatic packet-capture for L3 Redirect RX multi-slot Destination MAC Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_non_ipv4_vxla

Description Enable automatic packet-capture for L3 Redirect received non ipv4 VXLAN packet

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_rx_encap_para

Description Enable automatic packet-capture for L3 Redirect decap Rx encap params error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_decap_vlan_sanity_d

Description Enable automatic packet-capture for L3 Redirect Decap VLAN Sanity Drop during receipt

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_error_drop

Description Enable automatic packet-capture for L3 Redirect encap error drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_ipv4_jumbo_fr

Description Enable automatic packet-capture for L3 Redirect ipv4 packet after encap more than max jumbo size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_encap_ipv6_jumbo_fr

Description Enable automatic packet-capture for L3 Redirect tx ipv6 packet after encap more than max jumbo size

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_fragmentation_error

Description Enable automatic packet-capture for L3 redirect encap Fragmentation error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_inner_mac_zero_drop

Description Enable automatic packet-capture for L3 Redirect inner mac zero drop during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_invalid_dev_dir

Description Enable automatic packet-capture for L3 Redirect Invalid Device direction during transmission

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_rcvd_in_l2_mode_dro

Description Enable automatic packet-capture for Recevied l3 redirect packets in L2 mode Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_error

Description Enable automatic packet-capture for L3 Redirect Table error Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_table_no_entry_foun

Description Enable automatic packet-capture for L3 redirect Table no redirect entry found error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_l3_redirect_too_large_pkts_in_d

Description Enable automatic packet-capture for Received L3 Redirected fragmented packets too large

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_scaleout_not_active_drop

Description Enable automatic packet-capture for Scaleout Not Active Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_release_fail

Description Enable automatic packet-capture for Total SLB NAT release failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_slb_nat_reserve_fail

Description Enable automatic packet-capture for Total SLB NAT reserve failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

so_pkts_traffic_map_not_found_drop

Description Enable automatic packet-capture for Traffic MAP Not Found Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

Description Enable automatic packet-capture for Total Kerberos Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-timeout-error

Description Enable automatic packet-capture for Total Kerberos Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-job-start-error

Description Enable automatic packet-capture for Total NTLM Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-polling-control-error

Description Enable automatic packet-capture for Total NTLM Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-prepare-req-failed

Description Enable automatic packet-capture for Total NTLM Prepare Request Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-proto-negotiation-failure

Description Enable automatic packet-capture for Total NTLM Protocol Negotiation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-request-dropped

Description Enable automatic packet-capture for Total NTLM Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-response-error

Description Enable automatic packet-capture for Total NTLM Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-response-timeout

Description Enable automatic packet-capture for Total NTLM Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-session-setup-failed

Description Enable automatic packet-capture for Total NTLM Session Setup Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-timeout-error

Description Enable automatic packet-capture for Total NTLM Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_aam-auth-server-win_trigger-stats-rate

Specification	
Type	*object*

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

kerberos-job-start-error

Description Enable automatic packet-capture for Total Kerberos Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-polling-control-error

Description Enable automatic packet-capture for Total Kerberos Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-pw-expiry

Description Enable automatic packet-capture for Total Kerberos password expiry

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-request-dropped

Description Enable automatic packet-capture for Total Kerberos Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-response-error

Description Enable automatic packet-capture for Total Kerberos Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-response-timeout

Description Enable automatic packet-capture for Total Kerberos Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

kerberos-timeout-error

Description Enable automatic packet-capture for Total Kerberos Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-job-start-error

Description Enable automatic packet-capture for Total NTLM Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-polling-control-error

Description Enable automatic packet-capture for Total NTLM Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-prepare-req-failed

Description Enable automatic packet-capture for Total NTLM Prepare Request Failed

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-proto-negotiation-failure

Description Enable automatic packet-capture for Total NTLM Protocol Negotiation Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-request-dropped

Description Enable automatic packet-capture for Total NTLM Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-response-error

Description Enable automatic packet-capture for Total NTLM Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-response-timeout

Description Enable automatic packet-capture for Total NTLM Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-session-setup-failed

Description Enable automatic packet-capture for Total NTLM Session Setup Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ntlm-timeout-error

Description Enable automatic packet-capture for Total NTLM Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_aam-auth-server-ldap

Specification	
Type	*object*

dummy

Description dummy to make intermediate obj to single

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

trigger-stats-inc

Description: trigger-stats-inc is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_aam-auth-server-ldap_trigger-stats-inc*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-ldap/trigger-stats-inc*

trigger-stats-rate

Description: trigger-stats-rate is a **JSON Block**. Please see below for *trigger-sys-obj-stats-change_aam-auth-server-ldap_trigger-stats-rate*

Type: Object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/aam-auth-server-ldap/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_aam-auth-server-ldap_trigger-stats-inc

Specification	
Type	*object*

admin-bind-failure

Description Enable automatic packet-capture for Total Admin Bind Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authorize-failure

Description Enable automatic packet-capture for Total Authorization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bind-failure

Description Enable automatic packet-capture for Total User Bind Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

job-start-error

Description Enable automatic packet-capture for Total Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

polling-control-error

Description Enable automatic packet-capture for Total Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pw-change-failure

Description Enable automatic packet-capture for Total password change failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-dropped

Description Enable automatic packet-capture for Total Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-error

Description Enable automatic packet-capture for Total Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-timeout

Description Enable automatic packet-capture for Total Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

search-failure

Description Enable automatic packet-capture for Total Search Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-failure

Description Enable automatic packet-capture for TLS/SSL Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

timeout-error

Description Enable automatic packet-capture for Total Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_aam-auth-server-ldap_trigger-stats-rate

Specification	
Type	*object*

admin-bind-failure

Description Enable automatic packet-capture for Total Admin Bind Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

authorize-failure

Description Enable automatic packet-capture for Total Authorization Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

bind-failure

Description Enable automatic packet-capture for Total User Bind Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

duration

Description Time in seconds to look for the anomaly, default is 60

Type: number

Range: 1-250

Default: 60

job-start-error

Description Enable automatic packet-capture for Total Job Start Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

polling-control-error

Description Enable automatic packet-capture for Total Polling Control Error

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

pw-change-failure

Description Enable automatic packet-capture for Total password change failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

request-dropped

Description Enable automatic packet-capture for Total Dropped Request

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-error

Description Enable automatic packet-capture for Total Error Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

response-timeout

Description Enable automatic packet-capture for Total Timeout Response

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

search-failure

Description Enable automatic packet-capture for Total Search Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ssl-session-failure

Description Enable automatic packet-capture for TLS/SSL Session Failure

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

threshold-exceeded-by

Description The threshold percentage over which to caputre the packets for this counter, default is 5

Type: number

Range: 0-100

Default: 5

timeout-error

Description Enable automatic packet-capture for Total Timeout

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Refernce Object: */axapi/v3/visibility/packet-capture/global-templates/template/{name}/trigger-sys-obj-stats-change/fw-ddos-protection/trigger-stats-rate*

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters

trigger-sys-obj-stats-change_fw-ddos-protection_trigger-stats-inc

Specification	
Type	*object*

ddos_entries_too_many

Description Enable automatic packet-capture for Too many DDOS entries

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ddos_entry_add_to_bgp_failure

Description Enable automatic packet-capture for DDoS Entry BGP add failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ddos_entry_remove_from_bgp_failure

Description Enable automatic packet-capture for DDOS entry BGP remove failures

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

ddos_packet_dropped

Description Enable automatic packet-capture for DDOS Packet Drop

Type: boolean

Supported Values: true, false, 1, 0

Default: 0

uuid

Description uuid of the object

Type: string

Maximum Length: 64 characters

Maximum Length: 1 characters
